ANNUAL REPORT

OF THE

Bureau of Railways

Department of Internal Affairs.

PART IV.

RAILROAD, CANAL, NAVIGATION, TELEGRAPH AND TELEPHONE COMPANIES

FOR THE YEAR ENDING JUNE 30, 1901.

COMMUNICATION.

Department of Internal Affairs,
Harrisburg, December 1, 1901.

To His Excellency, William A. Stone,

Governor of the Commonwealth of Pennsylvania:

Sir: In compliance with the requirements of the Constitution, and the acts of the General Assembly approved, respectively, April 9, 1870, May 15, 1874, June 4, 1883, May 13, 1889, and April 19, 1897, I have the honor to present to you herewith, for transmission to the General Assembly a report of this Department, Part IV, covering the affairs of Railroad, Canal, Navigation, Telegraph and Telephone Companies for the year ending June 30, 1901.

I am very respectfully,

Your obedient servant,

JAMES W. LATTA,
Secretary of Internal Affairs.

(1)

BROAD STREET STATION, PHILADELPHIA, PA.

Pennsylvania Railroad Company.

BUREAU OF RAILWAYS.

Department of Internal Affairs.

LETTER OF TRANSMITTAL.

Harrisburg, December 1, 1901.

Hon. James W. Latta, Secretary of Internal Affairs of the Commonwealth of Pennsylvania:

Sir: I have the honor to present herewith the report of the Railway Bureau for the year ending June 30, 1901, for transmission to the General Assembly, as required by law.

Very truly yours,
ISAAC B. BROWN,
Superintendent Bureau of Railways.

READING TERMINAL, 12TH AND MARKET STREETS, PHILADELPHIA.
Philadelphia and Reading Railway Company.

REPORT.

In the last ten years the number of corporations annually reporting to this Bureau has been vastly increased. The work has been multiplied on account of the increased number of corporations whose annual reports are filed here and also on account of the additional information which is now required to be given by these corporations. This additional information necessitates the expenditure of a larger amount of work in compiling and editing the annual reports of these corporations. The work of correspondence is likewise increased and more difficulty is encountered in getting the annual reports in within the time prescribed by law.

During the year covered by the report which is submitted herewith blanks have been furnished promptly to each of the steam railway, and street railway corporations as well as the telegraph, telephone and canal companies. By law, these blanks are to be forwarded on or before the first of June and the requirements of the law have been strictly complied with. In many cases it has been difficult to find the proper officers to whom these reports should be sent or delivered. This is conspicuously true in the case of those corporations whose lines have not yet been constructed. This difficulty has made it necessary to employ the services of persons to visit the cities where the home offices of these companies are supposed to be located. In a very few cases no offices or officers could be found, and, therefore, it was impossible to execute the law which requires the Department to send or furnish blanks within the specified time.

The usual, or perhaps it might be said, unusual amount of difficulty has been encountered this year in obtaining the prompt presentation of annual reports. The same story may be related as for a number of years, that it is not with the leading corporations of the Commonwealth that difficulty has been encountered. Some of these leading corporations have found it entirely impossible to compile the prodigious amount of data that the operation of their companies necessitates, and requested that they be given an extension of time beyond the 31st day of August to enable them to com-

plete their reports. In all cases the companies have been notified that this office has no power to extend the time, but that it would be satisfactory to the administration of the office if the reports were filed within a reasonable time after the day fixed by law, so, with these companies, but little difficulty has been encountered. There is a considerable number of corporations whose business is limited and whose accounts are kept in a way not at all creditable to their business management, and, therefore, those who make the annual reports have much trouble in assembling the necessary data and arranging it in proper shape for submission to this office.

In addition to these corporations whose books are not kept as they should be, there are a number of other corporations whose officers exhibit a spirit of total indifference to the mandates of the constitution and law with reference to public supervision and the making of annual reports, some of them attempting to rely upon political influences either to entirely evade the making of annual reports or to so postpone their presentation as to greatly embarrass the work of the Bureau.

The imposition of the penalty provided by the act of 1889 and its supplements has been a source of discipline to a few of the delinquent corporations. The penalty is a severe one and ought not, under any circumstances, to be imposed where there is a disposition to comply with the laws of the Commonwealth, but where there is a disposition to defy the Constitution and the law, there is but one course left and that is to impose the penalty and certify the delinquent corporations to the Attorney General for the collection of the penalty so imposed.

Lest these comments should indicate that there is a general disposition to evade the law on the question of making full and complete annual reports to this Bureau, it is proper to say that a very decided majority of the corporations doing business in Pennsylvania have manifested the most commendable and law-abiding spirit with reference to their duties to the State in making annual reports, and so far as this Bureau is informed, in obeying the laws of the State regulating the affairs of common carriers.

As before indicated, the work of the Bureau increases year by year in proportion to the increased number of corporations whose annual reports are filed and in proportion also to the increased amount of data gathered from these corporations.

During the session of the Legislature of 1901 several acts having reference to steam and street railways were passed, and as some of these enactments have caused considerable public comment, it seems proper to have them published in this annual report of the Bureau of Railways.

On page 63 of the Pamphlet Laws is a bill authorizing the construction of roads across or partly across rivers that are boundary lines between this and adjoining states:

AN ACT

To authorize railroads, heretofore or hereafter constructed to any river forming the boundary between this and any adjoining State, to be built by means of a bridge and its approaches to the middle of such river, and there connect with any railroad of such adjoining State, heretofore or hereafter constructed.

Section 1. Be it enacted, &c., That it shall be lawful for any railroad company of this State, which shall have heretofore constructed or shall hereafter construct its railroad to any river forming the boundary between this and any adjoining state, to build such railroad, with so many tracks as it shall deem necessary, by means of a bridge and its approaches, to the middle of such river, and there connect the same with any railroad of such adjoining state, heretofore or hereafter constructed, and for that purpose such company shall have all the powers conferred upon it with respect to other portions of its railroad.

Approved—The 4th day of April, A. D. 1901.

WILLIAM A. STONE.

On page 53 of the Pamphlet Laws is a bill which relates to the right of one railroad company to acquire the franchises and properties of other railroads by the purchase of stock under certain conditions:

AN ACT

To authorize and empower any railroad corporation of this Commonwealth which shall own at least two-thirds of the whole capital stock of any other like corporation of this Commonwealth, and shall have a railroad connecting with the railroad of the latter, to acquire franchises, property, rights and credits of the latter.

Section 1. Be it enacted, &c., That it shall be lawful for any railroad corporation of this Commonwealth, having a railroad connecting with that of any other like corporation, and owning at least two-thirds of the capital stock of the latter, to acquire in the manner hereinafter provided, and thereafter be possessed of, own, hold, exercise and enjoy, all the franchises, corporate property, rights and credits then possessed, owned, held or exercised, by said last mentioned vendor corporation.

Section 2. Such acquisition shall be effected in the manner and upon the conditions hereinafter stated, to wit: PA Internal Affairs 1901

First. The corporations shall, pursuant to resolution duly adopted by the directors of each, make and execute under their respective corporate seals, duly attested, an agreement providing for such acquisition and sale, specifying all essential details, terms, stipulations and conditions thereof, and particularly showing the number of outstanding shares of capital stock of the vendor corporation, the amount fixed as the price or value per share thereof, and the mode by which the respective holders shall receive payment for the same, and with a map of the railroad to be acquired thereunder, annexed and made part thereof.

Second. Said agreement, after due notice is given all directors of such corporation or corporations, shall be submitted for approval or disapproval to the stockholders of each corporation at separate meetings, either annual or special, duly convened, and if said agreement shall be approved by a majority of the stockholders of each corporation, present at such meeting, then that fact shall be certified by the secretary of each corporation under its corporate seal, and a copy of the agreement, with said certificates attached, shall be filed in the office of the Secretary of the Commonwealth; and immediately upon the filing thereof all the corporate rights, franchises and privileges, and all the corporate property, real, personal and mixed, rights and credits, owned, possessed, held, used or otherwise exercised by the vendor corporation, shall (subject, however, to full payment, in the manner prescribed by said agreement, of the stipulated price or value of the whole capital stock of said vendor corporation,) become and be vested in the acquiring corporation, subject to all the debts, liabilities and duties of said vendor corporation, and shall thereafter be possessed, held, used, exercised and enjoyed by said acquiring corporation, as fully, completely and absolutely in all respects as the same had been theretofore owned, held, exercised and enjoyed by said vendor corporation; and said acquiring corporation may also, with respect to the property so acquired, have, exercise and enjoy all the rights, powers, privileges and franchises which it has and may exercise respecting its other railroads and property. Upon the filing in the office of the Secretary of the Commonwealth of said copy of agreement and attached certificates, as herein required, the capital stock of said vendor corporation shall be wholly extinguished by payment, in the mode prescribed in said agreement, of the stipulated price or value thereof, and all certificates representative thereof shall be delivered to the acquiring corporation for immediate cancellation, and all the corporate rights, franchises, privileges and property of every kind, acquired under said agreement, shall thereafter be represented by the capital stock of the acquiring corporation, and thereupon the corporate existence of the said vendor corporation shall terminate.

Section 3. That the copy of said agreement with said certificates attacher, filed in the office of the Secretary of the Commonwealth, shall be evidence of the lawful holding of the meetings of stockholders of each corporation, and of the due approval of the said agreement as required by this act, as well as the precedent action of the directors of each approving thereof. If any stockholder or stockholders of the railroad corporation, whose franchises, corporate property, rights and credits are acquired under said agreement, shall be dissatisfied with said acquisition, and the terms and conditions thereof contained in said agreement, then it shall and may be lawful for any such stockholder or stockholders, within thirty days after the filing of said agreement in the office of the Secretary of the Commonwealth, to apply by petition to the court of common pleas of the county in which the chief office of the said last mentioned company may be situated to appoint three disinterested persons to estimate and appraise the damage, if any, which such stockholder or stockholders shall suffer or sustain by reason of the purchase and acquisition provided for by said agreement, and whose award, or that of a majority of them, when confirmed by the said court, shall be final and conclusive; and the persons, so appointed, shall also appraise the share or shares of said stockholders in the said company, at the market value thereof, without regard to any depreciation resulting from said purchase and acquisition, and the said company may, at its election, either pay to the said holder the amount of damages so found or the value of the stock so ascertained, and upon payment of the value of the stock, as aforesaid, the same shall be transferred to and be vested in said acquiring company.

Section 4. In connection with and upon consummation of such acquisition, as aforesaid, the acquiring company may issue its own then authorized capital stock or its own bonds, either or both, at not less than the par or face value thereof, to such amount as may be required by said agreement, or as may be found otherwise necessary for paying and extinguishing the outstanding capital stock and bonded indebtedness, or either, of the corporation whose rights, property and franchises are so acquired.

Approved—The 22d day of March, A. D. 1901.

WILLIAM A. STONE.

On page 62 of the Pamphlet Laws is an act which authorizes a railroad company, or rather transportation company, to acquire, hold, dispose of or guarantee stock and securities of other corporations:

AN ACT

Authorizing railroad and other transportation corporations of this State to acquire, hold, dispose of, and guarantee the stock and securities of certain other corporations of this State or elsewhere.

Section 1. Be it enacted, &c., That it shall be lawful for any railroad or other transportation corporation, created by or existing under the laws of this Commonwealth, from time to time to acquire, own and hold, pledge, sell or otherwise dispose of, the stock, bonds and other securities, or either, and to guarantee the stock, bonds and other securities, or either, of any other corporation of this Commonwealth or elsewhere, engaged in the business of transportation, either on land or water, and also of any other warehouse, storage elevator or terminal company, whose business is incidental to the business of transportation in which the purchasing or guaranteeing corporation shall be authorized to engage.

Approved—The 4th day of April, A. D. 1901.

WILLIAM A. STONE.

On page 61 of the Pamphlet Laws is found an act which it is presumed is intended to enforce the provisions of section four of Article XVII of the Constitution, relating to parallel or competing lines:

AN ACT

To enforce the provisions of section four of Article XVII of the Constitution.

Section 1. Be it enacted. &c..That no railroad, canal or other corporation of this State, or the lessees, purchasers or managers of any such railroad or canal corporation, shall consolidate the stock, property or franchises of such corporation with, or lease or purchase the works or franchises of, or hold a majority of the stock of, or in any other way control, any other railroad or canal corporation, organized under the laws of this State, owning or having under its control within this State a parallel or competing line; nor shall any officer of such railroad or canal corporation of this State act as an officer of any other railroad or canal corporation of this State, owning or having the control of a parallel or competing line; and the question whether railroads or canals are parallel or competing lines shall, when demanded by the party complainant, be decided by a jury as in other civil issues: Provided, That none of the prohibitions of this act shall apply where one railroad or canal corporation owns a majority of the stock of another railroad or canal cor-

poration, which it held before the adoption of the present Constitution, nor where a railroad corporation has further or shall further the construction of a line, parallel and competing with its own, by subscribing to a majority of the stock of a corporation organized for that purpose.

Section 2. That any violation or attempted violation of the provisions of this act may be attacked or restrained by appropriate proceedings at law or in equity, at the instance of the Commonwealth acting through the Attorney General, and that any such violation shall also constitute a misdemeanor, for which the offending corporation, as well as the president vice president and members of the board of directors participating therein, may be indicted and punished separately or collectively.

Approved—The 4th day of April, A. D. 1901.

WILLIAM A. STONE.

On page 6 of the Pamphlet Laws is found an act which authorizes the classification of boards of directors in order that the terms of all the directors may not expire at the same time:

AN ACT

To permit the classification by railroad, railway and transportation corporations of their boards of directors or managers.

Section 1. Be it enacted, &c., That it shall be lawful for the stockholders of any railroad, railway or other transportation company at any meeting, annual or otherwise, held after notice of intention to present thereto the subject of such classification, by a vote of a majority of the shares there represented, either in person or by proxy, to classify its directors or managers thereafter to be chosen into two, three or four classes, each to contain an equal number unless the board shall consist of a number which shall not be divisible into equal parts, in which case the excess which cannot thus be divided shall be added to the first class. At the next annual election of said corporation, held after such classification shall have been determined upon, directors or managers of the first class shall be elected to serve for the term of one year, and directors or managers of the second, third or fourth classes shall be elected to serve for two, three or four years, respectively. At all ensuing elections of said corporation the stockholders shall only elect the number of directors or managers necessary to take the place of those whose terms of office shall have then expired or be about to expire, and such directors or managers shall be elected for the longest term for which any class may be elected. Every vacancy which shall occur in any class of the members of the board shall be filled by the

board until the next annual election for members of the class in which such vacancy shall occur. After any corporation shall have determined upon any such classification as that herein permitted, it shall not thereafter change the same, unless with the assent of the stockholders duly expressed at a meeting properly called. All laws or parts of laws inconsistent herewith are hereby repealed.

Approved—The 9th day of February, A. D. 1901.

WILLIAM A. STONE.

On page 491 of the Pamphlet Laws provision is made establishing the conditions upon which railroads may occupy public parks, etc., by agreement with the authorities of municipal corporations:

AN ACT

Authorizing municipalities to define and fix the terms for the use of public parks, or grounds of any kind, for railroad purposes.

Section 1. Be it enacted, &c., That the municipal and other corporation or public officers, or authorities owning or having charge of any park or public grounds in cities of the first and second class, may enter into an agreement with any railroad company, maintaining and operating a railroad within this State, defining and fixing the manner, terms and conditions upon which such park or public grounds, or any portion thereof, may be used and occupied by said railroad company with its tracks and passenger station buildings.

Approved—The 7th day of June, A. D. 1901.

WILLIAM A. STONE.

Herewith is published an act found on page 531 of the Pamphlet Laws, which relates to grade crossings. In view of the fact that this Bureau has, for a number of years, advocated as fully as possible the necessity for a new law in relation to grade crossings to prevent the great destruction of life and to insure the safety of persons and property, it seems proper that this act should find a place in this report. While the act is not what has been recommended by this Bureau, it ought to enable the municipal authorities in the several counties of the Commonwealth to make a start towards the elimination of grade crossings which now exist, and to quite effectually prevent grade crossings in the future construction of railroads. By the provisions of this act it is seen that an effort is made, except in certain cases, to prevent the construction of grade crossings. Certain duties are imposed upon the courts, upon the railroads and upon the municipalities. Provision is also made for a division of the cost according to the direction which may be given by the courts, and the manner of procedure is set forth in extensio.

The thought which has controlled the utterances of the Bureau in previous reports of this office, has been that power should be given some State official to exercise supervision over all questions that arise out of grade crossings, either with reference to eliminating those now in existence or those the construction of which might be contemplated. This seems to have been the policy that has characterized legislation in other states upon this subject, nearly all the New England States and also New York State having imposed upon their Railway Commissioners certain duties relating to grade crossings, but in this State the policy now adopted by the act hereinafter quoted, seems to be to place the duties of supervision in the hands of the courts. It is probable that the interests of both the public and the railroad corporations will be safe in the hands of the judiciary, and the only particular criticism which may be made upon the act is that it is hardly possible that all the judges who may have to deal with the question of grade crossings can have the same opinion as to what should be done by the public or by the railroad corporation, while one tribunal charged with the responsibility of passing upon grade crossing questions would at least have uniformity of action and decision with it, but might be faulty in the way of equity.

Whether this law shall be faithfully executed and what results may follow from its passage, of course cannot now be determined, but that some attention has been given by the legislative branch of the Government to this important subject is gratifying, and if the present law does not accomplished all that is desired, it may lead to more effectual enactments:

AN ACT

Relating to railroad crossings of highways, and for the regulation, alteration and abolition of grade crossings, except in cities of the first and second classes.

Section 1. Be it enacted, &c., That, except as in this act elsewhere provided, all crossings, hereafter established, whether of highways by railroads or of railroads by highways, shall, except in cities of the first and second classes, be above or below the grade thereof.

Section 2. Every railroad company constructing a new line of railroad, under its chartered powers, across a highway, except in cities of the first and second classes, shall construct the same above or below the grade of the highway, unless permitted, in the manner hereinafter provided, to construct the same at grade; and such railroad company may exercise the powers, contained in its charter and the general laws, for altering the grade and location of highways in order to avoid grade crossings.

Section 3. Every municipality or other authority, heretofore constructing a highway, except in cities of the first and second classes, across an existing railroad, shall construct the same above or below the grade thereof, unless permitted, in the manner hereinafter provided, to construct the same at grade, and the cost of said work shall be paid one-half by said municipality and one-half by the railroad company owning said railroad.

Section 4. Whenever it shall be desired by any railroad company, constructing a new railroad, or by any municipality or authority, constructing a new highway, except in cities of the first and second classes, that the railroad or highway should be so constructed that the railroad and highway shall cross each other at the same grade, a petition shall be presented by the party desiring such construction to the court of common pleas of the district within which said cross is situated, upon ten days' notice to the corporation owning said railroad or to such municipality or authority, describing the proposed construction, and setting forth the reasons that are supposed to make the same necessary or desirable; and the court of common pleas shall thereupon have jurisdiction of the parties and the subject matter of such petition, and may proceed summarily or otherwise, and upon such notice as it shall deem sufficient, to examine the matter, either by evidence, by reference to a master or to commissioners, or otherwise, and if satisfied that such construction is reasonably required to accommodate the public or to avoid excessive expense in view of the small amount of traffic on the highway or railroad, or in view of the difficulties of other methods of construction, or for other good and sufficient reasons, then it shall make an order or orders permitting such crossing at grade to be established; and it may, in such orders, in its discretion, prescribe what gates, signals or other safeguards shall be maintained by the railroad company, in addition to the signals and safeguards prescribed by statute; and all such orders shall be binding upon the parties, and shall be observed by them; all costs and expenses of the proceedings shall be ascertained and allowed by the court of common pleas, and shall be paid by such party as it shall decide, or be by it apportioned between the parties, and may be collected by execution out of said court.

Section 5. Any railroad company may, at any time, at its own cost and of its own motion, vacate and alter any crossing of its tracks at grade by a highway, except in cities of the first and second classes, by passing the highway over or under its railroad, and for this purpose may use the powers contained in its charter and the general laws for altering the location and grade of the highway: Provided, That no highway which has been constructed at grade,

by permission of the court of common pleas, shall be so altered without like permission, unless by agreement with the municipality wherein the crossing is situated.

Section 6. Any municipality, except cities of the first and second classes, may of its own motion, at any time, at its own cost, vacate and alter any railroad grade crossing of a highway, within its limits, by passing the highway over or under the grade of the railroad: Provided, That no highway which has been constructed at grade, by permission of the court of common pleas, shall be so altered without like permission, unless by agreement with the railroad company: And Provided, further, That such alteration shall not, without the consent of the railroad company, create a steeper gradient than the established gradient, in the same direction, upon the division of said railroad upon which the crossing is located. The said municipality shall, before proceeding with the work, give thirty days' notice to the railroad company of the proposed vacation, alteration and change, with plans and details thereof; and it shall be the duty of the railroad company, in case the highway is to be carried under the railroad, to protect and support the railroad tracks during the progress of the work, and in case of the failure of the railroad company so to do, the municipality may proceed to enter upon the railroad and provide for such protection and support.

Section 7. If any additional lands or rights or easements therein are necessary or required for the use of the railroad company, in making the changes hereinbefore authorized, the same may be purchased or condemned by the company owning or operating said railroad, and for that purpose the company owning or operating the railroad is hereby invested with all the powers of condemnation contained in the charters of said companies or either of them, or in the laws under which said companies or either of them is organized; such lands taken by the railroad company shall be paid for by the company acquiring them. If any addition lands or rights or easements therein are necessary or required for the changes of highways, or the location of new highways or passageways, such lands may be taken by the municipality by purchase or condemnation, and the cost of the same shall be deemed a part of the cost of the changes and alterations, and paid for in like manner as the other expenses thereof. The railroad companies interested in the proposed improvement shall have notice of any such condemnation proceedings, and the right to be heard therein, and no such purchase shall be made without the approval of the railroad company.

Section 8. In case the parties interested cannot agree upon the damages sustained by any person, through the alteration of the grade of any public highway, as aforesaid, the same shall be determ-

ined by a jury, in the court of common pleas for the district where the crossing and property are situated, upon petition brought by any party so claiming to be damaged, as aforesaid, within one year after the decree of the court shall have been rendered in the proceedings aforesaid.

Section 9. Whenever it is necessary for the safety of any railroad, operated by steam, or for the convenience or safety of the public, except in cities of the first and second classes, that a private way crossing a railroad operated by steam, shall be changed or abolished, the said railroad company shall have a right, upon petition to the court of common pleas of the district in which the same may be situated, to apply for a removal and discontinuance of the same, and the said court shall determine such question, upon the proper notice and hearing; and any party claiming damage by reason of said removal or discontinuance shall have the right to have the same determined by a jury and proper proceedings in said court of common pleas, within one year from the date of the decree of said court ordering said removal or discontinuance, and the decree of the court in such matter shall be final and conclusive.

Section 10. Nothing in this act shall prevent any railroad company from laying additional tracks at crossing previously existing, or from constructing switches and sidings and branch lines from their lines of railroad, now or hereafter constructed, to any mill, factory or other manufacturing establishment, or other industrial plant, or any elevator, wharf or pier, or gravel, marl- or clay-bed, or any mine, or from laying additional tracks to increase their yard facilities at terminal or other points, across public highways at the grade thereof, outside of the corporate limits of cities of the first and second classes; but such sign-posts and signals shall be employed for the protection of such crossings as are by law prescribed for railroad crossing of public highways.

Section 11. This act shall take effect on and after June first, one thousand nine hundred and two.

Approved—The 7th day of June, A. D. 1901.

WILLIAM A. STONE.

Through the newspapers of the Commonwealth much comment has been made upon the act found on page 523 of the Pamphlet Laws, which has reference to the incorporation and government of passenger railways either elevated or underground. As there appear to have been no railroads constructed and none in process of construction, the only good which the public has secured from the passage of this act is the amount of bonus which has been paid into the Treasury of the Commonwealth by virtue of the granting of some 300 charters under the provisions of this law. It is not likely that ten per cent.

of the companies organized under this act, to whom charters have been granted, will ever construct their lines, and in all probability the projectors will hold their franchises hoping for an opportunity to merge, to consolidate, or to sell out:

AN ACT

To provide for the incorporation and government of passenger railways, either elevated or underground, or partly elevated and partly underground, with surface rights.

