

ANNUAL REPORT

OF THE

SECRETARY OF INTERNAL AFFAIRS

OF THE

COMMONWEALTH OF PENNSYLVANIA,

FOR THE

YEAR ENDING JUNE 30, 1900.

PART IV.

Railroad, Canal, Navigation, Telegraph and Telephone Companies.

WM. STANLEY RAY,
STATE PRINTER OF PENNSYLVANIA.
1900.

SECRET

98 97 5

ANNUAL REPORT
OF THE
Secretary of Internal Affairs.

PART IV.

RAILROAD, CANAL, NAVIGATION, TELEGRAPH AND TELEPHONE COMPANIES

FOR THE YEAR ENDING JUNE 30, 1900.

COMMUNICATION.

Department of Internal Affairs,
Harrisburg, December 1, 1900.

To His Excellency, William A. Stone,

Governor of the Commonwealth of Pennsylvania:

Sir: In compliance with the requirements of the Constitution, and the acts of the General Assembly approved, respectively, April 9, 1870, May 15, 1874, June 4, 1883, May 13, 1889, and April 19, 1897, I have the honor to present to you herewith, for transmission to the General Assembly a report of this Department, Part IV, covering the affairs of Railroad, Canal, Navigation, Telegraph and Telephone Companies for the year ending June 30, 1900.

I am very respectfully,

Your obedient servant,

JAMES W. LATTA,
Secretary of Internal Affairs.

BUREAU OF RAILWAYS.

Department of Internal Affairs.

LETTER OF TRANSMITTAL.

Harrisburg, December 1, 1900.

Hon. James W. Latta, Secretary of Internal Affairs of the Commonwealth of Pennsylvania:

Sir: I have the honor to present herewith the report of the Railway Bureau for the year ending June 30, 1900, for transmission to the General Assembly, as required by law.

Very truly yours,

ISAAC B. BROWN,
Superintendent Bureau of Railways.

Tow Path and Canal seven miles west of Harrisburg, Pa.

REPORT.

There were 977 corporations from which reports were due for the year ending June 30, 1900. The names of quite a number of corporations have been stricken from the list for diverse reasons. In some cases there have been mergers and consolidations, and in other cases some of the corporations have practically gone out of existence by abandonment of the enterprise contemplated at the time of organization. This has taken place where charters have been taken out for the purpose of constructing lines, and before the lines were constructed the interests were purchased or absorbed by other corporations. The number of companies reporting for the year are classified as follows: 443 steam railway corporations, 400 street or passenger railway corporations, 130 telegraph and telephone corporations and 4 canal corporations.

It is not to be expected that this great number of corporations will all make their reports and file them here without showing some negligence. There have been many delays, necessitating a large amount of correspondence, the expenditure of no inconsiderable amount in the way of telegraph and telephone bills, and in the employment of specials to represent this office in searching out the officers of delinquent corporations. However much difficulty has been encountered in securing reports from these corporations for the fiscal year just closed, it is a fact that these common carriers are being pretty thoroughly disciplined with reference to their duty, under existing laws.

It is but a few years ago that the manuscript for the annual report was sent to the printer with a large number of corporations delinquent. These delays made it necessary to secure the passage of a law which subjects delinquent corporations to a heavy penalty for failure or refusal to make reports within the prescribed time.

The certifying of delinquents to the Attorney General for the collection of penalties has had a most desirable result, for it has

(v)

enabled the office to secure a prompt compliance with the law in most cases, and has saved the Commonwealth from the expenditure of no small amount of money. In making these observations, however, it is remembered that the prescribed forms on which steam railway corporations make their reports involve the employment of a large clerical force, and the expenditure of a great deal of time and energy in the compilation and arrangement of data to be given to the State.

The disposition exhibited by nearly all the greater corporations of the State is, therefore, most commendable, for with the most of these there is but little difficulty encountered in securing a strict compliance with the law in the filing of reports, and no hesitancy is shown to give the data called for in all the details required.

Upon an examination of these reports it will be seen that the utmost care must be shown by the controlling and auditing departments to enable the officers to give the desired data. Every steam railway, for instance, is required to give the train mileage and the entire number of passengers carried during the year, and this must then be reduced to a mileage basis to show the number of persons carried one mile. They must also show the average distance each passenger is carried. So, too, in the figures which show the transportation of commodities, not only must the number of tons of freight be given, but the mileage of freight trains, the total number of tons of freight carried, the number of tons carried one mile, the average distance of each ton of freight carried, the receipts per ton per mile, and the cost of carrying the same per ton per mile.

Then, too, there must be a classification of freights to show the transportation of commodities that originate on the farm, in the forests, in the factories and in the mines, and also many subdivisions of these classifications. This reference is sufficient to indicate the prodigious amount of work involved in arranging information relating to operations of a railway company during the year so that the controlling or auditing department is enabled to make correct reports to this Bureau. The willingness to discharge the duties imposed by law upon the officers of these corporations reflects much credit upon railway officials.

THE OPERATIONS OF COMMON CARRIERS EXHIBIT THE TRUE CONDITION OF COMMERCIAL INTERESTS.

The fiscal year covered by this report closes with the most fortunate conditions surrounding the great railway interests reporting to this office, and gives promise of a greater realization in returns from investments in railway securities than has existed heretofore for years.

The steam railways covered by this report show a capitalization including stock, bonds and current liabilities of \$2,965,077,932, with assets of \$3,067,955,557. These companies have 25,885 miles of road; own 11,747 locomotives, 10,709 passenger cars, and 512,048 freight cars.

On these roads there are employed 307,737 persons, to whom there was paid during the year \$176,762,468 as compensation for services.

The trains of these corporations have traversed 257,777,050 miles and carried 205,939,884 passengers and 578,995,338 tons of freight.

Their passenger earnings amount to \$109,757,426, and their freight earnings to \$331,013,955, which together with other earnings, makes a grand total of \$498,012,493. The operations of these steam railroads involve an expenditure, exclusive of dividends, of \$428,837,899, and result in the payment to the stockholders of dividends amounting to \$37,823,306.

These figures are a brief epitome of steam railway operations for the year covered by this report and are an index of the immensity of the interests of those railways whose lines are in whole or in part in Pennsylvania.

The results of these railway operations present the most telling testimony of the prosperous conditions existing among our commercial interests. There is no truer presentation of the commercial conditions of our country than those figures which exhibit the traffic of the railways, for a reduction of tonnage, or a decrease in the number of passengers carried, means the impairment of commercial operations.

In general, the railway sequestrator is only able to ply his vocation when business stagnation affects the commercial world, and he disappears on the approach of prosperity. Consequently,

with the prosperous conditions that do now exist in railway operations there are few railroads in the hands of sequestrators, while every other great material interest is also found to be prosperous.

There have been nearly 50,000,000 tons of freight carried upon our railways, the products of agriculture and agricultural pursuits, and this tells the story of bountiful harvests, of the absence of want and the presence of plenty in the farmer's household.

Nearly 400,000,000 tons of products of mines conveyed to market upon the railways present assurance of profits to the mining operators and remunerative wages to those who handle the pick and the shovel in the coal and iron mines of the Commonwealth.

Twenty-five million tons of freight from the forests not only tell the story of how rapidly the native forests are disappearing, but with equal force exhibits the profits to the lumberman and show that substantial wages have been paid to his employes.

Seventy-six million tons of freight, the output of factories, carry conviction as to the success of manufacturing operations and show how substantial and remunerative has been the employment of the machinist, the mechanic and the artisan, as well as of the common laborer.

Thirty-four million tons of merchandise and miscellaneous shipments show how busy the merchant has been behind his counter and the ability of the people to buy and pay for the necessities and luxuries of life.

STEAM RAILWAY REPORTS.

LIABILITIES.

In considering the liabilities of steam railways, it is understood that these liabilities are classified as follows:

1. Total amount of stock outstanding.
2. Total amount of funded debt.
3. Total amount of other forms of indebtedness including current liabilities.

This classification arranged in tabular form presents at once the liabilities of each corporation reporting to this office, and when considered in connection with consolidated table C enables one to quite readily determine the financial status of each of the corporations whose liabilities and assets are exhibited in these tables.

Amount of Stock Outstanding.

The total amount of stock outstanding of these several steam railway corporations is \$1,357,441,338. Of this amount, the Baltimore and Ohio have \$104,357,168; the Erie \$171,240,200; the New York Central and Hudson River \$115,000,000; the Pennsylvania \$151,522,870; or a total of these four companies of \$542,120,238, embracing over 40 per cent. of the entire capital stock of the 306 railroad companies whose lines are in operation and whose capital stock appears in the first column of table B. There are but two other corporations whose capital stock amounts to \$50,000,000. These are the Lake Shore and Michigan Southern, \$50,000,000, and the New York Ontario and Western, \$58,118,983.

If there were to be added to the capital stock of the four companies named the capital stock of the roads that are subsidiary to these, as for instance, to combine the capitalization of the Pennsylvania Railroad Company with the Pennsylvania Company and the Pittsburg, Cincinnati, Chicago and St. Louis, which are practically a part of the Pennsylvania system, it would be found that these four railroad corporations have more than 50 per cent. of the combined capital stock of the 306 railroads included in this list.

Amount of Funded Debt Outstanding.

The total amount of funded debt outstanding of those railroad companies whose lines are constructed or in operation is \$1,308,360,220. The corporations whose indebtedness exceeds \$100,000,000 are the Baltimore and Ohio, \$186,807,830; the Erie, \$134,044,436; the New York, Central and Hudson River, \$185,751,021, making a total of \$506,603,287, over 38 per cent. of the entire funded indebtedness of all these corporations.

It will be seen on examination that while the Pennsylvania has capital stock outstanding of something over \$150,000,000, it has considerably less than \$100,000,000 of funded indebtedness. It will also be observed that in the case of the Baltimore and Ohio Railroad and the New York Central and Hudson River, the funded indebtedness of each of these corporations is something above the amount of capital stock outstanding. The only corporations having a funded indebtedness of more than \$50,000,000 besides the three above named as having over \$100,000,000 are, the Pennsylvania, \$83,566,840; the Philadelphia and Reading, \$67,683,952, and the Pittsburg, Cincinnati, Chicago and St. Louis, \$50,282,694.

Other Forms of Indebtedness Including Current Liabilities.

The total amount of other indebtedness, including current liabilities is \$299,276,374. Of this amount, the Baltimore and Ohio has \$28,380,821; the Erie \$6,978,437; the Lake Shore and Michigan Southern \$6,193,910; the Lehigh Valley \$12,914,810; the New York Central and Hudson River \$26,306,943; the Philadelphia and Reading \$8,815,025; the Pittsburg and Connellsville \$17,596,133; the Pittsburg and Western \$6,432,615; the Western Maryland \$6,506,208; these being the only corporations whose unfunded indebtedness amounts to over \$6,000,000.

Total Railway Capital.

The total railway capital, which includes stock outstanding, funded and unfunded indebtedness, amounts to \$2,965,077,932. Of this amount the Baltimore and Ohio has \$319,545,819; the Erie \$312,263,073; the Lake Shore and Michigan Southern \$104,881,910; the New York Central and Hudson River \$327,057,964; the Pennsylvania \$316,579,732. These five companies, each of which has liabilities exceeding \$100,000,000, have combined liabilities amounting to \$1,380,328,498, or over 46 per cent. of the total liabilities of the companies appearing in consolidated table B.

ASSETS.

The assets of steam railway corporations are classified as follows:

1. Total cost of roads owned.
2. Total cost of equipment.
3. Stocks and bonds owned.
4. Cash and current assets.
5. Other assets.
6. Total assets.

Total Cost of Roads Owned.

The reports for the fiscal year show a total cost of roads of \$1,968,330,588. Of this amount the Baltimore and Ohio has \$228,993,859; the Erie, \$272,390,138; the New York Central and Hudson River, \$136,592,686. No other corporations report a cost of road exceeding \$100,000,000.

Cost of Equipment.

The corporations reporting a cost of equipment exceeding \$25,000,000 are as follows: The Baltimore and Ohio, \$28,085,476, the New York Central and Hudson River, \$43,666,127, and the Pennsylvania \$42,073,823. The total cost of equipment for all the roads reporting is \$258,760,695.

Stocks and Bonds and Owned.

Under existing laws railway corporations are permitted to own the stock and bonds of other corporations. The total amount reported as so owned is \$501,201,108. Of this amount the Baltimore and Ohio owns \$15,242,766; the Central Railroad Company of New Jersey \$27,762,008; the Erie \$27,208,533; the Lake Shore and Michigan Southern \$19,614,362; the Lehigh Valley \$36,591,911; the New York Central and Hudson River \$127,536,448; the Pennsylvania \$160,410,735; the Pennsylvania Company \$43,651,601; making a total for these eight companies of \$458,018,364, or over 91 per cent. of the entire amount of stocks and bonds owned. These figures convey substantial proof of the rapidity with which railway interests have been merged and consolidated of late years.

Cash and Current Assets.

The total amount of cash and current assets in the hands of steam railway corporations at the close of the fiscal year covered by this report was \$149,315,869, of which the Baltimore and Ohio has \$15,325,062 and the Pennsylvania \$36,933,895.

Other Assets.

The Baltimore and Ohio reports an ownership of other assets amounting to \$32,532,395; the Central Railroad Company of New Jersey, \$6,829,234; the Lake Shore and Michigan Southern, \$7,113,972; the Lehigh Valley \$15,269,574; the New York Central and Hudson River, \$20,248,991; the Pennsylvania \$24,180,346; the Pennsylvania Company, \$10,597,576; the Philadelphia and Reading, \$14,355,112; the Pittsburg, Cincinnati, Chicago and St. Louis \$6,395,669, and the Pittsburg, Fort Wayne and Chicago, \$12,589,150. The total amount of other assets of all companies is \$190,347,297. It will, therefore, be seen that under the classification of "other assets," the companies above named own a very considerable amount.

Total Assets.

The total assets of all these corporations amount to \$3,067,955,557. Of this large amount, the companies owning above \$300,000,000

are, the Baltimore and Ohio, \$320,179,558; the Erie, \$315,717,946; the New York Central and Hudson River, \$338,812,854; the Pennsylvania, \$341,019,794.

MILEAGE.

Last year the total mileage reported by the steam railways then on our list was 22,737.97. The amount of this mileage reported to be entirely within the limits of Pennsylvania was 10,308.95.

The figures this year are greatly augmented by the introduction of the mileage of the New York Central and Hudson River, which has not been previously embraced within our totals except so far as its lines were within the limits of the State.

The mileage reported for this year was 25,885.53, and within the limits of Pennsylvania 10,576.52.

A classification of this mileage is made with reference to that represented by the capital stock of each company, lines operated under lease, lines operated under contract, lines operated under trackage rights, total mileage operated, total number of miles operated in Pennsylvania, new lines constructed during the year entirely within the State, and aggregate length of all tracks.

The aggregate length of all tracks as appears in the reports for this year is 48,016.23 miles.

The Baltimore and Ohio own or operate 2,259.71 miles; the Buffalo, Rochester and Pittsburg 472.08; the Central Railroad of New Jersey 695.78; the Delaware, Lackawanna and Western 798.18; the Erie 1,839.88, of which 434.91 miles are in Pennsylvania; the Lake Shore and Michigan Southern 1,412.78, of which 102.49 miles are in Pennsylvania; the New York Central and Hudson River 2,951.62, of which 354.43 miles are in Pennsylvania; the New York, Chicago and St. Louis 533.88, of which 45.29 miles are in Pennsylvania; the Pennsylvania 2,810.25, of which 2,366.56 are in Pennsylvania; the Pennsylvania Company 1,328.30, of which 211.15 are in Pennsylvania; the Philadelphia and Reading 951.21, of which 917.37 are in Pennsylvania; the Pittsburg, Cincinnati, Chicago and St. Louis 1,407.36, of which 70.72 are in Pennsylvania.

The mileage of the above named roads constitutes, as will be seen, a large proportion of the entire mileage reporting to this office. The

Pennsylvania Railroad and the Philadelphia and Reading are more strictly Pennsylvania organizations than any of the other large ones, as their mileage is nearly all within the limits of Pennsylvania.

In considering the mileage of the Pennsylvania Railroad, it must be understood that it does not include the mileage operated by the Pennsylvania Company, neither does it include the Pittsburg, Cincinnati, Chicago and St. Louis, and other roads which are practically a part of the Pennsylvania system.

The Baltimore and Ohio has constructed during the year 7.91 miles within the State; the Buffalo, Rochester and Pittsburg 59.69 miles; the Delaware and Hudson 8.87; the Mt. Jewett, Kinzua and Riterville 12.65; the Pennsylvania 38.94; the Pittsburg and Western 7.90.

In addition to these constructions, there are a number of corporations that have built short lines, branches, or sidings, which make the total number of miles constructed during the year 230.20.

EQUIPMENT.

The equipment of steam railways is classified as follows:

1. Number of locomotives in service.
2. Number cars in passenger service.
3. Number cars in freight service.
4. Number cars in company service.
5. Total number cars in service.

Locomotives.

The total number of locomotives in the service of the railways reporting to this office for the year ending June 30, 1900, was 11,747. Of these locomotives, 1,038 are owned by the Baltimore and Ohio; 966 by the Erie; 736 by the Lehigh Valley; 1,303 by the New York Central and Hudson River; 1,848 by the Pennsylvania; 538 by the Pennsylvania Company; 827 by the Philadelphia and Reading; and 504 by the Lake Shore and Michigan Southern.

Number of Cars in Passenger Service.

In the service of the Baltimore and Ohio Railroad Company there are 681 passenger cars; the Central Railroad of New Jersey 465;

the Delaware, Lackawanna and Western 694; the Erie 851; the Lake Shore and Michigan Southern 431; the Lehigh Valley 464; the New York Central and Hudson River 1,517; the Pennsylvania 1,764; the Pennsylvania Company 487; the Philadelphia and Reading 775; the Pittsburg, Cincinnati, Chicago and St. Louis 425. It will be seen, therefore, that the above named companies own the great majority of the passenger cars in the service of the railroads reporting to this office, the total number of all being 10,709.

Number of Cars in Freight Service.

The total number of the cars in the freight service of the railroads reporting to this office for this year was 512,048. Of this number 49,652 are owned by the Baltimore and Ohio; 8,858 by the Buffalo, Rochester and Pittsburg; 17,065 by the Central Railroad Company of New Jersey; 25,822 by the Delaware, Lackawanna and Western; 45,505 by the Erie; 20,661 by the Lake Shore and Michigan Southern; 35,174 by the Lehigh Valley; 58,656 by the New York Central and Hudson River; 78,389 by the Pennsylvania; 43,380 by the Pennsylvania Company; and 32,473 by the Philadelphia and Reading.

Number of Cars in Companies' Service.

All the greater railway corporations find it necessary to keep a large number of cars in their own service, that is, to be used in the maintenance of ways and in the construction of spurs or branches and in the reconstruction of old lines. The total number of cars so owned is 15,237. Of this number the Baltimore and Ohio own 1,346, the Lehigh Valley 1,156; the New York Central and Hudson River 1,221; the Pennsylvania 4,067; the Philadelphia and Reading 940 .

Total Number of Cars in Service.

The total number of cars of all classes, including passenger and freight, those used in the transportation of commodities and those used in the construction and maintenance accounts is 307,737.

In table E, under the different classifications enumerated is given the number of cars owned by each of the corporations reporting.

EMPLOYES.

Number of Employees.

If any evidence is lacking in the reports of steam railways to present in a particular way the immensity of the interests involved in railway enterprises, that evidence is supplied in the data which shows the number of steam railway employes and the prodigious amount paid to them in the way of compensation for services.

The total number of employes is 307,737. Of course in considering these figures and all others relating to steam railway corporations it must not be overlooked that they refer not only to those corporations whose lines are wholly within the State of Pennsylvania, but also to those whose lines are partly in this State and partly in other adjoining states.

It has been found entirely impossible for railway companies to so adjust their accounts as to determine the exact number of employes chargeable to the services rendered entirely within the State of Pennsylvania as well as to give that portion of the compensation applicable to the services rendered by such employes within the State. This observation is made so that when it is considered that there are on the railways reporting to this office 307,737 employes, it will not be understood that they are all employed within the State of Pennsylvania, but on the railroads whose lines are, in whole or in part, within the limits of that State.

The railway employes, both from their number and from the character of the men themselves, who in most classes of employment must be of a high order of intelligence and acquirements, are an exceedingly important factor in the material interests of the country and by no means an insignificant portion of the citizenship in the territory through which the lines of the roads upon which they are employed pass. These railway employes and their families probably constitute one and one-half million of the population of this State and those adjoining states in which they are employed.

The railway employes upon the railways reporting to this office constitute a force greater than the combined Union and Confederate forces engaged in any of the great battles of the Civil War. They constitute nearly double the number of men in both the Union and Confederate armies who were actually engaged in the battle of Gettysburg on the 1st, 2d and 3d days of July, 1863.

These comparisons may give some idea of the great number of men employed upon our railways and may carry conviction as to their importance to the State and Nation.

Of these more than 300,000 employes, the Baltimore and Ohio has 26,304; the Central Railroad Company of New Jersey 10,060; the Delaware, Lackawanna and Western 13,795; the Erie 24,609; the Lake Shore and Michigan Southern 14,722; the Lehigh Valley 17,105; the New York Central and Hudson River 32,544; the Pennsylvania 60,161; the Pennsylvania Company 19,287; the Philadelphia and Reading 17,746, and the Pittsburg, Cincinnati, Chicago and St. Louis 15,255.

The number of employes on each of the above named railroads is equal to an army corps, while those employed on the Pennsylvania Railroad alone constitute a number sufficient to make up an army of a most formidable character.

Compensation.

During the year covered by this report, the 307,737 railroad employes received as compensation for services rendered \$176,762,468, or an average of nearly \$575 each. In this total amount of capitalization, of course are included the salaries of the general officers, which in some cases amount to several thousands of dollars per annum, but when distributed through the accounts of the thousands of men that are employed, the amount per capita per day is less than two cents, so that the average yearly compensation above given practically represents the actual compensation of railroad employes exclusive of the salaries that are paid under the account of salaries to general officers.

During the year ending June 30, 1899, there were employed 257,628 persons, but this did not include the number employed on the New York Central and Hudson River Railroad, as this is the first year that corporation has filed its general report in this office, it having previously reported for those subsidiary lines which it controls, located entirely within the State of Pennsylvania. The number of employes for that company for the present year is 32,554, but it had a less number of persons in its employment last year than this. However, adding the number which it reports this year to the total number given last year we have 290,182. This would show an increase in the number of employes of 17,555. It is probable that during the year there has been an increase of persons employed of practically 20,000.

Looking at the separate reports from each company with reference to the amount of compensation paid, it is found that the Baltimore and Ohio has paid \$14,083,228; the Delaware, Lackawanna

and Western \$7,078,296; the Erie \$14,503,824; the Lake Shore and Michigan Southern \$8,827,800; the Lehigh Valley \$9,643,942; the New York Central and Hudson River \$20,167,269; the Pennsylvania \$36,937,356; the Pennsylvania Company \$9,813,478; the Philadelphia and Reading \$10,049,630; and the Pittsburgh, Cincinnati, Chicago and St. Louis \$8,813,658.

He who stops to contemplate the importance of railway interests and railway employes to the country in general, while admitting that there should be reasonable public supervision of the affairs of railways, will pause before enacting legislation or imposing supervision which would cripple these interests or prove injurious to the welfare of the persons employed.

A noted increase is found this year in the number of employes as well as in the total amount of compensation paid. In the case of the Baltimore and Ohio the total number of employes last year was 24,295; this year it is 26,304, an increase of 2,009. The compensation paid by the Baltimore and Ohio last year was \$12,843,626; this year \$14,083,228, an increase in the total compensation paid of \$1,159,602. From the calculation made, it will be seen that this increase of compensation means the payment of more than an average of \$500 per man for the 2,009 additional persons employed.

In the case of the Erie road the number of employes last year was 22,359; this year 24,609, an increase of 2,250. Last year the total compensation paid was \$13,557,665; this year \$14,503,824, an increase of \$946,159.

In the case of the Pennsylvania Railroad the number employed last year was 55,602; this year 60,161, an increase of 4,559. Last year the total amount of compensation paid was \$33,187,462; this year it is \$36,937,356, an increase of \$3,749,894. This would seem to indicate that the 4,559 additional employes had resulted in an average per capita payment of something over \$800, while considering the total amount of compensation paid by this corporation and the 60,161 employes, the average compensation per capita would be \$614.

TRAIN MILEAGE.

Train mileage is classified with reference to passenger trains, freight trains and mixed trains, and the greater the amount of business done, the greater of course will be the train mileage.

Number of Miles run by Passenger Trains.

The total number of miles run by passenger trains of all the roads reporting to this office was 101,987,774, of which the Baltimore and Ohio had 8,657,316; the Central Railroad Company of New Jersey 3,719,182; the Delaware, Lackawanna and Western 5,541,790; the Erie 7,289,069; the Lake Shore and Michigan Southern 4,852,968; the Lehigh Valley 4,579,325; the New York Central and Hudson River 16,820,180; the Pennsylvania 15,624,766; the Pennsylvania Company 4,415,478; the Philadelphia and Reading 5,695,141, and the Pittsburg, Cincinnati, Chicago and St. Louis 5,540,375.

Number of Miles run by Freight Trains.

The freight train mileage of the Baltimore and Ohio was 16,051,214; the Central Railroad Company of New Jersey 3,505,337; the Delaware, Lackawanna and Western 6,543,769; the Erie 12,038,155; the Lake Shore and Michigan Southern 8,079,375; the Lehigh Valley 7,718,615; the New York Central and Hudson River 16,609,622; the Pennsylvania 23,670,443; the Pennsylvania Company 8,847,870; the Philadelphia and Reading 11,116,988, and the Pittsburg, Cincinnati, Chicago and St. Louis 9,076,584. The total freight train mileage for the year was 152,912,087.

Number of Miles run by Mixed Trains.

In addition to the distinctive passenger and freight train mileage, the railroads reporting have a mixed train mileage of 2,877,189.

Presumably many of the large corporations in their accounts make no classification of mixed trains, as in the case of the Pennsylvania, the Pennsylvania Company, the Erie, and other large corporations, no mixed train mileage is given.

Mixed train mileage appears in the greater percentage among those corporations having but short lines of railway.

From the observations before given as to passenger train mileage and freight train mileage, it will be seen that in several instances the freight train mileage is practically double the passenger train mileage, while in the case of the New York Central and Hudson River the passenger train mileage is greater than the freight train mileage. This would seem to indicate that a greater percentage of the entire business done by this road is to the account of passenger service than to freight service. In other words, the greater the proportion of passenger train mileage, the greater will be the proportion of passenger traffic to the total amount of passenger and freight traffic.

From the figures above given, it will be seen that the total amount of train mileage of all classes is 257,777,050.

NUMBER OF PASSENGERS CARRIED.

The passenger traffic of steam railways is classified as follows:

1. Number of passengers carried earning revenue.
2. Number of passengers carried one mile.
3. Average distance carried.
4. Total passenger revenue.
5. Average amount received from each passenger.
6. Average receipts per passenger per mile.
7. Passenger earnings per train mile.
8. Passenger earnings per mile of road.

Number of Passengers Carried Earning Revenue.

Under this classification it is found that there were carried during the year 205,939,884 passengers. Of this great number the Baltimore and Ohio carried 9,465,136; last year this road carried 8,632,524; the Central Railroad Company of New Jersey this year carried 14,431,205; last year 13,518,403; the Delaware, Lackawanna and Western carried this year 13,620,786; last year 12,340,457; the Erie carried this year 16,230,757; last year 14,946,046; the Pennsylvania carried this year 39,793,708; last year 35,290,417, or practically an increase of four and a half millions of passengers on this line alone. This the year the Philadelphia and Reading carried 21,910,349, while last year it carried 19,689,787.

Number of Passengers Carried One Mile.

In the reports made, each company is required to reduce to a single mile basis the number of passengers carried. From this process it appears that the number of passengers carried one mile on all the roads reporting, is 4,452,754,915. It is an interesting study to examine the details of each road on this subject, as they appear published in the second column of consolidated table G.