Section 1. Be it enacted, &c., That any number of persons not less than five, three of whom shall be citizens of this Commonwealth, may form a company for the purpose of construction and operation of passenger railways, either elevated or underground, or partly elevated and partly underground for the transportation of passengers and with power and authority to contract for and to locally gather, carry and distribute the mails of the United States, and with power to construct such portion thereof upon the surface as may be reasonably necessary for terminals or connections between the underground and elevated sections thereof: Provided, however, that the surface so occupied shall not exceed two thousand five hundred feet in length, in any one place which said railways may be constructed and operated upon, over, under, across, through, and along any street, highway or bridge in this Commonwealth, upon which no railway incorporated under this act is already erected or constructed, and in constant daily use for the transportation of passengers, or authorized to be erected or constructed under any existing charter issued under this act, and for which permission to erect or construct the same has been obtained from the local authorities of the city, borough or township in which the same is to operate, within two years, with the privilege of occupying so much of the said streets, highways or bridges mentioned in their charter as may be necessary for the erection and operation of said railway for public use, in the conveyance of passengers, by such motive power, other than steam, as may be adopted from time to time; and said companies may build and operate on, over, under, across, through, and along streets, highways and bridges on which passenger railways are constructed or authorized to be constructed on the surface of the street and may use and occupy the surface to the extent of two thousand five hundred feet, as herein provided.

Section 2. The charter of such intended corporation shall be subscribed by at least three of the incorporators; who shall certify, in writing, to the Governor, the name of the company; the number of years the same is to continue; the length of road, as near as may be,

and the route and character of construction; the amount of capital stock of the company, which shall not be less than fifty thousand dollars for every mile of road proposed to be constructed, and the number of shares and the par value of each; the names and places of residences of the president and board of directors, who shall manage its affairs until the first annual meeting thereafter, and until others are chosen in their places. Each subscriber shall subscribe thereto his name, place of residence, and the number of shares of stock he agrees to take in said company. On compliance with the preceding provisions of this section, the articles of association shall be acknowledged by at least three of the directors, before some officer competent to take acknowledgment of deeds, and may be filed in the office of the Secretary of the Commonwealth, who shall endorse thereon the day on which they were filed, and record the same in a book to be provided by him for such purpose. Thereupon the Governor shall issue his letters patent, creating the persons who have so subscribed such articles of association, and all persons who shall become stockholders in such company, a corporation, by the name specified therein, which shall possess the powers and privileges following, namely:

First. To have succession, by its corporate name, for the period limited in its articles of association.

Second. To sue and be sued, complain and defend, in any court of law or equity.

Third. To make and use a common seal, and alter the same at pleasure.

Fourth. To take, hold, purchase, operate, lease, and convey such real and personal property, estate and franchises as the purposes of the corporation shall require.

Fifth. To appoint such officers and agents as the business of the corporation shall require.

Sixth. To make by-laws, not inconsistent with the Constitution or any existing law, for the government of its property and regulation of its affairs, and for the transfer of its stock.

Seventh. To sell or lease its road and franchises, or parts thereof, to traction or motor power companies or to other passenger railway companies, or to acquire the roads, property and franchises of other passenger railway companies, by lease or purchase. But no company incorporated under this act shall be authorized or permitted to connect its tracks with the tracks of any railroad company, incorporated under any law of this State for the transportation of both passengers and freight, nor shall the interchange of cars and continuous movement thereof between and over the tracks of any railway company incorporated under this act and such railroad company be authorized or permitted.

Section 3. Such articles of association shall not be filed and recorded in the office of the Secretary of the Commonwealth until at least twenty-five thousand dollars of stock for every mile of road proposed to be constructed shall have been subscribed thereto, and ten per centum paid thereon in good faith and in cash to the directors named in said articles of association; nor until there is endorsed thereon or annexed thereto an affidavit, made by at least three of the directors named in said articles, that the amount of stock required by this section has been in good faith subscribed, and ten per centum paid in cash thereon, as aforesaid, and that it is intended in good faith to construct and to maintain and operate the road mentioned in said articles of association, which affidavit shall be recorded with the articles of association, as aforesaid.

Section 4. Unpaid subscriptions to the capital stock of such corporations shall be payable at such times and places and in such proportions and installments as the directors shall require, of which public notice shall be given, for at least two weeks preceding the time appointed for the purpose, in one or more newspapers published in the county; and if any subscriber shall neglect to pay such installment, so called for, at the time and place appointed, he, she or they shall be liable to pay, in addition to said installment a penalty, at the rate of one per centum per month for the delay; and if the same and the additional penalty, or any part thereof, shall remain unpaid for the period of six months, he, she, or they shall, at the discretion of the directors, forfeit, for use of the company, all right, title and interest in and to every and all stock, on account of which such default in payment may be made, as aforesaid; or, the directors may bring suit to recover the amount due, together with the penalty. In the event of forfeiture, the share or shares so forfeited may be disposed of at the discretion of the president and directors, under such rules and regulations as may be prescribed by by-laws; but no forfeiture of stock shall release the owner from any liabilities or penalties incurred prior to the forfeiture. When stock shall have been paid in full, the board of directors shall cause certificates for the same to be issued to the parties entitled thereto, signed by the president and countersigned by the treasurer, and sealed with the corporate seal; which certificates shall be transferable at the pleasure of the holder on the books of the company, in person, or by attorney duly authorized, and the assignee shall thereupon be a member of such corporation. Companies incorporated under this act may issue either preferred or common stock, or both, as may be considered advisable.

Section 5. Whenever any company incorporated under this act shall, in the opinion of the directors thereof, require an increased amount of capital stock, in order to complete and equip its road and carry out the full intent and meaning of its articles of association, it shall, if

authorized by a majority of the stockholders voting at a meeting called for that purpose, which call shall be in the manner provided by the Constitution and laws of this State, file with the Secretary of the Commonwealth, a certificate setting forth the amount of such desired increase, and thereafter such company shall be entitled to have such increased capital as is fixed by said certificate.

Section 6. The president and directors of any company created under this act shall have power to borrow money, not exceeding the amount of the capital stock authorized to be issued, and issue the bonds or obligations of the company therefor, in such amounts, and on and upon such terms, and at such times as the directors shall deem best, the proceeds whereof shall be expended in the construction and equipment of their railways; these bonds or obligations to be payable at such times, and at such place, and at such rate of interest, as said directors may deem best, and may secure the payment of said bonds or obligations and interest by a mortgage or mortgages on the said railways and franchises.

Section 7. The stockholders of such corporations shall hold annual meetings for the purpose of electing a president and board of directors, upon such date as may be fixed by the by-laws, and special meetings may also be called as prescribed by said by-laws. At all elections, each stockholder shall be entitled to one vote for each share of stock held in the company; but no share of stock sold within sixty days of the said election shall entitle the holder thereof to vote on the same; nor shall any proxy be received, or entitle the holder to vote, which shall have been executed more than three months preceding such election; and no stockholder shall be entitled to vote any shares, at any election, in case any arrearages of any assessment shall be due on such share or shares for more than thirty days prior to such election.

Section 8. Corporations created under this act shall, for the purpose of constructing the railways herein authorized, and the necessary stations and approaches thereto as herein provided, have the right of eminent domain, which is hereby expressly conferred, and may construct, maintain, and operate their railways, stations and approaches thereto, on, under, over, across, through and along any street, highway or bridge, or on, over, under, across, through and along lands and tenements in private ownership; and may locate, fix and determine such route for the railway as the board of directors may deem expedient, on, under, over, across, through and along any street, highway, bridge or private property, not, however, passing through any burying-grounds or place of worship; and thereon may erect, construct, establish and operate a railway, with such stations and approaches as they may deem necessary; and, in like manner, by themselves or other persons by them appointed, may enter upon and into, and occupy, take

and acquire, all land and buildings which may be necessary for the said railways, stations or approaches, or other needful buildings or appurtenances, or convenient for the construction and maintenance of the same. Such corporations, however, shall in all cases make just compensation for all property taken, injured or destroyed by the construction or enlargement of their railway. If the parties claiming compensation and the said corporation, so chartered under this act, shall not be able to agree as to the amount of compensation to be paid by reason of the construction, maintenance or operation of said road, then the court of common pleas of the proper county, upon petition of any person in interest, shall appoint five persons to view and assess the compensation due to all persons, corporations or bodies politic that have failed to agree with the corporation so chartered, by reason of the construction, maintenance and operation of the said road and its branches, or of its stations and approaches thereto, and make report thereof to the court. Any party dissatisfied with the report shall have the right to appeal to the court of common pleas in which the said report shall have been filed, and thereupon the amount of compensation shall be determined by a jury, on issues properly framed, according to the course of the common law, subject to such rules and regulations as the said court may prescribe. Where any such corporation desires to proceed with the construction or operation of its railway before the compensation shall be determined and paid, it may do so, provided it shall first give a bond to the Commonwealth of Pennsylvania, for the use of all parties interested, in such amount and with such sureties as the court of common pleas, of the proper county, having jurisdiction of the matter, may direct.

Section 9. Every company organized under this act shall maintain an office within this State for the transaction of its business, where transfers of its stock shall be made, and books kept for inspection by its stockholders or bondholders.

Section 10. Every company incorporated under this act shall have authority to use so much of the streets, highways and bridges of this Commonwealth, immediately adjacent to their tracks, as may be necessary and proper, either for the erection of stations or the proper, necessary and convenient approaches thereto, or both; but in the case of elevated roads, all stations must be on a level with the tracks; all of which, however, shall be erected and maintained and operated subject to all rules and regulations which may be made or passed by the local authorities of any city, borough or township, through which the said road may run, in regard to the same.

Section 11. Corporations incorporated under this act may construct branches and extensions, but in that case shall first file in the office of the Secretary of the Commonwealth a resolution of the board of

directors, approved by the stockholders, giving the route of such branches and extensions.

Section 12. Any company proposing to construct a railway or any branch or extension thereof, under the provisions of this act, shall in good faith commence the construction thereof within two years after the consent of the proper local authorities of the city, borough or township, within which the same is located, shall have been obtained; and the same shall be completed within five years thereafter, unless the time shall be extended by the authority aforesaid. Whenever a charter shall be granted to any corporation to build a road as provided by this act, no other charter to build a road on, over, under, across, through, or along the same streets, highways, bridges or property shall be granted to any other company, within the time during which, by the provisions of this act, the company first securing the charter has the right to commence and complete its work: Provided, That the consent of the local authorities shall be promptly applied for, and shall have been obtained within two years from the date of the charter.

Section 13. Any corporation chartered under this act shall have the right, from time to time, to increase its capital stock, and to issue and sell stock and bonds or other obligations, to such an amount and upon such terms, as shall be deemed proper to enable them to perform the duties of their organization.

Section 14. Any company incorporated under this act shall have power, by its officers and servants, to construct and operate its road as authorized by this act on, over, under, across, through, and along any turnpike or turnpikes, and to use the same for its general business; and, in addition to the space so occupied by its tracks, may occupy so much of the space on, over, under, across, through, and along such turnpikes as may be necessary for the erection of the proper stations and approaches thereto: Provided, however, That it shall make or secure compensation to the owner or owners of such turnpike for such occupation and use, in the mode provided for in section eight hereof.

Section 15. If in the construction of any railway, incorporated under this act, it shall become necessary to cross any river or rivers, creeks or water courses within this State, the said company shall have power and authority to bridge or tunnel the same. The route and method of construction, or both, as described in the charter of any company incorporated under this act, may be changed, with the consent of the local authorities of the proper city, borough or township; but, in that case, if the company shall accept such change, a resolution of the board of directors, setting out the change and the authority therefor, shall be filed in the office of the Secretary of the Commonwealth. Such change shall only be made when ratified and ap-

proved by a majority of the stockholders, voting at a meeting called for the purpose of considering such change.

Approved—The 7th day of June, A. D. 1901.

WILLIAM A. STONE.

As will be seen the above act was approved on the 7th day of June, 1901. On page 572 of the Pamphlet Laws is found a supplement to the act, as follows:

A SUPPLEMENT

To an act, entitled "An act to provide for the incorporation and government of passenger railways, either elevated or underground, or partly elevated and partly underground, with surface rights," approved June seventh, one thousand nine hundred and one, authorizing the building of an elevated or underground railway, or both an elevated and underground railway, having first obtained consent of the local authorities.

Section 1. Be it enacted, &c., That any company chartered to build either an elevated or an underground railway, under the provisions of the act entitled "An act to provide for the incorporation and government of passenger railways, either elevated or underground, or partly elevated and partly underground, with surface rights," approved June seventh, one thousand nine hundred and one, shall have power and is hereby authorized to build either an elevated or an underground railway, or both an elevated and an underground railway, over the route described in their charter, having first obtained the consent of the local authorities of the city, borough or township through which the said railway is located.

Section 2. All acts of Assembly, or parts of acts, inconsistent herewith, be and the same are hereby repealed.

Approved—The 19th day of June, A. D. 1901.

WILLIAM A. STONE.

On page 577 of the Pamphlet Laws is another supplement, or at least an act supplemental to the one approved on the 7th of June, which would seem to indicate that two things at least had been forgotten by those interested in passing the original act authorizing the construction of elevated or underground railroads. This latter supplement provides that the Governor, the Secretary of the Commonwealth and the Attorney General shall pass upon the necessity for the construction of elevated or underground railroads. This is a feature of legislation relative to the construction of railroads which has never before found its way into our enactments:

AN ACT

Providing that no company hereafter formed for the purpose of construction and operation of a passenger railway, either elevated or underground, or partly elevated or partly underground, with incidental surface rights, shall be incorporated except where the same shall be located upon the streets in thickly populated regions, and until the necessity of such railways shall have been passed upon by a board consisting of the Governor, the Secretary of the Commonwealth and the Attorney General, after notice.

Section 1. Be it enacted, &c. That hereafter no letters patent shall be issued to any company, nor shall any corporation be otherwise created, for the construction of an elevated or underground, or party elevated and partly underground, passenger railway, except the same shall be located upon, over, under, across, through or along a street, road or highway in a thickly populated locality; where the surface travel is congested; nor unless and until the necessity for the construction and operation of said railway shall have been passed on and approved by a board, consisting of the Governor, the Secretary of the Commonwealth and the Attorney General, after thirty days' public notice, published as shall be prescribed by said board.

Approved—The 20th day of June, A. D. 1901.

WILLIAM A. STONE.

On page 514 of the Pamphlet Laws is found an amendment of the street railway act of 1899, which further regulates the chartering of street railway corporations, their powers, their relations to municipalities and other street railway corporations, as follows:

AN ACT

To further amend an act, entitled "An act to provide for the incorporation and government of street railway companies in this Commonwealth," approved the fourteenth day of May, Anno Domini one thousand eight hundred and eight-nine and the amendments thereto, approved the twenty-first day of May, Anno Domini one thousand eight hundred and ninety-five; and providing for the length of tracks of any companies that may be used by another company; for the use by any company of streets, highways and bridges which have been abandoned or may be abandoned, or are not in use by any other companies, chartered or authorized to use the same, or which are not in constant daily use for the transportation of passengers by such companies; and for the use of streets, highways and bridges by any company, which other companies have relinquished the right to use, or which are only in temporary use, either by virtue of the provisions of any act of Assembly, or of any ordinance of Council,

or of any contract or agreement with the Commonwealth or the local authorities of any city, borough or township, and providing compensation therefor; limiting the time within which application must be made to the local authorities of any city, borough or township, within which work must be commenced and the railway completed; and providing that where a company shall receive a charter to build a road on any street or highway, no other charter shall be granted to any other company to occupy the same street or highway, until after the time given to the first company to obtain the consent of the local authorities and begin and complete its work, shall have elapsed; conferring the right to acquire property by purchase, for certain uses of the corporation.

Section 1. Be it enacted, &c., That section one of an act, entitled "An act to provide for the incorporation and government of street railway companies in this Commonwealth," approved May fourteen, one thousand eight hundred and eighty-nine, which reads as follows:

"Section 1. That any number of persons, not less than five, may form a company for the purpose of constructing, maintaining and operating a street railway, on any street or highway upon which no track is laid, or authorized to be laid or to be extended under any existing charter, with the privilege of occupying so much of any street, used or authorized to be used, under any existing charter, as is hereinafter provided, for public use in the conveyance of passengers, by any power other than by locomotives; and for that purpose may make and sign articles of association, in which shall be stated the name of the company, the number of years the same is to continue, the length of such road, as near as may be, the streets and highways upon which the said railway is to be laid and constructed, showing also the circuit of the route, the amount of the capital stock of the company, which shall not be less than six thousand dollars to every mile of road proposed to be constructed, and the number of shares of which said capital stock is to consist, and the names and places of residence of a president and not less than four nor more than twelve directors of the company, who shall manage its affairs until the first annual meeting thereafter and until others are chosen in their places; each subscriber to such articles of association shall subscribe thereto his name, place of residence and the number of shares of stock he agrees to take in said company. On compliance with the provisions of the second section of this act, such articles of association shall be acknowledged by at least three of the directors, before some officer competent to take acknowledgments of deeds, and may be filed in the office of the Secretary of the Commonwealth, who shall endorse thereon the day on which they were filed and record the same in a book to be provided by him for that purpose, whereupon the Governor shall

issue his letters patent, creating the persons who have so subscribed such articles of association and all persons who shall become stockholders in such company, a corporation by the name specified therein, and shall possess the power and privileges following, namely:

"First. To have succession by its corporate name for the period limited in its articles of association.

"Second. To sue and be sued, complain and defend, in any court of law or equity.

"Third. To make and use a common seal and alter the same at pleasure.

"Fourth. To hold, purchase and convey, subject to existing laws, such real and personal estate as the purposes of the corporation shall require, not exceeding the amount limited in the articles of association.

"Fifth. To appoint such officers and agents as the business of the corporation shall require and to allow them a suitable compensation.

"Sixth. To make by-laws, not inconsistent with the Constitution or any existing laws for the management of its property and regulation of its affairs, and for the transfer of its stock," be and the same is hereby amended so as to read as follows:

Section 1. That any number of persons, not less than five, may form a company for the purpose of constructing, maintaining and operating a street railway for public use in the conveyance of passengers, by any power other than locomotive, on any street or highway upon which no track is laid, under any existing charter, and in constant daily use for the transportation of passengers at the time of the application by another company for a charter to use such street, with the privilege of occupying so much of any other street, highway or bridge as is hereinafter provided; but whenever a charter, after the approval of this act, shall be granted to any corporation to build a road as provided by this act, no other charter to build a road on the same streets, highways, bridges or property shall be granted to any other company within the time during which, by the provisions of this act, the company first securing the charter has the right to commence and complete this work: Provided, That the consent of the local authorities shall be promptly applied for, and shall have been obtained within two years from the date of the charter; for the purpose of such formation said persons may make and sign articles of association, in which shall be stated the name of the company, the number of years the same is to continue, the length of such road, as near as may be, the streets, highways and bridges upon which the said railway is to be laid and constructed, showing also the circuit of the route, the amount of the capital stock of the company, which shall not be less than six thousand dollars to every mile of road proposed to be constructed, and the number of shares of which said capital stock is to consist, and the

names and places of residence of a president and not less than four nor more than twelve directors of the company, who shall manage its affairs until the first annual meeting thereafter and until others are chosen in their places; each subscriber to such articles of association shall subscribe thereto his name, place of residence, and the number of shares of stock he agrees to take in said company. On compliance with the provisions of the second section of this act, such articles of association shall be acknowledged by at least three of the directors, before some officer competent to take acknowledgements of deeds, and may be filed in the office of the Secretary of the Commonwealth, who shall endorse thereon the day on which they were filed and record the same in a book to be provided by him for that purpose; whereupon the Governor shall issue his letters patent, creating the persons who have so subscribed such articles of association and all persons who shall become stockholders in such company, a corporation by the name specified therein, and shall possess the powers and privileges following, namely:

First. To have succession by its corporate name for the period limited in its articles of association.

Second. To sue and be sued, complain and defend, in any court of law or equity.

Third. To make and use a common seal and alter the same at pleasure.

Fourth. To hold, purchase, operate, lease and convey such real and personal property, estate and franchises, as the purposes of the corporation shall require.

Fifth. To appoint such officers and agents as the business of the corporation shall require, and to allow them a suitable compensation.

Sixth. To make by-laws, not inconsistent with the constitution or any existing laws, for the management of its property and regulation of its affairs, and for the transfer of its stock.

Seventh. To sell or lease their road and franchises, or parts thereof, to traction or motor power companies, or to other passenger railway companies, or to acquire the roads, property and franchises of other passenger railway companies by lease or purchase.

Section 2. That section four of an act, entitled "An act to provide for the incorporation and government of street railway companies in this Commonwealth," approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, which reads as follows:

"Section 4. Any company incorporated under this act, shall have authority to construct such extensions or branches as it may deem necessary to increase its business and accommodate the travel of the public: Provided, That the act of the company authorizing any exten-

sion or branch, shall distinctly name the streets and highways on which said extension or branch is to be laid and constructed, and a copy of the minutes of said company containing said authority shall be recorded in the office of the recorder of deeds for the proper county, and an exemplification of the said record shall be filed in the office of the Secretary of the Commonwealth, and no right to actually construct the same shall vest until after thirty days from the filing of said exemplification: And provided, That no extension or branch shall be constructed on any street or highway on which a track is laid or authorized under any existing charter, except as hereinafter provided," be and the same is hereby amended so as to read as follows:

Section 4. Any company incorporated under this act, shall have authority to construct such extensions or branches as it may deem necessary to increase its business and accommodate the travel of the public: Provided, That the act of the company authorizing any extensions or branches, shall name the streets, highways and bridges on which each extension or branch is to be laid and constructed, and a copy of the minutes of said company, containing said authority, shall be recorded in the office of the Recorder of Deeds for the proper county, and an exemplification of the said record shall be filed in the office of the Secretary of the Commonwealth; and no right to actually construct the same shall vest until after thirty days from the filing of said exemplification: And provided, That no extension or branch shall be constructed on any street or highway upon which a track is laid and in constant daily use for the transportation of passengers, under any existing charter, at the time of the filing of such exemplification, except as hereinafter provided.

Section 3. That section fourteen of an act, entitled "An act to provide for the incorporation and government of street railway companies in this Commonwealth," approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, as amended by an act, entitled "An act to amend an act, entitled 'An act to provide for the incorporation and government of street railway companies in this Commonwealth,' approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, increasing the length of the tracks of other companies that may be used, authorizing the carrying and distribution of mails of the United States, and the abandonment of portions of street railways," approved the twenty-first day of May, one thousand eight hundred and ninety-five, which reads as follows:

"Section 14. Any passenger railway company incorporated under this act shall have the right to use such portion of the single or double tracks of any other company incorporated under this act, and already laid down, as may be necessary either to construct a circuit upon its road or to connect with the road of any passenger railway company

already in existence, agreeing by itself or through its lessee or operating company to make such connection. The length of tracks to be used, shall be used only with the consent of the local authorities of the city, borough or township, and in no event shall exceed two thousand five hundred feet in length of street or highway; and said company shall have the right to replace, at its own expense, such tracks with new tracks and appliances necessary for the proper operation of the cars of both companies over and upon said tracks. Before any such use occurs compensation shall be paid to the corporation owning the track laid. In case of disagreement, the court of common pleas of the proper county, upon the petition of the corporation seeking the privilege, shall appoint five persons to view and assess the damages and return thereof make to the court, with the right of appeal now secured under section eight of article sixteen of the Constitution and of an act for the further regulation of appeals from assessment of damages to owners of property taken for public use, passed June thirteen, one thousand eight hundred and seventy-four. If such an appeal be taken, it shall be competent to pay into court the amount of such award, upon which payment the right to use said tracks shall vest, and said sum shall await the final judgment of said appeal," be and the same is hereby amended so as to read as follows:

Section 14. Any passenger railway company, incorporated under this act, shall have the right to use such portion of the single or double tracks of, or the streets, highways and bridges occupied by, any other passenger railway company or companies, incorporated under this or any general or special act, and already laid down and in constant daily use, and all of any streets, highways and bridges included in the route of any other company or companies, when the tracks are not laid down or are not in constant daily use, or are only in temporary use, as it may require, either to construct a circuit upon its road or upon any of its branches or extensions, or to connect its road with any and all its branches and extensions or with the road of any other passenger railway company. The length of tracks to be used of any other road already laid down, shall be used only with the consent of the local authorities of the city, borough or township in which the same are laid, and in no event shall exceed two thousand five hundred feet in length of street or highway, in which measurement no bridge to be crossed, or the approaches thereto, shall be included; and shall have the further right to use all bridges and the approaches thereto, in use by any other company, in addition to the two thousand five hundred feet of track thereinbefore provided for; and said company shall have the right to replace, at its own expense, such tracks with new tracks and appliances necessary for the proper operation of the cars of both companies over and upon said tracks. Before any such use occurs, compensation shall be paid or secured to any person or

corporation injured thereby. In case the parties cannot agree as to the amount of compensation to be paid, then the court of common pleas of the proper county, upon the petition of the corporation seeking the privilege, shall appoint five persons to view and assess the compensation for the use of the tracks already laid and in constant daily use, or the streets, highways or bridges on which the same are laid, whether the said corporation owning said tracks shall or shall not have the exclusive right to lay tracks in said street or highway, either by virtue of their charter or any other legislation claiming to confer such exclusive privilege. The jury so appointed shall hear the testimony, and shall make a report to the court, assessing the damages which the corporation claiming the privilege of laying or using tracks shall pay for the said privilege; and if no appeal shall be taken to the said report, the court shall, at the expiration of thirty days, confirm the said report; and the amount so fixed by the jury shall then be due and payable: Provided, however, That either party shall have a right of appeal, within the said thirty days, from the award of the jury, as now provided by law. If the damages due are to be secured, such security shall be given, in such amount, as the court having jurisdiction thereof shall direct, and shall be approved by said court; whereupon, upon such security being entered, the company so entering the same shall have the right to the immediate use of such streets or tracks. If an appeal shall be taken, it shall be competent for the party against whom an award has been made to pay into court the amount of such award, upon which payment the right to lay or use said tracks shall vest, and said sum shall await the final judgment on said appeal.

Section 4. That section fifteen of the act, entitled "An act to provide for the incorporation and government of street railway companies of this Commonwealth," approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, as amended by an act, entitled "An act to amend an act, entitled 'An act to provide for the incorporation and government of street railway companies in this Commonwealth,' approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, increasing the length of the tracks of other companies that may be used, authorizing the carrying and distribution of mails of the United States, and the abandonment of portions of street railways," approved the twenty-first day of May, Anno Domini one thousand eight hundred and ninety-five, which reads as follows:

"Section 15. No street passenger railway shall be constructed by any company, incorporated under this act, within the limits of any city, borough or township, without the consent of the local authorities thereof, nor shall any street railway be incorporated hereunder, which shall not have a continuous route from the beginning to the

end, excepting the twentyfive hundred feet authorized to be used under section fourteen as amended by the provisions of this act," be and the same is hereby amended so as to read as follows:

Section 15. No street passenger railway shall be constructed by any company, incorporated under this act, within the limits of any city, borough or township, without the consent of the local authorities thereof; nor shall any street railway be incorporated hereunder, which shall not have a continuous route, including branches and extensions, from the beginning to the end, including connections made with each other, and including the use of bridges and the approaches thereto, and the two thousand five hundred feet authorized to be used under section fourteen as amended by the provisions of this act.

Section 5. That section four of the act, entitled "An act to amend an act, entitled 'An act to provide for the incorporation and government of street railways in this Commonwealth,' approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine, as amended by an act, entitled 'An act to amend an act, entitled 'An act to provide for the incorporation and government of street railway companies in this Commonwealth,' approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine,' increasing the length of the tracks of other companies that may be used, authorizing the carrying and distribution of mails of the United States, and the abandonment of portions of street railway companies, approved the twenty-first day of May, Anno Domini one thousand eight hundred and ninety-five, which reads as follows:

"Section 4. Any company incorporated under the provisions of an act, entitled 'An act to provide for the incorporation and government of street railway companies in this Commonwealth,' approved May fourteenth, Anno Domini one thousand eight hundred and eighty-nine, is hereby authorized and empowered, with the consent of the authorities of the municipality within which said railway is located, to abandon any portion of its road, without prejudice to its right to operate, or to complete and operate, the remaining portion of its railway, by appropriate action by its board of directors, with the approval of a majority in value of its stockholders, upon the filing of a copy of such action, certified under the hand of its president and secretary and the seal of the company, in the office of the Secretary of the Commonwealth, and also with the proper municipal authorities," be and the same is hereby amended so as to read as follows:

Section 4. Any company incorporated under the provisions of an act, entitled "An act to provide for the incorporation and government of street railways in this Commonwealth," approved May fourteenth, Anno Domini one thousand eight hundred and eighty-nine, is hereby authorized and empowered, with the consent of the local authorities of any city, borough or township within which said railway is located,

to abandon any portion of its road, without prejudice to its right to operate, or to complete and operate, the remaining portions of its railway, by appropriate action by its board of directors, with the approval of a majority in value of its stockholders, upon the filing of a copy of such action, certified under the hands of its president and secretary and the seal of the company, in the office of the Secretary of the Commonwealth, and also with the proper local authorities. All streets, highways and bridges, or parts thereof, the use and occupation of which is thus abandoned, or which shall be deemed abandoned as hereafter set forth, and any other street, highway or bridge, or part or parts thereof, the use and occupation of which has heretofore been abandoned or discontinued, or which is only in temporary use, or which is not occupied by any railway because of the prohibition contained in any act of Assembly or any ordinance of councils, or because of any contract or agreement by and between any railway and the Commonwealth of Pennsylvania, or any railway and the local authorities of any city, borough or township, or the Commonwealth and any of the citizens thereof, or because of any ordinance of the councils of any city, borough or township, may thereafter or hereafter, with the consent of the local authorities of such city, borough or township, but not otherwise be occupied and used by any railway company chartered under this act, or by the company which has abandoned or discontinued the use thereof. Before such use shall be made of any such street, highway or bridge, compensation for the use thereof shall be made or secured to any persons or corporations having vested rights under any such act of Assembly, ordinance, contract or agreement, and injured thereby. Such compensation shall be made or secured, in the manner herein provided for by the amendment to the fourteenth section of an act, entitled "An act to provide for the incorporation and government of street railway companies of this Commonwealth," approved the fourteenth day of May, Anno Domini one thousand eight hundred and eighty-nine.

Section 6. Any company which does not, within two years from the date of its incorporation, make formal application to the local authorities of the proper city, borough or township for leave to occupy and use the streets, highways or bridges which, by its charter, it is authorized to occupy and use, and any company which heretofore has or hereafter does obtain legislative or municipal consent to occupy and use any streets, highways or bridges, and does not forthwith diligently proceed to occupy and use the same, and does not begin work within two years after such consent shall be obtained, and complete its road, as provided by its charter, within five years thereafter, and constantly daily use the same thereafter for the transportation of passengers, shall be deemed to have abandoned the right to occupy and use such streets, highways and bridges; and the same may be occupied

and used by any other company, duly chartered and obtaining consent so to do, anything in any general or special act of Assembly or municipal ordinance to the contrary, notwithstanding.

Section 7. Any railway company, incorporated under this act, shall have the right and power, if it deem it to be necessary in order to make connections with any portion of its track, whether main line, branches or extensoins, to acquire property, either by purchase or otherwise; and after acquiring such property, shall have the right to lay its track upon the same as if it were a public highway, and to connect the track, so laid upon the property so acquired, with any other portions of its track laid upon public highways adjacent thereto.

Section 8. No street passenger railway company, heretofore or hereafter incorporated under the act hereby amended, shall be authorized or permitted to connect its tracks with the tracks of any railroad company, incorporated under any law of this State for the transportation of both passengers and freight, nor shall the interchange of cars and continuous movement thereof between and over the tracks of such street passenger railway company and such railroad company be authorized or permitted.

Section 9. All acts of Assembly and parts of acts inconsistent herewith, including all local and special laws, be and the same are hereby repealed.

Approved—The 7th day of June, A. D. 1901.

WILLIAM A. STONE.

On page 1 of the Pamphlet Laws will be found the act which provides for the increase of the capital stock and indebtedness of corporations. In the laws of this Commonwealth existing before the passage of this act of 1901 above referred to, a limitation has been placed not only upon the amount of capital stock of corporations, but also upon the amount of loans which might be made by any corporation. In some cases certain corporations were not allowed to create a funded indebtedness to an amount greater than fifty per cent. of the outstanding capital stock. Other limitations have been in existence, but these now seem to have all been wiped away by the provisions of the act of 1901, and but little or nor limitation now exists with reference to the amount of funded indebtedness which may be assumed by corporations, and by this act it is understood that it applies to railways as well as to any other corporations. The indebtedness, therefore, which may be assumed by a corporation in Pennsylvania now is limited only by the amount of credit corporations may have.

If this act be wisely executed, no serious results may follow; it is submitted, however, that if its provisions are carried to their

greatest limits, the act may result more favorably to the bondholders than to the stockholders:

AN ACT

To provide for increasing the capital stock and indebtedness of corporations.

Section 1. Be it enacted, &c., That the capital stock or indebtedness, or both, of any corporation created by general or special law may, with the consent of the persons or bodies corporate holding the larger amount in value of its stock, be increased to such an amount in the aggregate of each as it shall deem necessary to accomplish and carry on and enlarge the business and purposes of the corporation. Such increase of either may be made at once, or from time to time, as the stockholders aforesaid shall determine.

Section 2. That any corporation desirous of increasing its capital stock or indebtedness, or both, as authorized by this act, shall by resolution of its board of directors, adopted by a majority of the entire number thereof, declare such purpose, and thereupon by resolution, similarly adopted, direct that the question of such proposed increase shall be submitted to the stockholders of such corporation for their consent; either,

(A). At any prescribed regular annual meeting or adjournment thereof, the notice whereof, stating inter alia that such subject would be considered thereat, shall have been published once a week for sixty days prior to such meeting in at least one newspaper published in the county, city or borough wherein the chief office or place of business of the corporation is situate. At said meeting the question shall be submitted to the stockholders, and it shall be the duty of the president and secretary of said meeting, by such agencies or methods as to them may seem meet, to ascertain whether the persons and bodies corporate holding the larger amount in value of the stock of said corporation shall have consented to such increase, and upon being so satisfied to certify in duplicate the fact, under oath duly administered: Provided, That should a stock vote be duly demanded at said meeting, it shall be the duty of the president and secretary, in ascertainment of the fact of the consent, to cause such vote to be taken at the same time and place, by the same persons and in the same manner, as the vote for directors or managers of such corporation shall be taken; or,

(B). At a special meeting of the stockholders, notice of the time, place and object of which shall have been published once a week for sixty days prior to said meeting in at least one newspaper published in the county, city or borough wherein such office or place of business is situated. At such meeting thus called, or any adjournment thereof, an election of the stockholders shall be taken for or against

such increase, which shall be conducted by three judges, stockholders of such corporation, appointed by the board of directors to hold said election, and if one or more of said judges be absent the judge or judges present shall appoint a judge or judges who shall act in the place of the judge or judges absent; and said judges shall respectively take and subscribe an oath or affirmation before an officer authorized by law to administer the same, well and truly and according to law to conduct such election to the best of their ability; and the said judges shall decide upon the qualifications of voters, and when the election is closed count the number of shares voted for and against such increase, and declare whether the persons and bodies corporate holding the larger amount of the stock of such corporation have consented to such an increase or refused to consent thereto, and shall make out duplicate returns of said election, stating the number of shares of stock that voted for such increase and the number that voted against such increase, and subscribe and deliver the same to one of the chief officers of said company. Each ballot shall have endorsed thereon the number of shares thereby represented, but no share or shares transferred within sixty days shall entitle the holder or holders thereof to vote at such election or meeting; nor shall any proxy be received, or entitle the holder to vote, unless the same shall bear date and have been executed within four months next preceding such election or meeting; and it shall be the duty of such corporation to furnish the judges, at said meeting, with a statement of the amount of its capital stock, with the name of persons or bodies corporate holding the same, and number of shares by each respectively held, which statement shall be signed by one of the chief officers of such corporation, with an affidavit thereto annexed that the same is true and correct to the best of his knowledge and belief.

Section 3. That it shall be the duty of such corporation, if consent is given to such increase, to file in the Office of the Secretary of the Commonwealth, within thirty days after such election, one of the copies of the certificates of the president and secretary of the annual meeting, or one of the copies of the return of such election at the special meeting hereinbefore provided for, with a copy of the resolution and notice calling the same thereto annexed; and thereafter the increase may be made at such time or times as shall be determined by the directors. Upon the actual increase of the capital stock or indebtedness of such corporation, made pursuant thereto, it shall be the duty of the president or treasurer of such corporation, within thirty days thereafter, to make a return to the Secretary of the Commonwealth, under oath, of the amount of such increase actually made; and concurrently therewith such corporation shall pay to the State Treasurer, for the use of the Common-

wealth, such bonus on the actual increase shown by said return as shall then be prescribed by law. In case of neglect or omission to make said return, such corporation shall be subject to a penalty of five thousand dollars, in addition to the bonus, which penalty shall be collected on an account settled by the Auditor General and State Treasurer as accounts for taxes due the Commonwealth are settled and collected; and the Secretary of the Commonwealth shall cause said return to be recorded in a book for that purpose and furnish a copy of the same to the Auditor General.

Section 4. Nothing in this act contained shall be construed as compelling resort to the process herein provided in the case of indebtedness contracted in the usual course of corporation business. All acts and parts of acts inconsistent with the provisions of this act are hereby repealed: Provided, however, That any proceeding for increase of capital stock or indebtedness, begun under existing law prior to and not completed at the date this act becomes effective, shall be consummated under the authority of this act if the antecedent proceeding shall have conformed to its requirements; but if such antecedent proceeding shall not have so conformed, then the proceeding shall be consummated under the provisions of the law existing prior to the passage of this act: Provided, however, That the provisions of this act shall not inure to the benefit of any railroad, canal or other transportation corporation, unless such railroad, canal or other transportation corporation shall, before claiming or using the benefits of this act, file in the office of the Secretary of the Commonwealth an acceptance of all the provisions of article seventeen of the Constitution of this Commonwealth, which acceptance shall be made by resolution adopted at a regular or called meeting of the directors, trustees or other proper officers of such railroad, canal or other transportation corporation, certified under the seal of the corporation, and a copy of which resolution, certified under the seal of the office of the Secretary of the Commonwealth, shall be evidence for all purposes.

Approved—The 9th day of February, A. D. 1901.

WILLIAM A. STONE.

DEDUCTIONS FROM THE REPORTS OF SOME OF THE LEADING CORPORATIONS, EXHIBITING THE RESULTS OF OPERATION DURING THE YEAR ENDING JUNE 30, 1901.

While there are a great many steam railway corporations in Pennsylvania, there are, comparatively, but a few which may be de-

nominated trunk lines, and a consolidation of data showing the capitalization, operation, tonnage, etc., during the year, in order that the conditions of these leading corporations may be readily compared with each other, will be found to be fraught with interest.

Following out this line, there have been selected the Baltimore and Ohio, the Buffalo, Rochester and Pittsburg, the Central Railroad of New Jersey, the Delaware, Lackawanna and Western, the Erie, the Lake Shore and Michigan Southern, the Lehigh Valley, the New York Central and Hudson River, the New York, Chicago and St. Louis, the New York, Ontario and Western, the Northern Central, the Pennsylvania, the Pennsylvania Company, the Philadelphia and Reading, the Philadelphia, Wilmington and Baltimore, and the Pittsburg, Cincinnati, Chicago and St. Louis.

The Baltimore and Ohio Railroad Company.

This company now has an outstanding stock capitalization of \$104,361,267; a funded indebtedness of \$201,010,530; current liabilities of \$30,262,302, or a total capitalization of \$335,634,099.

Its assets are reported as follows: Cost of road, \$236,279,556; cost of equipment, \$31,025,872; stocks and bonds owned, \$26,715,219; cash and current assets, \$14,078,946; other assets, \$29,241,225, or a total of assets of \$337,340,818.

This company owns and operates lines of railways whose total mileage is 3,216.26, of which 381.50 is within the limits of Pennsylvania; it has in its passenger and freight service 1,144 locomotives, 693 cars in its passenger service, 54,343 freight cars and 1,622 cars devoted to the service of the company in the maintenance of its road and equipment, making a total of 56,658 cars of all kinds.

The number of its employes is 37,788, and the total compensation paid them during the year was \$19,180,939.

Its passenger trains show a mileage during the year of 11,479,095, and its freight trains of 19,064,962, or a total train mileage of 30,544,057. It has carried 11,660,900 passengers, the equivalent of carrying 458,294,750 persons one mile, and the average distance of the haul of its passengers is 39 miles.

The total passenger revenue of this road was \$9,054,602; the average amount from each passenger 77.6 cents; the average receipts per passenger per mile 1.9 cents, while the passenger earnings per train mile were 99.6 cents, making the passenger earnings per mile of road \$3,558.09.

This great corporation has carried during the year 3,153,571 tons designated as the products of agriculture; 546,549 tons, the products of animals; 20,369,895 tons, the products of mines; 1,943,980 tons, the products of the forests; 4,781,670 tons, the products of manu-

factories; 545,640 tons of merchandise, and 2,187,208 tons of miscellaneous shipments.

The total number of tons of freight carried was 33,528,513, an equivalent of having carried 7,140,897,000 tons one mile, and the average distance of the haul of one ton was 213 miles.

The total freight revenue for the year was \$35,553,872; the average amount received for each ton was \$1.0604; the average receipts per ton per mile were .498 of a cent; the freight earnings per train mile were \$1.871, while the freight earnings per mile of road \$11,090.72.

The total passenger revenue and earnings for the year were \$11,443,769; the freight revenue and earnings \$35,670,662; the total earnings from operation \$47,114,431; the income from other sources, including interest on bonds and dividends on stock, was \$856,793, making a total of earnings and income of \$47,971,224.

The expenses of this corporation during the year were, for maintenance of way and structure, \$5,721,695; for maintenance of equipment, \$6,104,310; for conducting transportation, \$18,019,019; general expenses, \$1,201,207, making a total operating expense of \$31,046,231, from which it appears that the operating expenses are 65.89 per cent. of the receipts from operation.

Other expenses during the year, which were properly deductions from income were \$12,236,008, making a total expenditure of \$43,282,239. Dividends were paid amounting to \$3,300,000, leaving a surplus for the year of \$1,388,985.

In the operation of this road during the year, there have been 3 passengers killed and 100 injured; 148 employes killed and 2,037 injured; 219 other persons than passengers and employes killed and 372 injured, or a total of 370 killed and 2,509 injured.

The Buffalo, Rochester and Pittsburg.

The capitalization of this road is made up as follows: \$12,000,000 of stock outstanding, \$13,032,000 of bonds, \$1,138,818 of current liabilities, or a total railway capital of \$26,170,818.

Under the head of assets this company reports as a total cost of road \$18,797,007; cost of equipment, \$6,164,232; stocks and bonds owned, \$1,003,670; cash and current assets, \$950,895; other assets, \$644,881, or a total of assets of \$27,560,685.

Its mileage owned and operated is 472.08; 289.64 miles of the same being within the limits of Pennsylvania.

This company has 177 locomotives, 79 passenger cars, 10,050 freight cars and 309 cars in its own service, making a total of 10,438 cars.

Its employes number 3,315, and the total compensation paid them during the year was \$2,156,319.

Its passenger train mileage was 962,471; its freight train mileage 2,127,856; mixed train mileage, 31,028, making a total train mileage of 3,121,355.

The number of passengers carried during the year was 1,002,677; the number of passengers carried one mile was 34,360,229, or an average distance for each passenger of 34 miles. The total passenger revenue was \$711,232; the average amount received from each passenger being 70.9 cents, the average receipts per mile 2.07 cents, the passenger earnings per train mile 80.38 cents, and the passenger earnings per mile of road \$1,652.08.

This road carried during the year 150,157 tons of the products of agriculture; 35,142 tons of the products of animals; 5,536,208 tons of the products of mines; 316,155 tons of the products of forests; 303,004 tons of the products of manufactories; 80,468 tons of merchandise and 349,913 tons of miscellaneous shipments.

The number of tons of freight carried was 6,771,047, or an equivalent of having carried 875,637.083 tons one mile; the average distance for each ton was 129 miles. The total freight revenue for the year was \$4,783,954, the average amount for each ton of freight being 70.65 cents, or an average receipt per ton per mile of .546 of a cent; \$2.2239 of freight earnings per train mile and \$10,133.78 of freight earnings per mile of road.

The passenger revenue and earnings for the year were \$779,915; freight earnings and revenue \$4,783,954; other earnings from operation \$102,698; total earnings from operation \$5,666,567; income from other sources, including interest on bonds and dividends on stock, \$26,926, or a total earnings and income for the year of \$5,693,493.

The expenses for the year were \$570,836 for maintenance of way and structure; \$694,546 for maintenance of equipment; \$1,870,523 for conducting transportation and \$134,372 for general expenses, making the total operating expenses for the year \$3,270,277, from which it appears that the operating expenses are 57.71 per cent. of the receipts from operation.

Other expenses not properly charged to operation amounted to \$1,737,912, or a total expense for the year of \$5,008,189. From the surplus so left dividends were paid of \$480,000, leaving a surplus for the year of \$205,304.

Under the head of accidents there were no fatal casualties among passenger, and but 4 injured; among employes 10 were killed and 403 injured; of other persons 14 were killed and 24 injured, making a total for the year of 24 killed and 431 injured.

The Central Railroad of New Jersey.

Under the head of capitalization this company reports \$27,251,800 of capital stock outstanding; \$46,665,000 of funded indebtedness;

\$5,541,579 of current liabilities, making a total capitalization of \$79,458,379.

Under the head of assets this company reports the cost of road owned as \$32,510,811; cost of equipment, \$16,532,044; stocks and bonds owned, \$26,210,208; cash and current assets, \$5,693,180; other assets, \$6,799,886; or a total of assets of \$87,746,129.

The mileage operated by this road during the year was 694.98, 266.94 of the same being within the limits of Pennsylvania.

In its equipment it has 405 locomotives, 483 passenger cars, 17,699 freight cars, with 584 cars devoted to its own service, making a total of 18,766 cars.

The number of employes of this company during the year were 3,378, and a total compensation was paid them of \$5,401,422.

The passenger trains of this company have run during the year 3,626,356 miles; its freight trains 2,946,233 miles, and its mixed trains 138,482 miles, making its total train mileage 6,711,071.

In conducting its passenger traffic it has carried 14,178,722 passengers, an equivalent of carrying 211,926,183 passengers one mile. Its total passenger revenue was \$3,302,122; the average amount received from each passenger 23,289 cents; the average receipts per passenger per mile, 1.558 cents; its passenger receipts per train mile, 85.734 cents, and its passenger receipts per mile of road \$4,516.25.

In conducting its freight business it has carried 309,842 tons, the products of agriculture; 71,123 tons, the product of animals; 9,985,720 tons, the products of mines; 266,169 tons, the products of forests; 1,939,108 tons, the products of manufactories; 250,693 tons of merchandise, and 4,143,998 tons of miscellaneous shipments.

The total amount of freight carried for the year was 16,966,653 tons, an equivalent of carrying 1,348,253,713 tons one mile. The total freight revenue for the year was \$12,594,246. The average amount received for each ton of freight was 74,229 cents; the average receipts per ton per mile, .934 of a cent; the freight earnings per train mile, \$3.896, or a total freight earnings per mile of road of \$17,099.19.

The total passenger revenue and earnings were \$3,608,369; the total freight revenue and earnings, \$12,594,246; other returns from operation, \$218,346, or a total earnings from operation of \$16,420,961. The income from other sources, including interest on bonds and dividends on stock were \$1,169,506, making a total for the year of \$17,590,467.

Under the head of expenses, the disbursements for the year were \$1,555,645 for maintenance of way and structure; \$1,741,414 for maintenance of equipment; \$5,574,211 for conducting transportation; \$419,069 for general expenses, making a total operating expense of \$9,290,339, from which it appears that the expense of operation of this road was 56.58 per cent. of the receipts from operation.

For other expenses than those of operation there have been paid by this company during the year \$5,377,886, making a total expenditure of \$14,668,225; \$1,360,515 have been paid out as dividends, leaving a surplus for the year of \$1,561,727.

In transporting the passengers on this road, 3 have been killed and 180 injured; of its employes, 34 were killed and 534 injured; of other persons than passengers and employes 66 were killed and 118 injured, making a total of 103 killed and 832 injured.