Average Distance Carried.

On the Allegheny Valley the average distance carried for each passenger was 20 miles; on the Baltimore and Ohio 38; on the Buffalo, Rochester and Pittsburg 26; on the Lake Shore and Michigan

Southern 47; on the Ligonier Valley 6; on the New York Central and Hudson River 30; on the New York, Cincinnati, Chicago and St. Louis 121; on the Pennsylvania 22; on the Pennsylvania Company 27, and on the Philadelphia and Reading 13.

From these figures it is apparent that the greater the mileage of a road upon which there is through passenger traffic the greater will be the average distance that each passenger is carried, and of course the converse is true that upon railways whose mileage is very small, the less will be the average distance which passengers are carried.

Total Passenger Revenue.

The total passenger revenue includes only such amounts as each corporation has received from the carrying of passengers. It does not include expressage or other sources of revenue which are derived from the running of passenger trains. The total amount so received for the year was \$89,336,051. Those railroads whose passenger revenue has exceeded \$5,000,000 are the following: The Baltimore and Ohio \$6,544,932; the Erie \$6,388,684; the Lake Shore and Michigan Southern \$5,038,343; the New York Central and Hudson River \$15,217,698, and the Pennsylvania \$16,925,492.

Average Amount Received from each Passenger.

An interesting classification of passenger traffic and the revenues derived therefrom is found in the average amount received from each passenger. The average upon each road depends upon the average distance that each passenger is carried. On the Allegheny Valley the average amount received from each passenger was 44 cents; on the Allegheny and Western \$1.05; on the Baltimore and Ohio 69 cents; on the Erie 39 cents; on the Huntingdon and Broad Top Mountain 53 cents; on the Lake Shore and Michigan Southern \$1.05; on the Lehigh Valley 61 cents; on the New York, Cincinnati, Chicago and St. Louis \$1.96; on the Pennsylvania 43 cents; on the Pennsylvania Company 57 cents, and on the Philadelphia, Newtown and New York 10 cents.

Average Receipts per Passenger per Mile.

For the first time in many years there seems to be a change in the average receipts per passenger per mile. While the downward tendency of passenger rates has not kept pace with the decrease in freight rates per ton per mile, yet for more than two decades the tendency in passenger rates has been downward. A comparison of the figures returned by the several companies for the year

covered by this report will show that there has been at least a pause in the downward tendency of passenger rates.

For instance, last year the average receipts per passenger per mile were 1.836 cents; this year they were 2.006 cents. As a general proposition, the average receipts per passenger per mile are greater on the smaller roads, or those having but a small mileage. For instance, on the Coudersport and Port Allegany the average was 3.632 cents, while on the Pennsylvania it was 1.952 cents, on the Erie 1.540, on the New York Central and Hudson River 1.793.

All the railroad companies whose average receipts per passenger per mile were over 3 cents are short line roads; they belong to a smaller class of corporations, while on practically all of the larger roads the receipts per passenger per mile were less than 2 cents.

Passenger Earnings per Train Mile.

The passenger earnings of the Cornwall and Lebanon, a short line, were 48.549 cents per train mile; the Cumberland Valley 83.947 cents; the Erie \$1.02766; the Lake Shore and Michigan Southern \$1.53242; the Ligonier Valley \$1.47923; the New York Central and Hudson River \$1.08130; the Pennsylvania \$1.34833.

Passenger Earnings per Mile of Road.

The data given under the preceding captions with reference to earnings per train mile, receipts per passenger per mile, etc., depend very largely upon the distance passengers are carried, but more particularly upon the length of line operated. Under this heading the whole subject of passenger receipts per mile of road is reduced to a comprehensive basis.

The Baltimore and Ohio has a passenger earning per mile of road of \$3,614; the Erie \$4,071.30; the Lake Shore and Michigan Southern \$5,262.29; the New York Central and Hudson River \$6,529.59; the Pennsylvania \$7,493.95.

Some comparisons have heretofore been made with reference to the number of passengers carried on the principal roads for the year ending June 30, 1900, with the number for the year ending June 30, 1899, and it will be interesting to make a similar comparison of the passenger earnings per mile of road, as they appear in consolidated table G.

KINDS OF FREIGHT CARRIED IN TONS.

A general classification of kinds of freight carried and the number of tons is found in consolidated table H. This classification is made as follows:

1. Products of agriculture.
2. Products of animals.
3. Products of mines.
4. Products of forests.
5. Manufactures.
6. Merchandise.
7. Miscellaneous.

Products of Agriculture.

The total number of tons of freight under this classification was 38,674,558. Some comparisons of the number of tons carried on the leading lines this year with the number carried last year may be of interest.

Last year the Erie carried 2,146,538 tons, this year 1,949,965; last year the Lake Shore and Michigan Southern carried 2,460,043; this year 2,875,572; last year the Pennsylvania carried 4,381,072, this year 4,769,548.

The significant feature of these figures is that there seems to be a falling off in the amount of agricultural products carried by the Erie road this year as compared with the year ending June 30, 1899.

Products of Animals.

The total tonnage of animal products for the year was 10,614,300. Of this amount the Baltimore and Ohio carried last year 503,774 tons, this year 503,382; the Erie carried last year 442,053, this year 425,296; the Lake Shore and Michigan Southern last year 916,759, this year 936,688; the Pennsylvania last year 1,664,646, this year 1,921,971.

Products of Mines.

395,544,022 tons represents the quantity of freight carried this year under the classification of products of mines. Of this amount, the Baltimore and Ohio carried 17,752,354 this year, last year 15,556,975; the Erie this year 15,080,925, last year 13,417,848; the Lake Shore and Michigan Southern this year 9,662,145, last year 8,159,078;

the Pennsylvania this year 53,143,031, last year 45,941,062; *the Philadelphia and Reading* this year 19,326,524; last year 16,488,397.

On all the leading lines there appears to be a marked increase in the number of tons of freight carried in this classification.

Products of Forests.

24,471,244 tons of freight is the amount resulting from the manufacture of lumber and from other products of forests. Of this tonnage the Baltimore and Ohio carried this year 1,558,426, last year 1,258,756; the Erie carried this year 1,364,171, last year 1,310,099; the Lake Shore and Michigan Southern this year 812,089, last year 741,429; the Pennsylvania this year 3,520,775; last year 2,957,087.

Manufactures.

The tonnage from manufacturers on all the lines for the year covered by this report was 75,694,847. A few references to the number of tons of freight carried this year by the leading roads, and comparisons made with the number of tons of this classification carried last year would indicate very closely the comparative amount of the output of our manufactories this year and last.

The Baltimore and Ohio carried this year as the products of manufactories 3,771,213 tons of freight, last year 3,290,936; the Erie carried this year 3,677,621 tons, last year 3,473,320; the Lake Shore and Michigan Southern this year 3,480,831, last year 2,887,424; the Pennsylvania this year 15,081,382, last year 13,179,953; the Philadelphia and Reading this year 3,553,089, last year 3,111,208.

Merchandise and Miscellaneous.

Under these classifications were carried 13,173,144 tons of merchandise and 20,823,223 tons of miscellaneous products. These amounts are divided among the leading roads in practically the same proportion that exists under the other classifications of tonnage referred to.

QUANTITY OF FREIGHT CARRIED.

Cost Per Ton Per Mile.

Having previously considered the number of tons of each classification of freight carried, a table has been arranged which is designated consolidated table I, showing.

1. Number of tons of freight carried earning revenue.
2. Number of tons carried one mile.
3. Average distance haul of one ton.
4. Total freight revenue.
5. Average amount received for each ton of freight.
6. Average receipts per ton per mile.
7. Freight earnings per train mile.
8. Freight earnings per mile of road.

A study of the figures relating to these classifications and the deductions therefrom will give some idea of the accuracy with which the accounts of railroads are required to be kept in order that these deductions may be made from the operations during each year. To ascertain the actual receipts of many millions of tons of freight on a one mile basis, so that it shall be accurately known what the carrier has received per ton per mile, is no small task. It is equally difficult and reflects as much credit upon the auditing officers of common carrier corporations to determine with accuracy what it has cost per tone per mile to carry freight.

Number of Tons of Freight Carried.

The Baltimore and Ohio carried during the year covered by this report 28,366,696 tons of freight; last year it carried 25,057,178; this year the Central Railroad Company of New Jersey carried 17,423,042, last year 14,549,484; this year the Erie carried 24,501,104, last year 22,660,236; this year the Lake Shore and Michigan Southern carried 19,130,750, last year 16,623,247; this year the Lehigh Valley carried 18,764,609, last year 20,674,491; this year the Pennsylvania carried 79,973,667, last year 69,566,877; this year the Philadelphia and Reading carried 29,404,293, last year 25,131,243; this year the Pittsburg, Cincinnati, Chicago and St. Louis carried 22,844,241, last year 19,409,527.

It is difficult to account for the falling off in total tonnage of the Lehigh Valley, when all the other leading lines show so marked an increase in tonnage. Evidently some question of competition with other large carriers of coal must have produced this result.

Number of Tons Carried One Mile.

The entire tonnage of all the railroads reporting to this department, when reduced to a single mile basis, indicates the hauling by all the roads of 56,727,167,903 tons one mile.

Average Distance Haul of one Ton.

The same conditions that are found to exist in the average distance passengers are carried, are found in the average distance of the haul

of a ton of freight. For instance, the greater the mileage of a road, and the greater the proportion of through freight, the greater will be the average distance of the haul of a ton.

This is seen in the fact that the Philadelphia and Chester Valley shows an average haul of a ton of freight of 11 miles; the Philadelphia and Reading 90 miles; the Pittsburg, Cincinnati, Chicago and St. Louis 115 miles; the Reading and Columbia 28 miles; the Baltimore and Ohio 206 miles; the Erie 181 miles; the Lake Shore and Michigan Southern 187 miles; the New York Central and Hudson River 163 miles; the New York, Chicago and St. Louis 297 miles, and the Pennsylvania 144 miles.

It will be seen from the above figures that the New York, Chicago and St. Louis has the greatest average distance haul for one ton of freight. This fact is, of course, not entirely attributable to the length of line, but is probably due to the fact that most of the freight that passes over this road is through freight, and a smaller proportion of local freight business is transacted on this road than on most of the others.

Total Freight Revenue.

The total freight revenue of all roads reporting was \$330,184,126. In considering the amount of freight revenue, it must be remembered that the amount given by each company and the total given under this caption do not include all the receipts which common carriers have enjoyed as the result of conducting the transportation of freight. Other sources of income from the transportation of freight not purely a freight revenue, are included in the column indicated "Freight Earnings," in consolidated table J, and the data given under the above classification, Total freight revenue, are for the purpose of furnishing a basis upon which to calculate the average amount received for each ton of freight, average receipts per ton per mile, freight earnings per train mile and freight earnings per mile of road. Reference is therefore made to the second column of consolidated table J, to show the total freight earnings. Similar reference is made in regard to the discrepancy between passenger revenue and passenger earnings, the total passenger earnings being given in the first column of consolidate table J.

Average Amount Received for Each Tonne of Freight.

Under this heading, the important matter to be considered as determining the amount received for each ton of freight is the average distance of the haul.

On the Baltimore and Ohio the average amount received for each ton of freight was 94 cents; on the Brownstone and Middletown 10 cents; on the Buffalo, Rochester and Pittsburg 63 cents; on the

Erie \$1.06; on the Lake Shore and Michigan Southern 92 cents; on the Lehigh Valley \$1.05; on the New York Central and Hudson River 91 cents; on the New York, Ontario and Western \$1.16; on the Pennsylvania 72 cents, and on the Philadelphia and Reading 72 cents.

Average Receipts per Ton per Mile.

A condition is found to exist with reference to the affairs of railroads, disclosed in the reports for the year ending June 30, 1900, which has not been found for many years heretofore. For more than 25 years there has been an almost uninterrupted decrease in the rate per ton per mile at which the railways have carried the productions of the country.

This reduction has been so steady and of such a serious character from the standpoint of the holders of railway securities and so difficult a problem for the railway manager to consider, that it has seemed for a number of years at least, that there must be a pause in the downward tendency of rates if American railways were to be saved from bankruptcy.

Railway journals have frequently given data with reference to the rate problem and the railway commissioners of the several states, in their annual reports have produced the most telling testimony as to the reduction of the railway rates for the transportation of commodities. The average rates which have been found to exist in one state have been compared with those which exist in others. American railway rates in general have been compared with those which exist in other nations of the world, and in no case was it found that the rates prevailing in other nations were as low as those in the United States. In other words, the products of the farms, the forests, the mines, the output of our manufactories, merchandise and miscellaneous commodities were being transported over the railroads of this country at a lower cost to the shipper and to the consignee than could be found in any other nation where railroads existed.

One of the factors which brought about this condition was the unrestricted competition which existed among the managers of railways during nearly the entire history of railway operations in this country.

There was a time in the earlier days of railway development when the common carrier could exact almost any charge which he might name in the performance of what the courts now hold to be a public service. The construction of competing lines seems to have been the first cause that started the downward tendency of rates. This was followed by the evil practices of discrimination,—the ostensible charging to all shippers of a uniform rate but the payment of large

amounts for rebate to certain shippers in consideration of securing their patronage. These rebates of course amounted to a reduction of rates and further lowered the scale of American rates of transportation.

To what extent this pernicious custom was carried on it is not likely will ever be known. Investigations made by committees of Congress and resolutions and laws passed by a number of the states of the Union disclosed the fact that discriminations existed in an appalling degree, and to such an extent as to ruin many interests, bankrupt many individuals, and at the same time add enormous wealth to those who were the recipients of the rebates.

So acute became the competition between common carriers and so malignant the relations existing between the managers of railroads, that discriminations of all kinds and conditions and secret understandings were the rule, and an open and fair rate common to all was the exception.

A knowledge of these practices came to the public attention, and there was an attempt at corrective legislation both in Congress and in several of the states. Public opinion was prejudiced against railroads, and in some of the states the most sumptuary legislation was passed, which further crippled the operations of railroads and in some states, particularly some of the western states such as Kansas, the railroads were practically all driven to bankruptcy. The Commissioners appointed in these states were the outgrowth of a prejudiced public opinion, and they attempted to execute such prejudiced opinion in the supervision of railways and the establishment of rates. The willing farmer was made to believe that he was paying too much for the transportation of his productions to the eastern markets. Although the railroads had been through a process of competition that resulted in their already carrying freight to the eastern market at a less charge to the shipper than it cost the railroads to carry it, yet there was a disposition, manifested in the most stubborn way, to further reduce the rates.

The spirit which seemed to characterize the conduct of those having supervision was, in many instances, to reduce existing rates no matter how low they already were or how much ruin they might bring upon the affairs of common carriers. To these persons a reasonable rate meant a cheap rate, and in considering what a reasonable rate was, no consideration whatever, in many cases, was given to the effect that a reduction of rate would have upon a railroad corporation. If it brought bankruptcy, if it placed the railroad in the hands of a sequestrator, if it caused a judicial sale at the hands of the sheriff of the rights, properties and franchises of the common carrier; if it made necessary liquidation, forfeiture of chartered

rights, and the extinguishment of all value in railroad securities, whether stocks or bonds, it made no difference to the populist legislator or railroad commissioner, or to those who were prejudiced against the railroad, so long as it enabled the shipper to get a low rate for the transportation of his commodities.

It may be assumed that primarily the railway manager was chargeable with some responsibility for the ruinous conditions which existed among railroads in regard to rates of transportation. As has been before indicated, the downward tendency had its inception in competition, a competition which was absolutely destructive, there being a perfect freedom on the part of railway managers to carry freight at a low figure, or for that matter, for nothing if he chose so to do; and so far some may regard the action of such railway managers as entirely free from the commission of wrong, but the unscrupulous railway manager who resorted to discriminations, was guilty of at least a moral wrong against the commercial interests of this nation. He destroyed enterprise on the one hand; he gave undue advantage to other enterprises of the same nature, on the other hand. He destroyed honest ambitions and made individuals arrogant, wealthy and important who did not merit success in honestly conducting business affairs.

There are few questions, if any, that are so important to the commercial interests of this country as transportation. No fault of late years can be charged to the railroads, for lack of facilities and conveniences, but the ruins that have been produced by discriminations are of so pronounced a character and so numerous as to have given great concern to those engaged in nearly all of the great business enterprises of the country.

One manufacturer, while exhibiting all the energy and furnishing all the capital necessary, employing all the economy which could be introduced, has been compelled to go into liquidation, while his competitor in the same line, possibly located in the same vicinity, not having the advantage of more capital, not spending more energy or introducing more economy, has been successful and accumulated great wealth on account of being able to effect some secret arrangement for the transportation of his output or his commodities, from which his financial success has been secured.

The prohibitory features of state legislation upon this subject gave freedom to a very large extent to the public from discriminations, but did not give relief to railroads, and rates continued on the descending scale.

The great developments which have been made in railway operations, the introduction of every valuable new invention and economy, the increased power of locomotives which has enabled one engineer in charge of his locomotive to haul two or three times the number of

tons that he could haul with the old locomotive twenty years ago, the increased capacity of cars, the economies practiced in their construction, the safety appliances by which passengers are carried with greater freedom from accidents, the additional cost of construction chargeable to the heavy rails in use, the expensive and improved bridges, every item of improvement which has gone into the construction, the maintenance and the operations of railroads, have inured to the benefit of the shipper, while the stockholders never received \$1 of benefit from the introduction of such inventions and the practice of such economies.

Railway managers saw the necessity which confronted them. The sequestrator already had many of the greater corporations in his custody. A very large percentage of the railway mileage of the country was in the hands of the law and but comparatively few of the railroad corporations were returning any dividends to their stockholders. In many railway revenues did not enable the managers to pay interest on funded indebtedness.

Through the public journals it became apparent that railway managers were attempting to effect understandings among themselves by which there should be some uniformity in the rates charged on the different railroads for the performance of a public service. It is possible that there were conferences held by the managers of some of the leading lines and that something may have been done looking toward the adoption of plans by which the railroads would be saved from further financial ruin.

Public opinion became captious; the political demagogue began to ply his vocation, and as a result Congress passed the act forbidding combinations or restriction of trade, and the adjudications of this law by our courts practically prohibited the manager of one railroad company conferring with others as to the adjustment of rates, and therefore the system of competition seemed as active as ever and the downward tendency of rates still continued. So each year the fact has been reported that the rate per ton per mile was less than for the preceding year.

A changed condition, however, is discovered in the reports for the year ending June 30, 1900, as in the reports of nearly all the leading lines it is found that not only has the downward tendency been stopped, but that the rates have been considerably advanced above those for the previous year.

It may be well to consider what has caused this change. That it has been a necessity can no longer be doubted by thoughtful or fair-minded people, because when the cost of transportation far exceeds the receipts, the common carrier is ruined, and when the common carrier is ruined commercial interests of necessity are destroyed or greatly impaired.

The better thought of this country to-day is that every function a common carrier performs in the way of transportation should be considered a public service. The manner of its performance, the integrity of action, the convenience and the conservation of the public in the services rendered should be in as good faith as if they were the acts of the government itself.

If the government were to assume supervision, the execution of the duties incident to such supervision would be the act of the government and would necessarily be done in equity.

Whatever the government in equity would do were it to own railways, should be done by the railways in all functions performed for the public.

The converse of this proposition is also true that railways ought to be permitted to do, in the establishment of rates and in the discharge of every public duty, whatever the government from necessity would do, were it the owner of the railways.

It has been apparent for years that the only way to enable railways to discharge their duties to the public as the government would were it the owner of the lines of transportation is through conferences and negotiations and by agreements made for the establishment of rates and in regard to other matters pertaining to transportation. This is prohibited by law, or by the construction placed upon existing laws by the courts.

The establishment of rates, the agreements with reference to the division of profits in transporting products, even though it be called pooling, has seemed for some time to be the conservative plan of establishing that which is of utmost importance, uniformity of rates and freedom from discriminations. The sentiment, however, has been strong against this proposition, and whatever legislation has been presented either in Congress or in the State has been defeated or postponed.

In the National Convention of Railway Commissioners the Committee on Legislation has investigated the question and made exhaustive reports recommending legislation on the line suggested, that is, advocating the passage of laws which would enable railroad companies to establish uniform rates for the transportation of commodities and to enter into agreements with reference to the division of profits, but all under the supervision and approval of public officials. The sentiment, however, prevailing in the convention has been averse to recommending such legislation, for many railway commissioners, those who are brought into close relations with the financial condition of railways, seem to join the popular cry to down rates, even though it down the railroads, rather than to meet and settle matters on conservative grounds.

In the last three conventions of railway commissioners this subject has been carefully considered and an attempt made to make it clear that public supervision means fairness to the shipper and to the common carrier, and yet a majority of that body seem to be still impressed with the idea that a fair rate is the lowest rate that can be procured without regard to consequences.

The warning was sounded by the thoughtful men of the convention in the declarations frequently made, that if railways were refused the right to legally adjust rates among themselves, consolidations and mergers would be carried on to an extent never before known in the development of American railways, and that it would not be long before all the great lines of the country would be practically under a few managements, and these few managements undoubtedly under one control.

If an examination is made of the names of the persons who constitute the Boards of Directors of many of the leading corporations, it will be found that there have been numerous changes made in the last two years, and that the name of one director appears on the lists of directors of several of the leading corporations which have heretofore appeared to be competitors in business.

While there has been no legal consolidation under the laws; while there is independent management and capitalization, and practically independent operation, yet in those things which concern the life of the corporations it will be found that many of the leading companies are conducting their business with some of the former elements of competition eliminated, and as a result of these new relations comes the changed condition in rates of transportation.

That this condition is justified cannot be gainsaid; that there is any violation of law is not apparent, but that there is an understanding that the suicidal policy of cutting rates shall be abolished is beyond dispute.

Rates are still low notwithstanding the slight advance in the last year; lower than they are found anywhere else in the world; and as long as they remain so, as long as the spirit which is said sometimes to characterize the acts of all monopolies does not control the new condition of affairs, there will be little reason to find fault.

If, however, there should be an unjustifiable advance in rates all along the line, public opinion would be aroused and legislation of a severe character might find its way upon the statute books, while supervision of a damaging nature might be established to the consternation of railway managers and railway security holders.

A clear exhibition of the change in rates, first, the reduction from 1890 down to 1899 inclusive, and second, the advance from 1899 to 1900, is shown in the following table:

Table showing average rate per ton per mile for the companies mentioned, for each year from 1890 to 1900 inclusive, together with percentage of decrease of the rate of 1890 compared with that of 1899 and 1900, also percentage of increase from 1899 to 1900.

Name of Company.	1890.	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.	1899.	1900.	Per cent. of decrease— 1890 to 1899.	Per cent. of decrease— 1890 to 1900.	Per cent. of increase— 1899 to 1900.
Erie Railroad,662	.658	.629	.655	.630	.625	.570	.609	.572	.539	.538	18.7	11.3	9.
Lake Shore and Michigan Southern,644	.630	.602	.599	.587	.567	.551	.538	.530	.481	.490	25.1	23.9	1.2
Lehigh Valley,855	.774	.789777	.689	.589	.561	.528	.510	.572	40.3	23.9	12.1
Pennsylvania,661	.656	.647	.620	.607	.586	.563	.561	.521	.483	.504	29.	23.7	7.4

This table exhibits the rate per ton per mile received by the Erie, the Lake Shore and Michigan Southern, the Lehigh Valley and the Pennsylvania, for each of the years mentioned. From which it appears that in 1890 the Erie railroad received .663 cents per ton per mile, and that, with one or two exceptions, there is a reduction each year in the average rate per ton per mile down to 1899, when it was .539. From 1899 to 1900 the rate advanced from .539 cents to .588. It will be seen, therefore, that from 1890 to 1899 there was a decrease in the rate per ton per mile of 18.7 per cent., and down to 1900 a decrease of 11.3 per cent., but there was an increase from 1899 to 1900 of 9 per cent.

In the case of the Lake Shore and Michigan Southern there was a decrease from 1890 to 1899 of 25.3 per cent. in the rate per ton per mile, and from 1890 to 1900 a decrease of 23.9 per cent., and the increase from 1899 to 1900 was 1.8 per cent.

On the Lehigh Valley there was a decrease from 1890 to 1899 of 40.3 per cent., from 1890 to 1900 a decrease of 33 per cent., and an increase from 1899 to 1900 of 12.1 per cent.

On the Pennsylvania there was a decrease from 1890 to 1899 of 29 per cent., and from 1890 to 1900 a decrease of 23.7 per cent., and an increase from 1899 to 1900 of 7.4 per cent.

These companies are heavy shippers of freight, both of local and through character, and the results of their operations during the 11 years embraced in the table herewith, must furnish practically a true index of the changes which have occurred in the rate problem during the period mentioned.

The steady decrease during the ten years from 1890 to 1899 inclusive is clearly indicated in these figures, and in all the roads mentioned there is an increase from 1899 to 1900 in the rate per ton per mile.

While this is true, that there is an increase from 1899 to 1900, yet in all cases there is a marked decrease from 1890 to 1900, showing that while there has been a check in the decrease in the average rate per ton per mile, yet the advance falls far short of restoring the rate per ton per mile which existed in 1890.

These figures also show that during the three or four years prior to 1900, while the price of nearly all standard articles of commerce increased, yet the downward tendency of the rate per ton per mile continued to 1899.

They would also seem to indicate that the average rate per ton per mile for 1900 does not indicate an advance of rate to correspond with the price of commodities which now prevails as compared with the price of those articles of eight or ten years ago.

This observation is made to show that while railroad rates of

transportation for the last year have somewhat increased, yet there is no room for complaint among shippers in view of the fact that this increase has, by no means, kept up with the advance in prices of standard articles of commerce.

In other words, farm productions, the products of manufactories, the output of mines and the lumber from the forests all have higher prices in the markets of the country than they had eight or ten years ago, and yet railroad rates of transportation, as indicated by the table herewith, are lower than they were ten years ago notwithstanding the slight advance from 1899 to 1900.

Looking at the figures which indicate the receipts per ton per mile for the year covered by this report, it is found that the average was .582 cents.

As a general proposition, it may be said that the roads having the greatest traffic, or the longest lines, carrying the most coal or other freight of a similar character, have the lowest rate per ton per mile.

The Allegheny and Western received 1.457 cents; the Baltimore and Harrisburg 1.435 cents; while the Baltimore and Ohio received this year .456 cents and last year .390. The Bellefonte Central received this year 3.418 cents, while the Berlin Branch received 6.438. The Bradford, Bordell and Kinzua received 3.942; the Bradford and Western Pennsylvania 10.510 cents per ton per mile for the 43,065 tons of freight carried. The Erie received .588 cents this year, while last year it received .539; the Lake Shore and Michigan Southern received this year .490 cents, last year .481; the Lehigh Valley this year .572, last year .510; the Pennsylvania this year .504, last year .469; the Pennsylvania Company this year .543, last year .515.

If a calculation were to be made of the tonnage of these leading railroads, based upon the rate per ton per mile which they received for the year ending June 30, 1899, instead of being based upon the rate they received this year, it would be found that these corporations would be short many millions of dollars of what they actually received. Therefore a change of .001 cents on the average received per ton per mile on the great number of tons of freight carried on the railroads reporting to this office amounts to a large sum of money.

Freight Earnings per Train Mile.

The Baltimore and Ohio reports freight earnings per train mile of \$1.66; the Bellefonte Central 73 cents; the Buffalo, Rochester and Pittsburg \$1.65; the Erie \$2.18; the New York Central and Hudson River \$2.02, and the Pennsylvania \$2.45.

Freight Earnings per Mile of Road.

An examination of the figures which show the freight earnings per mile of road discloses many glaring discrepancies in the amount of money which has been derived per mile of road from freight revenue. For instance, the Baltimore and Ohio has received \$11,825 per mile of road; the Bellefonte Central \$1.273; the Buffalo, Rochester and Pittsburg \$10.404; the Central Railroad Company of New Jersey \$16.465; the Cornwall and Lebanon \$10.729; the Coudersport and Port Allegany \$1.537; the Delaware, Lackawanna and Western \$20.434; the Erie \$14.250; the Lehigh Valley \$14.176; the Pennsylvania \$20.619.