The Delaware, Lackawanna and Western.

\$26,200,000 represent the capital stock outstanding of this corporation; \$3,067,000 the bonded indebtedness; \$5,873,534 the current liabilities, making a total of capitalization of \$35,140,534.

The assets for the year amounted to \$51,181,005, made up as follows: Cost of road, \$17,325,318; cost of equipment, \$8,114,201; stocks and bonds owned, \$6,770,476; cash and current assets, \$9,022,401, and other assets, \$9,948,609.

Its mileage owned and operated is 798.14, 206.92 miles of which are within the limits of Pennsylvania.

Its equipment consists of 614 locomotives, 732 cars in the passenger service, 27,118 cars in the freight service and 934 cars devoted to its own service, making a total of 28,784 cars.

The number of employes for the year was 16,195, and the total compensation paid them was \$8,092,281.

The train mileage was as follows: Miles run by passenger trains, 5,393,038; by freight trains, 6,246,784; total number of miles run, 11,639,822.

The number of passengers carried was 14,783,219, the equivalent of carrying 289,821,052 passengers one mile, the average distance per passenger being 20 miles. The total passenger revenue was \$4,205,861; receipts from each passenger 28.450 cents; average receipts per passenger per mile, 1.451 cents; passenger earnings per train mile, \$1.00241, and the passenger earnings per mile of road, \$6,773.26.

Of the tonnage carried by this road during the year, 1,643,916 tons were the products of agriculture; 349,329 tons, the products of animals; 8,724,373 tons, the products of mines; 460,696 tons, the products of forests; 1,085,379 tons, the product of manufactories; 612,597 tons of merchandise and 1,078,877 tons miscellaneous shipments.

The total amount of freight carried was 13,955,167 tons, an equivalent of carrying 2,172,581,287 tons one mile; the average haul per ton was 156 miles. The total freight revenue for the year was \$16,263,747; the average amount received for each ton of freight \$1.16543; the average receipts per ton per mile, .749 of a cent; the freight earn-

mgs per train mile \$2.60781, and the total freight earnings per mile of road \$20,410.47.

The passenger earnings and revenue for the year were \$5,406,013; the freight revenue and earnings \$16,290,409; other earnings from operation, \$265,425; total earnings from operation, \$21,961,847; income from other sources, including interest on bonds and dividends on stock, \$2,677,577, making the total earnings and income \$24,639,424.

In the way of expenses there have been paid out during the year \$3,455,066 for maintenance of way and structure; \$2,596,100 for maintenance of equipment; \$7,544,323 for conducting transportation; \$356,909 for general expenses, making the total of operating expenses \$13,952,398. The expenditures for operation were 63.53 per cent. of the receipts from operation.

During the year the expenses other than those for operation were \$7,528,218, making the total expenditures for the year \$21,480,616. The dividends paid were \$1,834,000, leaving a surplus of \$1,324,808.

Of the passengers carried there was but 1 killed and there were 46 injured; of employes 54 were killed and 303 injured; of other persons than passengers and employes 64 were killed and 57 injured, making a total of 119 killed and 406 injured.

The Erie.

\$176,271,300 represent the capital stock outstanding of this corporation; \$169,862,815 its bonded indebtedness outstanding; \$7,571,326 its current liabilities, making a total railway capital or liabilities amounting to \$353,705,441.

Under the head of assets the report shows, cost of road and equipment, \$335,043,829; stocks and bonds owned, \$14,765,286; cash and current assets, \$7,466,116; other assets, \$2,708,240, making a total of \$359,983,471 in the way of assets.

Its mileage owned and operated is 1,886.17, 503.62 miles being within the limits of Pennsylvania.

The equipment of this road consists of 1,040 locomotives, 892 passenger cars, 48,926 freight cars, 714 cars devoted to the company's own service, making a total of 50,532 cars.

There were 27,182 employes on this road to whom the compensation of \$14,623,841 was paid.

Its train mileage consists of 7,460,463 miles run by passenger trains, and 11,351,134 miles run by freight trains, making a total of 18,811,597 train miles.

This road carried during the year 16,910,061 passengers, an equivalent of carrying 435,902,860 persons one mile. The average haul per passenger was 26 miles; the total passenger revenue, \$6,716,513,

or an average amount received from each passenger of 39.719 cents; the average receipts per passenger per mile were 1.541 cents; passenger earnings per train mile \$1.05646, and the passenger earnings per mile of road \$4,178.66.

Of its freight carried, there were 2,456,474 tons, the products of agriculture; 761,128 tons, the products of animals; 14,218,968 tons, the products of mines; 1,451,957 tons, the products of forests; 3,909,551 tons, the products of manufactories; 1,154,237 tons of merchandise, and 864,797 tons of miscellaneous shipments.

The total number of tons carried was 24,817,112, the equivalent of carrying 4,297,141,486 tons one mile, or an average haul per ton of 173 miles. The total freight revenue for the year was \$26,421,852; the average amount received for each ton of freight, \$1.06466; the average receipts per ton per mile, .615 of a cent; the freight earnings per train mile, \$2.34570, and the freight earnings per mile of road, \$14,116.60.

The passenger earnings and revenue of this road were \$7,881,686; the freight revenue and earnings, \$26,626,405; other earnings from operation, \$923,355; or a total earnings from operation of \$25,431,446. Income from other sources, including interest on bonds, dividends on stock, etc., \$1,416,877, making the total earnings and income for the year \$36,848,323.

In the way of expenses, the Erie Railroad during the year has paid out \$3,855,900 for maintenance of way and structure; \$5,456,603 for maintenance of equipment; \$14,267,295 for conducting transportation; \$821,976 for general expenses, making the total operating expense, \$24,401,774, from which it appears that the operating expenses are 68.87 per cent. of the receipts from operation.

Besides the expenses of operation, there have been paid out during the year for other expenses, \$9,623,393, making a grand total of expenses of \$34,025,167. No dividends have been paid by this company during the year covered by this report, but it has a surplus of \$2,823,156.

The accidents reported for the year are as follows: 9 passengers killed, 162 injured; 53 employes killed, 1,914 injured; 147 other persons killed and 218 injured, making a total of 209 killed and 2,294 injured.

The Lake Shore and Michigan Southern.

The capital stock of this road is \$50,000,000; the bonded indebtedness, \$50,741,000; the current liabilities, \$10,555,508, making the total liabilities or railway capitalization \$111,296,508.

The report for the year shows the assets to be as follows: Cost of road, \$66,700,000; cost of equipment, \$17,300,000; stocks and bonds owned, \$29,482,676; cash and current assets, \$3,600,872; other assets, \$7,468,012; total assets, \$124,551,560.

The total mileage owned and operated is 1,411.16, 102.49 miles of which are within the limits of this State.

This company has in its service 542 locomotives, 431 passenger cars, 22,252 freight cars and 695 cars devoted to the service of the company, making a total of 23,378 cars.

The number of employes reported for this year was 16,344, and the pay roll amounted to \$10,014,659.

The train mileage of this corporation was 5,241,176 run by passenger trains, and 7,865,177 by freight trains, or a total train mileage of 13,106,353.

The number of passengers carried during the year was 5,156,827. Reduced to a single mile basis this is equivalent to carrying 283,098,769 passengers one mile, and an average distance per passenger of 55 miles. The total passenger revenue for the year was \$5,642,654. From these figures it is found that the average amount received from each passenger was \$1.09421; the average receipts per passenger per mile 1.993 cents; the passenger earnings per train mile \$1.54435. From these deductions it is ascertained that the passenger earnings per mile of road were \$5,735.84.

The report classifies the tonnage of the road as follows: Products of agriculture, 3,094,245 tons; products of animals, 984,404 tons; products of mines, 10,191,388 tons; products of forests, 714,144 tons; manufactured goods, 3,986,329 tons; merchandise, 963,332 tons and miscellaneous shipments, 670,287 tons.

The report shows that 20,504,129 tons of freight were transported on this road, which is an equivalent of carrying 3,874,212.117 tons one mile. The average distance of the haul of a ton of freight was 189 miles for the transportation of this freight the company has received \$18,939,235. The average receipts per ton of freight were 92.368 cents; the average receipts per ton per mile were .489 of a cent, and the freight earnings per train mile were \$2.41336. From these deductions it is found that the total freight earnings per mile of road have been \$13,450.98.

The passenger revenue and earnings were \$8,094,187; the freight revenue and earnings \$18,981,489; other earnings from operation, \$352,674, making a grand total of earnings from operation of \$27,428,350. There have been received from other sources, including interest on bonds and dividends on stock, \$1,123,711, or a grand total of earnings and income of \$28,552,061.

From the receipts of this company there have been paid for maintenance of way and structure, \$3,180,905; for maintenance of equipment, \$4,473,206; for conducting transportation, \$9,457,474; for general expenses, \$379,220, making a total expense from operation of \$17,490,805. From these figures it appears that the expense of

operation for the year was 63.77 per cent. of the total receipts from operation.

In addition to the expense from operation, the company has paid out during the year \$3,919,784, making a total of operating and other expenses for the year of \$21,410,589. The dividends paid amounted to \$3,516,005, leaving a surplus from the income for the year of \$3,625,467.

Notwithstanding the great number of passengers carried and the great amount of freight transported, the accidents reported exhibit a condition which is to be highly commended, for of all the passengers carried none have been killed and 43 injured; of employes, 35 killed and only 238 injured; of other persons than passengers and employes, 131 were killed and 129 injured, making a total of 166 killed and 410 injured.

The Lehigh Valley.

The total railway capitalization of this corporation is \$100,140,403, classified as follows: Capital stock outstanding, \$40,441,100; bonded indebtedness, \$46,975,000; other current liabilities, \$12,724,303.

In the way of assets the total amount reported is \$98,962,144, classified as follows: Cost of road, \$18,639,292; cost of equipment, \$19,018,420; stocks and bonds owned, \$38,776,094; cash and current assets, \$5,614,721; other assets, \$16,913,617. The significant feature of these figures is that the stocks and bonds owned exceed the total cost of road and equipment.

The Lehigh Valley Railroad Company owns and operates 1,387.38 miles of road, 629.41 miles of which are located within the limits of this State.

In conducting the business of the road for the year, the company has had in use 763 locomotives, 473 passenger cars, 34,889 freight cars, and 1,087 cars employed in its own service, or a total of 36,449 cars.

The company has given employment during the year to 17,576 persons, to whom it has paid \$9,338,924.

Its train mileage was as follows: Miles run by passenger trains, 4,317,944; by freight trains, 7,907,319, making a total of 12,225,263 miles.

The total number of passengers carried was 4,456,732, an equivalent of carrying 160,953.677 passengers one mile; the average haul per passenger was 36 miles. In conducting this passenger traffic, the company has received during the year \$3,003,060; the average receipts per passenger were 67.383 cents; the average receipts per passenger per mile, 1.866 cents; the passenger earnings per train mile, 80.143 cents, resulting in passenger earnings per mile of road of \$2,494.29.

The number of tons of freight carried embraces 3,540,600 tons, the products of agriculture; 540,323 tons, the products of animals; 10,541,980 tons, the products of mines; 703,245 tons, the products of forests; 1,849,225 tons, the products of manufactories; 232,185 tons of merchandise; 1,103,505 tons of miscellaneous shipments.

This makes a total tonnage during the year of 18,511,063; reduced to a single mile basis it is found these figures are equivalent to carrying 3,606,697,936 tons one mile, an average haul per ton of 195 miles. The total freight revenue reported was \$19,829,363, an average of \$1.07122 for each ton of freight carried; an average receipts per ton per mile of .550 of a cent, and freight earnings per train mile of \$2,40772. The total freight earnings per mile of road were \$14,292.67.

This company shows for the year the total passenger revenue and earnings to be \$3,460,528; freight revenue and earnings, \$19,829,363; other earnings from operation, \$1,082,423, or a total earnings from operation of \$24,372,314. It has also received from other sources embracing interest on bonds owned and dividends on stock, \$1,081,736, or a total earnings and income of \$25,454,050.

From these receipts, the company has disbursed for operation \$19,383,846, classified as follows: \$4,241,717 for maintenance of way and structure; \$4,448,244 for maintenance of equipment; \$9,958,739 for conducting transportation, and \$735,146 for general expenses. In addition to expenses for operation, there have been paid out for other expenses, \$7,210,019, making a total of expenditures for the year of \$26,593,865.

The significant features of the report of the Lehigh Valley Railroad for the year ending June 30, 1901, are that no dividends were paid and that there was a deficit for the year of \$1,139,815.

To the credit of this road the report shows that its passengers have been carried with no fatal accidents and 13 non-fatal; of its employes, 45 have been killed and 142 injured; of other persons, 68 were killed and 73 injured, making a total of 113 fatal accidents and 228 non-fatal.

The New York Central and Hudson River.

The total liabilities or railway capital of this corporation is \$333,601,054, divided as follows: \$115,000,000 of capital stock outstanding; \$193,772,941 of funded indebtedness and \$24,828,113 of other forms of indebtedness, including current liabilities.

This company reports as assets, \$345,371,047, divided as follows: Cost of road owned, \$138,952,138; cost of equipment owned, \$44,707,064; stocks and bonds owned, \$126,785,141; cash and current assets, \$11,262,225; other assets, \$23,664,479.

This corporation owns and operates 2,963.14 miles of road, 408.29 miles of which are within the limits of Pennsylvania.

Its equipment consists of 1,355 locomotives, 1,589 cars in passenger service, 57,116 cars in freight service, and 1,643 cars devoted to its own service, or a total of 60,348 cars.

The number of employes for the year was 35,670, and to these it has paid in the way of compensation \$22,204,049.

Comparing the train mileage of this road with the other leading railroads, it is seen that there is a great disparity in the matter of the passenger and freight train mileage. In most instances the freight train mileage far exceeds the passenger train mileage. The total train mileage of the New York Central and Hudson River was 33,894,537; the miles run by passenger trains, 17,340,600; by freight trains, 16,200,364; by mixed trains, 353,573.

The public service of this great common carrier is shown in the fact that the number of passengers carried during the year was 30,318,735, an equivalent of carrying 915,924,853 persons one mile; the average distance each passenger was carried was 30 miles. The passenger revenue for the year was \$16,473,822; the average receipts per passenger were 54.335 cents; the average receipts per passenger per mile, 1.799 cents; the passenger earnings per train mile, \$1.12373, resulting in passenger earnings per mile of road of \$6,998.04.

Of the products of agriculture this company carried during the year 7,000,487 tons; 2,225,595 tons, the products of animals; 16,632,589 tons, the products of mines; 2,412,168 tons, the products of forests; 3,881,101 tons, the products of manufactories; 2,711,142 tons of merchandise, and 2,540,040 tons of miscellaneous shipments.

The total tonnage was 37,403,122, an equivalent of 6,036,548,335 tons carried one mile; the average distance of the haul of one ton was 161 miles. For conducting the transportation of freight there were received \$34,698,516; the average amount received for each ton of freight was 92.769 cents; the average receipts per ton per mile, .575 of a cent; the freight earnings per train mile, \$2.10285, making the total freight earnings per mile of road, \$11,776.06.

This road received from its passenger revenue and earnings, \$19,883,455; from freight earnings and revenue, \$34,810,513; from other earnings from operation, \$1,725,286; making a total of earnings from operation of \$56,419,254; from other sources, including interest on bonds and dividends on stock, it received \$4,515,364, making the total earnings and income, \$60,934,618.

This corporation has paid out for maintenance of way and structure, \$6,710,193; for maintenance of equipment, \$6,718,145; for conducting transportation, \$21,428,065; for general expenses, \$1,298,300, or a total of \$36,154,703. From these figures it appears that the expenses of operation of the New York Central and Hudson River during the year were 64.08 per cent. of its receipts from operation.

In addition to the expenditure for operation the company has paid out for other expenses, \$17,244,034, making the total expenditure \$53,398,737. A dividend was paid amounting to \$5,750,000, leaving a surplus of \$1,785,881.

Of the passengers which this road has carried 7 were killed and 198 injured; of its great army of employes 118 were killed and 531 injured; of other persons than passengers and employes 283 were killed and 241 injured, making a total of 408 killed and 970 injured.

New York, Chicago and St. Louis.

This corporation has a total railway capitalization or liabilities of \$51,346,695; its capital stock is \$30,000,000; its bonded indebtedness \$19,425,000, and its other forms of indebtedness including current liabilities \$1,921,695.

Its assets amount to \$52,010,762, divided as follows: Cost of road owned \$46,086,158; cost of equipment owned \$3,720,846; cash and current assets \$1,932,023; other assets \$271,735.

This road owns and operates 538 miles, only 45.43 miles of which are within the limits of Pennsylvania.

In conducting its transportation for the year it has had in its service 164 locomotives, 75 passenger cars, 7,489 freight cars, and 131 cars devoted to its own service, making a total of 7,695 cars.

It has employed 4,022 persons, to whom the annual compensation paid was \$2,667,312.

Its passenger trains have run 1,199,672 miles; its freight trains 4,384,243 miles; its total train mileage being 5,583,915.

The number of passengers carried earning revenue was 587,513, an equivalent to carrying 66,599,841 persons one mile; the average distance per passenger was 113 miles; in conducting its passenger service the company has received \$1,131,850, being \$1,926.51 from each passenger, or an average receipt per passenger per mile of 1.699 cents; the passenger earnings per train mile were \$1.03773, and the total passenger earnings per mile of road \$2,314.

Of the freight carried during the year 1,527,842 tons were the products of agriculture; 483,799 tons, the products of animals; 928,250 tons the products of mines; 297,509 tons, the products of forests; 740,379 tons, the products of manufactories; 162,145 tons of merchandise, and 371,374 tons of miscellaneous shipments.

The total number of tons carried was 4,511,298, an equivalent of 1,330,558,059 tons carried one mile; an average haul of a ton of freight of 295 miles. In conducting its freight business the company received \$6,034,233; the average amount received for each ton of freight was \$1.33758, or .454 of a cent per ton per mile. The freight earnings per train mile were \$1.37635, or \$11,216.05 of earnings per mile of road.

The total passenger revenue and earnings of this company for the year were \$1,244,934, while its freight revenue and earnings were \$6,034,233. In addition, there were other earnings from operation amounting to \$13,053, making the total earnings from operation \$7,292,220. The income from other sources amounted to \$24,659, or a total earnings and income from operation of \$7,316,879.

This company paid out in the way of operating expenses \$5,522,621, divided as follows: For maintenance of way and structure \$850,026; for maintenance of equipment \$876,934; for conducting transportation \$3,690,376, and for general expenses \$105,285. The total operating expenses were 75.73 per cent. of the receipts from operation.

In addition to the expenses for operation, this company paid out for other expenses \$1,129,706, making a total of disbursements of \$6,652,327. From its year's operation it paid dividends of \$470,000 and had left a surplus of \$194,552.

In the way of accidents there were no fatalities among its passengers and but 11 injured; of its employes 13 were killed and 330 injured; of other persons 20 were killed and 30 injured, making the number of fatal accidents 33 and of non-fatal 371.

New York, Ontario and Western.

This company shows a railway capitalization of \$82,155,985, divided as follows: Capital stock, \$58,118,983; bonded indebtedness, \$17,419,000; other forms of indebtedness, including current liabilities, \$6,618,002.

Its assets for the year were \$87,225,385, embracing cost of road, \$66,853,391; cost of equipment, \$4,434,278; stocks and bonds owned, \$13,096,617; cash and current assets, \$1,897,930; other assets, \$943,169.

Its line of road owns and operates 480.46 miles of which 51.14 are in Pennsylvania.

It has 140 locomotives, 144 passenger cars, 6,881 freight cars, and 153 cars used only in the company's service, making a total of 7,178 cars.

Its employes number 3,025 and the annual compensation paid to them amounts to \$1,805,302.

Its passenger train mileage was 885,607; its freight train mileage 1,450,958; its mixed train mileage 744,239, making its total train mileage 3,080,804.

The number of passengers carried during the year was 1,312,572, an equivalent of carrying 46,683,528 persons one mile; the average distance per passenger was 36 miles. The total passenger revenue was \$855,201; the average amount received for each passenger 65.155 cents; the average receipts per passenger per mile 1.831 cents; the

passenger revenue per train mile 91.156 cents. The passenger earnings per mile of road were \$2,033.23.

Of the freight transported during the year, 238,706 tons were the products of agriculture; 28,513 tons, the products of animals; 2,625,017 tons the products of mines; 74,755 tons, the products of forests; 319,453 tons the products of manufactories; 53,713 tons, merchandise, and 168,351 tons, miscellaneous shipments.

The total tonnage was 3,508,508, an equivalent of carrying 516,135, 284 tons one mile, an average haul per ton of 147 miles. For conducting its freight traffic it received \$4,269,307, an average receipt for each ton of freight of \$1.21684, or .827 of a cent per ton per mile, and a freight earning per train mile of \$2.12495. The freight earnings per mile of road were \$8,885.87.

The passenger revenue and earnings of this company were \$976,886; the freight revenue and earnings \$4,269,307; other earnings from operation, \$76,690; total earnings from operation, \$5,322,883; income from other sources, \$417,245, or total earnings and income, \$5,740,128.

The amount paid out during the year for maintenance of way and structures was \$759,915; for maintenance of equipment, \$686,725; for conducting transportation, \$2,046,278; for general expenses, \$145,423, making the total operating expenses \$3,638,341, showing that the expense of operation was 68.35 per cent. of the receipts from operation.

In addition to the expense of operation there was paid out during the year the sum of \$1,222,555 for other expenses, making the total expenditures \$4,860,896. While this company paid no dividends during the year, it had a surplus of \$879,232.

In the way of accidents, the New York, Ontario and Western reports 1 passenger killed and 12 injured; 5 employes killed and 21 injured; 11 other persons killed and 12 injured, a total of 17 killed and 45 injured.

The Northern Central.

This railroad company properly belongs to the Pennsylvania system, but makes a separate report of its operations. It has a capitalization of \$24,212,098, of which \$11,462,300 are capital stock outstanding; \$9,578,000 funded indebtedness and \$3,171,798 other indebtedness including current liabilities.

The total amount of assets was \$27,837,340, made up as follows: Cost of road, \$15,997,133; cost of equipment, \$4,980,284; stocks and bonds owned, \$4,681,793; cash and current assets, \$1,427,912; other assets \$750,218.

This road owns and operates 381.06 miles; 230.74 miles of which are within the limits of this State.

This company has in its service as equipment 191 locomotives, 160 passenger cars, 9,806 freight cars and 431 cars devoted to its own use, making a total of 10,397 cars.

The men on its pay roll number 5,839, and the compensation paid them during the year was \$3,206,238.

The train mileage of the Northern Central during the year was 5,048,356, divided between passenger trains and freight trains as follows: Passenger trains, 1,838,784 miles; freight trains, 3,209,572 miles.

The total number of passengers carried was 4,471,047, an equivalent of carrying 62,089,167 passengers one mile. The average distance of the haul of one passenger was 14 miles; the total passenger revenue was \$1,360,098. The average receipts from each passenger were 30.420 cents, and the average receipts per passenger per mile were 2.191 cents. This is a much higher rate than obtains for the transportation of passengers on most of the leading railroads reporting to this office. The passenger earnings per train mile were 91.232 cents, and the passenger earnings per mile of road were \$4,402.35.

The tonnage was as follows: Products of agriculture, 2,186,477 tons; products of animals, 390,724 tons; products of mines, 9,373,883 tons; products of forests, 1,263,447 tons; products of manufactories, 2,955,274 tons; merchandise 230,095 tons, and miscellaneous shipments 99,655 tons.

The total number of tons of freight carried was 16,499,555. When reduced to a single mile basis this is an equivalent of carrying 1,083,152,009 tons one mile, an average haul of one ton of 66 miles. The freight revenue was \$6,133,479; the average receipts per ton 37.174 cents; the average receipts per ton per mile .566 of a cent; the freight earnings per ton per train mile \$1,911. A deduction from these figures shows that the average freight earnings per mile of road were \$16,095.83.

The total passenger revenue and earnings of this road were \$1,677,559; the freight revenue and earnings \$6,133,479; other earnings from operation, \$185,135; total earnings from operation, \$7,996,173; income from other sources, including interest on bonds and dividends on stocks owned, \$704,163, making a grand total of earnings and income of \$8,700,336.

The expenses of this road in conducting the business for the year are classified as follows: For maintenance of way and structure, \$1,060,514; for maintenance of equipment, \$1,328,615; for conducting transportation, \$3,052,825; for general expenses, \$157,511; total operating expenses, \$5,599,465. These figures show that the operating expenses of this company were 70.03 per cent. of the total receipts from operation.

The other disbursements of the company during the year exclusive

of expense of operation were \$2,203,047, making the total expenditure \$7,802,512. A dividend of \$916,980 was paid, leaving a deficit for the year of \$19,155.

In the way of accidents, although the Northern Central is a great carrier of passengers, there have been none killed during the year and but 4 injured; of its employes 6 were killed and 71 injured; of other persons 15 were killed and 17 injured, making a total of 21 fatal accidents and 92 non-fatal.

The Pennsylvania.

In considering the details and operations of this company during the year, it should be remembered that the figures here given do not cover any of the operations of the Pittsburg, Cincinnati, Chicago and St. Louis or of the Pennsylvania Company, and only cover the lines east of Pittsburg and Erie. They also exclude the Northern Central and Cumberland Valley, and the Philadelphia, Wilmington and Baltimore, each of these companies making separate operating reports.

The capitalization of the Pennsylvania Railroad for the year covered by this report was \$354,716,174, divided as follows: Capital stock outstanding, \$206,163,995; funded indebtedness, \$83,537,840; other forms of indebtedness, including current liabilities, \$65,014,339.

Last year the amount of stock reported outstanding was \$151,522,870. It will therefore be seen that there has been a material increase in the capital stock of this company and that the increase in the total capitalization is due to the increase in the capital stock rather than to the increase in the funded indebtedness and current liabilities. The vast improvements which are being made along the lines of this railroad show very clearly to what uses the money derived from the increase in the capital stock of this corporation is devoted.

The construction of the massive bridge across the Susquehanna river west of Harrisburg shows the spirit of improvement which characterizes the management of this great corporation. This bridge is in many ways the greatest that has ever been constructed on this continent, or in fact in the world, and will certainly be ready for use early in the coming year.

The extensive improvements that have been made and are being made on the many lines of the road both east and west of Harrisburg, and in the crossing of the Allegheny mountains, bear most positive evidence as to the policy which controls the action of the Board of Directors of this corporation.

There is an introduction of every improvement, and these improvements extending to every detail of construction that the most successful and conservative engineers can recommend, in order that the Pennsylvania Railroad shall be up on the advance lines of everything that constitutes a first class railroad company.

It is a fact which cannot be gainsaid, and of this the citizens of Pennsylvania have a just reason to be proud, that there is no corporation either in this or in any other country that can excel this railroad in all that goes to conserve the interests of the public, either in the facilities for transportation of commodities or in the convenience, safety and comforts which are offered to the public in its passenger service.

The assets of the Pennsylvania Railroad Company for the year covered by this report amount to \$381,527,836, classified as follows: Cost of road owned, \$78,186,904; cost of equipment owned, \$42,978,824; stocks and bonds owned, \$185,774,304; cash and current assets, \$45,827,103; other assets, \$28,760,701.

The significant features of the table of assets, as reported by this company are that they exhibit the wonderful magnitude of this corporation from a financial standpoint, as when placed in comparison with the figures showing the assets of this company twenty-five years ago, they clearly indicate its steady growth financially, and that expansion through leasing, purchase, mergers and consolidation has played no small part in its operations. The ownership of \$184,000,000 of stocks and bonds of other corporations, this amount being more than double the cost of road owned, is unquestionable evidence of the expansion tendencies of the Pennsylvania Railroad Company.

In considering the mileage of this road it must not be forgotten that this mileage does not include the Northern Central, the Cumberland Valley, the Philadelphia, Wilmington and Baltimore, or any of the railroads connected with the Pennsylvania Company west of Erie and Pittsburg.

The total mileage reported for the year covered by this report was 3,672.50, 2,912.82 of which is within the limits of Pennsylvania. Last year the total amount of mileage was 2,810.25.

The equipment of this road is classified as follows: Locomotives 2,141, passenger cars 1,935, freight cars 95,724, cars devoted to the service of the company in maintaining its road 5,080, total number of cars in service 102,739.

The number of employes for the year was 72,193, to whom there was paid during the year \$41,856,462.

The train mileage was 45,003,937, of which 18,766,821 represents the number of miles run by passenger trains and 26,237,116, the number of miles run by freight trains.

In the passenger service of this company there were carried 43,840,123 persons, an equivalent of carrying 980,248,549 passengers one mile; the average distance of the haul of a passenger was 22 miles; the total passenger revenue was \$19,525,446; the average amount received from each passenger was 44.538 cents; the average receipts per passenger per mile 1.992 cents; the passenger earnings per train mile

\$1.28022; the total passenger earnings per mile of road are therefore found to be \$6,540.24.

Comparing these figures with those disclosed by the report for the year ending June 30, 1900, it is found that the number of passengers carried that year was 39,793,708; also that the average distance of the haul of a passenger was 22 miles, the same as this year, and that the total passenger revenue was \$16,925,492, showing an increase of more than two and one-half millions of dollars during the year from passenger service alone. Last year the average amount received per passenger was 42.5 cents; this year, as above indicated, it was 44.5 cents.

This road carried during the year 4,931,503 tons, the products of agriculture; 1,796,135 tons, the products of animals; 54,566,907 tons, the products of mines; 3,980,231 tons, the products of forests; 15,307,293 tons, the products of manufactories; 447,931 tons of merchandise, and 1,778,063 tons of miscellaneous shipments.

The total number of tons of freight carried was 82,798,063, an equivalent of carrying 12,542,245,783 tons one mile; the average haul of a ton of freight was 151 miles; the total freight revenue for the year was \$70,508,266; the average amount received for each ton of freight was 85.157 cents; the average receipts per ton per mile .562 of a cent; the freight earnings per train mile were \$2.68735, and the earnings per mile of road were \$19,193.76.

Last year the total number of tons of freight carried was 79,973,667; the average haul of a ton was 144 miles; the total freight revenue \$57,966,361, and the average receipts per ton per mile .504 of a cent.

This year the passenger revenue and passenger earnings were \$24,025,589; the freight revenue and earnings \$70,508,266; other earnings from operation, \$1,352,329; total earnings from operation, \$95,886,184; income from other sources, including interest on bonds, dividends on stock, rentals, etc., \$5,787,273, making a grand total of earnings and income of \$101,673,457, as against \$85,972,704 last year.

This company paid out during the year \$12,081,154 for maintenance of way and structure; \$14,425,808 for maintenance of equipment; \$33,403,719 for conducting transportation. In addition to this there was paid under the head of general expenses \$2,203,451, making a total of \$62,114,132. From these figures it is seen that the operating expenses of the Pennsylvania Railroad Company for the year were 64.78 per cent. of the receipts from operation.

In addition to the expenses for operation this company paid out \$28,742,003, making the total expenditures \$90,856,135. A dividend of \$9,089,078 was paid to its stockholders, and it had left after transacting the business of the year a surplus of \$1,728,244.

This year there were 28 passengers killed and 524 injured. This is an increase in both fatal and non-fatal accidents among passengers, proper consideration having been given to the fact that a much larger

number was carried this year than last, as in last year's report the number of passengers killed was 2 and the number injured 378. This year the number of employes killed was 217; last year 216. This is a somewhat favorable showing, owing to the fact that a very much larger number of employes have been engaged in the service of the company, from which we might reasonably expect an increase in the number of accidents. This year the number of injured among employes was 4,733; last year it was 3,871. Of other persons, this year's report shows 392 killed and 557 injured; last year the number was 313 killed and 483 injured. The total number of fatal accidents this year was 637 and of non-fatal 5,814; last year the number of fatal accidents was 531 and of non-fatal 4,732.

The Pennsylvania Company.

The Pennsylvania Company is a separate corporation from that of the Pennsylvania Railroad, and while both companies are under the same general management a separate corporate existence is maintained and separate operating accounts are kept. It appears that the Pennsylvania Company is in immediate control of all the Pennsylvania lines west of Pittsburg except the Pittsburg, Cincinnati, Chicago and St. Louis, which is also a part of the Pennsylvania system, but whose operations are not included in either the report of the Pennsylvania Railroad Company or of the Pennsylvania Company. The operations of the balance of the Pennsylvania lines west of Pittsburg are embraced in the reports of the Pennsylvania Company.

This company has a capitalization of \$70,255,482, divided as follows: Capital stock \$21,000,000; bonds outstanding \$38,512,718; other forms of indebtedness including current liabilities \$10,742,764.

The company has assets amounting to \$76,861,148, made up as follows: Cost of road, \$1,446,591; cost of equipment, \$7,935,447; stocks and bonds owned, \$50,451,659; cash and current assets, \$6,118,490; other assets, \$10,908,961.

The noticeable features of this classification of assets are the comparatively small amount reported as costs of road and equipment, and the large amount reported as representing stocks and bonds owned.

The mileage operated by the Pennsylvania Company was 1,395.62, 278.47 miles of which are in Pennsylvania. The Pennsylvania Company itself does not own any railroad.

The number of locomotives used by this company in operating the lines of the subsidiary companies was 553; the number of cars in passenger service 489; in freight service 44,983; cars devoted to the use of the company in maintaining its system 378; the total number of cars 45,850.

On its pay rolls it carried during the year the names of 18,484 persons and to these it paid \$10,344,177.

The total amount of train mileage for the year was 13,972,799, of which 5,345,373 miles were run by passenger trains and 8, 627,426 by freight trains.

The total number of passengers carried was 7,681,823. When reduced to a single mile basis this is found to be an equivalent of carrying 211,682,018 persons one mile. The average haul of a passenger was 28 miles; the total passenger revenue \$4,425,858; the average amount received from each passenger 57.615 cents; the average receipts per passenger per mile 2.091 cents. From this it appears that the Pennsylvania Railroad Company, through the Pennsylvania Company, receives a somewhat larger rate per passenger per mile on its lines west of Pittsburg than it does on those east of Pittsburg. The passenger earnings per train mile were \$1,09393; the passenger earnings per mile of road \$4,206.70.

In the general classification of freight provided for in the blanks furnished each company, in which annual reports are made, it is found that the Pennsylvania Company carried 2,314,178 tons, the products of agriculture; 431,946 tons, the products of animals; 27,449,962 tons, the products of mines; 1,292,237 tons, the products of forests; 10,177,404 tons, the products of manufactories; 138,344 tons of merchandise, and 485,281 tons of miscellaneous shipments.

The total tonnage for the year was 42,649,352, an equivalent of carrying 3,294,794,521 tons one mile. The average distance of the haul of one ton was 77 miles; the total freight revenue \$19,411,613; the average amount received for each ton of freight 45,514 cents; the average receipts per ton per mile .589 of a cent; the freight earnings per train mile \$2.25257, and the freight earnings per mile of road \$13,981.12.

Assembling the figures showing the receipts from passenger and freight transportation, it is found that this company received as passenger revenue and earnings \$5,849,469; as freight revenue and earnings, \$19,433,893; other earnings from operation, \$336,981; total earnings from operation, \$25,618,343; income from other sources, including interest on bonds and dividends on stocks, rentals, etc., \$3,165,727, making the total earnings and income, \$28,784,070.

The operating expenses of the Pennsylvania Company during the year were \$17,089,541, of which amount \$3,607,177 were paid for maintenance of way and structure; \$4,089,507 for maintenance of equipment; \$8,944,240 for conducting transportations; \$448,617 for general expenses. The total amount paid for operating expenses, \$17,089,541, is 66.71 per cent. of the total receipts of the company from operation.

In addition to the expenses for operation this company paid out for other expenses not properly charged to operation, \$9,400,327, making a total of operating and other expenses of \$26,489,868.

While this company had a surplus as a result of its operations for the year of \$2,294,202, no dividends appear to have been paid.

The number of passenger carried this year on the Pennsylvania Company road was much larger than in previous years, and the results of the year's operations as to accidents were not so favorable as for the preceding year. Last year the number of fatal accidents was 2, and of non-fatal 57 in the case of passengers; this year, the number of passengers killed was 7, and the number injured 60. Last year 59 employes were killed and 2,558 injured; this year the number killed was 47, and the number injured, 1,544. The accidents to employes would indicate an improved condition. A larger number of employes have been on the rolls and more passengers and more freight carried than in the previous year, and yet the accidents to employes have been in a marked degree less. Last year the number of other persons killed was 80, and injured 130; this year, the number killed was 94, and the injured 163. Last year the total number of killed was 141, and injured 2,745; this year the number killed was 148, and 1,767 injured.

Philadelphia and Reading.

The Philadelphia and Reading Railway Company presents a report for the year ending June 30, 1901, which, a few years ago, would scarcely have been prophesied by the most ardent admirers of that corporation, and, therefore, the following figures relating to its capitalization, indebtedness and operations for the year are fraught with unusual interest.

Its total capitalization is \$96,945,115, of which \$20,000,000 are capital stock outstanding, \$67,683,952 are bonded indebtedness; \$9,261,163 are other forms of indebtedness and current liabilities.

The assets of this company amount to \$98,513,290; of this amount, \$80,582,838 represent the cost of road and equipment; \$4,198,959 cash and current assets; \$13,731,493 other assets; last year the total amount of assets was \$97,244,286.

Last year the total amount of mileage owned and operated by this company was 951.21; this year the amount was 1,002.90, of which 945.05 miles are within the State of Pennsylvania.

The equipment of the company this year was as follows: 878 locomotives, 803 passenger cars, 34,189 freight cars, 951 cars devoted to the company's service, making a total of 35,943 cars. Last year the number of cars in service was 34,188.

The number of employes this year was 17,884; last year, 17,746. The amount of compensation paid them this year was \$10,529,795; last year, \$10,049,630.

The total train mileage this year was 17,348,876; last year it was 17,147,118. Of the train mileage this year, 15,866,496 miles were

run by passenger trains, and 11,134,349 by freight trains, and 348,029 by mixed trains.

The number of passengers carried this year was 22,697,295, an equivalent of carrying 284,286,512 passengers one mile; the average distance each passenger was carried was 13 miles. Last year the total number of passengers carried was 21,910,349, an equivalent of carrying 275,418,845 persons one mile.

The total passenger revenue this year was \$4,561,393; last year it was \$4,437,850. This year the average amount received from each passenger was 20.097 cents; the average receipts per passenger per mile, 1.605 cents; the passenger earnings per train mile, 77.753 cents; the passenger earnings per mile of road, \$5,019.83.

The total number of tons of freight transported during the year were 30,077,465; this reduced to a single mile basis is equivalent to carrying 2,729,971,226 tons one mile, and an average haul of one ton 91 miles.

Last year the total number of tons carried was 29,404,893, an equivalent of carrying 2,648,336,764 tons one mile, and an average haul of one ton 90 miles.

The tonnage of freight for the year covered by this report is classified as follows: 1,919,090 tons, the products of agriculture; 387,196 tons, the products of animals; 19,722,193 tons, the products of mines; 989,373 tons, the products of forests; 3,890,362 tons, the products of manufactories; 1,891,005 tons of merchandise; and 1,278,246 tons of miscellaneous shipments.

The total freight revenue for this year was \$22,470,735; last year the total freight revenue was \$21,121,805. The average amount received for each ton of freight this year was 74.710 cents; the average receipts per ton per mile, .823; the freight earnings per train mile, \$1.95698, and the freight earnings per mile of road, \$22,405.76. Last year the freight earnings per mile of road were \$22,205.20.

The total passenger revenue and earnings this year were \$5,034,388; freight revenue and earnings, \$22,470,735; other earnings from operation, \$147,308; total earnings from operation, \$27,652,431; the income from other sources, \$726,748, making the total earnings and income, \$28,379,179. Last year the total earnings and income were \$26,924,157.

The operating expenses of the Philadelphia and Reading this year were \$15,742,920; last year, \$14,534,065. The expenses this year are classified as follows: Maintenance of way and structure, \$2,602,166; maintenance of equipment, \$3,475,569; conducting transportation, \$8,646,621; general expenses, \$1,018,564. The operating expenses for the year were 56.93 per cent. of the receipts from operation. This small percentage is the significant feature of the report of the Philadelphia and Reading this year, there being but

one other of the greater railway corporations reporting to this office whose percentage is so small. This company is the Central Railroad Company of New Jersey, which is practically under the same management as the Philadelphia and Reading.

In addition to the expenses from operation, other expenses were incurred during the year amounting to \$12,069,638, making a total of operating and other expenses of \$27,812,558; last year, this amount was \$26,178,847. There were no dividends paid during the year, but a surplus is shown of \$566,621. Last year the surplus was \$745,309.

In the way of accidents this year, 16 passengers have been killed and 215 injured; last year there were 3 killed and 40 injured. This exhibits an unfortunate result of the year's operations with regard to accidents among passengers. Of employes, there were 65 killed this year and 642 injured; last year, 55 killed and 582 injured; of other persons there were killed this year 138 and injured 161; last year 137 killed and 155 injured. The total number of killed this year was 219, and of injured 1,018; last year the total number killed was 195 and injured 777.

Philadelphia, Wilmington and Baltimore.

This road is a part of the Pennsylvania system, but makes separate operating reports. For the year ending June 30, 1901, its total capitalization was \$22,034,839, classified as follows: Capital stock, \$11,819,350; total amount of funded debt outstanding, \$4,930,000; other forms of indebtedness, including current liabilities, \$5,285,489. Last year the total railway capitalization of this company was \$20,708,902.

The total assets as reported this year were \$26,809,273; last year the total amount of assets was \$25,290,940. The assets this year embrace \$15,871,428, cost of road and equipment; \$5,423,592, stocks and bonds owned; \$4,093,696, cash and current assets, and \$1,420,577, other assets.

The mileage reported for this year was 703.89, 109.72 miles of which are within the State. Last year the total mileage was 670.46.

The equipment this year consisted of 229 locomotives; last year the number was 225; this year 391 cars in passenger service, 3,903 in freight service and 584 in the company's service, making a total of 4,878 cars. Last year the total was 4,874.

On its pay rolls this year the company had 7,767 persons, to whom there was paid \$4,209,996; last year the number of employes was 7,397, and the amount paid them \$4,188,206.

The total train mileage was 7,308,106. The miles run by passenger trains were 4,785,645; by freight trains, 2,522,461. There are but few

railroad companies whose passenger train mileage exceeds the freight train mileage, and it must be assumed, therefore, that this road is conspicuously a passenger road.

The number of passengers carried during the year was 9,309,780, an equivalent of carrying 246,947,496 passengers one mile, the average distance of the haul of a passenger being 27 miles. Last year the number of passengers carried was 8,933,984, an equivalent of carrying 234,491,635 persons one mile, the average haul of a passenger being 26 miles.

This year the total passenger revenue was \$4,949,451; last year it was \$4,690,743. This year the average amount received per passenger was 53.164 cents; the average receipts per passenger per mile, 2.004 cents; the passenger earnings per train mile, \$1.21864; the passenger earnings per mile of road, \$8,285.34. Last year the passenger earnings per mile of road were \$8,261.86.

The total number of tons of freight carried this year was 9,536,629, an equivalent of carrying 496,603,039 tons one mile, the average haul per ton being 52 miles. Last year the total number of tons carried was 9,222,085, an equivalent of 480,209,563 tons carried one mile.

The freight carried this year was classified as follows: 1,902,405 tons, the products of agriculture; 420,341 tons, the products of animals; 3,949,640 tons, the products of mines; 1,210,200 tons, the products of forests; 2,568,271 tons, the products of manufactories; 62,852 tons of merchandise; 232,920 tons of miscellaneous shipments.

The total freight revenue for the year was \$5,622,561; the average amount received for each ton of freight being 58.958 cents; the average receipts per ton per mile 1.132 cents; the freight earnings per train mile, \$2.229; the freight earnings per mile of road, \$7,987.84; last year the freight earnings per mile of road were \$7,964.08.

The passenger revenue and earnings this year were \$5,831,971; freight earnings and revenue, \$5,622,560; other earnings from operation, \$197,913; total earnings from operation, \$11,652,444; income from other sources, including interest on bonds and dividends on stock, etc., \$601,228, making a total earnings and income of \$12,253,672.

The annual expenses of this corporation have been as follows: For maintenance of way and structure, \$1,823,948; for maintenance of equipment, \$1,383,406; for conducting transportation, \$4,512,627; for general expenses, \$248,486, or a total of operating expenses of \$7,968,467. Last year this expense amounted to \$7,683,795. The expense of operation this year was 68.38 per cent. of the receipts from operation.

In addition to the expenses for operation, there were other ex-

penses incurred amounting to \$3,241,357, making the total expenditure \$11,209,824. Last year the amount so expended was \$10,301,088.

The company this year paid dividends amounting to \$827,355, and had left a surplus of \$216,494.

This year there were 4 passengers killed and 113 injured; last year 2 killed and 63 injured. This year 14 employes were killed and 95 injured; last year, 20 killed and 126 injured. Of other persons this year 72 were killed and 118 injured; last year, 60 killed and 115 injured. The total number killed this year was 90 and 326 injured; last year, 82 killed and 304 injured.

Pittsburg, Cincinnati, Chicago and St. Louis.

This railroad also belongs to the Pennsylvania system, although its operating report is made independent of either the Pennsylvania Company or the Pennsylvania Railroad Company.

It has a capitalization of \$101,661,038; last year, its capitalization was \$102,037,057. The total capitalization is classified as follows: Amount of stock outstanding, \$48,017,165; bonded indebtedness outstanding, \$49,942,234; other forms of indebtedness, \$3,701,639.

In the way of assets the company reports cost of road and equipment, \$94,352,687; stocks and bonds owned, \$1,883,698; cash and current assets, \$3,158,626; other assets, \$6,887,035; total assets, \$106,282,046.

The mileage of this company was 1,407.36, only 70.72 miles of which are within the limits of the State. The total mileage of this company this year is the same as reported for last year.

In the way of equipment, this company has 504 locomotives, 420 passenger cars, 13,710 freight cars and 350 cars in the company's service, making a total of 14,480 cars.

It has employed 14,857 persons, to whom it paid a compensation of \$8,667,761. Last year the number of employes was 15,255, and the compensation paid \$8,813,658.

The train mileage for the year was 14,013,849; last year it was 14,616,959. The passenger train mileage this year was 5,563,880; freight train, 8,449,969.

The number of passengers carried was 8,214,497, an equivalent of carrying 243,415,833 passengers one mile, an average haul per passenger of 30 miles. Last year the number of passengers carried was 8,248,106, an equivalent of carrying 242,430,246 passengers one mile, an average haul of a passenger 29 miles.

The total passenger revenue this year was \$4,948,491; the average amount received from each passenger 60.241 cents; the average receipts per passenger per mile, 2.033 cents; the passenger earnings

per train mile \$1.20128, and the passenger earnings per mile of road, \$4,749.18. The passenger earnings per mile of road last year were \$4,730.29.

The total tonnage of this road this year was 23,007,187, an equivalent of carrying 2,534,029,958 tons one mile, an average haul per ton of 110 miles. Last year the total tonnage was 22,844,241, an equivalent of carrying 2,636,022,572 tons one mile, and the average haul per ton was 115 miles.

The classification of freight carried this year is as follows: Products of agriculture, 2,241,185 tons; products of animals, 811,367 tons; products of mines, 10,874,888 tons; products of forests, 1,636,736 tons; products of manufactories, 6,063,654 tons; merchandise, 181,897 tons, and miscellaneous shipments, 1,197,460 tons.

The total freight revenue for the year was \$15,636,650; the average amount received for each ton of freight, 67.964 cents; the average receipts per ton per mile, .617 of a cent; the freight earnings per train mile, \$1.88333; the freight earnings per mile of road, \$11,307.73.

The passenger revenue and earnings this year were \$6,683,801; freight revenue and earnings, \$15,914,053; other earnings from operation, \$244,478; total earnings from operation, \$22,842,332; income from other sources, including interest on bonds, dividends on stock, rentals, etc., \$107,976, making the total earnings and income \$22,950,308. Last year the total earnings and income were \$22,766,533.

From the receipts from operation during the year, expenses were paid as follows: For maintenance of way and structure, \$2,970,361; for maintenance of equipment, \$4,141,209; for conducting transportation, \$8,208,208; for general expenses, \$402,745; total operating expenses, \$15,722,523. Last year these expenses amounted to \$15,598,724. The operating expenses for this year were 68.83 per cent. of the total receipts from operation.