EARNINGS AND INCOME DURING THE YEAR.

There have heretofore been considered the earnings of steam railway companies from passenger and freight revenues. In consolidated table J are shown the total passenger earnings and the total freight earnings, as distinguished from the passenger revenue and freight revenue.

This table is classified as follows:

1. Total passenger earnings.
2. Total freight earnings.
3. Other earnings from operation.
4. Total earnings from operation.
5. Income from other sources including interest on bonds, dividends on stock, rentals, etc.
6. Total earnings and income.

The passenger earnings and the freight earnings as a rule do not materially differ from the passenger and the freight revenues. It is interesting, however, to compare these tables to ascertain the sources of the earnings from both passenger and freight service, which are not included as passenger and freight revenues.

Some observations may be made here with reference to the total earnings and income. \$498,012,493 is the total amount of earnings and income from all sources for all the roads reporting. Of this amount \$48,830,366 are derived from interest on bonds, dividends on stock, rentals, etc., and \$449,182,127 are derived from the results of

operation, including freight and passenger traffic and other earnings incident thereto.

Last year the amount given as total earnings and income was \$377,825,660, but that amount did not include the data showing the income of the New York Central and Hudson River. We do not have the figures showing the income of that corporation for the year ending June 30, 1899, but the income for this year, as indicated in the report made to this office, was \$59,295,021. If this amount be deducted from the \$498,012,493, the total earnings and income for this year, exclusive of the New York Central and Hudson River will be \$438,717,472, an increase of \$61,596,791.

Among the companies which show the largest increase in their total income are, the Baltimore and Ohio, which had this year \$35,877,500, and last year \$28,754,398, an increase of \$7,123,102; this year the Erie had \$35,089,529, last year \$31,197,412, an increase of \$3,892,117; this year the Lake Shore and Michigan Southern had \$25,783,893, last year \$21,941,315, an increase of \$3,842,578; this year the Pennsylvania had \$85,972,704, last year \$72,462,247, an increase of \$13,510,457.

Practically all the railroads whose reports are made to this office show a decided increase in their income from operation, and in cases where these corporations own bonds and stocks of other railroads and other corporations, the increase in income from these sources is no inconsiderable amount.

EXPENSES.

The total expenses of steam railways for the year, not including any amounts paid for dividends, was \$428,837,899.

The general classifications of expense appearing in consolidated table K are as follows:

1. Maintenance of way and structure.
2. Maintenance of equipment.
3. Conducting transportation.
4. General expenses.
5. Total operating expenses.
6. Other expenses as per deductions from income.
7. Total expenditures for the year.

Canal Lock at Dauphin, Pa.

In addition to these classifications, the reports of the several companies give three other items which are included in this table:

1. Total amount of dividends paid during the year.
2. Surplus for the year.
3. Deficit for the year.

Maintenance of Way and Structure.

It is safe to say that the greater proportion of its receipts a railway corporation expends for maintenance of way and equipment, the greater freedom it will have from accidents both to passengers and employees. Therefore, the railroad corporation which has the most substantial construction and expends judiciously the greatest percentage of its receipts for maintenance of way and equipment, ought to receive the highest commendation from the travelling public.

The entire amount expended during the year for maintenance of way and structure was \$55,482,772. Of this amount, the Baltimore and Ohio expended \$3,578,370; the Erie \$3,577,654; the New York Central and Hudson River \$7,190,286; the Pennsylvania \$10,135,122; the Pennsylvania Company \$3,902,571. It will be seen from these figures that these five companies have expended more than half of the entire amount expended by all companies combined.

Maintenance of Equipment.

\$63,244,225 represents the total amount of money expended during the year for maintenance of equipment. Of this amount \$4,261,202 was expended by the Baltimore and Ohio; \$6,220,800 by the Erie; \$5,598,092 by the New York Central and Hudson River; \$12,545,584 by the Pennsylvania, and \$4,104,126 by the Pennsylvania Company.

As in the case of the maintenance of way and structure, these five companies have expended more money than all the other companies combined for the maintenance of equipment.

The significant feature of the amounts reported by these five companies is that the New York Central and Hudson River expended about a million and a half more for maintenance of way and structure than it did for equipment, while the other four companies expended far more for maintenance of equipment than for way and structure.

Conducting Transportation.

\$163,848,878 represents the amount of money paid by the railroad companies during the year for conducting transportation. Of this amount, \$13,902,833 were paid by the Baltimore and Ohio; \$13,891,265 by the Erie; \$19,921,551 by the New York Central and Hudson

River; \$29,357, 287 by the Pennsylvania; \$8,655,685 by the Pennsylvania Company, or a total for these five companies of \$85,728,621, a trifle over half the entire amount expended by all roads for conducting transportation.

General Expenses.

The total amount of general expenses for the year was \$10,212,202. Under this sub-caption are included salaries of general officers, salaries of clerks and attendants, general office expenses and supplies, insurance, law expenses, stationery and printing for the general office, and other expenses which are properly chargeable under this heading.

The general expenses of the Baltimore and Ohio for the year were \$788,378; of the Erie \$750,113; of the New York Central and Hudson River \$1,343,226; of the Pennsylvania \$1,878,179; and of the Pennsylvania Company \$384,331.

Again it is found that these five companies have expended more than half of the entire amount expended for general expenses.

Total Operating Expenses.

Under this classification are included the cost of maintenance of way and structure, maintenance of equipment, conducting transportation and general expenses. The total amount expended for the year was \$292,788,077. Of this amount the Baltimore and Ohio reports \$22,530,783; the Erie \$24,439,832; the New York Central and Hudson River \$34,053,155; the Pennsylvania \$53,916,172; and the Pennsylvania Company \$17,046,713.

Other Expenses as per Deductions from Income.

Under the preceding classifications have been included only those items of expense properly chargeable to operations. Under this caption is included the interest paid on funded debt, made up of interest on mortgage bonds, miscellaneous obligations, income bonds and equipment trust obligations; also any interest that may be paid on interest bearing current liabilities, rentals paid for lease of road, tracks, yards, terminals, etc., taxes, and amounts paid for permanent improvements or betterments.

The total amount so expended during the year was \$136,049,822. Of this amount the Baltimore and Ohio expended \$7,124,828; the Erie \$8,986,267; the New York Central and Hudson River \$17,262,840; the Pennsylvania \$21,844,791, and the Pennsylvania Company \$8,327,039; a total for these five companies of \$63,545,765.

Total Expenditures for the Year.

The total amount of expenditures for the year, including those incidental to operations, interest on funded indebtedness, etc., as before stated, was \$428,837,899. The ten corporations expending the most money during the year were as follows:

The Baltimore and Ohio, \$29,655,611; the Central Railroad Company of New Jersey, \$14,364,594; the Delaware, Lackawanna and Western, \$18,585,175; the Erie \$33,426,099; the Lake Shore and Michigan Southern \$19,369,501; the Lehigh Valley \$25,382,345; the New York Central and Hudson River \$51,315,995; the Pennsylvania, \$75,760,963; the Pennsylvania Company \$25,373,752; the Philadelphia and Reading \$26,178,847, making a total of these ten companies of \$319,412,882, nearly 75 per cent. of the total amount expended by the 275 companies reporting. It might be said that nine companies have expended 75 per cent. of the entire amount, for practically the Pennsylvania and the Pennsylvania Company are one and the same thing, although they maintain separate accounts.

If the Pennsylvania, the Pennsylvania Company, the Northern Central, the Cumberland Valley, the Philadelphia, Wilmington and Baltimore, with other companies owned or controlled by the Pennsylvania had their expenditures consolidated in one item, and the same process were applied to other leading corporations, it would be found that the accounts of the ten companies would probably cover 90 per cent. of the entire amount of money expended for the maintenance and operation of the railroads reporting to this office. These figures would seem to indicate that though there are many different corporations maintaining a legal existence and to some extent carrying on the business of common carriers, yet practically nearly all the business is done by a few corporations.

Dividends Paid During the Year.

The total amount of dividends paid during the year was \$37,013,306. Of this amount the New York Central and Hudson River paid \$4,937,500. In making comparison of the total amount of dividends paid last year, the amount paid by this road should be deducted from the total for this year, as this is the first year the general report of the New York Central and Hudson River has been filed in this office. Deducting therefore the \$4,937,500 we have left a total of \$32,075,806, as against \$24,378,850 paid out as dividends last year, or an increase of \$7,696,956, a very creditable exhibit for the year's business, which undoubtedly carried encouragement to stockholders in general. In some cases dividends had not been previously paid for years, and there must have been pleasant surprises for the

stockholders of those companies in which the payment of dividends had become a thing of the past.

101 of the corporations reporting, paid dividends during the year, and last year there were 91 companies that paid dividends.

The companies paying dividends this year that did not pay last year are as follows: The Baltimore and Ohio, \$4,073,560; the Galeton and Eastern, \$1,250; the Lackawanna and Montrose, \$6,314; the New York, Chicago and St. Louis, \$250,000; the Pennsylvania Company, \$1,000,000; the Pennsylvania and Northwestern, \$90,000; the Pine Creek, \$35,000; the Pittsburg and Moon Run, \$2,771; the Pittsburg, Virginia and Charleston, \$264,061; the Schuylkill and Lehigh, \$3,000; the Susquehanna and New York \$7,750; the Wilmington and Northern, \$13,092.

Surplus for the Year.

There are 147 corporations that show a surplus for the year above the total expenditures for operations and amounts paid for dividends. The companies having the largest surplus for the year were, the Baltimore and Ohio, \$2,148,329, after paying a dividend of \$4,073,560; the Central Railroad Company of New Jersey, \$1,313,536, after paying a dividend of \$2,185,276; the Delaware, Lackawanna and Western, \$3,191,578 after paying a dividend of \$1,834,000. The Erie, although it paid no dividend, had a surplus of \$1,663,430. This shows a favorable financial condition considering the financial misfortunes that have attended the operations of the old Erie road for so many years.

The Lake Shore and Michigan Southern, having paid a dividend of \$3,516,005, still had a surplus of \$2,898,387; the New York Central and Hudson River, after paying a dividend of \$4,937,500, had a surplus of \$3,041,527; the Pennsylvania Railroad could have increased its dividends materially, for after having paid \$6,712,289 in dividends, it had a surplus for the year of \$3,499,453; the Philadelphia and Reading had a surplus of \$745,309, from which the dividend paid after June 30th was undoubtedly taken. No mention of this dividend, of course, appears in the report for the year ending June 30, 1900.

Deficit for the Year.

There are 82 companies whose reports show a deficit for the year. This deficit, in many cases, was not caused by payments for operation and general expenses beyond receipts, but was due to the payment of dividends which, together with the expenses paid for operations, etc., during the year, exceeded the income.

The companies whose payments of dividends created a deficit are the following:

The Cleveland and Pittsburg, the Coudersport and Port Allegany,

the Elmira and Williamsport, the Galeton and Eastern, the Ironton, the Little Schuylkill Navigation and Railroad Company, the McKeesport Connecting, the Ohio Connecting, the Sunbury, Hazleton and Wilkes-Barre, the Susquehanna and New York, and the Youghiogheny Northern.

In completing these observations with reference to the income and expenditures of these railroad corporations, as they are exhibited in the consolidated tables, under the several classifications, it is proper to say that this is the most favorable presentation of the financial affairs of these corporations that has been made for several years.

ACCIDENTS.

The accidents which have occurred on the steam railways of this country have been in striking contrast to those which have occurred on the railways of foreign countries. American railways are said to conserve the interests of the passenger and the shipper in every way more completely than the railways of any other country. Certainly the convenience, the comfort and the rapidity of passenger traffic can hardly be excelled, and the despatch with which the products of the country are handled, together with the extremely low rates, leaves little room for complaint.

It is a fact, however, that railway accidents both to passengers and employes have been exceedingly high. Congress has given this matter careful attention and passed laws requiring railroads, within specified time, to provide safety appliances, and some of the states, through enactments, have sought to secure greater freedom from accidents both to passengers and employes.

Notwithstanding the efforts that have been put forth, railway accidents have increased even when receipts from operations have diminished, when there was a falling off in the number of passengers carried and when there was a material decrease in the number of tons of freight carried.

The list has simply become appalling, and the proper authorities in the states and in the nation have earnestly endeavored to prevent, so far as possible, the great loss of life and limb upon our railroads.

In some respects the report for the year ending June 30, 1900, gives assurances that conditions are improving. The results of the year's operations are by no means what they should be, however. 21,357 passengers, employes and other persons killed and injured is by far too great a number to convince the thoughtful man that all has been done that can be done to prevent these thousands of casualties, the killing and maiming of so many persons.

If every engineer, every conductor, every brakeman, switchman and other employe, down to the common trackman, were to exercise the utmost caution during the coming year, and if the passengers were to observe the rules which are put up in conspicuous places, with reference to their own safety, it is not presumptuous to assume that the report for the next year would show at least a 50 per cent. reduction in the number of fatal and non-fatal accidents.

There are not many collisions between trains that are not directly or indirectly attributable to the carelessness of some employe. It is a great responsibility that one assumes in the despatching of trains. Human nature is so exceedingly weak that there are few men comparatively, that have the capacity or the presence of judgment to enable them to act with unquestionable prudence at all times in the position of train despatcher.

What can be said of the train despatcher, can also be said of the telegraph operator, who makes out and delivers the orders and gives the signals with reference to the passing of trains. Every order that is given and executed carries with it the safety or destruction of human life. This fact alone ought to cause the most searching inquiry by the railroad companies as to the capability of the individual selected for so responsible a position as train despatcher or operator.

The question of a high salary should not stand in the way, for the passenger can well afford to pay an additional charge, if he can be assured that those who hold his life in their hands are exhibiting the utmost care in the discharge of their responsible duties.

One serious difficulty that is encountered in the accidents which occur is in placing the responsibility upon the right person. When the accident has occurred and the trains have collided, when human life has been destroyed, when permanent injuries have been incurred and hundreds of thousands of dollars worth of property destroyed, it is usually the case that an investigation has to be made to ascertain who is responsible.

Fear of the extreme punishment of the law, apprehension as to losing his position, or some other cause usually prevents the person who is actually responsible for the accident from acknowledging it. One employe charges it to another, who denies it and charges it to somebody else. As a matter of fact, some scheme ought to be devised

as a result of railway management, by which it would be possible to fix at once the responsibility for the accident.

So carefully are the accounts of railroads kept, that although there may be many thousands of accounts sent into the controller's or the auditor's office each month, yet if there is an error in a single one of them, the accounting department, through the employment of its expert accountant, is able to locate the error and to correct it, and through the process thus employed to determine with facility what clerk or other employe made the error.

If railway officers and employes were as careful with human life and limb as they are with their accounts, it would seem that the responsibility for railroad accidents which occur could be more easily ascertained than it is at the present time. With the use of signal stations and the block system, with a perfect record of the time of the passing of trains at each station, and with positive rules established and faithfully observed by all employes, there would not only be greater freedom from accidents, but railway managers would be better able to ascertain the employe through whose negligence or recklessness the accident occurred, and to place in his position some one who would observe the rules of the company and exhibit the utmost care and integrity in their execution.

Passengers Killed.

In making comparisons of the accidents which have occurred this year with those of the previous year, it is deemed proper to exclude from the report for this year the casualties on the New York Central and Hudson River Railroad, as the report of that company has not heretofore been filled in this office.

Excluding, therefore, the data given by the New York Central and Hudson River, we find that the number of passengers killed during the year was 30, while for the previous year the number was 74. This constitutes the most favorable exhibit that can be found in the tables in which railway casualties are assembled and classified for this year.

Of this number, 2 were killed on the Baltimore and Ohio; 2 on the Central Railroad of New Jersey; 9 on the Delaware, Lackawanna and Western; 4 on the Erie; 1 on the Lake Shore and Michigan Southern; 2 on the Lehigh Valley; 2 on the Pennsylvania; 2 on the Pennsylvania Company; 3 on the Philadelphia and Reading; 2 on the Philadelphia, Wilmington and Baltimore, and 1 on the Pittsburg, Cincinnati, Chicago and St. Louis.

The Lehigh Valley this year, as before indicated, reports but 2 killed, while in its report for last year it showed that 16 of its pas-

sengers were killed. Last year the Pennsylvania had 8 of its passengers killed, and but 2 this year.

One serious accident such as that which occurred on the Philadelphia and Reading last year would have increased the number of passengers killed to about what it was last year, for it will be remembered that the Philadelphia and Reading, while it has but 3 passengers killed to report this year, last year reported 32. It would seem, therefore, when these comparisons are made with previous years that it has been merely a streak of good luck that no more passengers have been killed this year, and that we cannot safely assume that the hazard is less. This too, in view of the fact that there have been many more passengers carried this year than last.

The number of passengers carried this year was 178,123,541, and the number of passengers killed being 30, there were 5,937,451 passengers carried for each one killed, while in the previous year when there were 161,434,854 passengers carried, and 74 killed, there were only 2,183,038 carried to each one killed.

Number of Passengers Injured.

The total number of passengers injured was 1,137, and the total number carried being 178,123,541, there were 156,660 carried to one injured. This is something of an improvement over the figures for last year, for, although there were more passengers injured this year than last, there were only 147,842 passengers carried last year to 1 injured.

Of the passengers injured, 71 were on the Baltimore and Ohio; 53 on the Central Railroad Company of New Jersey; 114 on the Delaware, Lackawanna and Western; 121 on the Erie; 378 on the Pennsylvania; 57 on the Pennsylvania Company; 40 on the Philadelphia and Reading; 63 on the Philadelphia, Wilmington and Baltimore, and 96 on the Pittsburg, Cincinnati, Chicago and St. Louis.

Employes Killed.

One hundred and two of the employes of the Baltimore and Ohio were killed during the year; 39 on the Lake Shore and Michigan Southern; 29 on the Lehigh Valley; 216 on the Pennsylvania; 59 on the Pennsylvania Company; 55 on the Philadelphia and Reading, and 44 on the Pittsburg, Cincinnati, Chicago and St. Louis. The number killed on other roads was small.

The total number killed was 795 as against 655 for the previous year. Last year there were 453 employed to one killed, and this year 347 employed to one killed.

Employees Injured.

The total number of employes injured during the year was 14,784; last year the number was 13,508. Therefore, this year there were 18 employed to one injured, while last year there were 19 employed to one injured.

The Baltimore and Ohio reports 1,691 employes injured; the Buffalo, Rochester and Pittsburg 320; the Delaware, Lackawanna and Western 210; the Erie 1,515; the New York, Chicago and St. Louis 542; the Pennsylvania 3,871; the Pennsylvania Company 2,558; the Pittsburg, Cincinnati, Chicago and St. Louis 1,365.

As before indicated, the casualties of the New York Central and Hudson River Railroad have been excluded from the above calculations. When this road is included it is found that the total number of passengers killed during the year was 40, and as there were 205,939,884 passengers carried, it would follow that there was one passenger killed for every 5,148,497 carried.

There were 1,198 passengers injured, and therefore one injured to every 171,068 carried.

There were 914 employes killed, and as there were 307,737 men employed there was one employe killed to every 336.

Fifteen thousand one hundred and sixty-six employes were injured. There was, therefore, one employe injured to every 20 employed.

Other Persons Killed

Under this heading is given the number of persons killed who were neither employes or passengers. As before seen, there were 30 passengers and 795 employes killed this year, and yet of other persons killed there were 1,451, nearly double the number of passengers and employes.

On the Baltimore and Ohio there were 135 killed; on the Buffalo, Rochester and Pittsburg 24; on the Delaware and Hudson 47; on the Delaware, Lackawanna and Western 52; on the Erie 148; on the Lake Shore and Michigan Southern 108; on the Lehigh Valley 66; on the New York Central and Hudson River 231; on the Pennsylvania 313; on the Pennsylvania Company 60; on the Philadelphia and Reading 137; on the Pittsburg, Cincinnati, Chicago and St. Louis 74.

Who are these persons, and who is to blame for this wholesale destruction of life? It is simply appalling. Some of them are suicides, and they may be said to be responsible for the loss of their own lives; certainly such of the number as were sane at the time of the commission of the offense of self destruction. The railway

management can in no way be held responsible for the loss of life through suicide.

How many of them were inebriates or common drunkards is a matter of conjecture, but a casual reading of the daily papers will carry conviction to almost any one that many of the men who are killed on or along the tracks of a railroad, become intoxicated and fall or lie down on tracks to sleep off a drunk. The railroad companies cannot be held responsible in these cases, for in any such case life has been destroyed as a result of intoxication and trespassing on the right of way of railroads, and the responsibility can be divided between the liquor seller and the worshipper at his shrine.

That a large number of these persons have been killed at grade crossings is shown by the reports, and the daily accounts of accidents that occur establishes the fact that one of the most prolific causes of the destruction of life in the operation of railroads is the grade crossing. This subject has been referred to so many times in the annual reports of this office that it seems like "line upon line, and precept upon precept" to refer to it again.

The responsibility for the loss of life at grade crossings, after we eliminate the element of lack of care, both on the part of the person killed and the railway employes, is fairly divisible between the public authorities and the railway managers.

The railway manager who hesitates to join the proper authorities in eliminating grade crossings, is an enemy to the safety of the people, and the public authorities, whether of township, borough, municipality, county, or state, that do not do their utmost to eliminate grade crossings now existing and to prevent them in future, should be held responsible for the loss of life that annually occurs as a result of their existence.

Other Persons Injured.

During this year there were 2,161 other persons injured on the several lines of railroad. Of this number 184 are reported by the Baltimore and Ohio; 249 by the Erie; 107 by the Lake Shore and Michigan Southern; 120 by the Lehigh Valley; 483 by the Pennsylvania; 130 by the Pennsylvania Company; 155 by the Philadelphia and Reading, and 137 by the Pittsburg, Cincinnati, Chicago and St. Louis.

The distinguishing feature about the number of other persons killed and injured in the operation of railroads, and by this is meant persons neither passengers nor employes, is that while there was a very small percentage of passengers killed to passengers injured,

and a small percentage of employes killed to employes injured, yet a comparison of reports made for years will show that the number of other persons killed is nearly as great as the number of other persons injured.

There is some disparity this year in the number of other persons reported killed and the number reported injured. This indicates that the suicide and the drunkard contribute in a great degree to the fatal accidents, and it is presumed that the proportion of fatal to non-fatal accidents occurring at grade crossings is greater than the proportion of fatal to non-fatal accidents to passengers and employes.

Total Number Killed and Injured.

Two thousand two hundred and seventy-six represents the total number of the three classes, to wit: passengers, employes and other persons, killed. Eighteen thousand and eighty-two represents the number injured.

When we include the New York Central and Hudson River Railroad, we have 1,682 other persons killed, and 2,357 other persons injured, making a total of 2,636 killed and 18,721 injured, or a total of casualties, fatal and non-fatal, of 21,357. It is a sad chapter, and ought to admonish all concerned as to the necessity of the greatest care possible and the adoption of the most improved safety appliances, in order that passengers, employes and other persons may be relieved from the great hazard that now exists.

Great as is the hazard, when compared with the immensity of traffic, both passenger and freight, the millions of persons carried and the hundreds of thousands of men employed, we have another side to the question. But however bright the present conditions may be made, everyone knows that it is possible to make the most decisive improvements, and all that legislation can do, all that state or national supervision can accomplish, and all that the most conservative railway manager can suggest, should be considered in bettering existing conditions.

NATIONAL CONVENTION OF RAILWAY COMMISSIONERS,
HELD AT MILWAUKEE, WISCONSIN, MAY 28 & 29, 1900.

The Secretary of Internal Affairs and the Superintendent of the Bureau of Railways attended the National Convention of Railway

Commissioners and Members of the Interstate Commerce Commission, held at Milwaukee.

These conventions have been held annually since 1889, the first one having met in the city of Washington, with the Interstate Commerce Commission. Until within the last three or four years they have been held continuously in Washington.

The questions in relation to transportation, adjustment of rates, and state and national supervision are of so much importance, that it has seemed necessary that there should be annual conferences of the officials of the several states with the members of the Interstate Commerce Commission, in order that there might be harmony of action in the discharge of the duties imposed by law upon those who are charged with the supervision of the common carriers.

As a result of these annual conferences or conventions, the laws in the several states have been somewhat assimilated, though there are still great differences. In some states full power is given railway commissioners to establish rates, supervise construction of roads and branches, enforce the use of safety appliances, establish rules with reference to the crossing of railroads, and in some states to prohibit the use of grade crossings, while in other states only a part of the authority so conferred is given.

There is no doubt that great good has been accomplished as a result of holding these conventions, and they are most highly to be commended.

An examination of the subjects which were considered at the National Convention at Milwaukee will carry conviction as to the desirability, if not the necessity of co-operation between the different states of the Union on the important questions concerning transportation.

The program arranged for the convention was as follows:

1. Roll call of delegates by states.
2. Address by the chairman of the convention, the Hon. Cicero J. Lindly.
3. Submission of reports of standing committees.

Under this caption a report was made on railway statistics by Mr. Adams, Statistician of the Interstate Commerce Commission, and Professor of Political Economy at the University of Michigan.

The report of the committee on uniform classification of freights was read by Judge Spencer R. Atkinson, of Georgia.

The report on powers, duties and work of railway commissions was read by Secretary of Internal Affairs, James W. Latta, of Pennsylvania.

The committee on classification of construction expenses was represented by Hon. A. K. Tiesburg, of Minnesota.

The report of the committee on legislation, in the absence of its chairman, Hon. Martin K. Knapp, chairman of the Interstate Commerce Commission, was read by Mr. Brown, Superintendent of the Bureau of Railways of Pennsylvania.

The report of the committee on delays attendant on enforcing orders of railway commissioners was presented by Mr. E. A. Dawson, Commissioner of the state of Iowa.

The report of the committee on safety appliances was presented by Hon. T. J. Hennessey, Commissioner of the state of Missouri.

The report of the committee on grade crossings was presented by Hon. W. T. La Folette, of South Dakota.

The report of the committee on plans for ascertaining the fair valuation of railroad properties, of which the Hon. John H. Regan, of Texas, was chairman, was presented in the form of a letter from Mr. Regan, who was unavoidably absent from the convention.

The next convention of Railway Commissioners will be held in June, 1901, in the city of San Francisco.

STREET RAILWAYS.

The pedestrian must be considered as having solved the first problem in transportation. Just in what order the introduction of innovations came history does not inform us. Different kinds of animals were certainly employed to facilitate transportation while the rivers, lakes and seas early became an important basis of transportation in the use of the canoe and the more pretentious craft. However crude the means of transportation were in the early history of the world, and however little may be found in history to show the change from one means to another, it is apparent to every student that the nineteenth century has furnished the brains, activity and genius that have done so much to solve this problem, and have contributed more in a single century than had been accomplished in all the past history of the world. In the last few years the means of local transportation have materially changed. It is not a quarter of a century since the horse was probably the most important factor in local transportation. By this is meant the power by which persons and commodities were carried through the cities and from the cities to

suburban localities and for short distances in the country. All vehicles were drawn by this power, and it has certainly been but a short time since the street cars were drawn by the faithful horse. In the last few years electricity has largely supplanted the horse as the power in local transportation. And no sooner had this new power, electricity, been introduced, than the bicycle appeared, apparently as a competitor of the street railway, and it indeed seemed at one time as if the use of the wheel would seriously impair the capitalization of these organizations and the value of the investment. There has been a pause, however, in the onward march of the wheel, and it is probable that to-day there are not more than one-half as many in use as there were three or four years ago. As the introduction of the bicycle seemed to encroach upon the receipts of the street railways, so the partial passing of the bicycle seems to inure to the benefit of these corporations, as indicated by the figures returned for the present year, for it may be assumed, that the increased earnings are due in part to the diminution in the use of the wheel. Now a new invention has made its appearance and will no doubt become a competing factor in local transportation. It is the automobile. To what extent this new vehicle will encroach upon the domain of the street railway is, of course, a matter of conjecture, but that it is likely to prove a factor in transportation in the future cannot be gainsaid. In the larger cities the automobile is now in constant use as a pleasure carriage, omnibus and delivery wagon. It glides almost noiselessly through the streets with a speed that is limited only by the city ordinances. There is unquestionably a great opening for this vehicle, and it is not too presumptuous to say that within the next ten years it will largely take the place of other kinds of vehicles in the cities and suburban localities and possibly on the greater thoroughfares in the country. This invention is a fitting climax to the marvelous productions of the nineteenth century in the way of transportation agencies. The steamboat, invented by Robert Fulton, in the early days of the century, was the pioneer, and it has been followed by the steam engine, the electric motor, the bicycle and the automobile. All are products of the 19th century.

During the year there has been no material change in the financial or physical condition of the trolley railways of Pennsylvania. The rapidity that characterized the development of these corporations a few years ago is no longer present, and there seems to be more stability in the financial conduct of these enterprises. The financial promoter has not been able, therefore, to ply his vocation as successfully as formerly.

The affairs of the street railways are classified with reference to

liabilities, consolidated table A; assets, consolidated table B; income, consolidated table C; disbursements, consolidated table D; equipment, persons employed and passengers carried, consolidated table E; accidents, consolidated table F.

LIABILITIES.

The total amount of capital stock outstanding of the operating street railways reporting for the year is \$103,176,121. This amount comprises the stock of 94 companies. Last year the total amount was \$103,122,319. The corporations whose capital stock makes up the greater portion of this amount are, the Consolidated Traction Company of Pittsburg \$27,000,000, Union Traction Company of Philadelphia \$10,499,912, United Traction Company of Pittsburg \$20,000,000. More than half of the total amount belongs to these three corporations, and \$47,000,000 of it to the two corporations in Pittsburg.

Funded Debt Outstanding.

The total amount of funded debt reported for the year is \$38,975,100. Last year the amount was \$31,309,425. The Lehigh Valley Traction Company has bonds outstanding to the amount of \$3,000,000; Pittsburg and Birmingham Traction Company \$1,500,000; the Scranton Railway Company \$3,000,000; the United Traction Company of Pittsburg \$10,000,000; the Wilkesburg and East Pittsburg Street Railway \$2,000,000; the Wilkes-Barre and Wyoming Valley Traction Company \$1,819,000; making \$21,319,000, or more than one-half the entire amount of funded debt outstanding.

Total Amount of Current Liabilities and Total Capitalization.

The total amount of current liabilities for the year is reported at \$11,585,004, making the total street railway capitalization of operating companies \$153,736,225. If to this amount be added the Capital Stock outstanding amounting to \$68,094,525, and the funded and unfunded indebtedness of the companies whose lines are subsidiary to or operated by other corporations, amounting to \$21,764,354, the total capitalization is found to be \$243,595,104. As the total mileage of these corporations is 1,654, the capitalization per mile of

road is \$147,276, or over double the capitalization per mile of road of the steam railways of the United States.

ASSETS.

Cost of Road.

The assets of street railways are classified as follows: Total cost of road, Cost of equipment, Stock owned, Bonds owned, Cash and current assets, Other assets, Total assets. The total cost of roads as reported for the year is \$87,806.26. The companies contributing most largely to this amount are the following: Conestoga Traction Co., of Lancaster, \$3,401,100; Consolidated Traction Company of Pittsburgh, \$3,582,642; Monongahela Street Railway, \$2,079,418; Pittsburg and Birmingham Traction Company, \$1,372,288; Pottsville Union Street Railway, \$1,498,062; Scranton Railway Company, \$4,570,535; United Traction Company of Pittsburg, \$29,575,641. The latter amount, however, includes cost of equipment, as this company for some reason or other fails to divide the cost of road and equipment in a manner that will show the separate accounts. Union Traction Company of Philadelphia, \$1,899,252; West End Traction Company of Pittsburg, \$5,526,691; Wilkinsburg and East Pittsburg, \$2,942,414; Wilkes-Barre and Wyoming Valley Traction Company, \$6,645,943. The total cost of road last year was \$87,411,512.

Cost of Equipment.

The total cost of equipment reported for the year is \$12,334,380. Last year the amount was \$9,128,533, but the cost of equipment of the Consolidated Traction Company of Pittsburg is not included in this amount.

Stocks Owned.

The Chester Traction Company reports ownership of \$200,108 of the stocks of other companies; Conestoga Traction Company reports \$698,400; Consolidated Traction Company of Pittsburg, \$22,182,765; Erie City Motor Company, \$300,000; Harrisburg Traction Company, \$1,870,000; Lehigh Valley Traction Company, \$200,200; New Castle Street Railway, \$500,000; Pittsburg and Birmingham Traction Company, \$1,003,812; Schuylkill Valley Traction Company, \$481,049; Scranton Railway Company, \$908,942; Union Traction

Company of Philadelphia, \$5,191,756; United Traction Company of Reading, \$222,983.

Bonds Owned.

The total amount of bonds owned by operating companies is \$1,330,500. Of this amount the Schuylkill Valley Traction Company owns \$130,500 and the Union Traction Company of Philadelphia, \$325,000.

Cash and Current Assets.

The total amount of cash and current assets reported for the year is \$12,014,131. Last year the amount was \$4,808,086. These figures show an apparent increase in operating capital of several millions of dollars.

Other Assets.

The total amount of other assets reported by the operating companies for the year is \$9,017,579. The Altoona and Logan Valley Street Railway reports \$392,444; the Conestoga Traction Company \$826,000 (which is represented as a franchise); Greensburg, Jeanette and Pittsburg Street Railway \$399,650; the Lehigh Traction Company \$1,000,000; the Lehigh Valley Traction Company, \$2,580,606; the Meadville Traction Company \$350,000; the Pittsburg and Birmingham Traction Company \$2,900,043. These assets are principally franchises.

Total Assets.

The total amount of assets reported for the year is \$156,368,465. Last year the amount was \$149,934,302. By adding the assets of subsidiary companies, or those whose lines are operated by other corporations, amounting to \$80,186,452, it will be seen that the total assets of the street railway corporations of Pennsylvania are \$236,554,917.

INCOME.

In Consolidated Table C there is a classification showing the income of street railways as follows: Gross earnings from operations; Income from other sources; Total Income. The gross earnings from operations for the year are reported at \$23,883,508, as against \$21,646,808 last year. The companies reporting gross earnings from operations upwards of \$500,000 are the Consolidated

Traction Company of Pittsburg, \$2,733,910; Pittsburg and Birmingham Traction Company, \$533,177; Union Traction Company of Philadelphia, \$13,033,970; United Traction Company of Pittsburg, \$1,783,461; Wilkes-Barre and Wyoming Valley Traction Company \$570,266. The receipts of the companies named, it will be seen, cover a very large percentage of the total amount of income from operations.

Income from Other Sources.

From other sources than operation the Consolidated Traction Company of Pittsburg received \$19,193, the Harrisburg Traction Company \$39,519, the Pittsburg and Birmingham Traction Company, \$99,278; the Union Traction Company of Philadelphia, \$215,849; United Traction Company of Pittsburg, \$33,225; United Traction Company of Reading, \$81,973. The total amount of income received from these companies and all other street railway companies from other sources than operation was \$593,673.

Total Income.

The total income of all the street railways in Pennsylvania during the year was \$24,477,181. Last year the amount was \$22,569,256. There are several large steam railway corporations in the State whose receipts from operations fall considerably below the receipts of some of the street railway companies. When it is understood that the source of revenue of these corporations is practically from passengers alone, and that the amount received from each passenger is very small, the total income seems exceedingly large. Few industries have increased their receipts with the same velocity as the street railways. They have certainly become a very important interest in commercial world.

Relative to the income and expenditures of street railway corporations, it is of interest to compare the operations of one of these street car companies with others that are similarly located. It would be unreasonable to compare a street railway in Harrisburg with the Union Traction Company of Philadelphia, or the Consolidated Traction Company of Pittsburg, but there is interest in comparing the street railways of the Commonwealth whose capitalization, mileage, income and expenditures are similar.

A table had been arranged and is published herewith, relating to the Harrisburg Traction Company, the Lehigh Valley Traction Company, the Scranton Street Railway Company and the Wilkes-Barre and Wyoming Valley Traction Company, showing the capital stock, bonds and current liabilities of each; also the total capitalization, the mileage operated, the income per mile of road, the expenditures,

the expenditures per mile of road, the net income per mile of road, the percentage of expenditures to income, and the gross dividends.

There is considerably disparity in the total capitalization of these companies. The greatest capitalization is that of the Wilkes-Barre and Wyoming Valley, which has \$5,000,000 of stock outstanding, \$1,819,000 of bonds, with \$233,360, for current liabilities, or a total capitalization of \$7,052,360.

The smallest capitalization is in the case of the Harrisburg Traction Company with \$2,000,000 of capital stock, \$75,000 of bonds and \$47,069 of current liabilities, or a total of \$2,122,069.

The mileage operated ranges from 40½ miles in the case of the Harrisburg Traction Company, to 73.78 miles of the Scranton Railway Company.

From an examination of this table it will be seen that the income per mile of road operated, of the Harrisburg Traction Company is \$9,102, the expenditures per mile \$6,720, the net income per mile \$2,382, and the percentage of expenditures to income 73.82.

In the case of the Lehigh Valley Traction Company, the income per mile of road is \$6,334, the expenditures per mile of road \$5,242, the net income per mile of road \$1,092, and the percentage of expenditures to income 83.37.

The Scranton Street Railway Company has an income per mile of road of \$6,290, expenditures per mile of road of \$5,576, net income per mile of road of \$714, and a percentage of expenditures to income of 88.52.

In the case of the Wilkes-Barre and Wyoming Valley Traction Company the income is \$8,978 per mile of road, the expenditures \$6,964, the net income per mile of road \$2,014, and the percentage of expenditures to income 77.57.

Of these four roads, therefore, it will be seen that the Harrisburg Traction Company makes the most favorable exhibit. Its capitalization is the smallest by more than \$3,000,000; its income per mile of road is the greatest of all, and its net income per mile of road is also the greatest, while its percentage of expenditures to income, 73.82, is the least of all.

In any comparison that may be made of the Harrisburg Traction Company with other corporations under similar conditions, the results will be found to be similar to those indicated in the above table and the deductions made therefrom.

The management of this corporation in the interest of its stockholders and its employes and in its service to the public, is worthy of emulation.

Table Showing Capital Stock, Bonds, Current Liabilities Total Capitalization, Mileage Operated of Four Companies, with Gross and Net Receipts per Mile of Road, Percentage of Expenses to Receipts and Dividends Paid.

	Capital stock.	Bonds.	Current liabilities.	Total capitalization.	Mileage.	Income.	Expenses exclusive of dividends.	Income per mile of road.	Percentage of expenses to income.	Dividends paid.	Expenses per mile of road.	Net income per mile of road.
Harrisburg Traction Company..	\$2,000,000	\$75,000	\$47,069	\$2,122,069	40.50	\$368,645	\$272,147	\$9,102	73.82	\$100,000	\$6,720	\$2,823
Lehigh Valley Traction Co.,.....	1,700,000	2,000,000	257,017	5,059,017	51.89	828,676	273,027	6,334	83.37	5,242	1,082
Scranton Railway Company,....	3,000,000	2,000,000	139,585	6,139,585	78.78	464,807	411,450	6,290	58.52	5,576	714
Wilkes-Barre and Wyoming Valley Traction Company,....	5,000,000	1,819,000	232,361	7,052,360	64.00	574,645	445,751	8,978	77.57	150,000	6,964	2,014

DISBURSEMENTS.

Operating Expenses.

In consolidated table D is given a classification of disbursements of operating street railways, as follows: Operating expenses, taxes, interest on funded debt, rentals, other expenses, dividends, total disbursements. The total amount expended for operations during the year was \$12,114,609, as against \$10,519,810 last year. Of this amount the Consolidated Traction Company of Pittsburg paid \$1,341,565, and the Union Traction Company of Philadelphia \$5,624,898.

Taxes.

The total amount of taxes paid during the year was \$1,579,284. Last year the amount was \$1,314,470. The increase in this amount is no doubt due to the increased valuation of the capital stock, the 5 mill tax being based on the market or appraised value of the stock. During the last two or three years there has been a marked increase in the market value of all kinds of stocks but no material increase in the par value. While it is known that the street railways are an important factor in the commercial world, it would also seem as if they were an important factor as a source of revenue for the maintenance of the State government. The Consolidated Traction Company of Pittsburg paid \$186,000 taxes, the Union Traction Company of Philadelphia \$1,023,266, and the United Traction Company of Pittsburg \$130,973, about two-thirds of the total amount paid.

Rentals.

The rentals paid during the year amounted to \$5,954,232. Last year the amount was \$6,237,691. The companies paying the heaviest rentals were the Chester Traction Company \$56,300, Consolidated Traction Company of Pittsburg \$229,080, Harrisburg Traction Company, \$61,655, Pittsburg and Birmingham Traction Company \$35,948, Union Traction Company of Philadelphia \$5,244,953, United Traction Company of Reading \$104,983.

Other Expenses.

Under this heading there was paid during the year \$398,326. Last year the amount was \$279,453. The Harrisburg Traction Company paid \$35,367, the Pittsburg and Birmingham Traction Com-

pany \$90,388, the Union Traction Company of Philadelphia \$46,528, and the United Traction Company of Pittsburg \$12,804.

Dividends.

Of the total number of operating companies there are only 20 that pay dividends. They are the Beaver Valley Traction Company \$6,000; Chester Traction Company \$2,500; Connellsville, New Haven and Leisenring Street Railway, \$1,750; Connellsville Suburban Street Railway \$5,000; Consolidated Traction Company of Pittsburg \$649,806; Delaware County and Philadelphia Street Railway \$36,000; Harrisburg Traction Company \$100,000; Holmesburg, Tacony and Frankford Street Railway Company \$10,500; Johnstown Street Railway \$23,193; People's Street Railway Company of Nanticoke and Newport \$2,000; Pittsburg and Birmingham Traction Company \$90,000; Roxboro, Chestnut Hill and Norristown Street Railway \$15,872; Stroudsburg Street Railway \$1,384; Tamaqua and Lansford Street Railway \$5,000; United Traction Company of Pittsburg \$150,000; United Traction Company of Reading \$24,000; West End Traction Company \$125,000; Wilkes-Barre, Dallas and Harvey's Lake Street Railway \$6,000; Wilkes-Barre and Wyoming Valley Traction Company \$150,000; York Street Railway Company \$6,552. There are 53 subsidiary companies that report payment of dividends, which of course is derived from rentals received. The amount of such dividends is \$5,427,590.

Total Disbursements.

The total disbursements for the year were \$23,976,312, as against \$21,788,663 last year. This amount includes all dividend payments.

**EQUIPMENT, MILEAGE, NUMBER OF PERSONS EMPLOYED
AND PASSENGERS CARRIED.**

Mileage.

The total mileage of the street railways of Pennsylvania is 1,654, as against 1,493 reported last year. While there has been no material increase in the capitalization of these corporations, it will be seen that about 160 miles were added to the total mileage. The companies having the greatest mileage are the Consolidated Traction Company of Pittsburg 68.06 miles; Harrisburg Traction Company 40.50 miles; Lehigh Valley Traction Company 51.89 miles; Union Traction Company of Philadelphia 336 miles; United Traction Company of Pittsburg 102 miles; United Traction Company of Reading 48 miles; Wilkes-Barre and Wyoming Valley Traction Company 64 miles.

Aggregate Length of all Tracks Operated.

The total length of all tracks, including sidings and switches, is reported for the year as 1,898.69 miles. Last year the total was 1,812.94 miles. These figures indicate that the mileage of the street railways is materially increasing.

Total Number of Cars.

The total number of cars in the service of the street railways of Pennsylvania during the year was 6,395. Last year it was 5,864. The Consolidated Traction Company of Pittsburg reported 508; Harrisburg Traction Company 103; Lehigh Valley Traction Company 86; Pittsburg and Birmingham Traction Company 78; Scranton Railway Company 145; Union Traction Company of Philadelphia 3,157; United Traction Company of Pittsburg 344, and the Wilkes-Barre and Wyoming Valley Traction Company 160.

Total Number of Employees.

The total number of employes reported for the year is 14,798. Last year it was 12,506. It will be seen from these figures that the street railways are not only a factor in the matter of transportation, but are also of great importance to the laboring classes as a source of employment and give fair return for services rendered. The Consolidated Traction Company of Pittsburg employs

1,563; the Union Traction Company of Philadelphia 7,222, and the United Traction Company of Pittsburg 994.

Compensation of Employes.

The total amount paid to street railway employes during the year was \$8,043,589. Last year the amount was \$6,569,204. The Consolidated Traction Company of Pittsburg paid \$895,900; Union Traction of Philadelphia \$3,934,835; United Traction Company of Pittsburg \$593,763; United Traction Company of Reading \$102,056; Wilkes-Barre and Wyoming Valley Traction Company \$178,181.

Total Number of Passengers Carried.

The total number of passengers carried during the year was 538,194,532. Last year the number was 473,313,258. An idea of the great number of persons who ride on the street cars will be gained when it is known that the number carried in one year is about seven times as great as the population of the United States.

ACCIDENTS.

Consolidated table F contains a classification of accidents, as follows: Passengers killed, passenger injured, employes killed, employes injured, other persons killed, other persons injured, total killed, total injured. As the result of the operation of the street railways during the year 28 passengers were killed, as against 17 last year. This is at the rate of one passenger to each 19,221,233 carried. One was killed on the Allentown and Lehigh Valley Traction Company, 1 on the Bradford Street Railway, 2 on the Consolidated Traction Company of Pittsburg, 1 on the Lebanon Valley Street Railway, 1 on the Monongahela Street Railway, 1 on the Montoursville Street Railway, 2 on the Olean, Rock City and Bradford Street Railway, 1 on the Schuylkill Valley Traction Company, 12 on the Union Traction Company of Philadelphia, 3 on the United Traction Company of Pittsburg, 1 on the West End Traction Company and 2 on the Wilkes-Barre and Wyoming Valley Traction Company.

Passengers Injured.

The passengers injured were as follows: 33, Chester Traction Company; 110, Consolidated Traction Company of Pittsburg; 24,

Erie City Motor Company; 49, Lehigh Valley Traction Company; 69, Scranton Railway Company; 225, Union Traction Company of Philadelphia; 74, United Traction Company of Pittsburg; 50, Wilkes-Barre and Wyoming Valley Traction Company. The number of persons injured on all the lines in the State was 780. Last year the number was 484. One passenger was injured to every 689,990 carried.

Employes Killed.

There were only 6 employes killed during the year. One to each 2,499 in the service. Last year the number killed was 3.

Employes Injured.

During the year 94 employes were injured. One in each 157. These figures indicate very clearly that the hazard for employes is not nearly so great on the street railways as on the steam roads, as 1 employe in every 20 on the steam railways was injured.

Other Persons Killed.

During the year 107 persons other than passengers or employes were killed. Last year the number was 77. These persons were run over by the cars, or in some other way lost their lives in connection with the operation of the street railways.

Other Persons Injured.

During the year 567 persons other than passengers or employes were killed. Last year the number was 504.

Total Number of Persons Killed and Injured.

The total number of persons killed during the year was 141. Last year the number was 97. The number injured was 1,441; last year 1,127. The total number killed and injured for the year was 1,582.

Table of Subsidiary Roads.

An additional consolidated table has been prepared in which is given a list of the companies in existence whose lines are leased and operated by other corporations. The data is classified as follows: Capital stock outstanding, funded and unfunded indebtedness, cost of road and equipment (not included in report of lessee company); income and other assets from rental of road and other sources, dividends paid, other disbursements. In many cases these roads have been practically merged into other corporations. Separate organizations are maintained, and they are classified as above indicated as subsidiary roads.

TELEGRAPH AND TELEPHONE COMPANIES.

There are 130 telegraph and telephone corporations whose reports are filed in this office for the year ending June 30, 1900. Reference is made to the published briefs of these reports for any information that is desired.

Within the last three or four years there has been a wonderful increase in the incorporation of telephone companies and in the extension of the wires devoted to their use.

All the large towns are now connected by telephone, and it is probable that within ten years practically all of the smaller villages in the Commonwealth will have telephonic connection with the rest of the country.

It is a great enterprise in the State, and millions of dollars are invested in the way of capitalization of telephone companies, while employment is given to many people. The distinguishing feature between the employes of telegraph and telephone companies is that the large majority in the services of telephone companies are ladies.

The service has been greatly advanced within the last two years by the abandonment of the old wires, and the substitution in their place of the metallic system of wires, which renders the transmission of the voice much more distinct and accurate. While it may be possible to make the present system more perfect, yet the service now given to the public is so satisfactory that there is little room for fault finding.

It is probable that within the next four or five years the process of consolidation and merger which has characterized other similar corporations in the state, will take place among the numerous telephone companies now doing business in Pennsylvania. Unrestricted competition will probably lead to such consolidations and mergers.

This may result in an improvement of the service to the public, but every corporation that renders a public service should, to some extent, be restricted in the amount of its charges for performing such public service, as a protection against extortion. Fair and reasonable charges should always be expected, but extortion should, with as much certainty, be prohibited.

Tunnel of the abandoned Union Canal near Lebanon, Pa.

THE CANALS OF PENNSYLVANIA.

There are but four canals now in operation within the limits of Pennsylvania. Their reports have been regularly filed and are published herewith.

Pennsylvania has been a most progressive state in the way of internal improvements. The problem of transportation was more difficult of solution in this State than in many of the other states. When transportation was by water that state which had the most formidable mountains to traverse found transportation problems the most difficult of solution.

When the State authorities in Pennsylvania, early in the commencement of this century, undertook a general system of public improvements, they exhibited a determination to forward the development of the material interests of the State which reflects the highest credit upon them.

The account of those public improvements furnishes one of the most interesting volumes in American history. And while there is but a vestige now of the formidable works and public improvements which were constructed from 60 to 75 years ago, still the millions which were expended through private enterprises and through appropriations directly from the State Treasury, seem to have been stepping stones that led to that most complete system of railway transportation which now exists in this State.

In some cases there may have been realization on the individual investments made in those enterprises which were of a personal character as contradistinguished from those of a public character, or those owned by the State, yet the scheme was a most commendable one, for when completed it mingled the waters of the lakes with those of the Allegheny, the Susquehanna, the Schuylkill and the Delaware, and furnished a means of transportation for the commodities produced throughout the entire state, or at least in the territories adjacent to these water ways. But, as before indicated, these public improvements have generally gone into decay, and there is but a single page left to show what at one time was the most formidable system of public improvements that then existed in any state of the Union.

It has seemed entirely fitting that a brief history should be prepared and published with this report, giving so far as possible, the origin, the rise and the decay of these public improvements. To this

end the Bureau of Railways publishes herewith an exhaustive article on this subject from the pen of the Hon. Theodore B. Klein. Mr. Klein was employed in the construction, operation and maintenance of the system of public improvements hereinbefore referred to. He served with distinction as a member of the Pennsylvania Legislature, and his familiarity with the subject is of such a character as to add materially to the value of the article he has prepared and which is published herewith. Mr. Klein is now Chief Clerk of the Department of Internal Affairs.

Mr. Klein's article is illustrated by a number of photographs showing the ruins of portions of the old system of public works, and with some views of portions of canals and the locks where the canals are still being operated.

THE CANALS OF PENNSYLVANIA, AND THE SYSTEM OF INTERNAL IMPROVEMENTS OF THE COMMONWEALTH.

By Theodore B. Klein.

In view of the fact that the days of inland navigation by the channels of the rivers and canals are passing away (being superceded by the later and improved mode of high class rapid transit, steam railroad transportation), it is fitting in this last year of the present century to review the history of the system of internal improvements projected and constructed by the several corporations (that took the initial steps in the early days of the century), and the Commonwealth that took an interest in the system and by the liberal expenditure of money responded to the demands of the public voice and in a short time took great strides in the right direction to develop the resources of a great State. Although the hundreds of miles constructed by the Commonwealth seventy years ago have been abandoned and are now lying in ruins, it is generally conceded that these works were not built in vain, but have directly and indirectly proved of much value in developing many portions of the State, and have added materially to her wealth, thus refunding to the Treasury the amounts expended in their construction.

The new lines that have taken the place of those of the early days, in a majority of instances, follow closely the lines of the natural

Trimmer's Rock, east of Newport, Pa., showing Junata River, abandoned Canal, and Pennsylvania Railroad; also abandoned location of railroad.

water ways; and the traveler, as he is now conveyed in luxurious parlor cars, may view the river upon whose waters the small craft of the Indian and the early trader passed to and fro, and in the immediate foreground the channel of the main line of canal which served in the transportation of great quantities of grain, lumber, flour and coal in later years, and as space is annihilated by the famous steam horse behind which he is traveling he passes long trains of steel pressed cars laden with coal and coke, and oil and grain, the products of the nation, even from the Pacific coast, hurrying by, bound for the seaboard, to be reshipped to, and distributed in every quarter of the globe, thus taking in at one view the wonderful development and expansion in the line of transportation during the century just closing.

The states upon, and connected with, the Atlantic coast were alive with the spirit of internal improvements, and with a prophetic anticipation were anxious to reach toward the western empire that was to become the promised land and furnish the food for the world and be the great reservoir from which would flow the tonnage to be transported to the sea coast in endless quantities. At that early day, before railroads and steam power were developed, water communication was the popular mode of commercial transportation, and therefore the construction of the grand system of canals to connect the Ohio river with the seaboard, to develop the regions on the Lehigh and Delaware rivers and the various branches of the Susquehanna river, were required to transport the products of the several territories to the metropolitan seaport city of Pennsylvania. It was a grand idea, which William Penn himself fostered and recommended in his scheme to connect the Susquehanna at Middletown, with Philadelphia by way of the Schuylkill, the Lebanon and Swatara valleys, uniting the waters of the Schuylkill river at Reading with those of the Tulpehocken creek which flowed from its head waters springing from the foot of the dividing ridge near Lebanon, at which point the summit had to be pierced to catch the headwaters of the Quittapahilla which flowed into the Swatara ten miles to the westward, and thence into the Susquehanna at Middletown.

In March, 1761, Joseph Fox, John Hughes, Samuel Rhoads, John Potes, William Palmer, David Davis, Mordecai Moor, Henry Pawling, James Coultas, Jonathan Coates, Joseph Millard, William Bird, Francis Parvin, Benjamin Lightfoot and Isaac Levan were constituted and appointed commissioners for clearing, scouring and making the river Schuylkill navigable, with full power and authority by virtue of the Act of Assembly of the above date to take, collect, recover and receive of and from any person or persons whatsoever, any sum or sums of money which are or shall hereafter be given, granted

or subscribed, for making the river Schuylkill navigable and passable for boats, flats, rafts, canoes and other small vessels, from the ridge of mountains commonly called the Blue Mountains to the river Delaware. This action was the inaugural step in the formation of the great Schuylkill Navigation Company whose works are monuments of skill from an engineering point of view, developing the great Schuylkill Valley and the inexhaustible mines of coal not dreamed of in the time of the Penns, and the commissioners appointed to render the waterway of the valley capable for the transportation of the millions of tons of the "black diamonds" which were in after years to be consumed in the furnaces, mills, factories and houses of the nation. The broad river itself in many portions was concentrated into pools forming a slack water navigation and these pools were connected by sections of canals with a depth of six feet of water, passing boats with a capacity of 200 tons. The line extended from Philadelphia up the river to the Schuylkill county coal region, via Reading, and many other thriving towns, all of which were to a greater or less degree developed and built up by the influence of the Navigation Company's line along the Schuylkill river.

During the succeeding years in the infancy of the Commonwealth public interest was being developed and preparing for the undertakings looking to the development of the outlying territory. Governor Thomas Mifflin in his message to the Legislature in 1790, said:

"The very laudable attention paid to the survey of roads and rivers is a conclusive proof of the importance of the object, while it furnishes an example highly deserving of your imitation. Every day, indeed, produces an additional incentive to persevere in improvements of this kind. The commercial policy of insuring the transportation of our produce from the interior counties to the capital is dependent upon the ease and facility of the communications that are established throughout the State; and when we consider Pennsylvania not only as the route that actually connects the extreme members of the Union, but as a natural avenue from the shores of the Atlantic to the vast regions of the western territory, imagination can hardly paint the magnitude of the scene which demands our industry, nor hope exaggerate the richness of the reward which solicits our enjoyment."