In addition to these expenses for operation, there were also paid out \$5,168,412, making a grand total of expenditures, exclusive of the amount paid for dividends, of \$20,890,935. Last year this amount was \$21,367,896. This year the company paid dividends to the amount of \$907,670, and had a surplus after the payment of these dividends of \$1,151,703. Last year the company paid as dividends \$793,998, and had a surplus of \$604,639.

In conducting the business for the year the fatal casualties among passengers were 4, the non-fatal, 48. Last year the number of passengers killed was 1 and injured 96. Of employes this year 53 were killed and 1,441 injured; last year, 44 killed and 1,365 injured. This year, other persons killed were 105 and injured 130; last year, 74 killed and 137 injured. The total number killed this year was 162 and injured 1,619; last year, 119 killed and 1,598 injured.

GENERAL DEDUCTIONS.

In considering the liabilities, the assets, the mileage, the tonnage, and the other important features of the railroads whose reports are embraced within this publication, it is important to remember that the data given includes lines of railway beyond the limits of Pennsylvania, for under the laws of this Commonwealth all railroads whose lines are in whole or in part within the limits of Pennsylvania, are required to make annual reports to this office. It is impossible for railroads to so adjust their accounts as to determine what part of the total amount of wages paid to employes is properly chargeable to services rendered entirely within this State, and this is true of many other disbursements that are made in constructing, maintaining and operating railroads.

This office collects data to show the amount of mileage and trackage entirely within the limits of the State and that outside of the State, but makes no effort to divide accounts showing receipts and expenditures with reference to Pennsylvania alone. The necessity exists for considering the whole system of each railroad, whether the same be wholly within or partly within and partly outside the State.

Liabilities.

The total railway capital or liabilities of railroad companies is made up of the amount of capital stock outstanding, the amount of funded indebtedness outstanding and of other forms of indebtedness, including current liabilities.

For the year covered by this report, the total amount of steam railway capitalization on the railways reporting to this office was \$3,086,690,205. This railway capitalization is classified as follows: Total amount of capital stock outstanding, \$1,413,433,325; amount of funded debt outstanding, \$1,380,747,413; amount of other forms of indebtedness, including current liabilities, \$292,509,467.

Last year the amount of capital stock outstanding was \$1,357,441,338; of funded indebtedness, \$1,308,360,220; of other forms of indebtedness, including current liabilities, \$299,276,374, and the total railway capitalization, \$2,965,077,932.

The amount of capital outstanding for all the lines of the United States for this year was \$11,491,034,960. Of this amount, \$5,845,579,593 was the amount of stock outstanding; \$5,654,455,367 the

amount of funded indebtedness; the entire amount of current liabilities, being the liabilities of railway corporations beyond the capital stock outstanding and the funded indebtedness, \$594,787,870. From these figures it will be seen that the railroad corporations whose annual reports are filed in this Department represent nearly one-third of the entire railway capitalization of the United States.

Assets.

The assets of railway corporations, according to the classification made by the Inter-State Commerce Commission and adopted by most of the State in the Union, are divided as follows: Cost of roads owned, cost of equipment owned, stocks and bonds owned, cash and current assets, other assets, and total assets.

A compilation of the assets of the steam railways whose reports were filed this year shows the total amount of assets to be \$3,200,353,755; of this amount, \$2,029,869,407 represent the cost of roads owned; \$266,929,003, the cost of equipment owned; \$549,883,909, stocks and bonds owned; \$156,086,231 cash and current assets, and \$197,585,205 other assets.

Last year the total amount of assets was \$3,067,955,557; of this amount \$1,968,330,588 represented total cost of roads owned; \$258,760,695, total cost of equipment owned; \$501,201,108, stocks and bonds owned; \$149,315,869, cash and current assets; \$190,347,297, other assets.

Mileage.

In Table D is found a tabulation of railway mileage of roads reporting to this office. It is classified as follows: (1) with reference to line represented by capital stock, (a) main line, (b) branches and spurs; (2) line of proprietary companies; (3) line operated under lease; (4) line operated under contract; (5) line operated under trackage rights; (6) total mileage operated; (7) total number of miles operated in Pennsylvania; (8) miles of new line constructed during the year; (9) aggregate length of all tracks, including yard tracks, sidings and spurs.

The total mileage operated by all these corporations was 26,975.86; of this amount, 10,697.68 miles are within the limits of Pennsylvania. The miles of new line constructed during the year were 101.67; the aggregate of all tracks, including yard tracks, sidings, spurs, etc., was 50,464.87 miles.

The mileage of all lines in the United States, according to the most recent data collected is 193,345.78. Illinois seems to be still in the lead in mileage, closely followed by Pennsylvania.

Equipment.

On the entire railway system of the United States for the previous year there were 37,633 locomotives; of these locomotives 9,863 were passenger locomotives, 25,596 freight locomotives, 5,621 switching locomotives and 583 were not classified. The total number of cars of all classes in the service of the railways for the same year was 1,450,838; 34,713 of these being assigned to passenger service; 1,365,531 to freight service, and 50,594 devoted entirely to the service of the railways. This number of cars does not include those used upon the lines of railways that are owned by individuals, firms or corporations.

For the year ending June 30, 1901, the railroads reporting to this office show the number of locomotives of all classes to be 12,133; the number of passenger cars 10,930; the number of cars in freight service 537,409; the number of cars devoted to the service of the railroads alone 16,687, making the total number of cars in service 565,026.

These figures when put in comparison with those which relate to railway equipment in the United States, show clearly the magnitude of those railway corporations reporting to this office and the public service they render.

Comparing the figures which relate to railway equipment for this year with those relating to the same subject for the year 1900, we find that on the 30th of June, 1900, there were 11,747 locomotives; 10,709 passenger cars; 512,048 cars in freight service, and 15,237 cars in the company's service, making the total number of cars 537,994.

These figures indicate clearly that the railway interests of this State are not on the decline, and they also show the increase in the commodities transported, which has made necessary the increase in the number of locomotives and passenger and freight cars, in order to meet the public demand for transportation.

Employees.

On the 30th of June, 1900, there were employed in the United States 1,017,653 persons to manage and conduct the affairs of railways, being an increase over the year ending June 30, 1899, of 88,729.

On the railroads reporting to this office this year the total number of employees was 335,865; last year the number was 307,737, or an increase during the year of 28,128. The total amount of compensation paid this year was \$189,204,533; last year the amount paid was \$176,762,468. These figures show over 9 per cent. of increase in the number of employees and over 7 per cent. of increase in the compensation paid.

Number of Passengers Carried.

During the year covered by this report there were carried by the railways in whole or in part within the limits of Pennsylvania 216,603,748 passengers. The number carried one mile was 5,237,096,903.

Last year the number of passengers carried was 205,939,884, and the number carried one mile was 4,452,754,915, or a percentage of increase of over 5 per cent. in the number of passengers carried and of over 17 per cent. in the number carried one mile.

Total Passenger Revenue.

The total passenger revenue this year was \$97,000,114; last year it was \$89,336,051, an increase of \$7,664,063 or about 8 per cent. This year the average receipts per passenger per mile were 1.852 cents; last year this amount was 2.006 cents.

Kinds of Freight and Number of Tons Carried.

This year the total number of tons of freight classified as products of agriculture was 40,530,481; last year the number was 38,674,558. Products of animals this year 10,968,587; last year 10,614,300; products of mines this year, 289,698,090; last year, 295,544,022; products of forests this year, 23,960,413; last year, 24,471,244; products of manufactories this year, 77,849,374; last year, 75,694,847. This number of tons classified as merchandise this year was 12,973,938; last year, 13,173,144; as miscellaneous shipments this year, 22,703,800; last year, 20,823,223. The total tonnage of all classifications carried this year was 478,684,683; last year the total tonnage was 478,995,338. The number of tons of freight carried one mile this year was 58,164,762,738; last year, 56,727,167,903.

Total Freight Revenue.

This year the total freight revenue was \$353,976,487; last year it was \$330,184,126. These figures indicate clearly that the rate per ton per mile has somewhat advanced over the prevailing rate for last year, and a computation made shows that the prevailing rate per ton per mile last year was .582 of a cent, while this year it was .608 of a cent.

Earnings and Income.

To the figures before given showing passenger and freight revenue, there must be added, to show the total amount of passenger revenue

and earnings and the total freight revenue and earnings, such amounts as these common carriers have received in the way of transportation of mail, express, etc.

Last year the total passenger revenue and earnings were \$109,757,426; this year the total amount was \$118,878,848, being an increase of \$9,121,422, or over 8 per cent.

The total freight revenue and earnings last year were \$331,013,955; this year, \$354,550,223; an increase of \$23,536,268, or over 7 per cent.

Of other earnings from operation last year the amount was \$8,410,746; this year \$8,326,411. The total earnings from operation last year were \$449,182,127; this year \$481,755,482, being an increase of \$32,573,355, or over 7 per cent.

In addition to the income from operation, as above indicated, there was received this year as an income from interest on bonds, and dividends on stocks, rentals, etc., \$52,459,145; last year this amount was \$48,830,366, an increase of \$3,628,779, or over 7 per cent.

Combining these figures, we find that there was received by the railroads reporting to this office this year a total of \$534,214,627; last year the total amount received from all sources was \$498,012,493, an increase for the year of \$36,202,134, or more than 7 per cent.

Expenses from Operation, Etc.

Railway expenses of operation are classified as follows: (1) Maintenance of ways and structures; (2) Maintenance of equipment; (3) Conducting transportation; (4) General expenses; (5) Total operating expenses; (6) Other expenses as per deductions from income; (7) Total expenditures for the year; (8) Total amount of dividends paid during the year.

This year the total amount expended for maintenance of ways and structures was \$62,169,364; last year the amount was \$55,482,772; for maintenance of equipment this year, \$67,209,708; last year, \$63,244,225; for conducting transportation this year \$174,790,342, last year, \$163,848,878; for general expenses this year, \$11,142,493, last year \$10,212,202; the total operating expenses this year, \$315,311,907; last year, \$292,788,077; other expenses as per deductions from income this year, \$151,847,265; last year, \$136,049,822; the total expenditures for all purposes, \$467,159,172; last year, \$428,837,899.

It is understood that under this caption are included all expenditures for operation, rentals paid for lease of roads, and all other moneys paid out except dividends.

The amount of dividends paid for this year was \$38,610,816, last year, \$37,013,306.

Surplus and Dividends for the Year.

The total amount of surplus, this year, after the payment of dividends for all the companies having a surplus, was \$29,089,267. To show the net surplus after the payment of dividends, there should, however, be subtracted the total amount of deficit for the year, \$2,637,678, which leaves a net surplus of \$26,451,589.

Some comparisons may be made with the earnings and expenses of railways in the United States. For the year ending June 30, 1900, the gross earnings were \$1,487,044,814, which was an increase of \$173,434,696 over the earnings for the previous year upon all the railroads of the United States.

For the year ending June 30, 1900, the operating expenses on the railways of the United States were \$961,428,511, being an increase over such expenses for the previous year of \$104,459,512.

Railway Accidents.

A general classification is made of accidents upon the steam railways, as follows: Accidents to passengers, divided as to number killed and injured; accidents to employes, divided as to number killed and injured; accidents to other persons than passengers and employes, divided as to number killed and injured, and total number killed and injured.

Of the passengers carried during the year there were 86 killed and 1,780 injured; of employes there were 987 killed and 15,456 injured; of other persons than passengers and employes, 2,007 killed and 2,601 injured, making the total number killed 3,080 and injured 19,837, or a total of casualties fatal and non-fatal, of 22,917.

Last year on the railroads reporting to this office there were 40 passengers killed and 1,198 injured; 914 employes killed and 15,166 injured; 1,682 other persons killed and 2,357 injured; the total number of killed last year was 2,636 and injured 18,721; the total of casualties was 21,357.

A study of these figures indicates clearly that there has been a marked increase in the number of passengers killed and injured, while the increase among employes and other persons is not so marked. The percentage of the increase of casualties both fatal and non-fatal, is about 7 per cent.

Considering the increase in the number of passengers carried and the increase in the number of employes, there is nothing in these figures to indicate that there has been a percentage of increase in the hazard incident to railway operation. It is true, however, that there is a marked increase in the number of fatal accidents among passen-

gers, but no safe calculation can be made as to the percentage of increase. It would be unfair to the railroads if we were to make a calculation showing the percentages of increase in the number of passengers killed. It would also be unfair to arrive at a percentage of decrease in case there had been a marked falling off in fatal accidents among passengers.

This is apparent from the fact that one single accident, and that perhaps an inevitable accident, or occurring without the fault being chargeable to anyone, might so change the percentage as to reflect unfavorably upon railway management, or in case of the reduction of the number of passengers killed, undue credit might be given to the managers of railways, or perhaps it would be more proper to say, to those who have the immediate custody of the hauling of passenger trains, such as the dispatcher or the engineer and conductors.

DEDUCTIONS FROM REPORTS OF STREET RAILWAYS.

Since the introduction of electricity as the motive power in the operation of street railways, new conditions have appeared, for it is but a few years since street railways were comparatively a small factor in the financial affairs of the State. Now they have grown to prodigious dimensions, involving financial transactions of millions, where but a few years ago thousands were involved. In the rapidity of the change, the wonderful transition from the old conditions surrounding street railways, there is much food for thought.

From the report of this Bureau for the year 1887, the year when the present superintendent first assumed the duties of his office, a compendium of the capitalization, operation and business of street railway companies at that time is found to be as follows: Capital stock outstanding \$17,911,680; funded and unfunded indebtedness, \$7,677,131; cost of road and equipment, \$12,326,068; length of road, 519.85 miles, and horses employed, 10,923. These horses furnished the power that moved the cars on all the street car lines of the Commonwealth. Practically none are employed in such service to-day.

The number of passengers carried in 1887 was 184,835,994; the total expense of maintenance and operation of the street car lines in the State was \$5,646,606; the total receipts from all sources were \$10,025,905.65.

In the way of accidents, there were 4 passengers killed and 17 injured; 3 employes injured; 8 other persons killed and 42 injured; the total number killed was 11, injured 63.

Bearing in mind these figures as to the condition of railroads in 1887 and the incidents of operation then occurring, and the exhibits as disclosed by our reports this year from the street railways now in operation in Pennsylvania, a marked contrast is found.

Now the capital stock outstanding is \$108,676,774; the funded debt outstanding \$44,998,055; current liabilities, \$14,028,799; total capitalization and current liabilities, \$167,703,628.

As before seen, the cost of road and equipment for 1887 was \$12,326,068, now the cost of road is \$84,192,336 and the cost of equipment, \$10,423,910. In addition to this the companies now own stocks to the amount of \$54,045,372, and bonds to the amount of \$689,000; their current assets amount to \$10,922,931; other assets, \$10,008,050, making the total amount of assets \$170,281,600. Truly, these figures indicate that prodigious strides have been made in the advancement of street railway enterprises since the introduction of electricity as a motive power.

As seen above, the total receipts in 1887 were \$10,025,905.65. This year the total earnings from operation were \$26,424,396; income from other sources \$973,747, or a total income of \$27,398,143.

In 1887 the total disbursements were \$5,646,606; this year there were paid out for operating expenses \$13,111,492, for taxes, \$1,676,746, interest on funded indebtedness, \$2,342,553, rentals, \$6,473,729, other expenses, \$931,828. To this may be added dividends paid, \$1,506,289, making a total of \$26,042,617.

In 1887 the length of all roads was 519.85 miles. Now the length of single track and branches operated is 1,768.90 miles, with a total length of all tracks of 2,167.91 miles.

In 1887 the number of passengers carried was 184,835,994; this year the number was 580,654,629.

Such comparisons may be made with every feature of street railway construction, maintenance and operation, business done, capitalization, indebtedness, etc., as they existed, comparatively, but a short time ago, and it will also be found that about as wonderful a change has taken place in all of the industrial and material interests of the Commonwealth.

Such a comparison of the capitalization and indebtedness for this year with that of last year shows marked changes. This year the capital stock outstanding was \$108,676,774; last year, \$103,176,121. The funded indebtedness this year was \$44,998,055; last year, \$38,975,100; the total capitalization and current liabilities this year were \$167,703,628; last year, \$153,736,225.

Under the head of assets this year the cost of road was reported to be \$84,192,336, while last year it was reported as \$87,806,026. These figures indicate something wrong, but an examination of the report of the Union Traction Company of Pittsburg shows that in last year's report they included in cost of road, a portion of the bonds which they owned, making their total of cost of road and equipment several millions beyond what the facts warrant. Under the head of assets is

also reported \$10,423,910 as cost of equipment; last year the amount was \$12,334,380. This discrepancy is accounted for by the fact that one or more large corporations divided the costs of road and equipment last year, while this year they were both included under cost of road. Last year the amount of stocks owned was \$33,865,849; this year \$54,045,372; last year there was an ownership of bonds of \$1,330,500; this year, \$689,001; last year the amount of cash and current assets was reported as \$12,014,131; this year, \$10,922,931; other assets last year amounted to \$9,017,579; this year, \$10,008,050, while the total assets last year were represented as being \$156,368,465, and this year, \$170,281,600.

In the way of income last year, there was received from operations \$23,883,508; this year, \$26,424,396; income from other sources last year \$593,673; this year, \$973,747; total income last year, \$24,477,181; this year, \$27,398,143.

Under the head of disbursements last year there were paid out for operating expenses, \$12,114,609; for taxes, \$1,579,284; for interest on funded debt, \$2,496,704; for rentals, \$5,954,232; for other expenses, \$398,326; for dividends, \$1,433,157, or a total of \$23,976,312. This year the operating expenses were \$13,111,472; taxes, \$1,676,746; interest, \$2,331,753; rentals, \$6,473,729; other expenses, \$938,170; dividends, \$1,506,289, making a total of \$26,038,159.

The mileage during the year has increased something over 100 miles, there being 1,653.86 miles last year and 1,768.90 miles this year.

The total number of cars owned last year was 6,395; this year 6,618.

The total number of employes last year was 14,798; this year, 15,828. The total compensation paid to those employes last year was \$8,043,589; this year, \$8,745,024.

Last year the total number of passengers carried was 538,194,532; this year it was 580,654,629.

While the figures above given indicate an increase in capitalization, expenses of maintenance of way, structures and equipment, an increase in the number of passengers carried as well as an increase in receipts from operation and other income, there is perhaps a greater percentage of increase in the number of accidents which have occurred to passengers, employes and other persons incident to the operation of street railways in Pennsylvania for the year ending June 30, 1901.

Last year the number of passengers killed was 28, this year, 33; last year the number of passengers injured was 780, this year, 1,050; last year 6 employes were killed; this year, 14, last year 94 employes were injured, this year, 129. The significant feature of these figures showing casualties among passengers and employes is the comparatively great number of passengers killed and injured. On the steam railways there seems to be a greater percentage of hazard to employes,

for, considering the number carried, there are comparatively but few passengers killed and injured. With street railways the conditions are entirely different. There seems to be greater freedom from accident among the street railway employes than among the steam railway employes.

Of persons other than passengers and employes, last year there were 107 killed, this year, 111; last year, 567 injured; this year, 598; last year the total number killed was 141; injured, 1,441; making a total of casualties of 1,582; this year the total number killed was 158; injured, 1,777; or a total of killed and injured of 1,935.

The information acquired on the blanks furnished street railway companies for annual reports, does not disclose the number of passengers, employes and other persons killed or injured at grade crossings, but every person who has given thought to this subject will be convinced that the grade crossing has been a prolific cause of death, especially to passengers on street car lines. Probably it is safe to say that a large majority of passengers who have been killed on street car lines of this State have been killed at grade crossings.

The Legislature at its last session passed a law which may, to some extent, at least, prevent grade crossings between steam and street railways in future construction, but no radical means are yet provided by which they can be eliminated where they now exist.

Without desiring to criticize any street railway management in the State as to the manner of operating its lines, it is but fair to say that there is some recklessness exhibited in the way street cars are run. In some places, where there are steep grades, the cars are allowed to go down them with a velocity almost equal to the fastest time made on the level steam railway lines, and while there have not been very many serious results from such reckless running of street cars, it must be admitted by all that it would be very easy to throw a street car from the track when passing down a steep grade at a great velocity, in case a cobble stone or a piece of iron should be placed upon the track. If a car should be derailed under such circumstances, of course it would be entirely beyond the control of the motorman, and the result would, of necessity be death or injury to most of the passengers on the car.

Every street railway management should prohibit its employes from running its cars down steep grades at a rapid rate, and if any street railway management fails to establish proper regulations in regard to the running of cars under such conditions, it ought to be held guilty of criminal negligence in case an accident should occur. It is just to the patrons of such railway companies, whose lives are temporarily placed in their hands, that the greatest freedom from danger that is possible, should be insured to passengers in transitu.

In some localities there is a glaring recklessness in the running of cars which will certainly bring horrible results sooner or later unless it is brought to an end by rigid regulations, strictly and faithfully enforced. Saying nothing about the loss of life and destruction of limb, which of course are the most important considerations, from a public standpoint at least, it must be remembered that one well loaded car thrown from the track while going down a steep grade, will cause such damage in the loss of life and the maiming of passengers, that the stockholders will be deprived of dividends for some time to come, when, if proper regulations were established and thoroughly and faithfully enforced, such loss of life, such injuries of person, and such destruction of property would not occur.

These comments as to the reckless running of cars are made with the view of calling to the attention of street railway managers these offences of a glaring character on several of the street railways of this Commonwealth, to the end that the evils practiced may be abated and destruction of life and property averted.

AMERICAN RAILWAY ECONOMIES IN CONDUCTING TRANSPORTATION.

Whatever may be said relative to the public service of railways, it has long ago been admitted by all conversant with transportation problems that American railways are in advance of those of other nations in all that is essential to the convenience and comfort of passengers and in the facilities offered to shippers of commodities.

Likewise, there is no disputing the fact that American railway rates of transportation of productions are cheaper by far than those that exist on European railways, or, indeed, on the railways of any other country on the globe, thus making it possible for American manufacturers and producers, at a low rate of transportation, to place in our home markets or to deliver to shipping points on our extensive coasts for exportation, the productions of the country.

It is not often that the American pauses in the whirl of business to determine why such favorable conditions exist in this country; why it is possible to have rates of transportation cheaper in this country, which, when compared with European countries is sparsely settled, the density of the population being much less and the cen-

tralization of business and manufacturing interests less favorable for the common carrier than they are abroad.

More than 60 per cent. of the expense of maintenance and operation of railways is made up of the wages that are paid to employes. This fact in itself gives great emphasis to the statement that of all the items of expense for maintenance and operation of railways, the compensation paid employes is the greatest. If, therefore, American railway employes are paid higher wages for their services than are European employes, it of necessity follows that the ability of our American railways to carry American productions at a less expense must be due to other causes. The comparative capitalization of railways in this country with that of railways in foreign countries cannot be considered in the solution of this problem, for we are not dealing with any part of the railway problem except that which refers to the actual expense or cost to the railways of carrying the different classifications of freight.

For the same reason, cost of road, cost of equipment and cost of their maintenance have no direct relevancy to the problem; therefore, some other economic consideration must be involved.

If the railway pay roll, the capitalization, the fixed charges, the cost of road, the cost of equipment and their maintenance can in no way be looked to for the solving of this problem, then it follows of necessity that we must look for the solution in the range or realm of railway management. From a statement of these facts as they are known to exist, the superiority of American railway management or administration, must be admitted.

Americans in general are looked upon as expensive livers, and many economies practiced among the people of other nations are entirely wanting here. This is found to be true in private life, in public affairs, and exists in no small degree in the conduct of the business affairs of individuals, companies and corporations.

If this be true, then we have a much smaller sphere left for further exploits to find the immediate cause which makes it possible for American railways to carry the productions of this country at a less cost per ton per mile to the railways than can be done elsewhere.

A careful inspection, a thorough investigation of the economical considerations involved in the construction of locomotives with reference to their power, and the construction of cars, particularly with reference to their weight and capacity, will bring to the surface most valuable information on this economic railway question.

The great consideration which has taxed the brains of American railway engineers has had reference to so building locomotives and freight cars that the greatest results would be secured by the expenditure of a given amount of energy. To go into details more fully,

the campaigns being waged for the control of the commerce of the world.