A committee appointed in January, 1791, to examine the reports of Commissioners employed in exploring the western waters of the Susquehanna, the Delaware, etc., on the 19th day of February, of the same year reported as follows:

First. They considered the river Delaware as a most important channel for introducing the trade and produce, not only of the northern parts of the state, but as being capable of forming an easy

communication by a portage of 19 miles, with the northwestern parts of the state of New York, and extending by two other short portages to Lake Ontario. This river is capable of affording a safe boat and raft navigation from the extreme northern bounds of the State. By the estimates given, the expense will be about twenty-five hundred Pounds. The portage from the Delaware at Stockport, near the north line of the State, to Harmony, at the great bend of the Susquehanna, is 19 miles, the expense is about four hundred Pounds. Descending the Delaware we have considered the waters of the Lachawach and Lehigh as claiming public attention, yet as great benefit would immediately result from removing some of their obstructions. We think there may be allowed, for the Lachawach two hundred Pounds and for the Lehigh five hundred Pounds.

“The Schuylkill next presents itself, not merely in order as a branch of the Delaware, but as one of those great highways which at a future day will bear on its waters the immense produce and trade of the western country. This river is to be considered in a double point of view, first as a great natural channel, tending to the Metropolis from the upper waters above Reading, and thence joining a favorable country for an excellent road to the town of Harrisburg on the Susquehanna, by which means a ready and cheap communication may be formed. The expense of the Schuylkill to Reading is estimated at about fifteen hundred Pounds. The road from Reading to Harrisburg at five hundred Pounds.

“Secondly. Pursuing the Schuylkill up the waters of the Tulpehocken, it will be found they approach so near to the waters of the Quittapahilla leading down the Swatara to the Susquehanna river, that a canal and lock navigation force themselves into our notice, the expense of which is estimated at 18,650 Pounds. From this canal down the Swatara the expense is 250 Pounds. The expense of rendering the Tulpehocken navigable up to the water of the canal. is estimated at 11,290 Pounds. The canal from the head of Tulpehocken to Lechner’s Mill, 9,700 Pounds.” Having entered the Susquehanna, both at Harrisburg and at the mouth of the Swatara, a great scope of navigation presents itself. The expense of clearing the navigation of the Susquehanna to the northern boundary of the State, beyond which to its source at Lake Otsego there is no material obstruction, is as follows: From the mouth of the Swatara to the mouth of the Juniata 300 Pounds; from Juniata to West Branch to Great Bend 440 Pounds. Continuing the report an estimate was submitted for rendering the Juniata, Little Conemaugh and Kiskiminitas navigable and constructing a portage over the Alleghenies, which included a line from the mouth of the Juniata to Pittsburg, involving an expense of 10,010 Pounds, and the entire

expense of the whole system of internal improvements was estimated at 60,870 Pounds, a very moderate sum indeed, when in these days the same amount might be expended in a single mile of railroad or canal.

In accordance with the report and in sympathy with the popular voice, the sum of 25,720 Pounds was appropriated for the construction of water ways, removing obstructions from the rivers, and the building of roads to connect the links, forming the line of water communication.

Thus the system was started, and from this beginning grew the great main line of canal and its branches, upon which the Commonwealth spent large sums in their development, and fostered them with scrupulous care, until in the course of events, circumstances changed the system of transportation, steam was introduced as the motive power and rapid transit became the demand, when laboring under a debt of \$40,000,000 and a clamor for relief, negotiations were opened for the disposal of the public works, which was effected after a long parley, and in June, 1857, the canal and railroad forming the main line from Philadelphia to Pittsburg was sold to the Pennsylvania Railroad Company for \$7,500,000, and the branch lines were sold in May, 1859, for \$3,781,250, when the State was relieved of the great responsibilities of a common carrier and the finances of the Commonwealth placed upon a promising basis.

A detailed history, including the journal of the Canal Commissioners, of the difficulties attendant upon the location and construction of the public works, in the early days of the century, the various opinions and desires of individuals and communities as to the better place to locate the lines, and the demands of property owners to collect great sums for damages sustained and anticipated, and the negotiations required to adjust settlements, have filled nearly 7,000 pages of manuscript, as recorded in the Canal Commissioners' Journal, and ten times 7,000 more pages are covered with the claims and grievances and agreements and contracts and settlements and petitions, receipts and releases, complaints and maledictions, all of which demonstrate the fact that the Board of Canal Commissioners did not rest in beds of roses, but had, with the honor and responsibilities of their office, endless worry and annoyance.

After 1830 the Board consisted of three persons (whose term of office was three years), one of whom was elected each year, and party lines being closely drawn, the dominant party had among their number legions of applicants for place upon the public works, which became in numerous instances, cause for scandal, because of the abuse of confidence in some departments by the officials in charge.

Many distinguished men had a place in the Board of Commissioners

from time to time. In 1829, Nathaniel B. Eldred, afterward President Judge of the Capital District served in the Board. Thaddeus Stevens served a term, beginning in 1838. William F. Packer, afterward Governor of the State, served in 1839. George M. Hollenback was in the Board in 1842. William B. Foster, Jr., afterwards a prominent official of the Pennsylvania Railroad Company, was elected in 1844, and Jesse Miller, afterwards Secretary of the Commonwealth under Governor Francis R. Shunk, was a member of the Board at the same time, while Francis R. Shunk himself served as Secretary of the Board for a number of years. He was succeeded by Thomas L. Wilson who continued in the position until the Board was abolished. Mr. Wilson died February 28, 1861, and it is recorded of him, on the last page of the Commissioners' Journal, "He was a good man, thoroughly honest."

During the administration of John Andrew Shulze as Governor of the Commonwealth, beginning in 1823, the demand for a system of internal improvements was very strong, and in accordance therewith an Act of Assembly was approved March 27, 1824, providing for the appointment of a Board of Commissioners for the purpose of promoting the internal improvement of the State. "This act authorized "and required the Governor to appoint three Commissioners whose "duty it shall be to view and explore a route for a canal from Harrisburg to Pittsburg by the waters of the Juniata and Conemaugh "rivers, and also the route of the West Branch of the Susquehanna "and Sinnemahoning, with the waters of the Allegheny river, and also "the country between the Schuylkill and the Susquehanna, through "the great valley of Chester and Lancaster counties; and when these "are effected the Commissioners shall view and explore the route, beginning at a point on the Schuylkill river, in the county of Schuylkill, thence by Mahanoy creek, the river Susquehanna, the Moshannon or Clearfield and Black Lick creeks, the Conemaugh, Kiskiminitis and Allegheny rivers to Pittsburg, and who shall make report "to the Governor, accompanied with estimates of the probable expense of completing the same, the quantity of water at the terminal "levels, and the number of locks necessary, with such observations "as may tend to elucidate the subject."

This was the beginning of the State system of internal improvements, and it was a bold and startling step and probably more than likely stunned the three commissioners as they contemplated the task for them to study and prepare during one short summer. Rapid progress was made, however, and on the 11th day of April, 1825, Governor Shulze approved an act to appoint a Board of Canal Commissioners. The following is the preamble to the act: "Whereas, the establishment of a communication between eastern and western

waters of this State, and the lakes, by means of navigable streams and canals, would advance our agriculture, commerce and manufactures, would unite in a common interest the great natural divisions of the State, and would in the end be an important source of revenue to the Commonwealth: And, whereas, the best interests of the State require that this great and important improvement should be the property of the Commonwealth, and that the Commonwealth ought to embark in it with that zeal and energy that is best calculated to carry it into effect; therefore, be it enacted, etc.”

Under this act five commissioners were to be appointed to consider and adopt such measures preparatory to the establishment of a navigable communication between the eastern and the western waters of the State and Lake Erie. The act further authorized the employment of engineers and surveyors to make examinations and surveys, and the act furthermore appropriated a sum not to exceed \$20,000 to be expended and paid on the order of the majority of the Commissioners appointed under this act. And as if to confirm the determination of the administration to continue the work initiated by the act just voted, another act pledging the faith of the Commonwealth for a five per cent. loan of \$150,000, payable in 15 years, was authorized upon the same date as the act authorizing the appointment of the Board of Canal Commissioners.

On the 25th of February, 1826, Governor Shulze approved an act of Assembly, entitled “An act to provide for the commencement of a canal to be constructed at the expense of the State, and to be styled The Pennsylvania Canal.” This act authorized the commissioners to locate and contract for making a canal and locks from the river Swatara at or near Middletown to or near a point on the east side of the river Susquehanna opposite the mouth of the river Juniata; and from Pittsburg to the mouth of the Kiskiminitis; and also, as soon as they shall deem it expedient and practicable, to construct a navigable feeder for a canal from French Creek to the summit level at Conneaut Lake, and to survey and locate the route for a canal from thence to Lake Erie. The Commissioners appointed under the act of 1825 were authorized by this act to appoint one or two of their number, as occasion might require, as acting commissioner or commissioners at a compensation of four dollars a day while actually engaged in the superintendence of the works contemplated by this act, which sum was to be in full for all compensation for services and expenses. The same act appropriated the sum of \$300,000 to be expended by the Board of Commissioners, subject to the usual restrictions and requirements of the law governing public expenditures. On the 10th of April, 1826, a supplement to the above act was approved authorizing the Governor to appoint four additional canal

commissioners, making a board of nine, five of whom constituted a quorum. They were required to call upon the owners of the land through which the land passed, with a view to obtaining releases, and adjust any damage claimed by reason of the construction of the works.

The succeeding year, 1827, witnessed increased activity and interest in the great work now started, for on the 9th of April of that year Governor Shulze approved an act to provide for the further extension of the Pennsylvania Canal. This act authorized the Canal Commissioners to locate and contract for the making of a canal and locks up the valley of the Juniata from the eastern section of the Pennsylvania Canal to a point near Lewistown. Also a canal and locks up the valley of the Kiskiminitas and the Conemaugh from the western section of the Pennsylvania Canal to a point at or near Blairsville; and also a canal and locks up the valley of the Susquehanna from the eastern section of the Pennsylvania Canal to a point at or near Northumberland. Surveys were also directed to be made for a portage road over the Allegheny mountains to ascertain the best mode of connecting the lines east and west. That all parts of the Commonwealth might be benefitted by the improvements, surveys were ordered to be made from Northumberland up the north branch of the Susquehanna to the State line; from the western section of the Pennsylvania Canal, near the mouth of the Kiskiminitas, to a point on Lake Erie, by the Allegheny river and French creek, at or near the borough of Erie; and from the city of Pittsburg to the said point on Lake Erie, by the route of Beaver and Shenango. Thorough examinations were also to be made of the Juniata Valley; also surveys of a canal and railway from Philadelphia to Columbia; also a survey in order to ascertain the practicability and cost of forming a connection of the North Branch of the Susquehanna and the Lehigh. A survey was also ordered down both sides of the Susquehanna river from the Swatara to the Maryland line. Section 6 of the same act directed surveys to be made along the Delaware Valley from Philadelphia or from Bristol or any intermediate point between Bristol and the head of tide water to Carpenter's point; and the next section directed the immediate commencement of the work to be built toward Easton, and \$100,000 were appropriated for that purpose.

A concluding section of the act ordered a survey for a canal commencing in the vicinity of the United States Arsenal, upon the east bank of the river Schuylkill, and terminating at the river Delaware, at the south of the Navy Yard, in the county of Philadelphia.

In the furtherance of the numerous projects of this act a loan of \$1,000,000 was authorized and the Canal Commissioners searched the country for engineers to make the required surveys and examinations. At the succeeding session of the Legislature another act, approved the 24th of March, 1829, authorized additional surveys and

the speedy construction of canal sections, the location of a railroad across the Allegheny mountains, the location of a railroad from Philadelphia, via Lancaster and Columbia, to York. Surveys were ordered along the valley of the Monongahela river from Pittsburg to the Maryland line. From Columbia to the Conestoga river in Lancaster county, and along the Ohio river from Pittsburg to the mouth of Beaver creek, besides many other projected lines. A further sum of \$2,000,000 was directed to be borrowed to carry out the provisions of the Internal Improvement Acts.

A review of the construction of the early projects develops the fact that the magnitude of the undertakings were boldly taken in hand, and notwithstanding the discouragements that presented themselves in the way of financial difficulties, etc., persevering zeal at last accomplished the desired end.

Incorporated companies, anticipating the State authorities, began their improvements at a somewhat earlier period, among which:

The Schuylkill Navigation Company's line, which covered a distance of 108 miles up the valley from Philadelphia; and in that distance the channel of the Schuylkill river was utilized and converted into slack water (by the erection of 31 dams), covering 50 miles of the river channel with a slack water navigation. On the line 71 locks were constructed to overcome the elevation from tidewater which amounted to 618 feet between Philadelphia and the upper terminus at Mill Creek. In 1865, 1,000 boats with an average capacity of 170 tons passed to and fro through the canal carrying nearly 1,500,000 tons of coal, lumber, iron ore and other products of the mines, etc., yielding a revenue of \$1,650,800. The cost of the line at this time was \$12,250,000, and the stockholders received dividends of six per cent. The venerable Frederick Fraley, of Philadelphia, who was President of the company for a number of years, still survives after having witnessed the marvellous changes in the transportation of the traffic of the country, and the passing of the great line of navigation into the control of its great rival, the Philadelphia and Reading Railroad Company, which has a long lease. At this time the length of the works have been reduced 18 miles, and the receipts reported for the year ending June 30, 1900, amounted to \$50,694.

By an act of Assembly passed the 29th of September, 1791, a company was incorporated to construct a canal and lock navigation between the Schuylkill and Susquehanna rivers by the waters of Tulpehocken, Quittapahilla and Swatara creeks, in the counties of Berks and Dauphin, and that project may therefore be classed as another pioneer in the projected lines to the west. It was virtually a branch of the Schuylkill Navigation, or rather a feeder, and connected the Schuylkill river with the Susquehanna. As one of the very early corporations it too passed through many vicissitudes and trials. Lot-

West End of Tunnel, Abandoned Union Canal, near Lebanon, Pa.

teries that brought in some money, bridged it over some of the difficulties, but at last it went into decay, and a railroad is now constructed in the summit level at Lebanon. The line of this canal was constructed along the Tulpehocken creek between Reading on the Schuylkill river and Lebanon, a tortuous route, following the stream to its head, a distance of 40 miles. On nearing the summit or the dividing ridge a treacherous limestone country prevailed, and the great fissures between the rocks for many years deprived the canal of the water required for navigation purposes. Many of the levels east and west of the summit were planked upon solid oak sills which for a few years retained the water, but advanced engineers discarded the wooden lined canal, and clay puddling was substituted after the limestone was removed in order to give sufficient base for the clay to be tramped in. The summit level seven miles in length between the headwaters of the Tulpehocken and the Quittapahilla required its supply of water almost entirely from artificial sources from the first; and subsequently, after enlargement in 1856, from reservoirs filled from winter rains and snows stored for use in the summer months. Enormous steam pumping engines hauled from Pittsburg on wagons to a point on the Swatara creek, six miles west of Lebanon, and large water wheels of great capacity, forced the water from that stream to a height of 95 feet, from which point it flowed by gravity through a wooden cylinder three feet in diameter for four miles to the summit level, from which it was utilized in the required pool and to supply the contingent levels east and west, with 25 locks to raise and lower the traffic in transit. Another steam engine was located at the headwaters of the Quittapahilla (near Lebanon) which raised the waters from that stream 45 feet, and they were carried by an open trunk one-half mile to the summit. A bit of engineering skill in those early days was the construction of a tunnel 600 feet in length just west of Lebanon and hard by a flight of 16 locks carrying the canal to Swatara creek, which stream it followed, crossing it at one place by an aqueduct, to Middletown, where the main line of the Pennsylvania canal received the tonnage from the east and distributed the cargoes of lumber, coal, etc., from points north and west. Standing at the head of the tunnel the observer cannot but feel a tinge of sadness akin to the feeling upon viewing the ruins of any historic castle beyond the sea, as the crumbling atoms fall from the tunnel roof into the abandoned channel of this once famous canal.

Other appliances to furnish a supply for the summit level consisted of impounding the winter waters in reservoirs north of the line of the canal and utilizing them in the summer time. Three reservoirs were constructed covering in all over 100 acres, and having a depth of from 20 to 30 feet of water at the breasts of the dams. The supply from

the largest of these reservoirs was conveyed in a brick conduit 30 inches in diameter and 3 miles in length to the eastern end of the summit, 3 miles east of Lebanon. This line of canal was finished and open for navigation in the spring of 1828.

The Union Canal was 77 miles in length between Middletown and Reading, via Lebanon, with a branch of 22 miles from a point where the canal left the Swatara creek to Pine Grove in the Schuylkill Coal Region, which branch was almost entirely destroyed by a flood which broke through a large dam on the Swatara, and its flow towards the river took with it the towing path and banks with the superstructure, rendering the branch canal entirely useless. The Philadelphia and Reading Railway Company invested \$100,000 in the damaged canal and built a portion of their Tremont branch from Lebanon upon the land acquired by the purchase.

Large quantities of iron ore from the Cornwall banks of Lebanon county were shipped to Danville and other points via the Union Canal, and coal was returned from the Wyoming region for use in the furnaces at Lebanon and vicinity as back loading. After the enlargement of the Union Canal lumber from the west branch came through for a time in order to avoid towage charges on the Chesapeake Bay, but the delays incident to low stages of water and the great amount of lockage was detrimental to the shippers and carriers and at last, in 1885, the officials of the company reported that "The Union Canal is non est, it having been sold out, property and franchise, by the sheriff of Philadelphia." It had borne the brunt of flood and financial panic for almost three-quarters of a century, it having been in operation before the canals of the Commonwealth. The work was abandoned and sold for a song, including the masonry of 100 lift locks, 3 guard locks, with buildings, machinery and pumps, all of which had cost more than \$6,000,000, which melted away from the estates of widows, orphans and capitalists all over the Commonwealth.

One of the most successful enterprises of the early years of the century was incorporated by the Legislature on the 24th day of March, 1817, under the name and title of the President and Managers of the Monongahela Navigation Company. This act authorized George Sutton, Anthony Beelan and Thomas Baird, of Pittsburg, and their associates to act as commissioners to receive subscriptions to 1,600 shares of stock at \$30 each as a capital for the construction of 16 dams across the Monongahela river, in order to form a slack water navigation with locks connecting the pools. A period of 25 years was granted to complete the work to the mouth of the Cheat river. In 1870, the capital invested was \$1,003,500, upon which 10 per cent. dividends were divided on a tonnage of 2,246,000 tons of which 218,000 tons were bituminous coal. In 1880 the capital had been

Lock No. 1—Abandoned Union Canal, West of Tunnel, near Lebanon, Pa.

increased to \$1,115,000, and the coal tonnage reached 3,193,800 tons. A dividend of 12 per cent. was paid that year on the capital stock. In 1890 the capital had reached the amount of \$1,632,000, upon which a 9 per cent. dividend was paid, thus showing a profitable investment for the shareholders. In 1897, the United States government by proceedings in condemnation assumed possession of the work, and it is now maintained free of expense to the carrier of the products of the Monongahela Valley.

On the 20th of March, 1818, an act entitled "An act to improve the navigation of the river Lehigh," granted to Josiah White, George F. A. Hanto and Erskine Hazard certain rights and privileges concerning the improvement of the navigation of the river Lehigh. These gentlemen became owners of coal lands, to develop which, it became necessary to enlarge their capital which was done by organizing the Lehigh Coal Company. In order to carry out the intents of the projectors, further capital was required and a new company with enlarged privileges was organized and on the 13th of February, 1822, the Lehigh Coal and Navigation Company was incorporated with a proviso that the maximum amount of money to be invested in the purchase of land should not at any time exceed the sum of \$60,000, nor the entire capital exceed \$1,000,000 in the undertaking. In after years the requirements of the corporation demanded more capital for which privileges were duly granted, so that there is at this time a capitalization of over \$14,000,000 and a funded debt of \$17,500,000, the value of which is invested in coal lands, 108 miles of canal owned and leased, and other property.

The Delaware and Hudson Canal pierced the northeastern section of the State and connected Honesdale, in Wayne county, Pennsylvania, with Eddyville in the State of New York. It was constructed by a company incorporated by the Legislature of New York, and authority was given by the Legislature of Pennsylvania to the Delaware and Hudson Canal Company in 1825, to assume the privileges conferred upon one Maurice Wurtz to improve the navigation of the Lackawaxen river. This undertaking resulted in the construction of 25 miles of canal in this State from Honesdale to the Delaware river, by the Delaware and Hudson Canal Company. A million tons of merchandise passed through this canal in 1865, principally anthracite coal. A fleet of 880 boats was employed in the traffic. The canal was maintained with a depth of six feet of water, and the locks were 100 feet in length between gates. The company abandoned the Pennsylvania division of the canal in 1899, transferring the tonnage to their lines of railroad, which traverse the coal regions of that section of the State.

On the 9th of May, 1825, the commissioners appointed by the Governor under the act, entitled "An act to appoint a Board of Canal

Commissioners," held their first meeting in Philadelphia. There were present Robert M. Patterson, John Sergeant, William Darlington and David Scott. Mr. Gallatin, another appointee, was absent. The names of several persons, notably Charles Trezcylulney, William Wilson and John Mitchell were presented as competent engineers for employment. After several short meetings from day to day the Board adjourned until (called together pursuant to notice) on the 2d day of July, 1825, when the same gentlemen were present, together with Abner Lacock, who filled the place of Mr. Gallatin. John Sergeant was chosen as President of the Board on the 4th of July. William Wilson was selected as the first engineer by the Board. At a meeting of the Board held October 26, of the same year, reports were made by William Wilson and John Mitchell on surveys made during the preceding months, and in December Mr. William Strickland was appointed as a consulting engineer and to prepare maps and make estimates of the several lines reported upon.

On the 10th of May, 1826, an advertisement for proposals to construct a part of the canal from the Swatara to the mouth of the Juniata river was authorized by the Board. The four new members authorized by act of April 10, 1826, General Daniel Montgomery, of Columbia county, Thomas Enochs, of Allegheny county, General John Phillips, of Erie county, Charles Mowry, of Dauphin county, were appointed May 17, 1826. On the 19th of June, 1826, the Governor approved of the location of the canal from the Swatara to the mouth of the Juniata river, William Strickland's location, and on the fourth of July following, the first ground was broken in the construction of the great system of Pennsylvania's line of internal improvements near Harrisburg.

In the settlement for damages along this part of the line about 100 different land owners out of 122, claimed damages, and some of them to an extravagant extent. Several honorable exceptions were named, and but one specific offer in the whole number was accepted. On the 14th of September, 1826, the acting Commissioner on the western division reported that 25 miles of that division had been contracted for and that more than 1,000 men were at work under the contractors. On the 2d of May, 1827, the Board of Canal Commissioners appointed William Strickland, Nathan S. Roberts, James Geddes, David B. Douglass and Simon Guilford as principal engineers, and assigned Judge Geddes to examine the north branch and Chester Valley. Nathan S. Roberts was instructed to locate the line to Blairsville; Mr. Strickland to locate the lines to Northumberland and Lewistown; Major Douglass to locate the French creek feeder and make surveys on the Allegheny and to Lake Erie, and Simeon Guilford to attend to the Delaware line.

Ruins of Columbia Dam, Columbia, Pa.

In the Autumn of 1828 it was resolved by the Board of Canal Commissioners to further prosecute the work by placing under contract the construction of the canal from Blairsville to Johnstown, a part of the French creek feeder, a portion of the North Branch to include 45 miles with that already under contract, a portion of the west branch from Sugar Camp Island to Northumberland, on the Juniata from Lewistown to Huntingdon, on the Delaware division, from New Hope to Raubs, 18 miles.

The construction of these works involved a large expenditure of money, but provision was made therefor by loans through the Bank of Pennsylvania, which furnished the amounts required in instalments as the work progressed.

The construction of a railroad from the end of the canal at Columbia, on the Susquehanna river, to Philadelphia, being an important link in the line of internal improvements, the survey of Mr. Roberts with report was submitted by a committee (to whom the subject was referred) to the Board of Commissioners at their meeting of December 9, 1828, who decided that in consequence of the importance of this line in connection with the projected canals, \$200,000 should be appropriated during 1829 toward the construction of the road which was considered about one-half the sum required to cover the distance between the Susquehanna and Delaware rivers. At this time the system was well outlined, and from Philadelphia to Columbia the first link in the chain was to be 84 miles of railroad, on which was to be transported the merchandise to the west and the products of the soil, mines and forests to the seaboard. From Columbia along the east bank of the Susquehanna river, the eastern division covered a distance of 46 miles via Harrisburg to the junction of the Juniata and Susquehanna divisions. The Susquehanna division continued up the west branch of the river for 42 miles where the river was crossed to Northumberland where the north and west branch divisions were united. The north branch division was constructed on the west side of the river in Northumberland by way of Danville, Bloomsburg, Catawissa, Berwick and Wilkes-Barre to Lackawanna dam a distance of 72 miles, and the west branch division formed that part of the system from Northumberland by way of Milton, Watsonstown, Muncy, Williamsport, Jersey Shore and Lock Haven to Farrandville, a distance of 76 miles. These branches constituted the great feeders to the main line, delivering anthracite coal from the Wyoming region and lumber from the virgin forests of the state. The Juniata division being a continuation of the main line and the thoroughfare to the west composed that part of the canal between the junction of the several divisions at Duncan's Island and Hollidaysburg up the valley of the Juniata by way of Newport, Mifflintown, Lewistown and Hun-

tingdon, covering a distance of 128 miles. At Hollidaysburg connection was made with the Allegheny Portage railroad which by a series of inclined planes and intermediate short levels served for the transportation of the traffic as well as passengers over the mountain to Johnstown, a distance of 36 miles.

The Portage Railroad over the Allegheny mountains was considered in its day a marvel in engineering skill, which David Stevenson, a distinguished civil engineer, in 1838 described as "a mountain railway which in boldness of design and difficulty of execution compared only with the passing of Simplon and Mount Cenis in Sardinia, "but even those remarkable passes viewed as engineering works, did not strike him as being more wonderful."

The history of this section of the system of internal improvements is full of interest and an article entitled "The Evolution, Decadence and Abandonment of the Allegheny Portage Railroad," as written by William Bender Wilson, and published in the report of the Railway Bureau of this department for the year 1898-99 embraces in detail a full account of this most interesting section of the public works.

The western division joined the Portage road, and by a canal covering a distance of 103 miles reached Pittsburg, and thus the main line traversed the State from east to west and joined the city of Philadelphia with the young and prosperous city beyond the mountains. The Delaware division being an independent section of the public works consisted of a canal from Bristol on the Delaware river above Philadelphia to Easton, a distance of 60 miles, where connection was made with the navigation of the Lehigh. This canal passed into the hands of a corporation and is still being successfully operated under the management of the Lehigh Coal and Navigation Company.

The Susquehanna and Tidewater Canal, constructed by a company with a view to take the tonnage from the public works of Pennsylvania to Philadelphia and Baltimore via tidewater, ran along the west side of the Susquehanna river from Wrightsville, opposite Columbia, to Harve de Grace on Chesapeake Bay in the state of Maryland, from which point steam tow boats were required to take boats and cargoes to their destination. This canal passed through all the vicissitudes of floods and financial difficulties, and was on January 2, 1872, leased to the Philadelphia and Reading Railroad Company for 999 years, at a rental of \$20,000, and is now with its 45 miles of well constructed works, including a great feeder dam at Columbia, a ruin past reconstruction. This work involved an expenditure of \$5,000,000.

A short line of canal from Duncan's Island to Millersburg, called the Wiconisco, was built by the State to transport coal from the Lykens Valley region, and its 10 miles served a good purpose for some years, but it passed into the possession of the Pennsylvania

Ascending an Inclined Plane.

Canal Company with the main line, and with a division of the traffic with the Northern Central Railroad Company it proved to be unprofitable, and it has passed out of existence as a water way.

The French Creek division was also constructed by the State. It commenced on the Allegheny river near the borough of Franklin, from which point it was carried up French creek $22\frac{1}{2}$ miles to the feeder from whence the feeder formed a continuation of the canal up which the right branch proceeded 11 miles, and the left branch down the feeder $12\frac{1}{2}$ miles to Conneaut Lake. The whole division, 45 miles in length, consisted of 27 miles of canal and 18 miles of slack water.

The Beaver division was another part of the system of public works in the western part of the State and connected with the Ohio river, 28 miles below Pittsburg, and was located from the mouth of the Big Beaver creek up that stream and Shenango creek 30 miles, terminating in Mercer county. Eight miles of this division was canal and 22 miles slack water formed by the erection of 7 dams across the stream. As the works were about being completed the report of the Canal Commissioners made December 2, 1833, contained a statement submitted by the President, in which was given the time of the commencement and progress of the "most splendid system of internal improvement that has ever been undertaken and executed in so short a period by any country." In his recapitulation he gave as placed under contract:

In 1826,	46 $\frac{1}{2}$ miles.
1827,	162 $\frac{3}{4}$ "
1828,	214 $\frac{1}{2}$ "
1829,	15 $\frac{3}{4}$ "
1830,	3 $\frac{1}{2}$ "
1831,	193 "
1832,	28 $\frac{1}{2}$ "
1833,	47 "

Or a total,	711 $\frac{1}{2}$ "

The same statement says that on December 18, 1829, 195 miles of canal were finished, but of this distance only 180 miles were so situated as to be partially navigable, on which tolls to the amount of \$27,012.90 were received in 1830. On the 21st of December, 1830, 426 miles of canal were reported as finished and the water had been introduced into 406 miles. On the 1st of November, 1832, 480 $\frac{1}{2}$ miles of canal and 22 miles of railroad were finished, the tolls on which amounted to \$151,419 for the year.

In anticipation of the progress of the lines under course of con-

struction it was announced that by the 10th of March, 1834, there would be completed and ready for use a total of 632 miles of canal and railway.

Governor George Wolf in his message of December 4, 1833, to the General Assembly re-echoed the proud claim of the President of the Board of Canal Commissioners. He said:

“With prospects so flattering, fellow citizens, in the very infancy of our public works, the friends of the internal improvement policy may rest satisfied that the day is not far distant when Pennsylvania, encouraged by the success that has attended her public improvements; their continually increasing productiveness; the overflowing treasury, for which she will be indebted to the redundant revenues derived from that source; and threatened as she is on all sides to be deprived of that commerce which the God of Nature seems to have destined for her use, will in her own defence force the waters of Lake Erie to mingle with those of the Allegheny and the Delaware; the Ohio river to become tributary to her own extensive improvements; the waters of the Cayuga and Seneca Lakes, by means of the Elmira Canal, to unite with those of the Susquehanna; and will cause the wilderness countries, drained by the improvements by which all this will be accomplished, to ‘smile and blossom as the rose.’ This may be regarded as fancy now, but it must become fact before long; and judging from the signs of the times, it would not be surprising if it should all happen in our own day and generation, and be achieved by the force of public opinion itself.”

And now the solving of the problem of operating an extended line of public works by the Commonwealth was commenced and begun under flattering auspices, from which great results were anticipated; but the contingencies of flood, depressions in trade, and the advancing ideas of the times, involving a demand for more rapid transit and quick delivery; (all tending to difficulties in the maintenance of the system projected in the early days) in the course of the succeeding twenty-five years developed a demand of the public to transfer (by sale or otherwise) the enterprise into the hand of private corporations, who, it was argued, could operate the lines to better advantage than the Commonwealth.

In the meantime toll sheets were being prepared and all manner of produce, merchandise, etc., were classified and rated in schedules on which tolls were to be collected in transit at the various offices established on the line.

The enthusiasm of the State officials was indeed justifiable, for the line of internal improvements about being completed was a magnificent work, involving in all the details and contingencies of construction; more in comparison, than the work of De Lesseps in his work

Outlet, Pennsylvania Canal at Columbia, Pa., showing terminus of canal and ruins of Columbia Bridge.

on the great ship canal at Suez, for that (although greater in capacity) was of a comparative short distance, with no engineering difficulties after the construction of the terminal locks and breakwaters, and provision for the prevention of the drifting sands of the adjacent deserts into the channel; whereas the construction of the Pennsylvania improvements involved the location of hundreds of miles of canal beds, so as to be free from the dangers of the semi-annual floods that swept down from the mountains through the valleys occupied by the mother river, from whom the required nurture was to be furnished to the artificial waterways, as required. The construction of great dams across the rivers from which the water was taken to supply the canals; the building of hundreds of great locks of masonry to overcome the elevation, with massive water tight gates; the building of miles of heavy retaining walls as shields against the encroachments of ice and flood; the construction of numberless bridges for the crossing of public and private roads; the erection of houses for the residences of the keepers of the locks; the construction of heavy aqueducts carrying the canal bed across large streams; the building of culverts to prevent the innocent looking brooks that trickled from the hillsides, that were often transformed into raging streams, from doing damage; the provision for the excess of water that often came unexpectedly, doing great damage, by the erection of spills and waste wiers, besides many other details, required the watchful care and direction of the engineers in the finishing of the great system; and therefore with a commendable pride the officials might well be enthusiastic upon the achievements of their efforts. Thousands of brawny men from the Emerald Isle followed the directions of the engineers, and the ultimate results caused joy and enthusiasm. The work was a grand school for engineers, and many prominent names in the profession are recorded as efficient in the construction of later improvements who served in the different corps of engineers employed by the Commonwealth. Among these are the names of Roberts, Mitchell, Treczuliny, Douglass, Strickland, Kneass, White, Welsh, Robinson, Faries, Guilford, Gay, Foster, Wierman, Worrall, Hage, Mifflin, Warford, Whippo, Schlatter, J. Edgar Thompson, Miller and many others will be remembered, whose work at many points in the line although now in ruins still shows their skill in directing construction.

And thus the work went bravely on. Individuals prepared for the anticipated traffic by building boats to launch in the now completed canal. Transportation companies were formed to carry merchandise from Philadelphia to Pittsburg without break in the cargo by means of boats built in sections, some of iron, which could be transferred from the channel of the canal into cradles upon the trucks of railroad cars and be hoisted over the Allegheny mountains and again placed

in the waters of the Conemaugh and Kiskiminetas, and thus reach Pittsburg in what was at that time considered quick despatch. These lines claimed right of way on the main line, running night and day with double crews and extra teams aboard as relays. Some of these line boats made a specialty of passenger traffic, particularly of emigrants to the west, and every day in the week during the summer might be seen merry groups of German emigrants upon the deck of their chosen craft passing the capitol city and lifted by the old Penn lock (now enlarged greatly in its capacity, at the foot of walnut street in the city of Harrisburg), to the upper level which would soon bring them to view the broad waters of the Susquehanna, cleaving the spurs of the Blue mountains, and soon after into the valley of the Juniata, famous as the abode of the red men not many years ago.

The robust men and fair maidens among these emigrants from the German Fatherland tripped with their wooden shoes upon the upper decks and were borne to the broad acres beyond the mountains, where they and their descendants peopled the new states of Ohio, Indiana and Illinois, which are now empires of this Republic, which the emigrants adopted in their day, where there was a freer air, than in the hampered home of their own Fatherland.

A number of transportation companies to operate upon the canals were formed, and boats of the "Union Transportation Company," the "Reliance Line," the fleet of the "Leech Brothers," and "Bingham's Line," with a company from Baltimore, styled the "Chesapeake and Ohio Line," were soon in active operation and in a measure competed for the trade between Baltimore and Philadelphia and the west. Lines of packets, too, were established for passengers. The principal lines from Harrisburg to points north and west, as well as to Columbia (before the Harrisburg and Lancaster Railroad was constructed) was operated by William Colder, Sr., of Harrisburg, and his associates, who for many years maintained the lines and operated them with regularity and success. The traveler who had time (and he was obliged to have it in those days), enjoyed the trip along the picturesque valley of the Susquehanna and Juniata, and the social pleasures attendant during the journey would long be remembered. Charles Dickens in his American Notes records an amusing account of his experience in gaining the place where he was to sleep in the main saloon of one of these packets. Individuals, too, invested in horses, mules and boats to engage in the transportation of merchandise and produce, and many yards and dry docks were constructed along the line for the building and repairing of boats, and some of the skeletons of the oak ribbed hulls of the fleet still remain scattered along the line, going to decay, with the superstructure of the works, of which they formed an important part in the busy days of inland navigation.

RELIANCE TRAMP OPERATION COMPANY,
 (VIA)
Pennsylvania Rail Roads and Canals
FROM PHILADELPHIA TO PITTSBURG

By means of Transshipping IRON CASKS, BUCKS, in which Goods are packed at Philadelphia and Jars together with the Boxes to Pittsburgh, with safety, certainty and unprecedented despatch. Freighters and others travelling with their effects can be accommodated with a strong & expeditious passage West.

Agents:
James W. Davis *John W. Smith*

Philadelphia *Pittsburgh*

The Commissioners experienced many difficulties during the succeeding years in operating the lines, including a deficiency in the supply of water at the headwaters of the rivers which were the natural feeders for the canals. It was therefore necessary to construct large reservoirs to impound the winter waters for use in case of emergency.

The engineers in 1839 and 1840 projected reservoirs for the purpose upon the eastern and western slopes of the Allegheny mountains, near Hollidaysburg, for the eastern division, and upon the south fork of the Conemaugh near Johnstown for the western division. A large area of land was submerged by each of the reservoirs, forming beautiful lakes surrounded by high rolling ground; they answered the purpose for which they were built, and passed out of the possession of the State authorities upon the sale of the main line. The western reservoir and adjacent lands became the property of a company who established an elegant resort upon the shore of the great sheet of water which was maintained until the time of the memorable flood of 1889, when the waters destroyed the retaining bank of the reservoir, and a frightful loss of life and property followed the course of the mighty wave that came down the ill-fated valley of the Conemaugh, submerging everything in its path and spreading dismay and death in the unfortunate city of Johnstown and the neighboring towns and villages.

The financial operations of the works were in the first years considered satisfactory. The receipts averaged about one and a quarter millions per annum for the first six years, and the expenditures about \$625,000. In the succeeding years, when the superstructure began to show signs of decay, the expenditures began to increase, so that in 1846 they amounted to \$707,000, in 1847 \$723,000, and in 1848 to \$1,008,429, while the receipts in the latter year amounted to \$1,500,555. At this time the debt of the State approximated \$40,000,000, and the agitation began for the sale of a portion at least of the public works. To this end an act, entitled "An act to reduce the State debt and to incorporate the Pennsylvania Canal and Railroad Company," was approved the 29th day of April, 1844, by Governor David R. Porter. This act provided for the sale of the railroad from Philadelphia to Columbia, the canal from Columbia to Hollidaysburg, the Portage Railroad over the Allegheny mountains from Hollidaysburg to Johnstown, and the canal from Johnstown to Pittsburg, for the sum of \$20,000,000. This sum was to form the capital of a company incorporated by the same act. Commissioners consisting of prominent men from different sections of the State were named and appointed to offer for sale the stock and shares of \$100 each of the said Pennsylvania Canal and Railroad Company at public auction in the city of Philadelphia, payable in money or certificates of indebtedness of the State. Section 30 of the act provided "that so much of this

act as relates to the sale of certain public works shall not go into operation unless approved by a majority of the people, in the following manner, to-wit: "That at the next general election the qualified "voters of this Commonwealth, or as many of them as choose to do so, "shall deposit in the ballot boxes at the usual times and places provided by law separate ballots indorsed 'main line,' with the words, " 'for sale of the main line' upon them, or 'against the sale of the "main line,' as their opinion may be."

At the election in the succeeding autumn a majority of the votes cast were in favor of the sale of the main line, and in accordance with the provisions of the act of Assembly the Commissioners appointed the 20th of January, 1845, as the date to begin the sale of the stock. The sale of the stock was not consummated, and therefore the works remained in control of the State and its Board of Canal Commissioners. Several years of good traffic followed, and Governor Francis R. Shunk in his message to the Assembly January 5, 1848, in commenting on the prospects and success of the system, said: "The increased and increasing value of these great works renders them an object worthy of peculiar care and protection, and must forever negative the idea of the State surrendering the control over them to a corporation." In 1850, Governor William F. Johnston in his message to the Assembly said: "The method adopted in the management of "the public works is evidently defective, as the State does not derive "an adequate share of the profits arising from the use of the Columbia Railroad." This remark, caused by a continued decrease in current receipts created a distrust in the public mind, and the question of a sale was again discussed, which was increased by the construction of the Pennsylvania Railroad, which many feared would ruin the canals of the State.

In 1852 Governor Johnson said in his message: "It cannot be "doubted that the revenues derived from the public works ought to be "very greatly increased. These improvements should bring a clear "revenue to the Treasury. In other states canals and railways have "rarely failed to become sources of such revenue within 20 years from "the period of construction, while with us, from causes heretofore "suggested for legislative action, and still within legislative control, "the result has been widely different."

As late as 1853, Governor William Bigler in his annual message said: "There are a few public enterprises to be consummated to render Pennsylvania's triumphs complete. The North Branch Canal "must be finished, the Allegheny mountains must be passed without "the use of inclined planes, and our metropolis must be connected "with the lakes by means of a railroad."

In accord with the declaration of the Governor, a statement to

the Legislature on the finances, made January 4, 1854, contained an item of expenditure of \$1,000,000 for the construction of the North Branch Canal towards the New York state line, and an item of \$556,000 for the construction of a new railroad to avoid the inclined planes on the Allegheny mountains. In addition to these expenditures estimates were presented requiring an additional million to complete the urgent desires of the chief magistrate as expressed in his message of the previous year. The same message discussed the sale of the public works, because of its agitation in the public press. The Governor was not favorable to the proposition, but said: "It is apparent that the affect of competition on the value of these works, the inroads which may be made by science and mechanic arts on every description of transportation facilities now in existence, the casualties that may result to them from the elements; in short, the mutability of human structures and the propriety of simplyfying the duties of government must constitute mainly the considerations in favor of the separation between the State and her improvements. If it be desirable to sell the public works, we should not underrate their importance, nor it is just to disparage the wisdom of their founders. We are prone to murmur against the policy that dictated their construction because of the debt we have thus incurred, and yet if the proposition were submitted to cancel this liability by their destruction or disuse, we should be compelled to reject it."

Objections were also urged against the sale to any corporation in which the State would be a holder of the stock, but recommended that in case the sale should be determined upon, that a full compensation equivalent to \$22,000,000 of State bonds should be the minimum price.

By an act of Assembly, approved the 27th of April, 1854, the Governor was authorized to invite sealed proposals for the purchase of the main line of the public works from Philadelphia to Pittsburgh. The minimum price was fixed at \$10,000,000. No bid for a less amount could be entertained. Governor Bigler, in his message of January 5, 1855, declared that proposals were invited during the year 1854, covering periods of several months, and that none had been received. The Governor in his comments on the proposed sale said: "A sale might not prove injurious to the public weal, but a bad sale would assuredly be a greater misfortune than no sale at all." Continued efforts were made to effect a sale, and by an act of Assembly, approved the 8th day of May, 1855, the Governor was directed to advertise notice of a public sale (within ninety days after the passage of the act) of the main line of the public works, for a sum not less than \$7,500,000. The act of Assembly provided that in event of the purchaser being the Pennsylvania Railroad Company an additional million of dollars should be charged, for which amount (paid in excess

of the minimum price fixed), the said company should be exempt from the tonnage tax imposed by the State in order to make up any deficiency in revenue from the main line, because of the construction of the Pennsylvania Railroad. No sale was made under this act; no offers even having been made. The act providing for the sale also provided that (in case no sale was effected) the Governor should invite proposals for the purchase or lease of the said works. In accordance with the provisions of this section John Edgar Thompson, for the Pennsylvania Railroad Company, on the 20th of December, 1855, submitted a proposition to Governor James Pollock for the purchase of the Main line and also for the Columbia Railroad separately. For the main line from Philadelphia to the Monongahela and Allegheny rivers, including the real estate, shops, locomotives, cars and other property connected therewith, the sum of \$7,500,000 was offered, payable in instalments, covering a period of thirty years, the State to repeal "all tonnage tax laws" heretofore imposed.

The Pennsylvania Railroad Company at the same time proposed to purchase the Philadelphia and Columbia Railroad alone at the cost of construction, agreeing to pay forever, semi-annually, to the State Treasurer an amount equivalent to the dividend paid to the stockholders of its company, or an equal portion of its capital stock.

The Harrisburg, Mt. Joy and Lancaster Railroad Company, by its President, also submitted a proposition to purchase the Philadelphia and Columbia Railroad for \$4,000,000 in cash or in loans of the State payable in instalments covering a period of twenty years.

These were the only proposals received which were submitted to the General Assembly by Governor Pollock in his message January 1, 1856. The Governor favored the sale and said: "A sale of these works for a fair consideration and upon terms just and liberal, would constitute a beginning in the process of liquidation that would free our Commonwealth from debt, and her people from consequent taxation. In every measure calculated to produce these desirable results, I will cheerfully co-operate with the Legislature."

The receipts from the public works during the year 1856 were \$2,006,000, and the expenditures \$1,943,900, leaving but \$62,100 in excess for interest. Governor Pollock in his message of January 7, 1857, in commenting on the results of the operations, said "Every consideration of public policy, of present and future interest, requires the separation of the State from the management and control of these works. A sale of the main line for a fair consideration and upon terms just and liberal to the purchasers is the proper remedy. The subject is earnestly recommended to your favorable consideration."

In pursuance of these suggestions, legislation was secured on the 16th of May, 1857, providing for the sale of the main line, and on the

Dauphin Narrows, showing pair loaded boats coupled together in tandem, the usual practice on the Canal.

25th of June following it was sold to the Pennsylvania Railroad Company for \$7,500,000 and the line was delivered to the purchaser on the first day of August, 1857, payable in bonds to be redeemed at stated periods ending July 31st, 1890.

Governor Pollock gave expression to his feelings in his message to the Assembly on January 6, 1858, in these words: "I cannot forbear congratulating the people of the Commonwealth on the consummation of this sale. Public sentiment as expressed through the ballot box, and in other forms equally significant, demanded it—public policy and the interests of the Commonwealth required it. It is done—the many approve—few complain—those most, who have gained an unenviable reputation by a reckless disregard of the public interests as exhibited in the extravagant, useless and fraudulent expenditures of the public money for selfish or partisan purposes."

Thus an important step was taken in the disposal of the main stem in the system, and the Governor in the same message warmly recommended the sale of the remaining branches "for a fair consideration, upon terms just and liberal to the purchasers, amply protective of the rights and interests of the people."

Quick to accomplish the desired end, the Legislature passed an act for the sale of the State canals (which was approved the 21st of April, 1858) providing for the sale of all the public works remaining unsold (to the Sunbury and Erie Railroad Company) consisting of the Delaware Division, the Lower North Branch Division, the Upper North Branch Division, the West Branch Division and the Susquehanna Division for the sum of \$3,500,000.

This act authorized the Sunbury and Erie Railroad Company to issue seven millions of bonds, the one-half of which were to be used in the construction of the railroad from Sunbury to Lake Erie, and the other half in the purchase of the branch canals, thus establishing a basis of credit for the construction of an important line of railroad to the lakes. The Act of Assembly also gave power to the railroad company to dispose of the lines of canal with a proviso that in case the canals were sold for more than the price paid to the State, 75 per centum of the excess received should revert to the Treasury of the Commonwealth.

Governor William F. Packer in January, 1859, in his message informed the Assembly that on the 19th of May, 1858, he had conveyed to the Sunbury and Erie Railroad Company the lines remaining unsold upon the compliance of the terms of the sale, and before the meeting of the Legislature the Sunbury and Erie Railroad Company had sold the lines for \$3,875,000 of which amount \$281,250.00 (75 per cent. of the excess above purchase price), was added to the original price and paid into the Treasury of the Commonwealth.

Governor Packer, endorsing the opinions of his predecessor in office said: "I have an abiding confidence that the measures will prove wise; "guaranteeing the completion of one of the greatest improvements ever projected in the Commonwealth, it, at the same time, divorced "the State from the unprofitable and demoralizing management of "the railroads and canals. Whatever differences of opinion may at "any time have been entertained in regard to the propriety of the "details of the legislation authorizing the sale of the main line, or "the branches, it can scarcely be doubted that the public welfare will, "in every respect be vastly promoted by the transfer of the manage- "ment of the public works from the state to individual owners." He "continues: "It would, in my judgment, be a public calamity, if, by "the happening of any contingency, the Commonwealth should be "constrained to again become the owner, and resume the manage- ment, of any portion of the public improvements."

From these comments we find that the Executives of the Common- wealth of all political parties, were at this time in harmony upon the relinquishing of the public works, notwithstanding some litigation was proposed to prevent the disposition of the line, as decided upon.

At this date it may be safely inferred that the sales were profitable to the Commonwealth and the purchases a bargain to the buyers. In the abandonment of many miles of the works, there may have been some losses, most of which have ere this been made up, in economies practiced because of non-sustenance indirectly, and by increase of traffic upon lines connected in interest with those abandoned.

The Board of Canal Commissioners consisting of Messrs. Strick- land, Scott and Frazer held their last meeting on the 25th of Jan- uary, 1859, and transferred to the Auditor General the custody of all the books, papers, records and other property belonging to the Canal Commissioners' Department, which was their last official duty, and the official Board was abolished.

On February 26, 1885, by an act of Assembly, the records and papers of the Canal Commissioners were transferred from the custody of the Auditor General to that of the Department of Internal Affairs, where they remain on file classified for reference when required.

The remaining portions of the main line, known as the Pennsylva- nia Canal and its branches consist at this time of 144 miles of naviga- ble canal with a width at water line of 52 feet, from Columbia to Nanticoke (from which point anthracite coal may be transported from the mines), and a section of 25 miles from Northumberland to- ward Muncy, covering that distance of the old West Branch Division.

The Pennsylvania Railroad Company operated the canals acquired by the purchase as a "Canal Department" of their road, for a period of ten years, when the entire main line and leased branches were

Double-lift Lock at Harrisburg, Pa., showing empty chamber.

merged into the present Pennsylvania Canal Company, and operated under a separate organization from the railroad. General Isaac J. Wistar is President of the company and Thomas T. Wierman is the Chief Engineer.

It is a model of canal navigation in its construction and all of its appliances, and in the maintenance of its 60 locks (overcoming 277 feet in elevation) 99 houses for employes, 73 waste ways and overflows, covering 7,322 feet of surface, 309 bridges, 71 culverts, 5 dams across large streams, 33 aqueducts, comprising 2,832 feet of superstructure and 150 boats, all involving a watchful care and zealous supervision; subject as they are to damage from many contingencies, which can only be averted by strict attention to the duties of those in charge of the work. The improved mode of transportation in boats operated in pairs carrying 250 tons, gives this division of the canal enlarged facilities for delivering coal in large quantities during the season of navigation.

Although the traffic upon the Pennsylvania Canal has not in the last year of the century yielded any profits to its owners, it is nevertheless a worthy monument of the once famous line of Pennsylvania's system of internal improvements which formed a memorable part in the history of the Commonwealth.

STEAM RAILROADS NOT IN OPERATION.

List of steam railroad corporations, whose lines are not in operation or are not constructed, or are now in process of construction, exhibiting the "authorized" capital, together with the amount expended on organization, construction, capital paid in, etc. (Blank spaces in the columns indicate that the information has not been furnished the Department.)

Schenley Park and Highlands Street Railway merged into Monongahela Street Railway.

Shamokin Street Railway sold at judicial sale May 14, 1900; re-organized as Shamokin and Edgewood Street Railway.

South Bethlehem and Hellertown Street Railway merged and consolidated under the name of Lehigh Valley Traction Company November 17, 1899.

Uniontown Electric Railway merged and consolidated, forming Connellsville and Uniontown Railway January 25, 1900.

Versailles Traction Company merged and consolidated under the name of McKeesport and Yough Street Railway October 24, 1899.

Wind Gap and Nazareth Street Railway merged and consolidated under name of Slate Belt Electric Railway.

Youghiogheny Valley Passenger Railway merged and consolidated under the name of McKeesport and Yough Street Railway October 24, 1899.

TELEPHONE AND TELEGRAPH COMPANIES.

Franklin County Telephone Company merged into Cumberland Valley Telephone Company.

Juniata Telephone and Telegraph Company merged into Tuscarora Telephone Company September 15, 1899.

Tuscarora Telephone and Telegraph Company merged into Tuscarora Telephone Company.

CORPORATIONS STRICKEN FROM THE LIST,

The following named roads have been stricken from the list by reason of abandonment by decree of court, forfeiture of corporate rights, annulment of charter, etc.

STEAM RAILROAD COMPANIES

Grassy Island Railroad.

Kettle Creek Railroad.

Kish Waukee Mineral Spring Railroad.

Marion and St. Clair Railroad.

New York, Philadelphia and Chicago Railroad.

Oregon and Texas Railroad.

Pennsylvania and Buffalo Connecting Railroad.

Pittsburg, Connellsville and Baltimore Railroad.

Sharon Connecting Railroad.

Westmoreland Junction Railroad.

York and Black Mountain Railroad.

Youghiogheny Connecting Railroad.

STREET RAILWAY COMPANIES.

Allentown and Bangor Street Railway Company.

Allegheny and Reserve Township Street Railway Company.

Archbald Street Railway Company.

Brady Street Railway Company.

Bristol and Trenton Street Railway Company.

Delaware and Schuylkill Passenger Street Railway Company.

Duquesne Heights, Mt. Washington and Knoxville Railway Company.

Edinboro and Erie Street Railway Company.

Frankford and Somerton Street Railway Company.

Gray's Ferry and Woodland Avenue Connecting Street Railway Company.

Grand Boulevard Street Railway Company.

Hazlewood Avenue Street Railway Company.

Holmesburg and Bristol Passenger Railway Company.

Middletown Electric Railway Company.

Mount Minsi Electric Railway Company.
Powelton Avenue and Thirty-fourth Street Passenger Railway Company.
Sewickley Valley Electric Street Railway Company.
Southern Street Railway Company.

TELEGRAPH AND TELEPHONE COMPANIES.

Beaver Valley Telegraph and Telephone Company.
Danielsville Telephone Company.
Erie Telephone Company.
Home Telephone Company of Fayette County.
Monongahela Magneto Telephone Company.
Phillipsburg and Clearfield Telephone Company.
Waynesburg, Jefferson, Rice's Landing and Carmichaels Telephone Company.

The following named corporation is stricken from the list for the reason that there has been a practical merger of this corporation with others. It does not own, control or operate lines of railway, telegraph or telephone in this Commonwealth. It has no receipts or expenditures, and reports received from it are of no value.

STREET.

Meadville Street Railway stricken from list on account of a practical merger into Meadville Traction Company.

CONCLUSION.

The contents of this publication are an index to the physical and financial affairs of our transportation and telegraph and telephone companies doing business within the limits of Pennsylvania.

These corporations are of inestimable value, and indeed, are indispensable to the development of the material wealth of the State; without them every great manufactory would be closed, every industry crippled, and every commercial enterprise of moment wrecked.

Conservatism and a spirit of fairness should characterize legislative enactments in reference to their control and supervision, while the public should be protected from extortion and given freedom from all discriminations.

The compilation of the information in this report has made necessary a prodigious amount of hard work. Credit is due to the clerical force that has prepared the consolidated tables and arranged and assembled the data upon which observations and deductions have been made.

The work of the Bureau deserves fair consideration of the Legislature. There are but three clerks to do all the work, and it is suggested that this small force ought at least to be augmented by the employment of a stenographer.

Respectfully submitted,

ISAAC B. BROWN,
Superintendent Bureau of Railways.

IMPORTANT CHANGES DURING THE YEAR.

Dating from July 1st, 1899. The Bangor and Portland Railway and the Nazareth and Lehigh Railway were merged by articles of association now on file with the State Department, at Harrisburg, Pa. By this merger of the two companies, the amount of capital stock issued was \$510,000.00, and carrying with it the bonded indebtedness of the Bangor and Portland Railway before the merger, of \$320,000.00, placing total cost of road and equipment in the consolidated companies at \$830,000.00.