On the London and Northwestern Railroad, of Great Britain, the average expense of carrying one ton of freight a mile was 1.38 cents, while for the year covered by this report the New York Central and Hudson River Railroad carried its freight at an expense to itself of less than one-third what it cost the London and Northwestern. These figures can be relied upon for the reason that the New York Central last year made a considerable margin on its freight business, and yet it received for the carrying of its freight only .575 of a cent per ton per mile.

This data is made more comprehensible by the fact that the average expense of carrying freight on the Erie, the Pennsylvania, the Lake Shore and Michigan Southern, the New York Central and Hudson River, the Pittsburg, Cincinnati, Chicago and St. Louis, and on nearly all the other of the great common carriers of the country, is less than four mills per ton per mile, while on the London and Northwestern the average rate per ton per mile is over thirteen mills.

It is plainly to be seen, therefore, that if the average rate on the American railways were thirteen mills per ton per mile for the shipment of commodities to the seaport, our producers would be driven from foreign markets. How important, therefore, is the maintenance of this low cost of transportation not only to the American producer, but also to the great business interests of the United States.

To the skill, the energy, the pluck, the indomitable courage, the restless and resistless perseverance of those in the administration of American railways are due the possibilities through which American machinery and American productions in general are on the way to the remotest corners of the earth.

On those railways whose expenses of transportation are unreasonably high, there exists, therefore, a great embargo on commerce. This high expense of transportation may be due to bad management in operation, to the kind of locomotives used, to the capacity of cars, and to a thousand other considerations incident to railway construction, maintenance and operation.

If 1,000 tons of freight are to be carried from Chicago to New York, that company which can carry this tonnage at the least expense to itself is in the position to render not only the best returns to the stockholders but to best conserve American commerce and advance it in the struggle made for a fair share of the commerce of other nations.

Our American railways, though paying higher wages to their engineers, firemen, conductors, trainmen, switchmen and other em-

our American locomotives in some directions may not be superior to those of foreign build, but they are so constructed that the steam produced by the burning of a ton of coal will secure the best possible results.

A locomotive has the power to haul a certain amount of tonnage a given distance with the consumption of, say, one ton of coal. The greater proportion of that tonnage is made up of freight, or of articles which make up the commerce of the nation, and the less tonnage there is in the weight of the cars hauled, the better the results are, not only for the stockholders but for the shipper, for the reason that the greater the quantity of the productions that can be carried with the expenditure of a given amount of energy, the cheaper it will be possible for the common carrier to transport any and all kinds of commodities.

It is believed that on American railways the very highest consideration has been given to the construction of cars to avoid the haul of unnecessary dead weight. The cars are so constructed that they shall have the necessary strength, but shall have a greater tonnage of productions to the weight of the cars, than is found, at least, on the railways of Great Britain. This seems to be an admitted fact, and to this is largely attributed the superiority of American railways, which enables the common carrier in this country to carry all kinds of shipments at a less expense to itself than they can be carried upon railways whose locomotives and whose cars are not constructed under such favorable conditions.

It is believed that there is thus discovered the secret of that wonderful success which has characterized railway operations in the United States. Without the application of this superior talent there is not a trunk line in the country that could have survived through the decade just closed, and all these great lines of railways would have been, as many were, in the hands of the sequestrator during this period.

This inventive power, this expenditure of energy, which has produced the almost incomprehensible results, is found not only in railway operations but also enters into the different American enterprises which of late have enabled Americans to enter into successful and direct competition with their productions in all the markets of the world. If freight rates were as high here as they are in Europe, the Chicago manufacturer, the western producer, could in no way place his productions in the European markets in competition with those articles of commerce there produced.

That our railways are able, therefore, to carry American products to the points from which they are exported at an extremely low figure, enables the American producer to secure a foothold in

ployes than are paid by European railways, can convey these 1,000 tons of freight the required distance at about half the actual expense to themselves that it would cost European railways to perform the same service.

The superiority of American railways may be emphasized when it is considered that no standard article of commerce, for thirty years, has suffered such a reduction in cost of production as has the cost of transportation, or the rate per ton per mile received for the transportation of commodities.

Such conditions cannot be found on European railways. Thirty years ago the New York Central and Hudson River Railway Company received 1.88 cents per ton per mile for the transportation of its freight; now, as before indicated, it receives .575 of a cent. Similar reductions in receipts per ton per mile and cost per ton per mile, are found on other trunk lines in the United States, but there has been no particular change on European roads in this direction during the three decades of railway development and advancement.

A very pertinent publication was recently made in the New York Tribune, showing the superiority of American railway management and operations over those of Great Britain. The authority given is of such a character as to induce belief in the correctness of the statements given, although in some particulars they are so startling as to make us wonder that such a condition, particularly as to the weight and capacity of freight cars, should be tolerated by any European railway in this era when railway engineering skill has reached so high a degree of proficiency:

"The London and Northwestern freight rate in 1900 was 2.34 cents a ton a mile, or over three times that of the New York Central. Nor is the lower American rate due to cheap labor. The average wage paid by the New York Central, according to Colonel Jeffords, is double that paid by the London and Northwestern. Moreover, the English roads cost more to build than the American, and with their better roadbeds they should be able to handle traffic at less expense, yet with all their outlay for equipment and their low wages they are hopelessly outclassed. A fair specimen of their wasteful management is seen in the character of their freight cars. They weigh about eight tons each, and carry a load not to exceed two tons. The average American freight car weighs twelve tons and carries a load of eighteen tons. So, for every ton of paying freight the English road carries it draws four tons of dead weight, while the American only draws two-thirds of a ton of dead weight. No wonder the cost of carrying freight is high when every locomotive is thus handicapped. It is easy to understand why, at a charge of 2.34 cents a ton a mile for freight, and 1.76 cents a mile a passenger, each locomotive of the London and Northwestern earns

only \$22,500 a year, while with a charge of 0.54 cent for freight and 1.98 cents for passengers each Pennsylvania locomotive earns \$48,500 a year. Naturally, our locomotives, adapted to do twice as much work as the English are found to use more fuel and oil than the latter when put to work on English trains. The London and North-western's total tonnage of freight last year was 44,229,850. To carry that traffic it drew over its road 221,149,250 tons, or 176,919,400 tons of dead weight, while the American would have moved the same amount of freight with a carriage of only 29,486,566 tons of dead weight, thus saving the expense of hauling 147,432,834 tons, besides the wear and tear of that unnecessary burden on engines and track. The cost of moving dead weight must, of course, be paid by the shipper of freight, and, consequently, English commerce is handicapped by a railway management which persists in following cumbersome, expensive and antiquated methods."

THE AMERICAN RAILWAY LOCOMOTIVE.

At the World's Fair, in Chicago, in 1892 and 1893, exhibits were made by all the leading locomotive manufacturers in the United States, Germany, Great Britain, France and Canada, and never in the history of railway development has there been such a diversified exhibit of locomotives as was found there.

From the very earliest, crudely constructed locomotives to those of the highest and most improved type then in existence, there was a most satisfactory display, and there was, therefore, furnished to the railway engineer and to the inventor the finest possible exhibit of engineering skill in the production of these wonderful machines of commerce.

It was then thought that the par excellence, the very highest type of development possible had been reached, but, like everything else in this world of progress and advancement, the high types of locomotives exhibited at the World's Fair in 1892 and 1893 have been greatly surpassed by those which have since been constructed and introduced on the leading railways of the country.

This was apparent to those who visited the Pan-American Exposition at Buffalo. While the exhibits of locomotives there were entirely of American manufacture, yet to those whose judgment may be safely depended upon, it was evident that there has been a material advance in all that goes to make up a complete railway loco-

BALDWIN LOCOMOTIVE WORKS.

The locomotive here represented was built by the Baldwin Locomotive Works for the Illinois Central Railroad. The boiler and tender are of special construction, embodying the inventions of Cornelius Vanderbilt, M. E.

VANDERBILT BOILER.

The firebox is cylindrical in form, with annular corrugations, after the form of the well-known Fox furnaces, as used in marine practice. It is suspended within the cylindrical shell of the boiler with its axis eccentric to that of the boiler, in order to allow suitable steam space above the crown. The principal point of suspension is at the rear where it is riveted to the back head of the boiler; it is also supported at the bottom by the reinforcing rings around the openings provided for cleaning the furnace;—otherwise the firebox is entirely disconnected from the outer shell.

By this construction all the flat surfaces ordinarily encountered in a locomotive boiler, are eliminated, and the use of staybolts and crown bars, necessary to such flat surfaces, is entirely avoided.

SECRET

motive, in the less than ten years that have intervened since the World's Fair.

This advancement has been directed more particularly to the utility of the locomotive. The engineer has devoted his utmost skill to the application of those elements of engineering which would lead to the construction of a locomotive that would produce the best results in the velocity required to haul a passenger train or in the expenditure of power essential to hauling heavy trains of freight.

As appears in another article in this report, American railways have excelled all others in the ingenuity which has been applied to so constructing locomotives and railway equipments as to enable railway management to obtain the best possible effects that the scientific engineering mind can produce.

The type of locomotive has very largely changed in the last ten years. There is a marked disparity in the appearance of a passenger locomotive and a freight locomotive. Their construction is entirely different in many ways. This has been found necessary in order that the purposes for which each was constructed should be met in the most satisfactory manner. It would be ridiculous now to attempt to haul a passenger train with great velocity through the country with the most modern type of freight locomotive, and of course the converse of this proposition is true.

There was very little at the Pan-American Exposition that excited more interest in those directly or indirectly interested in engineering matters than the exhibits of locomotives by the Baldwin, the Brooks and the Richmond locomotive manufacturing establishments.

The Baldwin Locomotive Works exhibited locomotive No. 1211, of the Lehigh Valley, a cut and description of which is submitted:

Another product of the Baldwin Locomotive Works is locomotive No. 64, in the same exhibit, built for the Illinois Central Railway Company, a cut and brief description of which is submitted.

The Brooks Locomotive Works, of Dunkirk, New York, had several exhibits. One of these was a beautiful locomotive numbered 1302, of the Chicago, Rock Island and Pacific Railroad, called "Chatauqua," a cut and description of which is submitted:

Another of the "Chatauqua" type is engine No. 77, built for the Burlington, Cedar Rapids and Northern Railroad Company. This is also of the type characterized as having the trailing wheel, a cut and description of which are given herewith:

Another beautiful engine, No. 504, was built by the same company for the Chicago and Alton Railroad, especially for passenger service. A cut and description of this locomotive is given herewith:

The locomotive which probably attracted the most attention was

No. 466, also built by Brooks Locomotive Works, for the Central Railroad of New Jersey. It was a twelve wheeled freighter and a monster in size. Every part of the wonderful structure impressed one with the immensity of its power. There is almost as much difference in build and appearance between this engine and the freighters in use fifteen or twenty years ago, as there is between the John Bull and those freight locomotives which were in use but two decades ago.

This seems to be an ideal specimen of the highest type of freight locomotives, adapted, as has been suggested, in every possible way, to give its power and secure the best possible effects for all energies that may be expended in discharging the work for which it has been designed. A cut and description of this locomotive is given herewith:

The consensus of opinion among engineers seems to be now that the highest degree of excellence has been reached in both passenger and freight locomotives, particularly with reference to the power of freight locomotives, for the reason that these machines cannot be built at a greater altitude and to increase their weight would necessitate the strengthening of railroad iron, and indeed all parts of railway structure.

Formidable as have been railroad structures in the last few years, designed for bearing the heaviest burdens, yet many railroads have found it necessary to increase the strength especially of the bridges, and in several instances to replace old bridges with new ones, in order that the increased weight of locomotives and trains might be withstood.

This last described locomotive is so prodigiously large and so incomprehensively heavy that when we consider that it is made to traverse valleys and cross mountains, it seems impossible that it can be surpassed in weight unless there shall be a material strengthening of road structures, bridges, etc.

However, it seems hazardous to make any prophecies as to what the future will bring forth in the way of engines of locomotion, or indeed, with reference to the powers of nature which may be applied in the transportation of commodities or in conducting the commerce of this country.

It is safe, however, to predict, judging from the experiences of the past, wherever development may go, whatever new inventions may be introduced, what increased power locomotives may have, whatever strengthening there may be of structures and roadbeds, the American Civil Engineers will not be left behind those of any other country of the civilized world, and we can rest assured that American railways will still keep in the van of those of any other country.

On the 27th day of June, 1901, a convention of railway employes was held in the city of Harrisburg, under the auspices of the Brother-

hood of Railway Employes, at which the Superintendent of the Bureau of Railways was invited to deliver an address. This address has reference to the relations of railway employes to the common carrier and to the public, and on that account alone it is printed with this report:

ADDRESS OF MAJOR ISAAC BROWNELL BROWN TO THE
BROTHERHOOD OF RAILWAY EMPLOYES AT HARRIS-
BURG, JUNE 27, 1901.

Here are gathered to-day representatives of an important portion of American citizenship. They are also of great importance in the commerce of this nation. Their importance is emphasized in the fact that were they to cease their labors, were they by some great stroke of the Almighty to be wiped out of existence, the wheels of commerce would stand still in every state in this American Union. Here are gathered the representatives of that great army of men that run the railways of this country; the officers, the clerks, the station agents and station men, the engine men, the firemen, the conductors, the machinists, the carpenters, the shop men, the trackmen, the switchmen, the brakemen, the watchmen, and the employes generally, who have charge of the construction, maintenance and operation of railways. You are an important element of American citizenship because of your great numbers. By the money you pay, the result of your earnings, you keep alive thousands and tens of thousands of commercial houses in all lines of business. But your greatest importance to every American citizen rests in the fact that however great may be the capitalization of railroads, however shrewd their management, much depends upon the effort capitalization which is put forth by the railway employes.

A few days ago I stood upon the campus of the great Stanford University at Palo Alto, in the state of California. I observed the magnificent architecture of the University buildings which were constructed as the result of a gift of millions by Governor Stanford in commemoration of the life of his son. Prodigious arches, magnificent buildings statuary representing the finest productions of American art were to be seen on all sides, and the surroundings impressed me with what is said to have occurred a short time before the construction of this educational institution was begun: Mr. Stanford, desiring to

know something of the cost of a university similar to that of Harvard, at Cambridge, Massachusetts, made inquiry as to the expense of reproducing a number of the buildings which beautify the campus of that ancient college. His response was: "Our buildings may be reproduced for \$10,000,000, but the 250 years of experience will come high." So as I looked upon the magnificence of the 9,000 acres upon which the University buildings are set, in California, I thought how meaningless would be these structures without the force of teachers, without the director, without the operators of all kinds to move the university on to the accomplishment of the purposes for which it was designed. And so with the great railways of this country, pre-eminently those of our own State, how meaningless they would be! although the engineer may have successfully surmounted the highest altitudes of the Alleghenies and crossed the deepest valleys and the most turbulent rivers, yet without the brawn and brain and the sinews of the railway engineer, the fireman, the brakeman and all the other classification of employes, the projects would have been an ignominious failure.

I mention this to impress upon you that the American people look upon you not only as important factors in making up American citizenship, but as of the utmost importance in carrying on the commerce of the world. Each of you has an important part to perform. None of you, perhaps, may rise to the position of railway manager or superintendent, but successful railway construction, successful railway maintenance and operation, rest in a greater or less degree upon the fidelity with which you discharge the duties of your position. It must be remembered that Roberts, Thompson and Cassatt, of the Pennsylvania, came from the lower ranks of railway employes. The trackman may see but little of the great railway problem, and yet if he does all he can, all that his position demands, he is doing much. The soldier in the ranks in time of battle has no responsibility beyond that which rests upon an enlisted man, and yet his place is an important one, for his strong right arm, his steady purpose, his devotion to duty, aid in the result of the battle, and his shout emphasizes every victory.

So with the railway man; however menial his services may be, he contributes to the success of railway management, he helps in no small degree to carry out the purposes for which railway corporations are given existence, and upon which so much depends for the financial welfare of the commercial world.

It is said that railways have been the most potent element to advance civilization since the world began, and this is true, but in looking at this we must not stop with admiration for the powerful locomotives; we must not stop with the magnificent, palatial cars in which the passenger is carried from one part of the country to another; we

must not think of the prodigious bridges which enable railways to cross the great rivers; we must not stop with the physical affairs of railways in our expressions of praise, but we must remember the engineer and all other classes of railway employes who have rendered it possible to make the railways this great means of advancing civilization. No where in the history of the world has this advancement of civilization, education and culture, been so pronounced as it has in these United States, and all because, of all the nations of the earth, this nation has the greatest railway mileage and is in the advance line of all those elements of transportation which come nearest the point of perfection in railway construction and operation.

When the great War of the Rebellion had come to a close; when Richardson, the great army correspondent devoted himself to more extended literary work and wrote his book entitled "Beyond the Mississippi," railway construction, while then in advance of any other nation of the earth, was still in its infancy as compared with its magnitude at the present time. Then, the almost limitless territory west of the Mississippi was a national book, but few of whose leaves had been turned. The crossing of this mighty river and the Missouri, moving on with their resistless waters from the mountains to the sea; the surmounting of the Rockies, the Cascades, the Sierra Nevadas and the coast range by the several lines of railways, have made it possible to open every leaf of this great book of our national wealth beyond the Mississippi; have taken away the habiliments of heathenism largely from the Indian; have carried enterprises to every locality from the Mississippi on to the Pacific Ocean, and one may start now from the very uttermost parts of Southern California and travel over the thousands of miles of sea coast, and through this land of fruits and flowers, through Oregon, Washington, Montana, Idaho, Wyoming, Dakota, Nebraska and Iowa, along which are beautiful towns and cities in which are successful enterprises of all kinds, before he reaches the limit from which Richardson predicated his great book "Beyond the Mississippi," and practically all this has been accomplished by the construction of railways and by their operation by that class of people so large represented in this assemblage to-day.

Indeed, before the advent of railway locomotives, the civilization of the world was greatly limited and its extent depended upon the construction of national highways. Four centuries before the birth of our Saviour, the Romans advanced civilization by the construction, on the part of the Roman government, of great highways that led in nearly every direction from Rome as a center. The greatest of these highways was that known in history as the Appian Way, along which were erected monuments to impress the Roman citizens of the power of kings and the glory of the Roman empire. As these public high-

ways advanced civilization, so with the downfall of the Roman Empire, civilization was crippled, its advancement greatly retarded and in many instances diminished, and for centuries throughout the whole world showed no such great strides of advancement as it has during the century that has just been brought to a close.

The citizens of our own State, Pennsylvania, early in its history, learned from the experience of the European and Asiatic nations that transportation was most essential in the advancement of civilization and in the building up of commerce, and commenced the construction of highways. They very early devised and constructed the scheme of canals which gave great impetus to the development of the material interests of this Commonwealth, but they are only a reminiscence now. Through the efforts of capitalists, through the energy displayed by railway engineers and railway employes, this state has now more than 10,000 miles of railway, and along these 10,000 miles of railway are located the greatest interests that can be found anywhere in the commercial world.

One may travel on the Pennsylvania railroad and sitting in the magnificent coaches, crossing the Allegheny mountains, may look out upon the ruins of the old Pennsylvania Canal and old Portage road, over which commodities were carried from the eastern cities to Pittsburgh and the west. Now all these works are settling into decay, but they tell in most eloquent language the story of the enterprise of American citizenship. They also tell of the inventive power, of the brain and of the brawn of those who have been engaged in railway construction and operation by which the great transition has taken place from the slow means of transportation of persons and commodities to that which now exists of almost lightning speed upon the railways of this State.

While railway advancement has been greater in the United States than in any other country of the world, yet the sound of the railway locomotive now reverberates among the Ural mountains and is heard on the frozen plains of Siberia, and this great engine of advancement now enters even the sacred precincts of ancient Jerusalem.

In my official capacity I have wonderful opportunities of studying the operation of railways, and the results they produce in the development of commerce, and no part of this great problem is fraught with more interest than that which relates to those upon whom railway managers of necessity depend for successful operation, the American railway employes.

On the railways whose lines are in whole or in part within the limits of this State, we find the highest advancement in railway construction, and find also the greatest convenience and the best conservation of the interest of the passenger, the consignor and the consignee of commodities.

PA 1901

As I look upon you and think of the great body of men you represent, and of the wonderful amount of capitalization employed, I am impressed with the importance of your relation to those who own the capital stock and the bonds of our common carriers.

Nearly three thousand millions of dollars represent the stocks and bonds of the railroad companies in whose service you are engaged. Without your loyalty in the discharge of your services, there can be no dividends on stock, and the bond holder must rely upon your fidelity for honoring the payment of his coupons when due.

Of all classes of railway employes embraced in the reports to our office, there are more than 300,000 to whom there was paid last year more than \$176,000,000. I do not say that this is a liberal compensation when we consider the hazard of your employment and the fidelity with which your duties are discharged, but I do know that it is a greater daily compensation and a greater yearly compensation than is paid upon the railways of any other nation on the earth, and it ought to be that way, because statistics show the possession of a greater degree of education, a higher order of culture among American railway employes than can be found among the employes of the railways of the foreign governments; and the higher degree of education enables railway employes to render to the railways a greater service, resulting in more profit to the employer than can be rendered by railway employes possessed of a lesser degree of education and refinement.

A few days ago, I was passing down the western slope of the Rocky mountains on the Canadian Pacific. There was presented before me the most magnificent scenery my eyes ever beheld. The descent was rapid, and as the train wound around the sharp curves above canons thousands of feet below and shot through the numerous tunnels of that mountain railway, I could see the engineer and the fireman at their posts of duty, and realized fully how absolutely the lives and limbs of those in the magnificent Pullman cars depended upon the fidelity of those upon the locomotive.

So as I look at you to-day, and realize that upon the railways in whose service you are engaged, there were carried last year over 205,000,000 passengers, I am impressed with the fact that the safety of this prodigiously large number of persons must, of necessity, depend on the care and fidelity displayed by the train men of our railroads. Not alone upon the engineer and fireman, upon whom every boy in the land looks with great admiration, but also upon the men who handle the trains, who build the cars and who engage in the maintenance of ways.

Then, when I realize that more than 600,000,000 tons of freight have been handled by you and those you represent there is greater empha-

sis added to the fact that you are of the utmost importance in the conduct of the commerce of this State, and indeed of these United States. I believe that the nation holds you, the railway employes of America, in high esteem.

The National Congress has for many years attempted to pass legislation looking to greater freedom from accidents among American railway employes. Legislation has been adopted with a view to the invention and application of safety appliances of the most approved plan, and yet, with all this, notwithstanding the legislation which has been introduced in the several states of the Union, I believe to-day that there is a greater hazard to the life and limb of railroad employes than there ought to be. I do not say that anyone is to blame for this, but I do say that every contrivance, every means of protection of life and limb among not only passengers but also employes, should be introduced in the operation of our railways. If there is any one point in which there is a weakness in the American railways as compared with those of foreign governments, at least as shown by statistics, it is in the number of passengers, employed and other persons that are killed and maimed.

On the railways reporting to our office last year there were 795 employes killed, or 1 employ killed to every 347 employed; and among railway employes there were 14,784 injured, or 1 injured to every 18 employed.

These figures admonish the thoughtful that there is a debt of gratitude due to the men who maintain and operate our railways. The service is, of necessity, a hazardous one, and it must be admitted that an obligation rests with the legislative power in each state and with the Congress of the United States to effect such legislation as will secure a material reduction in the hazard of accident which now exists among American railway employes.

I have thought for years that the grade crossing was a most prolific source of railway accidents, and I have recommended to our Legislature the passage of a law that in all future construction, grade crossings should be prohibited, and that some reasonable means should be adopted for the elimination of grade crossings where they now exist.

The old Pennsylvania Railroad seems to be in the advance line of this most needful improvement, for it is not only gradually eliminating the grade crossings of its own lines with other lines of railway, but to a great extent is also eliminating the highway crossings with its own lines.

In the National Convention of Railway Commissioners recently held in San Francisco, this subject was given careful consideration. Several of the States of the Union, including Massachusetts, Con-

 Grate Area—45.25 sq. ft.

PA Internal Affairs 1901

necticut, Rhode Island and New York have effected legislation restricting crossings at grade, and it is believed that railway employes in the organizations that exist, ought to at least make suggestions to railways, if not, indeed, to the Legislatures of the several states of the Union, of some means by which there may be a decrease in the hazard which now exist among railway employes, in the operation of railways.

In closing, I may say that there is no class of American citizenship that is considered of greater importance than American railway employes, for upon them largely rests the safety of life, the preservation of property, and the advancement of the commerce of the nation.