The capital stock is represented by 5,100 shares as par value \$100.00 each. The Nazareth and Lehigh Railway Company, which was merged with the Bangor and Portland Railway Company, was chartered under laws of the State of Pennsylvania on March 17, 1899. On March 1, 1900, sixty (60) one thousand dollars five per cent. mortgage bonds, known as "Bath Extension," were issued, bearing even date and maturing March 1, 1925. Proceeds from sale of these bonds were used for completion of Bath Extension and the purchase of one new locomotive, as shown on pages 29 A and 29 B of this report.

BUFFALO AND SUSQUEHANNA RAILROAD COMPANY.

If a consolidated company, name the constituent companies: Under and in pursuance of the provisions of an act of the General Assembly of the State of Pennsylvania, entitled "An act to authorize the formation and regulation of railroad corporations," approved April 4, 1868, (laws of Pennsylvania, p. 82), the following named companies were chartered, their articles of association having been filed in the office of the Secretary of the Commonwealth on the following dates, viz: Sinnemahoning Valley Railroad Company, chartered May 8, 1889; Susquehanna Railroad Company, chartered August 3, 1891; Buffalo and Susquehanna Railroad Company, chartered October 7, 1891; Cherry Springs Railroad Company, chartered July 14, 1893; Cross Fork Railroad Company, chartered April 12, 1893; Coudersport and Wellsboro Railroad Company, chartered January 2, 1892; State Line Railroad Company, November 10, 1890.

On the 25th of September, 1893, the first five companies above named were merged and consolidated into one corporation, known as the Buffalo and Susquehanna Railroad Company, into which, on the 29th day of September, 1894, the Coudersport and Wellsboro Railroad Company was merged, and into which, on the 26th day of November, 1895, the State Line Railroad Company was also merged.

Date and authority for each consolidation: Dates given in answer to No. 4. Consolidation authorized by Pennsylvania general statutes of May 16, 1861 (P. L. 702), and March 24, 1865 (P. L. 49).

COLUMBIA AND PORT DEPOSIT RAILWAY COMPANY.

Operated by Pennsylvania Railroad Company.

Date of organization: July 17, 1890.

Under laws of what government or state organized: Washington and Maryland Line Railroad Company, organized May 19, 1867, under the authority of an act of the General Assembly of the Commonwealth of Pennsylvania, approved April 12, 1866.

Name changed to Columbia and Maryland Line Railroad Company, under authority of a supplement to the above act, approved March 29, 1860; and of a further supplement to said act approved April 1, 1863.

Name again changed to Columbia and Port Deposit Railroad Company, under authority of an act of the General Assembly of the Commonwealth of Pennsylvania, approved April 4, 1864. Columbia and Port Deposit Railroad Company (of State of Maryland), incorporated by act of the General Assembly of the State of Maryland, February 20, 1858, chapter 102.

Supplementary act of General Assembly of State of Maryland enacted at January session, 1864, chapter 21.

Consolidation of the railroads in Pennsylvania and Maryland, effected June 1, 1864, under the name of the Columbia and Port Deposit Railroad Company, by authority of act of General Assembly of the Commonwealth of Pennsylvania, April 4, 1864, and act of General Assembly of State of Maryland, February 20, 1858, chapter 102.

Columbia and Port Deposit Railroad sold under foreclosure of mortgage March 4, 1890, and purchased by George Kugler, who organized two companies, as follows:

May 21, 1890, the Columbia and Port Deposit Railway Company, for the portion of the road in the state of Pennsylvania, under the authority of the acts of the General Assembly of the Commonwealth of Pennsylvania, approved May 25, 1878, and May 31, 1887.

May 23, 1890, the Port Deposit Railroad Company, for the portion of the road in the state of Maryland, under the provisions of the Code of Public General Laws of the state of Maryland.

The two railroad companies aforesaid, namely, the Columbia and Port Deposit Railway Company, of Pennsylvania, and the Port Deposit Railroad Company, of Maryland, were consolidated May 29, 1890, under the name, style and title of the Columbia and Port Deposit Railway Company, under the laws of the Commonwealth of Pennsylvania and state of Maryland.

The agreement of consolidation and merger being filed in the office of the Secretary of the state of Maryland, June 21, 1890, and in the office of the Secretary of the Commonwealth of Pennsylvania, July 17, 1890.

IMPORTANT CHANGES DURING THE YEAR.

During the year the use of old gravity planes between Fairview and Waymart, Pa., and between Waymart and Fairview (return track), were abandoned and 7.10 miles of standard gauge track built to take the place of those planes; in addition to this the gauge was widened on old light track from Bushwick to Archibald Junction, which had previously been abandoned; the changes make a net increase of 8.87 miles in mileage of road operated.

\$2,500,000 debentures issued for the purchase of new equipment.

Capital stock of company was reduced under provisions of sinking fund from \$35,000,000 to \$34,800,000.

FALL BROOK RAILWAY COMPANY.

Date of organization: July 1, 1892, succeeding Corning, Cowanesque and Antrim Railway.

Under the laws of what government or state organized: Laws of New York, 1869, chapter 917. Laws of Pennsylvania, approved May 16, 1861. Corning, Cowanesque and Antrim Railway Company, name changed to Fall Brook Railway Company July 1, 1892; order Supreme Court special term, June 21, 1892, at Watkins, Schuylkill county, New York; court of common pleas of Tioga county, Pa., April term, 1892, No. 151.

If a consolidated company, name the constituent companies: Blossburg and Corning Railroad Company, Wellsboro and Lawrenceville Railroad Company, Cowanesque Valley Railroad Company purchased and consolidated into Corning, Cowanesque and Antrim Railway Company.

Date and authority for each consolidation: January 2, 1873, chapter 917, laws of New York; 1869, and act of the Legislature of Pennsylvania, May 16, 1861.

If a reorganized company, give name of original corporation, and refer to laws under which it was organized: Blossburg and Corning Railroad Company, under chapter 191, laws of New York, 1828. The Tioga Coal, Iron, Mining and Manufacturing Company was incorporated with power to construct slack-water navigation; amended by chapter 81, laws of 1833, authorizing that company to construct a railroad, and chapter 90, laws of 1851, name of company changed to Corning and Blossburg Railroad Company. Sold sheriff sale and reorganized March 19, 1854, under general railroad laws of New York, passed April 2, 1850, under name of Blossburg and Corning Railroad Company. Wholly in state of New York.

Wellsboro and Lawrenceville Railroad Company, organized by act of Legislature of Pennsylvania, approved April 4, 1867, supplement approved March 20, 1868; further supplement approved May 10, 1871. Wholly in Pennsylvania.

Cowanesque Valley Railroad Company, organized by act of Legislature of Pennsylvania, approved April 9, 1869, supplement approved March 19, 1871. Wholly in State of Pennsylvania.

Operated by the New York Central and Hudson River Railroad Company.

IMPORTANT CHANGES DURING THE YEAR.

Three hundred thousand dollars six per cent. second mortgage bonds matured April 1, 1900, and the company being without funds for redemption thereof, such as were presented were purchased at par by the Pennsylvania Railroad Company and to date of this report \$293,000 were so purchased.

Subsequently the board of directors of the Junction Railroad Company authorized the issue as of April 3, 1900, of \$725,000 general mortgage three and one-half per cent. coupon gold bonds. Maturing April 1, 1930, \$425,000, of which were to be reserved for redemption of that amount of first mortgage four and one-half per cent. bonds, maturing July 1, 1907. The remaining \$300,000 to be issued to the Pennsylvania Railroad Company to take up the second mortgage bonds purchased by it as above.

The entire \$300,000 of bonds have been so delivered to the Pennsylvania Railroad Company, and that company charged with par value of the seven outstanding second mortgage bonds, which it will take up and deliver to Junction Railroad Company as they are presented for redemption.

IMPORTANT CHANGES DURING THE YEAR.

There have been sold within the year 870 shares of unsubscribed capital stock at par, amounting to \$21,750.00 on which has been paid \$8,700.00, the balance to be paid on assessments, as the necessities of the company require according to the terms of subscription until fully paid.

The amount received on stock sold was immediately applied on payments for a new locomotive. The balance is to be used in the building of "Y's" at each end of the road and for the reconstruction of bridges, ballasting the road and additional rolling stock, all of which was deemed necessary by the board of directors in order to operate the road successfully and with safety to both passengers and freight.

LAKE SHORE AND MICHIGAN SOUTHERN RAILROAD COMPANY.

Date of organization: June 24, 1869.

Under laws of what government or state organized: The company is a consolidation of the following roads:

The Buffalo and State Line Railroad, extending from the city of Buffalo, in the State of New York, westward to the State line of Pennsylvania, 68 miles.

The Erie and Northeast Railroad, extending from the State line of Pennsylvania, to the city of Erie, in the State of Pennsylvania, 20 miles.

These two roads were consolidated under the name of the Buffalo and Erie Railroad Company in the year 1867, in pursuance of the laws of the States of New York and Pennsylvania.

The Cleveland, Painesville and Ashtabula Railroad, extending from the city of Erie, in the State of Pennsylvania, to the city of Cleveland, in the state of Ohio, 95 miles.

The Cleveland and Toledo Railroad, extending from the city of Cleveland, in the state of Ohio, to the city of Toledo, in the state of Ohio, 113 miles.

With a branch (or northern division) extending from Elyria (26 miles west of Cleveland) to the city of Sandusky, in the state of Ohio, 35 miles.

Also extending from Oak Harbor (26 miles west of Sandusky) to Millbury, near Toledo, 15 miles.

These two roads last mentioned were consolidated under the name of the Lake Shore Railway Company, in March, 1869, pursuant to the laws of the States of Ohio and Pennsylvania.

The Michigan Southern and Northern Indiana Railroad, extending from the city of Toledo, in the state of Ohio, to the city of Chicago, in the state of Illinois, 244 miles.

This road was consolidated with the Lake Shore Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, in May, 1869, pursuant to the laws of Pennsylvania, Ohio, Michigan, Indiana and Illinois.

In August, 1869, the Buffalo and Erie Railroad Company was consolidated with the Lake Shore and Michigan Southern Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, pursuant to the laws of the States of New York, Pennsylvania, Ohio, Michigan, Indiana and Illinois, thus forming a continuous line of railway five hundred and forty miles in length, between the cities of Buffalo, in the State of New York, and Chicago, in the State of Illinois.

IMPORTANT CHANGES DURING THE YEAR.

During the year covered by this report, sixty-six one-hundredth of a mile of the Mahoning Coal Road was abandoned and rails were taken up. This makes the mileage of entire line on June 30, 1900, 1,412.78 miles. Average for the year is 1,413.22 miles.

During the year covered by this report the various old issues of seven per cent. interest bearing bonds were surrendered from time to time, and in conformity with the provisions made for their retirement, new three and one-half per cent. 100 year gold bonds were substituted therefor.

LEHIGH AND SUSQUEHANNA RAILROAD COMPANY.

Operated by Central Railroad of New Jersey, to which reference is made for all details of operation.

The Lehigh and Susquehanna Railroad is owned by the Lehigh Coal and Navigation Company, a corporation which is not a common carrier engaged in the transportation of passengers or property wholly by railroad or partly by railroad and partly by water; the railroad is leased by its owner to the Central Railroad Company of New Jersey, which operates it and pays as rental therefor one-third of the gross receipts; the ownership of the railroad is not represented by any railroad corporation maintaining an independent legal existence or separate financial accounts or which has issued as such, capital stock or incurred any bonded indebtedness.

Postoffice address of operating office: 143 Liberty street, New York.

See report of Central Railroad Company of New Jersey, leases, which operates the road. The Lehigh and Susquehanna Railroad has no operating officers.

PROPERTY LEASED OR OTHERWISE ASSIGNED FOR OPERATION.

PASSENGER AND FREIGHT, AND TRAIN MILEAGE.

Item.	Column for tonnage, number passengers number trains, mile- age, number cars.	Columns for revenue and rates.
Passenger Traffic:		
Number of passengers carried earning revenue,	4,739,555	
Number of passengers carried one mile,	160,491,798	
Number of passengers carried one mile per mile of road,	115,135	
Average distance carried,	33.86	
Total passenger revenue,		\$3,393,371 50
Average amount received from each passenger,		61.045
Average receipts per passenger per mile,		1.508
Total passenger earnings,		3,336,157 31
Passenger earnings per mile of road,		2,336 18
Passenger earnings per train mile,		73.364
Freight Traffic:		
Number of tons carried of freight earning revenue,	13,764,609	
Number of tons carried one mile,	3,454,071,949	
Number of tons carried one mile per mile of road,	2,477,920	
Average distance haul of one ton,	184.07	
Total freight revenue,		19,780,797 69
Average amount received for each ton of freight,		1 05.389
Average receipts per ton per mile,572
Total freight earnings,		19,780,797 69
Freight earnings per mile of road,		14,176 22
Freight earnings per train mile,		3 55.143
Passenger and Freight:		
Passenger and freight revenue,		22,654,069 19
Passenger and freight revenue per mile of road,		15 251 33
Passenger and freight earnings,		23,066,954 90
Passenger and freight earnings per mile of road,		15 562 37
Gross earnings from operation,		24,454,530 78
Gross earnings from operation per mile of road,		17 543 46
Gross earnings from operation per train mile,		1 88.561
Operating expenses,		18,589,496 13
Operating expenses per mile of road,		13 335 94
Operating expenses per train mile,		1 51.159
Income from operation,		5,825,034 65
Income from operation per mile of road,		4 178 83
Train Mileage:		
Miles run by passenger trains,	4,579,325	
Miles run by freight trains,	7,718,615	
Miles run by mixed trains,		
Total mileage trains earning revenue,	12,297,940	
Miles run by construction and other trains,	634,907	
Grand total train mileage,	12,932,847	
Mileage of loaded freight cars—northeast,	129,500,472	
Mileage of loaded freight cars—southwest,	54,339,257	
Mileage of empty freight cars—northeast,	9,400,038	
Mileage of empty freight cars—southwest,	78,995,253	
Average number of freight cars in train,	35.27	
Average number of loaded cars in train,	23.82	
Average number of empty cars in train,	11.45	
Average number of tons of freight in train,	447.50	
Average number of tons of freight in each loaded car,	18.79	

FREIGHT TRAFFIC MOVEMENT.

(Company's Material Excluded.)

Commodity.	Freight originating on this road—Whole tons.	Freight received from connecting roads and other carriers—Whole tons.	Total Freight Tonnage.	
			Whole tons.	Per cent.

Figures reported on page 184 include locomotives and cars owned by auxiliary companies given below.

DESCRIPTION OF EQUIPMENT.

Item.	Number ad- ded dur- ing year.	Total num- ber at end of year.	Equipment Fitted with Train Brake.		Equipment Fitted with Automatic Couplers.	
			Number.	Name.	Number.	Name.
Locomotives—Owned and Leased:						
Passenger,	33	139	137	Westinghouse,	128	Gould.
Freight,		415	409	Westinghouse,	281	"
Switching,		182	143	Westinghouse,	81	"
Total locomotives in service,		736	689	490	
Less locomotives leased,		23	17	11	
Total locomotives owned,		713	672	479	
Cars—Owned and Leased:						
In Passenger Service:						
First class cars,	7	227	228	Westinghouse,	225	Gould.
Second class cars,		18	18	Westinghouse,	18	"
Combination cars,		72	71	Westinghouse,	70	"
Emigrant cars,		2	2	Westinghouse,	2	"
Dining cars,		4	4	Westinghouse,	4	"
Baggage, express and postal cars,	4	77	77	Westinghouse,	77	"
Other cars in passenger service,	15	66	66	Westinghouse,	66	"
Total in passenger service,	25	464	463	460	
In Freight Service:						
Box cars,	3,436	18,598	13,144	100 N. Y., 13,044 Westinghouse,	18,244	See page 163.
Flat cars,	800	2,107	359	Westinghouse,	1,947	"
Stock cars,	25	551	477	88 N. Y., 389 Westinghouse,	532	"
Coal cars,	2,311	13,797	6,607	Westinghouse,	13,747	"
Refrigerator cars,		96	96	Westinghouse,	96	"
Other cars in freight service,		29	Westinghouse,	22	"
Total in freight service,	6,072	35,178	20,683	34,558	
In Company Service:						
Officers' and pay cars,		6	6	Westinghouse,	6	Gould.
Gravel cars,		436	Westinghouse,	12 Gould and 3 Tower.
Derrick cars,	2	34	9	Westinghouse,	14	

PA Internal Affairs 1900

Caboose cars,	71	325	41	Westinghouse,	165	Tower.
Other road cars,	4	385	71	Westinghouse,	156	26 Gould; 130 Tower.
Total in company's service,	6,175	36,798	21,872		35,359	
Less cars leased,		13,785	13,716	88 N. Y., 13,628 Westinghouse, ..	13,777	Gould, Janney.
Total cars owned,		23,013	7,556	100 N. Y., 7,456 Westinghouse, ..	21,582	"
Cars contributed to fast freight line service,		2,389	1,306	Westinghouse,	2,347	"

MILEAGE.

A. Mileage of Road Operated (All Tracks).

Line in Use.	Line Represented by Capital Stock.		Line of proprietary companies.	Line operated under lease.	Line operated under contract, etc.	Line operated under trackage rights.	Total mileage operated.	New line constructed during year.	Rails.	
	Main line.	Branches and spurs.							Iron.	Steel.
Miles of single track,	\$232 33	\$34 89	\$969 93	\$139 43	\$ 82	\$63 54	\$1,398 94	\$0 41	\$39 80	\$1,300 60
Miles of second track,	189 63	2 23	367 71	27 46	567 03	539 37
Miles of third track,	2 79	15 57	18 36	13 88
Miles of fourth track,	3 04	3 04	3 04
Miles of yard track and sidings,	251 50	50 04	543 96	33 71	30	879 51	33 00	90 09	789 54
Total mileage operated (all tracks),	\$656 25	\$137 16	\$1,800 21	\$173 14	\$4 12	\$91 00	\$2,861 88	\$33 41	\$119 89	\$2,650 99

B. Mileage of Line Operated in this and Other States (Single Track).

Mileage by States.	Line Represented by Capital Stock.		Line of proprietary companies.	Line operated under lease.	Line operated under contract, etc.	Line operated under trackage rights.	Total mileage operated.	New line constructed during year.	Rails.	
	Main line.	Branches and spurs.							Iron.	Steel.
In State of Pennsylvania,	\$232 33	\$34 89	\$262 67	\$24 06	\$33 81	\$627 26	\$29 80	\$514 15
In State of New York,	498 76	115 37	\$3 82	16 06	633 01	\$0 07	617 95
In State of New Jersey,	108 50	15 17	123 67	34	108 50
Total mileage operated (single track),	\$232 33	\$34 89	\$869 93	\$139 43	\$3 82	\$63 54	\$1,398 94	\$0 41	\$39 80	\$1,300 60

C. Mileage of Line Owned in this and Other States (Single Track).

Mileage by States.	Line Represented by Capital stock.		Total mileage owned.	Rails.	
	Main line.	Branches and spurs.		Iron.	Steel.
In State of Pennsylvania,	\$232 33	\$84 89	\$317 22	\$1 97	\$315 25
Total mileage owned (single track),	\$232 33	\$84 89	\$317 22	\$1 97	\$315 25

RENEWALS OF RAILS AND TIES.

New Rails Laid During Year.				New Ties Laid During Year.		
Kind.	Tons.	Weight per yard, pounds.	Average price per ton at distribut- ing point.	Kind.	Number.	Average price at distributing point.
Steel:				Oak No. 1,	63,377	.5780
Ninety pounds, A,	1,864.60	90	\$24 82	Oak No. 2,	3,531	.4825
Ninety pounds, A,	1,023.73	90	34 08	Oak No. 3,	1,828	.51
One hundred pounds, A,	2,877.72	100	19 71	Yellow Pine No. 1,	106,036	.45
Total steel,	5,766.05		\$28.72	Yellow Pine No. 2,	2,940	.3490
				Chestnut No. 1,	5,151	.25

NEW YORK CENTRAL AND HUDSON RIVER RAILROAD COMPANY.

This company was organized by the consolidation on November 1, 1869, of the New York Central Railroad Company, and the Hudson River Railroad Company.

The New York Central Railroad Company:

This company was organized under a special law passed April 2, 1853, authorizing the consolidation of the railroads between Albany and Buffalo as follows:

The Albany and Schenectady.
 The Schenectady and Troy.

The Utica and Schenectady.
 The Mohawk Valley.
 The Syracuse and Utica.
 The Syracuse and Utica, Direct.
 The Rochester and Syracuse.
 The Buffalo and Rochester.
 The Rochester, Lock Port and Niagara Falls.
 The Buffalo and Lock Port.

Articles of agreement taking effect as of May 1, 1853, were filed May 17, 1853, the first board of directors elected July 6, and the whole line delivered to the new company August 1, 1853.

NEW YORK, CHICAGO AND ST. LOUIS RAILROAD COMPANY.

Date of organization: September 27, 1887.

Under laws of what government or state organized: States of New York, Pennsylvania, Ohio, Indiana and Illinois.

If a consolidated company, name the constituent companies: This company's railroad was built for the New York, Chicago and St. Louis Railway Company, a consolidated company organized under the laws of the five states above named and composed of constituent companies in the several states, to wit: The Buffalo, Cleveland and Chicago Railway Company of New York, articles of association of which were filed with the Secretary of State about January 15, 1881. The Buffalo, Cleveland and Chicago Railway Company of Pennsylvania, articles of association of which were filed with the Secretary of the Commonwealth about January 15, 1881. The New York and Chicago Railway Company of Ohio, articles of incorporation of which were filed with the Secretary of State about March 15, 1881. The New York and Chicago Railway Company of Indiana, articles of incorporation of which were filed with the Secretary of State March 4, 1881. The New York and Chicago Railway Company of Illinois, articles of organization of which were filed with the Secretary of State March 23, 1881. All of the constituent companies were incorporated under the general railroad laws of their respective states, to wit: General railroad laws of New York, entitled "An act to authorize the formation of railroad companies and to regulate the same," passed April 2, 1850. In Pennsylvania, "An act to authorize the formation and regulation of railroad corporations," approved April 4, 1868. In Ohio, sections 3236 to 3245 of revised statutes. In Indiana, sections 3885 to 3888 of revised statutes. In Illinois, chapter 114 of revised statutes, sections 1 to 6. The constituent companies were consolidated by agreement, dated April 8, 1881, under the general laws of the five states named, to which reference is made as follows: In New

York, chapter 917 of the law of 1869, entitled "An act authorizing the consolidation of certain railroad companies." In Pennsylvania, "An act supplementary to an act regulating railroad companies," approved the 17th day of February, A. D. 1849; approved 24th of March, 1865. In Ohio, sections 3380 to 3385 of revised statutes. In Indiana, section 3971 of revised statutes. In Illinois, chapter 32 of revised statutes, sections 59 to 57. By reason of the foreclosure of mortgages upon its railway, it was sold in May, 1887. Companies incorporated under the laws of the five states above named, respectively, bought from the purchasers the portions in their respective states. These companies, with the dates of their incorporation, were as follows. The New York, Chicago and St. Louis Railroad Company, of New York, articles of association of which were filed with the Secretary of State June 22, 1887. The Erie and State Line Railroad Company, of Pennsylvania, articles of association of which were filed with the Secretary of the Commonwealth June 27, 1887. The Cleveland and State Line Railroad Company of Ohio, articles of incorporation of which were filed with the Secretary of State August 15, 1887. The Fort Wayne and Illinois Railroad Company, certificate of incorporation of which was filed with the Secretary of State June 28, 1887. The Chicago and State Line Railroad Company, articles of incorporation of which were filed with the Secretary of State June 30, 1887. All were organized under the general railroad laws of the several states to which reference is given above.

Agreement for consolidation of the constituent companies in New York and Pennsylvania, dated July 7, 1887, and filed with the Secretary of State August 15, 1887. Name of consolidated company: The New York, Chicago and St. Louis Railroad Company. Agreement for consolidation of above named consolidated company with constituent companies in Ohio and Indiana filed with the Secretary of State September 27, 1887. Lease of Chicago and State Line Railroad from the Chicago and State Line Railroad Company to the Fort Wayne and Illinois Railroad Company, dated September 20, 1887. As this company is the owner of the capital stock of the Chicago and State Line Railroad Company, which does not keep up an independent organization for the purpose of distributing income, the leases treated as effecting a consolidation in fact. Consolidation was effected under the laws of the several states referred to in answer to question four, except the lease of the Chicago and State Line Railroad Company, which was made by authority of chapter 114, section 34, of revised statutes of Illinois, and section 3273 of revised statutes of Indiana.

Date of organization: June 22, 1896.

Under laws of what government or state organized: State of New York, chapter 555, in the laws of 1890, section 70. The act is known as the "Railroad Law" of New York.

If a consolidated company, name the constituent companies: New York and Pennsylvania Railroad Company, a New York corporation, chapter or articles of association dated June 22, 1895, amended September 23, 1895, and the Olean, Oswego and Eastern Railway Company, a Pennsylvania corporation, charter dated October 20, 1892. Consolidated under the laws of the State of New York (section 70, chapter 555, laws of 1890), known as the railroad law, on June 22, 1896.

Date and authority for each consolidation: June 22, 1896, railroad law of the State of New York, upon consent and authority of the stockholders of each constituent company.

Not given for reason stated in letter of M. Riebenack, assistant comptroller, April 29, 1890.

*See note, page 275.

PA Internal Affairs 1900

EXPLANATORY REMARKS.

The interest on equipment trust obligations accrued and paid for the year was \$339,235.00, as shown on opposite page. The amount charged to income account was \$760,023.03, shown on page 278. A reference to letter written by Mr. Riekenack, assistant comptroller, to Professor Henry C. Adams, statistician, dated May 7, 1890, which explained fully the Pennsylvania Railroad Company's method of treating payment on account of principal and interest of car trust obligations will give the cause of the difference.

EXPLANATORY REMARKS.

The amount shown on opposite page as "loans and bills payable," \$11,397,094.30, is composed almost entirely of balance due to the various railroad companies, other corporations, etc., controlled by the Pennsylvania Railroad Company which under its method of transacting business are required to be deposited with the treasurer of that company.

The amount shown on opposite page as miscellaneous, \$3,650,296.64 includes an amount of \$1,500,000.00 set aside as a fund to meet payments on account of extraordinary expenditures.

EXPLANATORY REMARKS.

It is not possible from the system of accounts used by this company to give the expenditures for the year or the total cost under the various items, as called for. The transactions for the year shown as "Cost of Construction," on opposite page, are sub-divided in our accounts as follows:

Right of way and station grounds,	*\$136,569 74
Additional tracks,	133,514 79
New lines,	*339,936 72
Interlocking or signal apparatus,	*461 19
Station buildings and fixtures,	*7,564 26
Docks and wharves,	*26,561 08
General expenses,	*55 00
	<u> </u>
	<u>*\$407,563 80</u>

*Deficit.

We do not separate, in our accounts, the cost of the different kinds of cars used in the passenger service. Consequently, we cannot divide the amount stated to show separately the cost of passenger, sleeping or dining cars, etc.

COST OF ROAD, EQUIPMENT AND PERMANENT IMPROVEMENTS.

Item.	Expenditures During Year.			Total cost to June 30, 1899.	Total cost to June 30, 1900.	Cost per mile.
	Included in operating expenses.	Not Included in Operating Expenses.				
		Charged to income account as permanent improvements.	Charged to construction of equipment.			
Construction:						
Real estate,			\$610,440 24	\$20,878,127 58	\$21,286,567 82	\$28,598 28

EXPLANATORY REMARKS

The total passenger revenue, \$16,925,491.71 shown on page 301 differs from that stated (17,965,-019.46) on page 285, on account of the passenger earnings of the Jersey City ferries and Pennsylvania Annex being included in the latter and not in the former.

In ascertaining the other per mile of road averages the mileage of the Jersey City ferries and the earnings of the Jersey City ferries and Pennsylvania Annex are included.

In ascertaining the number of passengers carried one mile per mile of road and "Average Receipts per Passenger per Mile" the earnings of the Jersey City ferries and earnings of the Pennsylvania Annex are excluded.

Considerable of the revenue of the Jersey City ferries and Pennsylvania Annex is derived from passengers using the ferries only and the passengers stated on opposite page are only rail passengers

Train Mileage.

"Mileage of Revenue Mixed Trains." This mileage is divided proportionately and included in the figures given for "Mileage of Revenue Passenger Trains" and "Mileage of Revenue Freight Trains."

"Mileage of Non-Revenue Trains." Unable to give this information, as will be noted below under the separate definitions as given for this class of mileage.

(a) "Trains of the Passenger Class, such as pay-trains, official trains, complimentary special trains, and trains run to convey employes to and from shops." This mileage has never been kept separately and is included in the figures for "Mileage of Revenue Passenger Trains."

(b) "Trains of the freight class, such as Material and Supply Trains." We do not have trains devoted exclusively to such class of service.

(c) "Trains of the Work Class, such as gravel trains, ballast trains, construction trains, wrecking trains, repair trains, snow ploughs and flangers, etc." The mileage of locomotives in work or construction service, known as "Work Locomotive Mileage" includes in addition to the above the mileage of shop yard shifters, that is the mileage of locomotives engaged in hauling shop materials.

PASSENGER AND FREIGHT, AND TRAIN MILEAGE.

Item.	Column for tonnage, number passengers, number trains, mile- age, number cars.	Column for revenue and rates.

Total cars owned,	102	57,728	31,279	" ..	54,834	"
Cars contributed to fast freight line service,		12,061	10,701	" ..	12,022	"

*One hundred and twenty-six tank cars rebuilt as coal cars.

†Seventeen first class cars and eighteen emigrant cars are charged to second class cars.

EXPLANATORY REMARKS.

No mileage is shown on page 303 under the headings "lines operated under trackage rights" for the reason that the information was prepared by the engineer, maintenance of way, who has no records of lines so operated.

MILEAGE.

A. Mileage of Road Operated (All Tracks).

Line in Use.	Line Represented by Capital Stock.		Line operated under lease.	Line operated under contract, etc.	Total mileage operated.	New line constructed during year.	Rails.	
	Main line.	Branches and spurs.					Iron.	Steel.
Miles of single track,	329.02	222.47	*606.60	1,652.16	2,310.25	39.11	23.92	2,788.23
Miles of second track,	329.02	63.68	220.78	208.14	821.60	23.30	321.60
Miles of third track,	251.69	7.74	102.79	13.15	375.27	4.50	375.27
Miles of fourth track,	180.90	99.41	.85	291.16	14.66	281.16
Miles of yard track and sidings,	509.86	158.01	494.71	703.35	1,865.93	75.63	145.53	1,720.40
Total mileage operated (all tracks),	1,600.49	451.90	1,524.27	2,577.65	6,154.81	157.20	169.45	5,984.86

*Hudson River ferries not included here.

B. Mileage of Line Operated in this and Other States (Single Track).

Mileage by States.	Line Represented by Capital Stock.		Line operated under lease.	Line operated under contract, etc.	Total mileage operated.	New line constructed during year.	Rails.	
	Main line.	Branches and spurs.					Iron.	Steel.
In State of Pennsylvania,	329.02	222.47	420.73	1,394.28	2,366.56	88.94	22.10	2,344.46
In State of New Jersey,			185.81	210.84	396.65	.17	1.82	394.53
In State of Maryland,				42.24	42.24			42.24
In State of Delaware,				4.80	4.80			4.80
Total mileage operated (single track),	329.02	222.47	606.60	1,652.16	2,810.25	39.11	23.92	2,786.33

C. Mileage of Line Owned in this and Other States (Single Track).

Mileage by States.	Line Represented by Capital Stock.		Total mileage owned.	New line constructed during year.	Rails.	
	Main line.	Branches and spurs.			Iron.	Steel.
In State of Pennsylvania,	329.02	222.47	551.49	16.19	.84	550.65
Total mileage owned (single track),	329.02	222.47	551.49	16.19	.84	550.65

*Hudson River ferries not included here.

RENEWALS OF RAILS AND TIES.

New Rails Laid During Year.				New Ties Laid During Year.		
Kind.	Tons.	Weight Per Yard—Pounds.	Average Price per Ton at Distributing Point.	Kind.	Number.	Average Price at Distributing Point.
Steel,	96.89	70	\$33 00	Oak No. 1,	496,586	59.75
	1,061.88	85	32 68	Oak No. 2,	164,151	40.75
	13,295.23	100	33 02	Chestnut No. 1,	26,826	37.25
Total steel,	14,393.85		\$32 99½	Chestnut No. 2,	5,688	27.26
				Yellow Pine No. 1,	3,043	65
				Miscellaneous No. 1,	2,173	47.50
				Miscellaneous No. 2,	19,324	28.25
				Total,	781,240	53.25

CONSUMPTION OF FUEL BY LOCOMOTIVES.

Locomotives.	Coal—Tons.		Wood—Cords, Soft.	Total Fuel Consumed—Tons.	Miles Run.	Average Pounds Consumed Per Mile.
	Anthracite.	Bituminous.				
Passenger,	94,644.30	494,260.80	1,958¾	589,902.04	16,612,489	71.02
Freight,	989.65	2,347,673.16	3,120¼	2,860,223.71	28,946,494	165.82
Switching,	62,537.20	408,059.80	1,833¾	571,313.87	13,433,558	70.17
Construction,	1,120.75	68,723.90	263¾	69,982.53	2,512,222	65.69
Total,	159,361.80	8,318,723.60	6,671½	3,481,421.15	60,905,751	114.82
Average cost at distributing point,	\$2 95	\$1 01	\$0 87			
	3 05	1 10	1 31	\$1 27		
		2 45	2 24			

Other Train Accidents—Trainmen.

	Killed.	Injured.
By broken axle,		2
By broken wheel,	1	4
By broken rail,	2	4
By car picking switch,		1
By coupling pin breaking,		1
By burnt journal,		1
By open switch,		1
By train parting,	1	1
Total,	4	15

Other Employees.

By broken axle,	1	
By broken wheel,		1
By broken rail,	1	
By car picking switch,		2
Total,	2	3

Other Causes—Trainmen.

By shifting of lading,		23
By shifting, peeling or repairing cars,		22
By water gauge breaking,		1
By being caught between engine and freight station,		1
By having hand caught between round of ladder and end of car,		1
By being caught between cars moving in opposite direction,		1
By jumping from wrecking train,		1
In handling brakes,		4
In getting on or off trains,		23
By falling beneath cars,		3
By being caught between cars,	1	53
By being struck by train,		9
By having foot caught between engine and ground,		2
In firing engines,		3
In putting on brakes,		13
By being run over by a train,	4	2
By starting car with bar,		1
By coupling steam hose,		4
By being caught between train and building,		2
By having leg caught by step of engine,		2
By being caught under train,		2
By falling in train,		1
By being struck by brake wheel,		1
Being struck by pier of bridge,		1
Applying and releasing brakes,	2	79
At work on bridges,		1
By falling from embankments, trestles, buildings and bridges,	1	3
Cinder in eye,		18
By being caught between cars—not coupling,	2	17
By being caught by window or door,		6
By being struck by coal falling from engines, cars, etc.,		19
In getting on or off cars,	6	259
At work on engines or cars,	1	141
By being struck by engines, cars and trains,	25	69
By end gate falling,		2
Fighting on duty,		1
By falling into turntable or ash-pit,		13
In handling freight or baggage,		58
By objects thrown by unknown persons,		5
By being struck by objects near track,	1	35
In pushing car,		1
By trains stopping or starting too suddenly,	1	45
In turning switches,	1	81
By tripping or falling while passing over trains,		6
By being assaulted by unknown persons,		1
By clearing wrecks and re-placing car on tracks,		7
While working on road-bed,		5
By lamp globe breaking,		1
By being struck by torpedo,		1

	Killed.	Injured.
While at work on turntable,		8
By tripping while walking over tracks,		40
By being struck by stone thrown by blast,		1
By falling from loft of cabin,		2
By cabin striking wagon tongue,		1
By being struck by ejected man,		1
By an explosion while cooking meal,		1
By falling from trestle breaking down,		1
By lading shifting,		10
By poling car,		2
While unloading hay,		1
By stepping through hole in car,		1
By shaking grate of engine,		2
By striling telegraph pole,		1
By trap door falling,		1
By being burned by back draught from engine,		1
By being struck by passing car,		2
By being thrown by cars shifting,		1
By being struck by switch lever,		8
By striking fence while giving a signal,		2
By being struck by engine while throwing switch,		3
By falling over hand car,		1
By falling on tank of engine,		2
While loading box in car,		1
By grate lever thrown from engine,		1
By pulling water scoop of engine,		1
By bottle thrown from passing train,		1
In turning engine,		1
By catching hand in gate,		1
By falling into culvert while crossing tracks,		1
By standing on tracks,		1
By running nail into foot,		1
By being struck by a wheel while raising float,		1
By catching fingers between lump of coal and fire door,		1
In catching calf escaped from stock yard,		1
By leved on top of standpipe,		1
By falling wood,		1
By stepping on piece of coal,		1
By stepping in front of moving train,	1
By being struck by moving train,	1	7
In charging cars,		1
In firing engines,		6
By oil blowing out of lubricator, ..		1
By being assaulted by tramps, ..		1
By sudden application of air,		9
By being burned by hot cinders,		2
By kicking brake shoe loose,		1
In handling tools,		6
By falling over ties, tracks, etc.,		15
By lard can exploding in cabin car,		1
By being caught between train and trestle,		1
By removing damaged coupler,		1
By being struck by coal train passing engine,		1
By coal rolling from tank to gangway of engine,		1
By being caught between car and shop door,		1
By being struck by fire hook,		1
By stepping on nail,		1
By having hand caught between lading and car,		2
By coupling bolt falling on foot,		3
By truck falling on foot,		1
By having foot sprained while walking on track,		8
By falling while crossing tracks,		5
Having hand cut by broken glass,		2
Falling on ice,		1
Falling over switch,		1
Total,	47	1,298

Other Causes—Switchmen, Flagmen, Watchmen, Etc.

By being struck by train,		1
By being run over by train,	1
By falling from bridges, trestles, building, embankments,		1
By getting on or off engines and cars,		4

	Killed.	Injured.
By being struck and run over by engines, trains or cars,	13	10
By being struck by objects near tracks,		1
In turning switches,		9
By tripping while walking over tracks,		6
By can exploding while cooking meal,		1
By walking on tracks,		1
By having hand caught by switch lever,		1
By falling over signal wire,		1
By having foot caught in switch lever,		1
By falling while running,		1
By falling on tracks, over ties, etc.,		4
By falling while crossing tracks,		1
Total,	13	43

Other Employees.

By applying and releasing brakes,		4
While at work on bridges,		7
By falling from bridges, trestles, building, embankments, etc.,	2	15
By cinder in eye,		3
By being caught between cars—not coupling,	1	8
By being caught by car door or window,		1
By being struck by coal falling from cars, engines, etc.,		5
In getting on or off engines and cars,	5	46
While at work on engines and cars,		118
By being struck and run over by engines, trains, cars,	59	53
By fighting on duty,		1
By falling into turn-table or ash-pit,		11
In handling baggage or freight,		200
By objects thrown by unknown persons,		2
By being struck by objects near tracks,		1
By stopping or starting trains too suddenly,		4
In turning switches,		3
In clearing wrecks and replacing cars on tracks,		11
While working on road-bed,	12	237
By being struck by torpedo,		1
While at work on turntable,		3
By tripping while walking over tracks,		24
By gun exploding,		1
By being struck by flying chain from electric crane,		1
By being struck by damper coming off engine,		2
By accidentally shooting himself,		1
By raising coal-dump,		1
By can exploding while cooking meal,		1
By jumping from steamer to car on barge,	1	1

While at Work:

Carpenters,		27
Captains, mates, engineers, firemen, deck hands, watchmen, cooks, floating of tugs, barges, lighters and floats,		27
Mechanics,		2
Boilermakers,		3
Boilermakers' helpers,		1
Baggage porters,		1
Car inspectors and oilers,		12
Plumbers,		2
Machinists,		2
Blacksmiths,		2
Car cleaners,		2
Engine cleaners,		8
Telegraph linemen,		1
Bridgemen,		2
Station cleaners,		1
Warehouse men,		2
Foremen,		1
Track and other laborers,		92
By being struck by trains while walking on track,	7	2
By being burnt by smouldering iron,		1
By being struck by falling ore,		2
By lading shifting,		6
By being burnt by hot cinders,		4
In handling tools,		39
By falling on tracks over ties, etc.,		20

	Killed.	Injured.
By being struck by fire hook,		3
By falling ties, rocks and rails,		3
In removing hand car from track,		1
By defective coal platform,		1
By being struck by piece of steel,		1
By being caught between train and platform,		1
By rail falling on foot,		1
By being drowned,	1	
By being struck by shed,		1
By having ankle sprained,		2
While repairing car,		4
By having foot caught in switch,		2
By being cut by window glass,		1
By being struck by piece of glass,		2
By being struck by bolt,		1
By being struck by wrench,		1
By being struck by cushion,		1
By being struck by bucket,		1
By being scalded while filling heater,		1
By having foot caught in bridge,		1
By falling from stairway,		1
By falling on ice,		1
By having legs scalded,		1
By having eye cut by rivet,		1
By tie falling on foot,		1
By having head burned at work,		1
By being caught in elevator,		1
By having hand caught in switch,		1
By trunk falling on foot,		1
By running nail in foot,		1
In cutting ice,		1
By shifting of lading,		1
By shifting, polling or repairing cars,		1
Being caught by engine rope,		1
By being run over by trains,	4	
By being struck by trains,		5
By stepping off train,		7
By being knocked off scaffold by train,		1
By falling in train,		1
By coupling steam heat,		3
By being caught between cars,		2
By having hand caught by car door,		2
By window sash falling on hand,		1
By striking arm against train,		1
Total,	92	1,175

Other Train Accidents—Passengers.

By car picking switch,	42
By open switch,	3
Total,	45
By axle breaking,	1

Other Causes—Passengers.

By falling from moving train,	12
In getting on or off moving train,	2
By objects thrown from car windows,	12
By being struck by objects near tracks,	3
By having foot caught between bumpers,	2
By being struck or caught by car windows,	17
By being struck by broken lamp globe,	2
By train starting too suddenly,	2
By tripping while passing through train,	1
By being struck by paper in hands of another passenger,	1
By car seat falling,	1
By falling down in coach while intoxicated,	1
By car windows broken by stone ballast, etc.,	12
By having hand caught between car window and casing,	1
By being thrown from chair in dining car,	2
By shoving hand through glass door,	1
By being thrown by car lurching,	1

	Killed.	Injured.
By car door,		2
By being caught between bumpers in passing from one track to another,		1
By falling while attempting to catch train,		1
In getting on or off trains,		1
By falling from moving train,		1
By window sash falling on hand,		1
Total,	2	118

Other Causes—Trespassing.

By being struck or run over by trains or engines,	202	150
In getting on or off moving trains or engines,	19	90
By jumping or falling from trains or engines,	12	43

PA Internal Affairs 1900

Section of Reservoir, with gates, West of Lebanon, Pa.

IMPORTANT CHANGES DURING THE YEAR.

4. Wilmington and Northern Railroad leased to Philadelphia and Reading Railway Company. for 999 years from February 1, 1900.

CONTRACTS, AGREEMENTS, ETC.

United States Express Company.—The railroad company supplies equipment and furnishes transportation for express freight, receiving a percentage of the gross receipts.

United States Government.—No contracts. The terms vary on the several mail routes.

Pullman's Palace Car Company.—The car company furnishes its own cars.

No contracts other than those covered by tariffs of rates with connecting lines and individual shippers in the ordinary course of business, copies of which tariffs have been duly filed with the Inter-State Commerce Commission.

SECURITY FOR FUNDED DEBT.

The mortgages described on page 343 are liens upon the entire property of the Philadelphia and Reading Railway Company.

PHILADELPHIA, WILMINGTON AND BALTIMORE RAILROAD COMPANY.

Date of organization: April 2, 1831.

Under laws of what government or state organized: The Philadelphia, Wilmington and Baltimore Railroad Company is a corporation organized under the laws of the states of Pennsylvania, Delaware and Maryland.

If a consolidated company, name the constituent companies: The present Philadelphia, Wilmington and Baltimore Railroad Company is a consolidated company, formed by the merger under date of March 28, 1877, under authority of an act of Pennsylvania Legislature of May 16, 1861, and an act of Delaware, of February 22, 1877, of the Philadelphia, Wilmington and Baltimore Railroad Company, New Castle and Frenchtown Turnpike Railroad Company, chartered by an act of the state of Delaware of February 7, 1823; New Castle and Wilmington Railroad Company, chartered by act of state of Delaware of February 9, 1839, and the Southwark Railroad Company, chartered by act of the Legislature of Pennsylvania of April 2, 1831.

The Philadelphia, Wilmington and Baltimore Railroad Company, which was a party to that consolidation, was organized February 5, 1838, by the consolidation under authority of an act of Delaware, of February 4, 1833, and an act of Maryland, of January 20, 1838, and an act of Pennsylvania Legislature of December 19, 1837, of the following companies: (1) The Philadelphia and Delaware County Railroad Company, chartered by act of State of Pennsylvania of April 2, 1831; name changed to Philadelphia, Wilmington and Baltimore Railroad Company, by act of March 14, 1836. (2) The Wilmington and Susquehanna Railroad Company, chartered by act of the state of Delaware, of January 18, 1832, into which the Delaware and Maryland Railroad Company, chartered by act of the state of Maryland, of March 14, 1832, had been merged

by authority of the act of Delaware, of February 4, 1833, act of Delaware of July 24, 1836, and act of Maryland, of March 13, 1836. (3) The Baltimore and Port Deposit Railroad Company, chartered by an act of Maryland, of March 5, 1832.

The following is a reference to the acts of incorporation and acts supplementary to or amendatory thereof, of each of the companies constituting the Philadelphia, Wilmington and Baltimore Railroad Company.

Philadelphia, Wilmington and Baltimore Railroad Company—Acts of Pennsylvania, of April 2, 1831 (P. L., page 353); March 14, 1836 (P. L., page 86); February 24, 1837 (P. L., page 20); March 7, 1837 (P. L., page 39); December 19, 1837 (P. L., page 1).

PITTSBURG, BESSEMER AND LAKE ERIE RAILROAD COMPANY.

Date of organization: The Pittsburg, Bessemer and Lake Erie Railroad Company was formed under agreement dated December 22, 1896; filed in Pennsylvania, January 18, 1897, and in Ohio, January 19, 1897, consolidating the Pittsburg, Shenango and Lake Erie Railroad Company, (5) and the Butler and Pittsburg Railroad Company, under the following acts of Assembly of Pennsylvania: act approved March 24, 1865, P. L., page 49, and act approved April 28, 1870, P. L., page 74, and under authority of sections 3378 to 3382, both inclusive, of the revised statutes of the state of Ohio.

The Butler and Pittsburg Railroad Company, one of the constituent companies, was organized April 8, 1896, under act of Assembly of Pennsylvania, approved April 4, 1868, P. L., page 62.

The Pittsburg, Shenango and Lake Erie Railroad Company (the fifth of the same name), was formed under agreement dated March 27, 1898, filed in Pennsylvania, April 23, and in Ohio, May 13, consolidating the Pittsburg, Shenango and Lake Erie Railroad Company (4), the Conneaut Terminal Railroad Company, and the Erie Terminal Railroad Company, under the fol-

following acts of Assembly of Pennsylvania; act approved March 24, 1865, P. L., page 49, and act approved April 26, 1870, P. L. page 1274, and under authority of sections 3379 to 3392, both inclusive, of the revised statutes of the state of Ohio.

The Pittsburg, Shenango and Lake Erie Railroad Company (4) was formed under agreement dated August 27, 1890, filed in Pennsylvania and Ohio in October, 1890, consolidating the Pittsburg, Shenango and Lake Erie Railroad Company (3) and the Pittsburg, Butler and Shenango Railroad Company under authority of the statutes of Pennsylvania and Ohio, above recited.

The Pittsburg, Shenango and Lake Erie Railroad Company (3) was formed June 9, 1888, by the consolidation of the Pittsburg, Shenango and Lake Erie Railroad Company (2) and the North Eastern Ohio Railroad Company, under authority of statutes of Pennsylvania and Ohio, above recited.

The Pittsburg, Shenango and Lake Erie Railroad Company (2), was organized June 8, 1888, by the consolidation of the Pittsburg, Shenango and Lake Erie Railroad Company (1) and the Erie, Shenango and Pittsburg Railway Company, under authority of the said acts of Assembly of Pennsylvania, approved March 24, 1865.

The Pittsburg, Shenango and Lake Erie Railroad Company (1) aforesaid, was organized on February 23, 1858, by a reorganization of the Shenango and Allegheny Railroad Company, under act of Assembly of Pennsylvania, approved May 25, 1878, after judicial sale under decree of the circuit court of the United States for the Western district of Pennsylvania.

The Conneaut Terminal Railroad Company, one of the constituent companies, was organized November 18, 1892, under sections 3235 to 3238, both inclusive, of the revised statutes of the state of Ohio.

The Erie Terminal Railroad Company, one of the constituent companies, was organized May 18, 1891, under the act of Assembly of Pennsylvania, approved April 4, 1868, P. L., page 62.

The Pittsburg, Butler and Shenango Railroad Company was organized in February, 1889, under said act of Assembly of Pennsylvania, approved May 25, 1878, by a reorganization of the West Penn and Shenango Connecting Railroad Company after a judicial sale under decree of the court of common pleas of Mercer county, Pennsylvania.

The West Penn and Shenango Connecting Railroad Company (formerly called the Connoquenessing Valley Railroad Company), was organized May 3, 1881, under said act of Assembly of Pennsylvania, approved April 4, 1868.

The North Eastern Ohio Railroad Company was organized under the general railroad law of Ohio, on February 16, 1888.

The Erie, Shenango and Pittsburg Railway Company was formed by the reorganization of the Ohio River and Lake Erie Railroad Company under said act of Assembly of Pennsylvania, approved May 25, 1878.

The Ohio River and Lake Erie Railroad Company was organized under said act of Assembly of Pennsylvania, approved April 4, 1868.

• The Shenango and Allegheny Railroad Company, formerly the Bear Creek Railroad Company (name changed by act of Legislature, approved April 9, 1867), was organized under act of Assembly of Pennsylvania, approved March 20, 1866, pages 429 and 430, and its supplements, as follows: (1) Approved April 9, 1867, P. L., pages 984 and 985; (2) Approved April 14, 1870, P. L., page 1516; (3) Approved May 15, 1871, P. L., pages 871 and 872; (4) Approved March 7, 1872, P. L., page 1012.

POMEROY AND NEWARK RAILROAD COMPANY.

Operated by Pennsylvania Railroad Company.

Date of organization; December 29, 1881.

Under laws of what government or state organized: The Doe Run and White Clay Creek Railroad Company was organized under an act of the General Assembly of the Commonwealth of Pennsylvania, approved March 24, 1868.

The name of the company was changed to the Pennsylvania and Delaware Railway Company by act of Assembly, approved April 20, 1869.

The Delaware and Pennsylvania Railroad Company was organized under an act of the General Assembly of the Commonwealth of Delaware, passed February 26, 1857.

The Pennsylvania and Delaware Railway Company and the Delaware and Pennsylvania Railroad Company were consolidated and merged into one company under the name and title of the Pennsylvania and Delaware Railway Company, by authority of the laws of the States of Pennsylvania and Delaware, a joint agreement dated March 17, 1873, being filed in the office of the Secretary of the Commonwealth of Pennsylvania, May 3, 1873.

The Pennsylvania and Delaware Railway was sold under foreclosure of mortgage August 12, 1879, which sale was confirmed absolutely by the circuit court of the United States for the Eastern District of Pennsylvania, October 25, 1879.

On February 5, 1880, a new corporation was organized, entitled the Pomeroy and State Line Railroad Company, for that portion of the railroad extending from Pomeroy in Chester county, Pennsylvania, to the boundary line between the states of Pennsylvania and Delaware, under the provisions of an act of the Legislature of Pennsylvania, approved April 8, 1881, and the supplements thereto. The certificate of reorganization was filed in the office of the Secretary of the Commonwealth of Pennsylvania, February 26, 1880.

A corporation under the name of the Newark and Delaware City Railroad Company, for that portion of the railroad extending from the boundary line between the States of Pennsylvania and Delaware, to Delaware City, was organized on March 29, 1880, in pursuance of an act of the Legislature of Delaware, passed March 27, 1879.

Under the authority of an act of the Legislature of the State of Delaware, passed March 19, 1881, the portion of the Newark and Delaware City Railroad lying between the north line of right of way of the main line of the Philadelphia, Wilmington and Baltimore Railroad and Delaware City was sold to the Philadelphia, Wilmington and Baltimore Railroad Company. Under the authority of the same act the residue of the railroad lying between the said northern line of the Philadelphia, Wilmington and Baltimore Railroad and the State line was consolidated and merged into the Pomeroy and State Line Railroad, the name of the consolidated company being changed to the Pomeroy and Newark Railroad Company. The agreement of consolidation and merger was dated December 2, 1881, copies of which were filed with the Secretary of the Commonwealth of Pennsylvania, December 29, 1881, and with the Secretary of the State of Delaware, December 9, 1881.

REYNOLDSVILLE AND FALLS CREEK RAILROAD COMPANY.

Date of organization: January 11, 1897.

Under laws of what government or State organized: Under general railroad laws of the State of Pennsylvania, and supplements thereto.

If a consolidated company, name the constituent companies: Consolidated company formed January 11, 1897, under articles of merger and consolidation of the Reynoldsville and Falls Creek Railroad Company, and the Falls Creek Railroad Company, both organized and existing under the general railroad laws of Pennsylvania; said articles of merger and consolidation were filed in the office of the Secretary of the Commonwealth of Pennsylvania January 22, 1897. The original articles of association of the constituent companies were filed in the office of the Secretary of the Commonwealth of Pennsylvania on December 13, 1883, and July 16, 1889, respectively.

Date and authority for such consolidation: January 11, 1897, by virtue of resolution of the stockholders and boards of directors of the respective constituent companies.

IMPORTANT CHANGES DURING THE YEAR.

The third mortgage bonds, \$375,000 matured June 1, 1900, were redeemed by the city of Baltimore, under its guarantee with the proceeds derived from the sale of \$375,000 of Baltimore city 3¼ per cent. stock and as a security therefore. The Western Maryland Railroad Company executed and delivered to the city of Baltimore a new mortgage on all its property, dated February 13, 1900, known as "Sixth Mortgage." The premiums derived from the sale of said \$375,000 city stock amounting to \$115,281.25, being applied as the nucleus of a sinking fund for the redemption of said city stock March 1, 1950.

*This road is owned and operated by the Oliver interests and the stock issue is under consideration.

a This amount includes "cost of equipment."

b This company is operated by the Lehigh Coal and Navigation Company, which is claimed not to be a common carrier, but according to the report of the Lehigh and Susquehanna Company, all revenues are received by the said Lehigh Coal and Navigation Company.

The report of this company shows that it has no capital stock, bonded or floating indebtedness, therefore, the amount of cost of road and equipment is inserted as representing its capital stock, "authorized and outstanding."

*Lessee's report.

a This report covers the operations to December 31, 1899, only. After that date the road was operated by the Buffalo, Rochester and Pittsburg Railway Company.

b Operating report for the seven months ending January 31, 1900.

This table shows that railroads have carried more tons freight to train mile than heretofore.

TABLE G—NUMBER OF PASSENGERS CARRIED, COST PER MILE, ETC.

Name of Company.	Number of passengers carried earning revenue.	Number of passengers carried one mile.	Average distance carried.	Total passenger revenue.	Average amount received from each passenger.	Average receipts per passenger per mile.	Passenger earnings per train mile.	Passenger earnings per mile of road.