NATIONAL CONVENTION OF RAILWAY COMMISSIONERS.

The National Convention of Railway Commissioners was held in the city of San Francisco, California, in June. It was attended by officials of most of the states of the Union, who exercise public supervision over the affairs of railways.

Many important subjects were considered, such as the classification of freights, the appraisalment of railroad property, both stocks and bonds, the relations between railroad companies as to the right to make pooling contracts, the introduction of safety appliances to give greater freedom from accidents to both passengers and employes, the control of street or electric railways, and many other important subjects which concern the official supervision of common carriers.

An interesting report was made by the Committee on Legislation bearing upon legislation which the United States Congress should pass upon several important subjects relating to interstate commerce.

The Secretary of Internal Affairs of Pennsylvania was Chairman of this Committee, prepared its report and read the same to the National Convention. That report is submitted herewith.

Report of Committee on Legislation.

The indisposition of the last national convention to fully approve the comprehensive measure submitted for its consideration, and the failure of Congress to adopt that or any other measure in modification of it, would indicate that remedial legislation for the better regulation

of interstate traffic was still afar. Meanwhile the railway more effectually than ever is a "law unto itself." It has so largely perfected joint ownership, consolidation, and directorate representation that the two or more persons which the text writers define as essential to the consummation of an agreement have been entirely eliminated from the definition. Except as hindered by the "feeble restraints" imposed by existing supervision, it may prescribe the rate, regulate the haul, and adjust the classification. The most cohesive of all the still growing combinations, freer from competitive puncture than any of the many others, it might be assumed that it is only "up against" the proposition of Federal supervision of it and all others of its class, whenever such intervention may ultimately assert itself.

To seek to supply evidence to confirm these conclusions would be a superfluity. It is too apparent that so far as progressive consolidation is concerned "the incident has closed." The consolidation has had its substantial beginning, and its progress can only be interrupted by a combat between the powers. The "scope and effect" of these operations have been carefully considered by the Interstate Commerce Commission in its fourteenth annual report, and having "informed itself as well as possible from unofficial sources" the commission announces its deductions as follows:

"When we consider what has actually been done, what is undoubtedly in contemplation, the entire feasibility of these schemes, the very great advantage which would result to the owners of the properties involved, the fact that a step once taken in that direction is seldom retraced, it becomes evident that in the immediate future the main transportation lines of this country will be thrown into great groups, controlling their own territory and not subject, with respect to most of their traffic, to serious competition."

These conditions were not unforeseen. They are the outcome of the situation. They have been born of a season of legislative inactivity. Our conventions have more than once sounded the warning. In the able and exhaustive report of the committee on legislation to the eleventh annual convention, quoted also by the same committee in its report to the twelfth annual convention, it was thus forcefully conjectured: "The last results of unrestricted competition and of progressive consolidation must necessarily be the same—monopoly. Promoting or fostering unrestricted competition compels consolidation as a protective measure, but restricting and regulating competition discourages and prevents consolidation."

Judge Knapp, in his instructive paper on "Personal influence in the administration of railway laws," read at the Denver convention, while addressing his thoughts in altogether another channel, indirectly portrays the advantage of system, entirety, and mutual dependence to

ward a hopeful solution of present conditions if the powers that make the laws can only be persuaded to make them appropriately.

"When," says the judge, "the whole subject has thus been carefully examined in the light of reason and experience, there are certain conclusions which seem to me fundamental and for the support of which our influence should be exerted. In the first place, it is seen that all measures of legislation are designed to the one inclusive end of securing at all times and to all persons just and equitable charges for public transportation. To attain this result and realize its advantages, the railroads of the country should be regarded in their entirety and treated, so far as possible, as a single system for all the purposes of legal regulation. Practically there is no such thing as an independent or isolated railway. There are many members, yet but one body. Between the different parts of this complex organization there is such relationship and mutual dependence that whatever affects one must in greater or less degree affect the others also and the public interest as well. Whatever, therefore, tends to harmonize action between different lines, whether connected or competing, whatever operates to bring railway service into more uniform and systematic operation, should be promoted and encouraged by suitable enactments and appropriate administration."

The abundance of railroad literature, the volume of official utterance, the wide scope of judicial deliverance, has lost none of its practical value. Its logic is convincing, its diction attractive. Intended for the better direction of the business thought of the country, the more equable adjustment of differences between shipper and carrier, it is with but little modification still available for the new conditions presented by progressive consolidation. It is neither the time to give pause nor to divert the general direction of previous efforts. The agreement and the pool have most offended. Absorbed in the consolidation, when the combination is perfected, they might be treated as eliminated from the proposition, but the rate, the haul, the classification, still survive. The situation is best summarized in one of the opening paragraphs of the report of the Interstate Commerce Commission for the past year. "Knowledge," says the report, "of present conditions and tendencies increases rather than lessens the necessity for legislative action upon the lines already indicated and in such other direction as will furnish an adequate and workable statute for the regulation of commerce 'among the several States.'"

And again in the same report the commission continues: "It is idle to say that freight rates can not be advanced. During the past year they have been, by concerted action upon a vast volume of traffic, advanced in every part of this country. It is equally idle to say that they will not be advanced. It is both human nature and the lesson

of history that unlimited power induces misuse of that power. Railways are not combining for the purpose of 'extortion and abuse,' but none the less should the people provide some protection against that possible result of the combination."

The consensus of opinion and the weight of authority clearly indicate that the new conditions do not avoid the need of protective legislation, but rather do they the more imperatively demand it. It will scarcely be maintained that the country—for the railway problem includes the country—must await the slow growth of legislation that may eventually be invoked for the regulation and superintendence of business combinations generally. Nor can it be otherwise than admitted that with competition, "the only check upon the rate removed," with nothing "to keep down the price of carriage" except the "force of popular opinion" and "the feeble restraints of the present law," that efforts should be renewed and energy strengthened toward the speedy enactment of appropriate protective railway legislation.

To perform a public service and discharge a private trust impose duties apparently of divergent purpose. No man can serve two masters. He must not be permitted to tarry too long in his opportunity to do violence to this long-accepted axiom of apostolic ethics. The longer one is relieved from the restraints of discipline, the less willing he is to submit to their imposition. To levy your own assessments, collect your own tax, is a precious privilege. The gatekeeper on the turnpike gathered his tolls in sums permitted by the terms of the charter. There was no free travel except for the dead man, his escort, and the churchgoer. The miller tolled his grist in quantities fixed by immemorial usage. The earlier railroad charters and the general railroad laws of the older states prescribed maximum rates, reduced sometimes when concessions accompanied the franchise. The volume of traffic was steady. Its slight increase demanded neither better facilities nor justified lower prices. The only precedent that the early railway projectors had to determine a rate was the cost of the old canal or wagon haul. By these primitive methods of carriage it required the same amount of money to carry the same quantity of goods 15 miles as it does now to carry the same quantity of goods from the middle of the continent either way to the ocean. A rigid rule, therefore, might be safely made operative. The present need of a flexible one is too apparent for discussion.

In its annual report for the year 1900 the Interstate Commerce Commission states, with reference to legislation, it "has little to suggest and nothing new to propose." Why seek for new propositions if those already suggested were wise propositions? When was there a more comprehensive measure of recent consideration, more comprehensive than the act that created the commission itself, as it came

afterwards to be judicially interpreted, than the bill that happened to become popularly known as the Cullom bill? It was the product of careful study and intelligent conference of the best business thought of the country. It comes as near the "workable statute" as any yet framed. While it appears to be a voluminous production, it is only made so that it may suitably provide for the ultimate judicial determination and consideration of such questions as it has so often been decided must ultimately find their conclusions only in the Federal courts. Its salient features were its long and short haul clause, its rate-posting provisions, and, above all, the authority it vested in the commission to establish a "national freight classification" and to fix, where its judgments need to be so perfected, maximum, minimum, or differential charges. It only inferentially permitted traffic agreements, providing, as in did, where such contracts, agreements, or arrangements existed, that copies should be filed with the commission. In view of the changed condition it would probably be the part of wisdom, for the present at least, not to suggest a more forceful enlargement.

This question of protective railway legislation was so ably treated in the report of the committee on legislation to the last annual convention that there should be no answer to the logic of that treatment save to deny the need of any legislation at all. That has never been the province of our conventions, and never will be until the need has disappeared in the accomplishment of the purpose sought. Affirmative discussion having been so forcefully conducted in the past, it is unnecessary to prolong it.

The question must find its way to the floor of Congress. There it has never yet been disposed of. Ultimately it will be, one way or the other. The relief measure last proposed, or the better understood so-styled Cullom bill, was never considered outside of committee. Though adversely reported, it received subsequently more favorable consideration when it was allotted a place on the calendar. There it rested, failing, as did a vast deal of other important legislation, with the close of the recent Congress.

Your committee would recommend that this bill or some measure akin to it be suggested to the Fifty-seventh Congress and in that connection beg leave to submit the following resolution:

Resolved, That the Congress be earnestly urged to the prompt enactment of appropriate and essential legislation to forbid the charge or receipt of unreasonable or greater compensation for the transportation of passengers or property over a shorter than a longer haul; to provide for the proper and more satisfactory posting and publication of tariffs showing the rates, fares, terminal charges, and joint rates charged for interstate transportation, as well within our

borders as beyond them, and to more fully and specifically declare against unjust discrimination, rebates, and other devices that would avoid the published rates and schedules, and to penalize such offenses; to clothe the Inter-State Commerce Commission with power and authority to establish a national freight classification and permit it to alter and amend it when required, and to fix also maximum, minimum, and differential charges when its judgments need to be so perfected.

Resolved, That while urging action on the several subjects upon which protective legislation appears to be most required, the convention would particularly direct attention to the methods of enforcement, arrangement, expression, and incidentals substantially and fully prescribed and set out specifically and in detail in the measure submitted to the Senate at the first session of the Fifty-sixth Congress, known to and accepted by the public as the Cullom bill.

Resolved, That copies of this report and resolution be transmitted to the President of the Senate and the Speaker of the House of Representatives.

COMPLAINT.

A complaint was made against the Dunning's Creek Branch of the Bedford Division of the Pennsylvania Railroad by A. C. Blackburn and Company, wholesale grocers at Fishertown, Pennsylvania.

The complaint was first made to the Interstate Commerce Commission and the chairman of that Commission wrote to Messrs. Blackburn and Company as follows:

“Washington, May 25, 1901.

“Messrs. A. C. Blackburn & Co., Fishertown, Pa.:

“Gentlemen: The engagements of the Commission here and elsewhere have prevented earlier reply to your letter of the 10th instant.

“Upon due consideration, the Commission is satisfied that it has no jurisdiction to require additional train service on the branch road serving your town. We have, however, called the attention of the Pennsylvania Railroad management to your complaint, which appears to be all we can do in the premises. It may be that the Department of Internal Affairs of your State has authority to grant you some relief, and you might make application to Hon. Isaac B. Brown, Superintendent, Bureau of Railways, Harrisburg, Pa.

“Yours very truly,

“MARTIN A. KNAPP,
“Chairman.”

This was inclosed to this office with a communication from Messrs. A. C. Blackburn and Company, of which the following is a copy:

"Fishertown, Pa., May 29, 1901.

"Hon. Isaac B. Brown, Superintendent, Bureau of Railways, Harrisburg, Pa.:

"Dear Sir: The Chairman Inter-state Commerce Commission, Washington, D. C., upon due consideration of complaint which we made versus Pennsylvania Railroad, kindly refers us to carry same before you. Our complaint is as follows: We are situated at Cessna, Pa., conducting a wholesale grocery business of near \$100,000 yearly, and we find we can no longer meet competition without regular daily train service. Cessna being on a branch road from Bedford, Pa., they have in the past been giving us but three trains weekly or train every other day, and no passenger service at all, through which the community at large, which they should endeavor to serve, is neglected. Our freight alone last month amounted to \$226, which is only a small portion of the receipts of this station. Kindly inform us whether it is possible, under your Department, to compel the railroad to give some relief in accordance with the requirements of the charter under which they are operating. Would you allow us to present you with a petition of 1,000 voters, which will show the need of better freight and also passenger service from Bedford to this point?

"Yours very truly,

"A. C. Blackburn & Co."

Soon after the receipt of this letter, which came during the absence of the Superintendent, a letter was addressed to Messrs. Blackburn and Company, of which the following is a copy:

"Harrisburg, Pa., June 24, 1901.

"Messrs. A. C. Blackburn & Co., Fishertown, Pa.:

"Gentlemen: I beg to acknowledge receipt of your letter of the 29th ultimo which came during my absence in California, and to say in reply that if you have the petition referred to you can file it in this office. I will take no action until I hear from you on this subject. In the meantime you might also state what railroad it is of whose service you complain.

"I do not ask that you furnish the petition referred to, but if you have it prepared, it would be well to file it.

"Very truly yours,

"ISAAC B. BROWN,

"Superintendent."

To this Messrs. Blackburn and Company further replied by the following letter:

"Fishertown, Pa., June 25, 1901.

"Mr. Isaac B. Brown, Superintendent, Harrisburg, Pa.:

"Our Dear Sir: Referring to your favor under date of the 24th inst., beg to state that we have not yet proceeded with general petition referred to, but surely desire to bring the matter up in proper shape and if you suggest that this would be of any benefit in showing the great necessity, we will do so at once, as the public desires to have a passenger as well as better freight service at Cessna. We have our warehouses there and cannot meet the competition with only ten to twelve trains monthly and no passenger service at all. The tonnage at this point is almost as heavy if not heavier than at the best stations along the Bedford Division of the Pennsylvania Railroad, of which this is a part. We are surely glad to receive a recognition in this matter and hope to

show you that we deserve what we are asking for. Hoping to hear from you soon, we are,

"Most heartily,

"A. C. Blackburn & Co."

On the 9th day of July following, a communication was addressed to the President of the Pennsylvania Railroad Company, of which the following is a copy:

"Harrisburg, Pa., July 9, 1901.

"Mr. A. J. Cassatt, President Pennsylvania Railroad Company, Philadelphia, Penna.:

"My Dear Sir: A complaint has been filed in this office by A. C. Blackburn & Co., of Fishertown, Pa., with reference to the public service of your company. Among other things it is alleged that the firm, located at Cessna, Pa., conducting a wholesale grocery business, is greatly crippled in the transaction of its business on account of there being no regular daily train service. That Cessna, being on a branch road from Bedford, has only a train service of three trains per week, or a train every other day, and that no passenger service whatever is furnished. That on account of this failure to conserve the public interests both for transportation of commodities and passengers, there is a failure to perform the duties of a common carrier as required by law.

"The complainants assert that they are large shippers and paid upwards of \$200 last month for freight. I would be glad to know if there is any way by which the shippers and passengers along the line of this branch road can be better served without injury to your company. Please give this matter early attention.

"Very truly yours,

"ISAAC B. BROWN,

"Superintendent."

To this letter Mr. A. J. Cassatt, President of the Pennsylvania Railroad Company, replied as follows:

"Philadelphia, July 10, 1901.

"Mr. Isaac B. Brown, Superintendent, Bureau of Railways, Harrisburg, Pa.:

"Dear Sir: I beg to acknowledge receipt of your favor of the 9th instant, and to advise you that the same has been referred to Mr. S. M. Prevost, third vice president, for investigation and reply.

"Yours truly,

"A. J. CASSATT,

"President."

On the 6th day of August, 1901, a letter was received from Messrs. Blackburn & Co., of which the following is a copy:

"Fishertown, Pa.

"Mr. Isaac B. Brown, Harrisburg, Pa.:

"Our Dear Sir: Again referring to the poor service by the Pennsylvania Railroad on Cessna branch, beg to ask if there is any information that we can give or get for you, as it is a matter of such vital importance to us that nothing will be considered too arduous for us to do for you in the matter. We find that there have been nearly 200 (or a little over) solid car loads at Cessna, Pa., in the last six months, not including the local goods which would likely be

much more in tonnage, as last night two car loads of local came to this station. We learned last night that the Pennsylvania Railroad people are trying to represent the income by calculating the branch in miles (8). For instance, a package of freight from Philadelphia would be thirty-eight cents (277 miles). Cessna branch would get nearly two cents as the miles stand. This representation would be their side of the case, but not in a proper light, as these branches should be called feeders and give the patrons some advantages.

"Kindly advise what action has been taken.

"Yours very truly,

"A. C. Blackburn & Co."

On the 6th day of August, an inquiry having been received from Messrs. Blackburn and Company, as above quoted, a communication was addressed to Vice President Prevost, of the Pennsylvania Railroad as follows:

"Harrisburg, August 6, 1901.

"Mr. S. M. Prevost, Third Vice President, Pennsylvania Railroad Company, Philadelphia, Pa.:

"Dear Sir: I beg to ask what action, if any has been taken in regard to the complaint of A. C. Blackburn & Co., as to the inefficiency of the public service rendered by the Pennsylvania Railroad on the Cessna Branch. I have a communication from Blackburn & Co. this morning, and as I have heard nothing from the former letter referred to you by President Cassatt, I beg to ask that you give the matter as early attention as possible.

"Very truly yours,

"ISAAC B. BROWN,

"Superintendent.

A further letter was received from Messrs. Blackburn and Company, of which the following is a copy:

"Fishertown, Pa., September 7, 1901.

"Mr. Isaac B. Brown, Harrisburg, Pa.:

"Our Dear Sir: Again referring to our conversation relative to improper service of the Pennsylvania Railroad, beg to inquire whether you can give us any information leading to the decision of the officials whom you addressed. We feel that it is impossible to further operate under the condition as it exists.

"Hoping to hear from you soon and thanking you for your courteous treatment when we visited you, we are,

"Most truly yours,

"A. C. Blackburn & Co."

On the 9th of September, 1901, the following letter was received from the General Assistant of the Pennsylvania Railroad Company:

"Philadelphia, September 5, 1901.

"Mr. Isaac B. Brown, Superintendent, Bureau of Railways, Department of Internal Affairs, Harrisburg, Pa.:

"Dear Sir: Referring to your favor of July 9, to Mr. A. J. Cassatt, President, and to your subsequent inquiry of August 6, addressed to Mr. S. M. Prevost, third vice president, I beg to advise you that the subject therein referred to of

additional train service on the Dunning's branch of the Bedford Division is one that has received careful consideration at the hands of our operating officers, and it has now been arranged to provide a regular passenger and freight service to be run tri-weekly over the road between Bedford and Cessna, and a time table will be issued, taking effect Tuesday, September 10, showing the time of this train at the various stations on the road. This will furnish all the facilities the situation will warrant.

"I hope, with the establishment of this regular schedule, that there may be no further cause for complaint on the part of shippers or passengers on this line.

"I am,

"Yours very truly,

"W. A. PATTON,

"Assistant to the President."

On the 9th of September, 1901, a communication was addressed to Messrs Blackburn and Company, as follows:

"Harrisburg, Pa., September 9, 1901.

"Messrs. A. C. Blackburn & Co., Fishertown, Pa.:

"Gentlemen: I acknowledge receipt of your letter of the 7th instant, and in reply beg to say that I have information from the Pennsylvania Road in relation to your complaint for defective service, as follows:

"I beg to advise you that the subject therein referred to of additional train service on the Dunning's Creek branch of the Bedford Division is one that has received careful consideration at the hands of our operating officers, and it has now been arranged to provide for a regular passenger and freight service to run tri-weekly over the road between Bedford and Cessna, and a time table will be issued, taking effect Tuesday, September 10, showing the time of these trains at the various stations on the road. This will furnish all the facilities the situation will warrant. I hope with the establishment of this regular schedule, that there may be no further complaint on the part of the shippers and passengers on this line.'"

"Very truly yours,

"ISAAC B. BROWN,

"Superintendent."

This correspondence exhibits practically all the action taken by this office in relation to the complaint filed against the above named company. The spirit which characterized the railroad company in furnishing service to accommodate shippers along the line of its road, is a commendable one, and it is probable that the change has been satisfactory, as no further complaint has been made by Messrs. Blackburn and Company or other persons along the line of said road.

The following-named companies, required by law to make report to this office for the year ending June 30, 1901, as provided for in the Constitution and the act of 1897, having failed to make such reports, the penalty provided by law has been imposed and they have been certified to the Attorney General for its collection:

The Carnegie and Rosslyn Park Street Railway Company.

The Chestnut Ridge Railroad of Pennsylvania.

The Monterey and Streets Run Connecting Railroad Company.

The Newtown and Delaware River Traction Company.

The Northwestern Street Railway Company.

The Philadelphia and Bristol Passenger Railway Company.

STEAM RAILROADS NOT IN OPERATION.

Westmoreland Traction Company.
Willmerding, Pitcairn and Stewart Street Railway Company.
York Traction Company.

TELEPHONE AND TELEGRAPH.

Anthracite Telephone.
Carbondale Telephone.
Clamond Telephone.
Penn Telephone.

The name of the American Telephone Company was stricken from the list, as the company is not such a company as the law contemplates shall make annual report to this Bureau.

The following named corporations have been stricken from the list for the reason that there has been a practical merger of these corporations with others. They do not own, control or operate lines of railway, telegraph or telephone in this Commonwealth. They have no receipts or expenditures, and reports received from them are of no value.

STREET.

Allentown and Lehigh Valley Traction Company.
Allentown and Reading Electric Railway Company.
Beaver and Vanport Electric Railway Company.
Carnegie, Heidelberg and Bridgeville Street Railway Company.
College and Grand View Electric Street Railway Company.
Conneaut and Erie Railway Company.
Crafton and Chartiers Valley Traction Company.
McKees Rocks and Ingram Street Railway Company.
McKees Rocks and Neville Island Street Railway Company.
People's Electric Street Railway (Beaver Falls).
Pittsburg, Banksville and Mt. Lebanon Street Railway Company.
Pittsburg and Hill Top Street Railway Company.
Pittsburg, Hill Top and Castle Shannon Street Railway Company.
Rochester and Monaca Street Railway Company.
Tustin Street Railway Company.
Virginia Avenue Street Railway Company.
West End Traction Company.
West Liberty Street Railway Company.

CONCLUSION.

In concluding the report for the year ending June 30, 1901, especial attention is called to the embellishments which accompany this report exhibiting some of the leading railway stations of the Commonwealth, particularly those which have recently been constructed, or are now in process of construction, as in the case of the new Pennsylvania railroad station in the city of Pittsburg.

The stations of the Philadelphia and Reading and of the Pennsylvania at Philadelphia, are certainly the two finest structures used for railway depots anywhere in the world. They are supplied with every convenience, every comfort, every facility which passengers and shippers need to transact any business they may have with these great common carriers.

The addition to this list of magnificent depots is that of the Pennsylvania Railroad at Pittsburg, which can be readily classed as one of the finest that was ever built, and which will be greatly appreciated by the people of Pittsburg and travelers generally, whose convenience and comfort it will conserve.

Especial attention is also directed to the tables in the back part of this report which at once present to the reader, in comprehensive form, all the important features relating to capitalization, operation, income, expenditures and dividends of the steam and street railways and the telephone and telegraph companies.

Transportation by canal is practically now a thing of the past, and there is scarcely enough of this slow means of transportation to be mentioned in a public report. Low rates of transportation and the increased rapidity in the delivery of goods by railroad as compared with the possibility of rapid transit on canals, have eclipsed the old system of transportation. The great line of public works, so ably described by the Honorable Theodore B. Klein, in the report for the year ending June 30, 1900, is rapidly disappearing.

In submitting this report, I desire to acknowledge the valuable services which have been rendered by Mr. W. W. Morgaridge and Mr. W. A. Neale in its compilation and the preparation of what must be considered interesting data.

Respectfully submitted,

ISAAC B. BROWN,
Superintendent Bureau of Railways.

Total,	<u>\$1,413,433,325</u>	<u>\$1,380,747,413</u>	<u>\$292,509,467</u>	<u>\$3,086,690,205</u>

*This road is owned and operated by the Oliver interests and the stock issue is under consideration.

a This amount includes "cost of equipment."

b This company is operated by the Lehigh Coal and Navigation Company, which is claimed not to be a common carrier, but according to the report of the Lehigh and Susquehanna Company, all revenues are received by the said Lehigh Coal and Navigation Company.

The report of this company shows that it has no capital stock, bonded or floating indebtedness, therefore, the amount of cost of road and equipment is inserted as representing its capital stock, "authorized and outstanding."
